## PREFACE.

THE first idea of this History was conceived many years ago, at a time when ancient Hellas was known to the English public chiefly through the pages of Mitford; and my purpose in writing it was to rectify the erroneous statements as to matter of fact which that history contained, as well as to present the general phenomena of the Grecian world under what I thought a juster and more comprehensive point of view. My leisure however was not at that time equal to the execution of any large literary undertaking; nor is it until within the last three or four years that I have been able to devote to the work that continuous and exclusive labour, without which, though much may be done to illustrate detached points, no entire or complicated subject can ever be set forth in a manner worthy to meet the public eye.

Meanwhile the state of the English literary world, in reference to ancient Hellas, has been materially

changed in more ways than one. If my early friend Dr. Thirlwall's *History of Greece* had appeared a few years sooner, I should probably never have conceived the design of the present work at all; I should certainly not have been prompted to the task by any deficiencies, such as those which I felt and regretted in Mitford. The comparison of the two authors affords indeed a striking proof of the progress of sound and enlarged views respecting the ancient world during the present generation. Having studied of course the same evidences as Dr. Thirlwall, I am better enabled than others to bear testimony to the learning, the sagacity and the candour which pervade his excellent work; and it is the more incumbent on me to give expression to this sentiment, since the particular points on which I shall have occasion to advert to it will unavoidably be points of dissent oftener than of coincidence.

The liberal spirit of criticism, in which Dr. Thirlwall stands so much distinguished from Mitford, is his own: there are other features of superiority which belong to him conjointly with his age. For during the generation since Mitford's work, philological studies have been prosecuted in Germany with remarkable success: the stock of facts and documents, comparatively scanty, handed down from the ancient world, has been combined, and illustrated in a thousand different ways: and if our

witnesses cannot be multiplied, we at least have numerous interpreters to catch, repeat, amplify and explain their broken and half-inaudible depositions. Some of the best writers in this department—Boeckh, Niebuhr, O. Müller—have been translated into our language; so that the English public has been enabled to form some idea of the new lights thrown upon many subjects of antiquity by the inestimable aid of German erudition. The poets, historians, orators and philosophers of Greece, have thus been all rendered both more intelligible and more instructive than they were to a student in the last century; and the general picture of the Grecian world may now be conceived with a degree of fidelity, which, considering our imperfect materials, it is curious to contemplate.

It is that general picture which an historian of Greece is required first to embody in his own mind, and next to lay out before his readers;—a picture not merely such as to delight the imagination by brilliancy of colouring and depth of sentiment, but also suggestive and improving to the reason. Not omitting the points of resemblance as well as of contrast with the better-known forms of modern society, he will especially study to exhibit the spontaneous movement of Grecian intellect, sometimes aided but never borrowed from without, and lighting up a small portion of a world otherwise clouded and stationary. He will develop the action of that

social system, which, while ensuring to the mass of freemen a degree of protection elsewhere unknown, acted as a stimulus to the creative impulses of genius, and left the superior minds sufficiently unshackled to soar above religious and political routine, to overshoot their own age, and to become the teachers of posterity.

To set forth the history of a people by whom the first spark was set to the dormant intellectual capacities of our nature—Hellenic phenomena as illustrative of the Hellenic mind and character—is the task which I propose to myself in the present work ; not without a painful consciousness how much the deed falls short of the will, and a yet more painful conviction, that full success is rendered impossible by an obstacle which no human ability can now remedy—the insufficiency of original evidence. For in spite of the valuable expositions of so many able commentators, our stock of information respecting the ancient world still remains lamentably inadequate to the demands of an enlightened curiosity. We possess only what has drifted ashore from the wreck of a stranded vessel ; and though this includes some of the most precious articles amongst its once-abundant cargo, yet if any man will cast his eyes over the citations in *Dio-genes Laërtius*, *Athemæus* or *Plutarch*, or the list of names in *Vossius de Historicis Græcis*, he will see with grief and surprise how much larger is the

proportion which, through the enslavement of the Greeks themselves, the decline of the Roman Empire, the change of religion, and the irruption of barbarian conquerors, has been irrecoverably submerged. We are thus reduced to judge of the whole Hellenic world, eminently multiform as it was, from a few compositions; excellent indeed in themselves, but bearing too exclusively the stamp of Athens. Of Thucydides and Aristotle indeed, both as inquirers into matter of fact and as free from narrow local feeling, it is impossible to speak too highly; but unfortunately that work of the latter which would have given us the most copious information regarding Grecian political life—his collection and comparison of 150 distinct town-constitutions—has not been preserved: and the brevity of Thucydides often gives us but a single word where a sentence would not have been too much, and sentences which we should be glad to see expanded into paragraphs.

Such insufficiency of original and trustworthy materials, as compared with those resources which are thought hardly sufficient for the historian of any modern kingdom, is neither to be concealed nor extenuated, however much we may lament it. I advert to the point here on more grounds than one. For it not only limits the amount of information which an historian of Greece can give to his readers—compelling him to leave much of his pic-

ture an absolute blank,—but it also greatly spoils the execution of the remainder. The question of credibility is perpetually obtruding itself, and requiring a decision, which, whether favourable or unfavourable, always introduces more or less of controversy; and gives to those outlines, which the interest of the picture requires to be straight and vigorous, a faint and faltering character. Expressions of qualified and hesitating affirmation are repeated until the reader is sickened; while the writer himself, to whom this restraint is more painful still, is frequently tempted to break loose from the unseen spell by which a conscientious criticism binds him down—to screw up the possible and probable into certainty, to suppress counterbalancing considerations, and to substitute a pleasing romance in place of half-known and perplexing realities. Desiring in the present work to set forth all which can be ascertained, together with such conjectures and inferences as can be reasonably deduced from it, but nothing more—I notice at the outset that faulty state of the original evidence which renders discussions of credibility, and hesitation in the language of the judge, unavoidable. Such discussions, though the reader may be assured that they will become less frequent as we advance into times better known, are tiresome enough even with the comparatively late period which I adopt as the historical beginning; much more intolerable would

they have proved had I thought it my duty to start from the primitive terminus of Deukalion or Inachus, or from the unburied Pelasgi and Leleges, and to subject the heroic ages to a similar scrutiny. I really know nothing so disheartening or unrequited as the elaborate balancing of what is called evidence—the comparison of infinitesimal probabilities and conjectures all uncertified—in regard to these shadowy times and persons.

The law respecting sufficiency of evidence ought to be the same for ancient times as for modern; and the reader will find in this history an application to the former, of criteria analogous to those which have been long recognised in the latter. Approaching, though with a certain measure of indulgence, to this standard, I begin the real history of Greece with the first recorded Olympiad, or 776 B.C. To such as are accustomed to the habits once universal, and still not uncommon, in investigating the ancient world, I may appear to be striking off one thousand years from the scroll of history; but to those whose canon of evidence is derived from Mr. Hallam, M. Siamonli, or any other eminent historian of modern events, I am well-assured that I shall appear lax and credulous rather than exigent or sceptical. For the truth is, that historical records, properly so called, do not begin until long after this date; nor will any man, who candidly considers the extreme paucity of attested facts for

two centuries after 776 B.C., be astonished to learn that the state of Greece in 900, 1000, 1100, 1200, 1300, 1400 B.C., &c.—or any earlier century which it may please chronologists to include in their computed genealogies—cannot be described to him upon anything like decent evidence. I shall hope, when I come to the lives of Socrates and Plato, to illustrate one of the most valuable of their principles—that conscious and confessed ignorance is a better state of mind, than the fancy, without the reality, of knowledge. Meanwhile I begin by making that confession, in reference to the real world of Greece anterior to the Olympiads; meaning the disclaimer to apply to anything like a general history,—not to exclude rigorously every individual event.

The times which I thus set apart from the region of history are discernible only through a different atmosphere—that of epic poetry and legend. To confound together these disparate matters is, in my judgement, essentially unphilosophical. I describe the earlier times by themselves, as conceived by the faith and feeling of the first Greeks, and known only through their legends—without presuming to measure how much or how little of historical matter these legends may contain. If the reader blame me for not assisting him to determine this—if he ask me why I do not undraw the curtain and disclose the picture—I reply in the words of the painter Zeuxis, when the same question was

addressed to him on exhibiting his master-piece of imitative art—"The curtain is the picture." What we now read as poetry and legend was once accredited history, and the only genuine history which the first Greeks could conceive or relish of their past time: the curtain conceals nothing behind, and cannot by any ingenuity be withdrawn. I undertake only to show it as it stands—not to efface, still less to re-paint it.

Three-fourths of the two volumes now presented to the public are destined to elucidate this age of historical faith, as distinguished from the later age of historical reason: to exhibit its basis in the human mind—an omnipresent religious and personal interpretation of nature; to illustrate it by comparison with the like mental habit in early modern Europe; to show its immense abundance and variety of narrative matter, with little care for consistency between one story and another; lastly, to set forth the causes which overgrew and partially supplanted the old epical sentiment, and introduced, in the room of literal faith, a variety of compromises and interpretations.

The legendary age of the Greeks receives its principal charm and dignity from the Homeric poems: to these, therefore, and to the other poems included in the ancient epic, an entire chapter is devoted, the length of which must be justified by the names of the Iliad and Odyssey. I have thought

it my duty to take some notice of the Wolfian controversy as it now stands in Germany, and have even hazarded some speculations respecting the structure of the *Iliad*. The society and manners of the heroic age, considered as known in a general way from Homer's descriptions and allusions, are also described and criticised.

I next pass to the historical age, beginning at 776 a.c.; prefixing some remarks upon the geographical features of Greece. I try to make out, amidst obscure and scanty indications, what the state of Greece was at this period; and I indulge some cautious conjectures, founded upon the earliest verifiable facts, respecting the steps immediately antecedent by which that condition was brought about. In the present volumes I have only been able to include the history of Sparta and the Peloponnesian Dorians, down to the age of Peisistratus and Croesus. I had hoped to have comprised in them the entire history of Greece down to this last-mentioned period, but I find the space insufficient.

The history of Greece falls most naturally into six compartments, of which the first may be looked at as a period of preparation for the five following, which exhaust the free life of collective Hellas.

I. Period from 776 a.c. to 560 b.c., the accession of Peisistratus at Athens and of Croesus in Lydia.

II. From the accession of Peisistratus and Cæsus to the repulse of Xerxes from Greece.

III. From the repulse of Xerxes to the close of the Peloponnesian war and overthrow of Athens.

IV. From the close of the Peloponnesian war to the battle of Leuktra.

V. From the battle of Leuktra to that of Chæroneia.

VI. From the battle of Chæroneia to the end of the generation of Alexander.

The five periods from Peisistratus down to the death of Alexander and of his generation, present the acts of an historical drama capable of being recounted in perspicuous succession, and connected by a sensible thread of unity. I shall interweave in their proper places the important but outlying adventures of the Sicilian and Italian Greeks—introducing such occasional notices of Grecian political constitutions, philosophy, poetry and oratory, as are requisite to exhibit the many-sided activity of this people during their short but brilliant career.

After the generation of Alexander, the political action of Greece becomes cramped and degraded—no longer interesting to the reader, or operative on the destinies of the future world. We may indeed name one or two incidents, especially the revolutions of Agis and Kleomenès at Sparta, which are both instructive and affecting; but as a whole, the

period, between 300 B.C. and the absorption of Greece by the Romans, is of no interest in itself, and is only so far of value as it helps us to understand the preceding centuries. The dignity and value of the Greeks from that time forward belong to them only as individual philosophers, preceptors, astronomers and mathematicians, literary men and critics, medical practitioners, &c. In all these respective capacities, especially in the great schools of philosophical speculation, they still constitute the light of the Roman world; though as communities, they have lost their own orbit, and have become satellites of more powerful neighbours.

I propose to bring down the history of the Grecian communities to the year 300 B.C., or the close of the generation which takes its name from Alexander the Great, and I hope to accomplish this in eight volumes altogether. For the next two or three volumes I have already large preparations made, and I shall publish my third (perhaps my fourth) in the course of the ensuing winter.

There are great disadvantages in the publication of one portion of a history apart from the remainder; for neither the earlier nor the later phenomena can be fully comprehended without the light which each mutually casts upon the other. But the practice has become habitual, and is indeed more than justified by the well-known inadmissibility of "long hopes" into the short span of human life. Yet I can-

not but fear that my first two volumes will suffer in the estimation of many readers by coming out alone—and that men who value the Greeks for their philosophy, their politics, and their oratory, may treat the early legends as not worth attention. And it must be confessed that the sentimental attributes of the Greek mind—its religious and poetical vein—here appear in disproportionate relief, as compared with its more vigorous and masculine capacities—with those powers of acting, organising, judging, and speculating, which will be revealed in the forthcoming volumes. I venture however to forewarn the reader that there will occur numerous circumstances in the after political life of the Greeks which he will not comprehend unless he be initiated into the course of their legendary associations. He will not understand the frantic terror of the Athenian public during the Peloponnesian war, on the occasion of the mutilation of the statues called *Hermae*, unless he enters into the way in which they connected their stability and security with the domiciliation of the gods in the soil: nor will he adequately appreciate the habit of the Spartan king on military expeditions,—when he offered his daily public sacrifices on behalf of his army and his country,—“always to perform this morning service immediately before sunrise, in order that he might be beforehand in obtaining the favour of the

gods<sup>1</sup>," if he be not familiar with the Homeric conception of Zeus going to rest at night and awaking to rise at early dawn from the side of the "white-armed Hērē." The occasion will indeed often occur for remarking how these legends illustrate and vivify the political phenomena of the succeeding times, and I have only now to urge the necessity of considering them as the beginning of a series,—not as an entire work.

<sup>1</sup> Xenophon, *Hoplite*. Lacédæmon, cap. xiii. 3. 'Αὐτὸ δὲ, ὅταν θύῃται, ἀρχεται καὶ ταύτῃ τοῖς ἔργοις εἶναι ἀνεφύστα, παραλαμβάνειτο βαλύνεται τῇσ' τοῦ βίου εὐνομίᾳ.

## PREFACE TO THE SECOND EDITION OF VOLUMES I. AND II.

---

IN preparing a Second Edition of the two First Volumes of my History, I have profited by the remarks and corrections of various critics, contained in Reviews both English and Foreign. I have suppressed, or rectified, some positions which had been pointed out as erroneous, or as advanced upon inadequate evidence. I have strengthened my argument in some cases where it appeared to have been imperfectly understood—adding some new notes, partly for the purpose of enlarged illustration, partly to defend certain opinions which had been called in question. The greater number of these alterations have been made in Chapters XVI. and XXI. of Part I.—and in Chapter VI. of Part II.

I trust that these three Chapters, more full of speculation, and therefore more open to criticism than any of the others, will thus appear in a more complete and satisfactory form. But I must at the same time add that they remain for the most part

unchanged in substance, and that I have seen no sufficient reason to modify my main conclusions even respecting the structure of the *Iliad*, controverted though they have been by some of my most esteemed critics.

In regard to the character and peculiarity of Grecian legend, as broadly distinguished throughout these volumes from Grecian history, I desire to notice two valuable publications with which I have only become acquainted since the date of my first edition. One of these is, a short *Essay on Primæval History*, by John Kenrick, M.A. (London 1846, published just at the same time as these volumes), which illustrates with much acute reflection the general features of legend, not only in Greece but throughout the ancient world—see especially pages 65, 84, 92, *et seq.* The other work is, *Rambles and Recollections of an Indian Official*, by Colonel Sleeman—first made known to me through an excellent notice of my *History* in the *Edinburgh Review* for October 1846. The description given by Colonel Sleeman, of the state of mind now actually prevalent among the native population of Hindostan, presents a vivid comparison, helping the modern reader to understand and appreciate the legendary æra of Greece. I have embodied in the notes of this Second Edition two or three passages from Colonel Sleeman's instructive work: but the whole of it richly deserves perusal.

Having now finished six volumes of this History, without attaining a lower point than the peace of Nikias in the tenth year of the Peloponnesian war—I find myself compelled to retract the expectation held out in the preface to my First Edition, that the entire work might be completed in eight volumes. Experience proves to me how impossible it is to measure beforehand the space which historical subjects will require. All I can now promise is, that the remainder of the work shall be executed with as much regard to brevity as is consistent with the paramount duty of rendering it fit for public acceptance.

## NAMES OF GODS, GODDESSES, AND HEROES.

FOLLOWING the example of Dr. Thirlwall and other excellent scholars, I call the Greek deities by their real Greek names, and not by the Latin equivalents used among the Romans. For the assistance of those readers to whom the Greek names may be less familiar, I here annex a table of the one and the other.

<i>Greek.</i>	<i>Latin.</i>
Zeus,	Jupiter.
Poseidôn,	Neptune.
Arês,	Mars.
Dionysos,	Bacchus.
Hermês,	Mercury.
Hêlios,	Sol.
Hêphæstos,	Vulcan.
Hadês,	Pluto.
Hêrê,	Juno.
Athênê,	Minerva.
Artemis,	Diana.
Aphroditê,	Venus.
Eôs,	Aurora.
Hestia,	Vesta.
Lêtô,	Latona.
Dômêtêr,	Ceres.
Hêraklês,	Hercules.
Asklopîos,	Æsculapius.

A few words are here necessary respecting the orthography of Greek names adopted in the above table and generally throughout this history. I have approximated

as nearly as I dared to the Greek letters in preference to the Latin; and on this point I venture upon an innovation which I should have little doubt of vindicating before the reason of any candid English student. For the ordinary practice of substituting, in a Greek name, the English C in place of the Greek K is indeed so obviously incorrect, that it admits of no rational justification. Our own K precisely and in every point coincides with the Greek K: we have thus the means of reproducing the Greek name to the eye as well as to the ear, yet we gratuitously take the wrong letter in preference to the right. And the precedent of the Latins is here against us rather than in our favour, for their C really coincided in sound with the Greek K, whereas our C entirely departs from it, and becomes an S, before e, i, æ, œ, and y. Though our C has so far deviated in sound from the Latin C, yet there is some warrant for our continuing to use it in writing Latin names—because we thus reproduce the name to the eye, though not to the ear. But this is not the case when we employ our C to designate the Greek K, for we depart here not less from the visible than from the audible original; while we mar the unrivalled euphony of the Greek language by that multiplied sibilant which constitutes the least inviting feature in our own. Among German philologists the K is now universally employed in writing Greek names, and I have adopted it pretty largely in this work, making exception for such names as the English reader has been so accustomed to hear with the C, that they may be considered as being almost Anglicised. I have further marked the long e and the long o (η, ω) by a circumflex (Hêrê) when they occur in the last syllable or in the penultimate of a name.

## PART I.

### LEGENDARY GREECE.

#### CHAPTER I.

##### LEGENDS RESPECTING THE GODS.

THE mythical world of the Greeks opens with the gods, anterior as well as superior to man : it gradually descends, first to heroes, and next to the human race. Along with the gods are found various monstrous natures, ultra-human and extra-human, who cannot with propriety be called gods, but who partake with gods and men in the attributes of volition, conscious agency, and susceptibility of pleasure and pain,—such as the Harpies, the Gorgons, the Grææ, the Sirens, Scylla and Charybdis, Echidna, Sphinx, Chimæra, Chrysaor, Pegasus, the Cyclopes, the Centaurs, &c. The first acts of what may be termed the great mythical cycle describe the proceedings of these gigantic agents—the crash and collision of certain terrific and overboiling forces, which are ultimately reduced to obedience, or chained up, or extinguished.

*Opening of  
the mythical  
world.*

under the more orderly government of Zeus, who supplants his less capable predecessors, and acquires presidency and supremacy over gods and men—subject however to certain social restraints from the chief gods and goddesses around him, as well as to the custom of occasionally convoking and consulting the divine agora.

Here the  
mythes are  
to be told.

I recount these events briefly, but literally, treating them simply as mythes springing from the same creative imagination, addressing themselves to analogous tastes and feelings, and depending upon the same authority, as the legends of Thebes and Troy. It is the inspired voice of the Muse which reveals and authenticates both, and from which Homer and Hesiod alike derive their knowledge—the one, of the heroic, the other, of the divine, foretime. I maintain, moreover, fully, the character of these great divine agents as Persons, which is the light in which they presented themselves to the Homeric or Hesiodic audience. Uranos, Nyx, Hypnos and Oneiros (Heaven, Night, Sleep and Dream), are Persons, just as much as Zeus and Apollo. To resolve them into mere allegories, is unsafe and unprofitable: we then depart from the point of view of the original hearers, without acquiring any consistent or philosophical point of view of our own<sup>1</sup>. For although some of the attributes and actions ascribed to these persons are often explicable by allegory, the whole series and system of them never are so: the theorist who adopts this course of explanation finds that, after

Allegory

missible.

<sup>1</sup> It is sufficient, here, to state this position briefly: more will be said respecting the allegorizing interpretation in a future chapter.

one or two simple and obvious steps, the path is no longer open, and he is forced to clear a way for himself by gratuitous refinements and conjectures. The allegorical persons and attributes are always found mingled with other persons and attributes not allegorical, but the two classes cannot be severed without breaking up the whole march of the mythical events, nor can any explanation which drives us to such a necessity be considered as admissible. To suppose indeed that these legends could be all traced by means of allegory into a coherent body of physical doctrine, would be inconsistent with all reasonable presumptions respecting the age or society in which they arose. Where the allegorical mark is clearly set upon any particular character, or attribute, or event, to that extent we may recognise it; but we can rarely venture to divine further, still less to alter the legends themselves on the faith of any such surmises. The theogony of the Greeks contains some cosmogonic ideas; but it cannot be considered as a system of cosmogony, or translated into a string of elementary, planetary, or physical changes.

In the order of legendary chronology, Zeus comes after Kronos and Uranos; but in the order of Grecian conception, Zeus is the prominent person, and Kronos and Uranos are inferior and introductory precursors, set up in order to be overthrown and to serve as mementos of the prowess of their conqueror. To Homer and Hesiod, as well as to the Greeks universally, Zeus is the great and predominant god, "the father of gods and men," whose power none of the other gods can hope to resist.

*Zeus—foremost in Grecian conceptions*

or even deliberately think of questioning. All the other gods have their specific potency and peculiar sphere of action and duty, with which Zeus does not usually interfere; but it is he who maintains the lineaments of a providential superintendence, as well over the phenomena of Olympus as over those of earth. Zeus and his brothers Poseidón and Hadēs have made a division of power: he has reserved the æther and the atmosphere to himself—Poseidón has obtained the sea—and Hadēs the under-world or infernal regions; while earth, and the events which pass upon earth, are common to all of them, together with free access to Olympus<sup>1</sup>.

The gods  
—how con-  
stituted: hu-  
man type  
enlarged.

Zeus, then, with his brethren and colleagues, constitute the present gods, whom Homer and Hesiod recognise as in full dignity and efficiency. The inmates of this divine world are conceived upon the model, but not upon the scale, of the human. They are actuated by the full play and variety of those appetites, sympathies, passions and affections, which divide the soul of man; invested with a far larger and indeterminate measure of power, and an exemption as well from death as (with some rare exceptions) from suffering and infirmity. The rich and diverse types thus conceived, full of energetic movement and contrast, each in his own province, and soaring confessedly above the limits of experience, were of all themes the most suitable for ad-

<sup>1</sup> See *Iliad*, viii. 405, 463; xv. 29, 130, 185. *Hesiod*, *Theog.* 885.

This unquestioned supremacy is the general representation of Zeus; at the same time the conspiracy of Hērē, Poseidón, and Athēnē against him, suppressed by the unexpected apparition of Baiaupē as his ally, is among the exceptions. (*Iliad*, i. 400.) Zeus is at one time vanquished by Typh, but rescued by Hēraklēs. (*Apollodōr.* i. 6, 3.)

venture and narrative, and operated with irresistible force upon the Grecian fancy. All nature was then conceived as moving and working through a number of personal agents, amongst whom the gods of Olympus were the most conspicuous; the reverential belief in Zeus and Apollo being only one branch of this omnipresent personifying faith. The attributes of all these agents had a tendency to expand themselves into illustrative legends—especially those of the gods, who were constantly invoked in the public worship. Out of this same mental source sprang both the divine and heroic mythes—the former being often the more extravagant and abnormous in their incidents, in proportion as the general type of the gods was more vast and awful than that of the heroes.

As the gods have houses and wives like men, so the present dynasty of gods must have a past to repose upon<sup>1</sup>; and the curious and imaginative Greek, whenever he does not find a recorded past ready to his hand, is uneasy until he has created one. Thus the Hesiodic theogony explains, with a certain degree of system and coherence, first the antecedent circumstances under which Zeus acquired the divine empire, next the number of his colleagues and descendants.

Past history of the gods fitted on to present conceptions.

First in order of time (we are told by Hesiod) came Chaos; next Gaia, the broad, firm, and flat Earth, with deep and dark Tartarus at her base. Erös (Love), the subduer of gods as well as men, came immediately afterwards<sup>2</sup>.

<sup>1</sup> *Ant. Foll. i. 1.* *Scæpe de antiquis illius imperatoris diplomatis diplomata, edicta, et res illius, esse solent.*

<sup>2</sup> *Hesiod, Theog. 116.* Apollodorus begins with Uranus and Gaia (i. 1); he does not recognise Erös, Nyx, or Erebos.

From Chaos sprung Erebus and Nyx ; from these latter Æthér and Héméra. Gæa also gave birth to Uranos, equal in breadth to herself, in order to serve both as an overarching vault to her, and as a residence for the immortal gods ; she further produced the mountains, habitations of the divine nymphs, and Pontus, the barren and billowy sea.

Gæa and  
Uranos.

Then Gæa intermarried with Uranos, and from this union came a numerous offspring—twelve Titans and Titanides, three Cyclopes, and three Hekatoncheires or beings with a hundred hands each. The Titans were Oceanus, Kœos, Krios, Hyperion, Iapetos, and Kronos : the Titanides, Theia, Rhea, Themis, Mnemosynê, Phœbê, and Têthys. The Cyclopes were Brontês, Steropês, and Argês, —formidable persons, equally distinguished for strength and for manual craft, so that they made the thunder which afterwards formed the irresistible artillery of Zeus<sup>1</sup>. The Hekatoncheires were Kottos, Briareus, and Gygês, of prodigious bodily force.

Uranos contemplated this powerful brood with fear and horror : as fast as any of them were born, he concealed them in cavities of the earth, and would not permit them to come out. Gæa could find no room for them, and groaned under the pressure : she produced iron, made a sickle, and implored her sons to avenge both her and themselves against the oppressive treatment of their father. But none of them, except Kronos, had courage to undertake the deed : he, the youngest and the most daring, was armed with the sickle and

placed in suitable ambush by the contrivance of Gæa. Presently night arrived, and Uranos descended to the embraces of Gæa: Kronos then emerged from his concealment, cut off the genitals of his father, and cast the bleeding member behind him far away into the sea<sup>1</sup>. Much of the blood was spilt upon the earth, and Gæa in consequence gave birth to the irresistible Erinnys, the vast and muscular Gigantes, and the Melian nymphs. Out of the genitals themselves, as they swam and foamed upon the sea, emerged the goddess Aphroditè, deriving her name from the foam out of which she had sprung. She first landed at Kythêra, and then went to Cyprus: the island felt her benign influence, and the green herb started up under her soft and delicate tread. Eros immediately joined her, and partook with her the function of suggesting and directing the amorous impulses both of gods and men<sup>2</sup>.

Uranos disabled.

Uranos being thus dethroned and disabled, Kronos and the Titans acquired their liberty and became predominant: the Cyclôpes and the Hekatoncheires had been cast by Uranos into Tartarus, and were still allowed to remain there.

Each of the Titans had a numerous offspring: Oceanus, especially, marrying his sister Têthys, begat three thousand daughters, the Oceanic nymphs,

<sup>2</sup> Hesiod, Theog. 192. This legend respecting the birth of Aphroditè seems to have been derived partly from her name (*ἀφρός*, foam), partly from the surname Urania, *Ἀφροδίτη Ὀυρανία*, under which she was in very extensively worshipped, especially both in Cyprus and Kythêra, seemingly originated in both islands by the Phœnicians. and as many sons: the rivers and springs passed for his offspring. Hyperion and his sister Theia had for their children Hélios, Selênê, and Eôs; Kœos with Phœbê begat Lêtô and Asteria; the children of Krios were Astrœos, Pallas, and Persês,—from Astrœos and Eôs sprang the winds Zephyrus, Boreas, and Notus. Iapetos marrying the Oceanic nymph Klymenê, counted as his progeny the celebrated Promêtheus, Êpimêtheus, Menœtius, and Atlas. But the offspring of Kronos were the most powerful and transcendent of all. He married his sister Rhea, and had by her three daughters—Hestia, Dêmêtêr, and Hêrê—and three sons, Hadês, Poseidôn, and Zeus, the latter at once the youngest and the greatest.

But Kronos foreboded to himself destruction from one of his own children, and accordingly, as soon as any of them were born, he immediately swallowed them and retained them in his own belly. In this manner had the five first been treated, and Rhea was on the point of being delivered of Zeus. Grieved and indignant at the loss of her children, she applied for counsel to her father and mother, Uranos and Gœa, who aided her to conceal the birth of Zeus. They conveyed her by night to Lyktus in Crête, hid the new-born child in a woody cavern on Mount Ida, and gave to Kronos, in place of it, a stone wrapped in swaddling clothes, which he greedily swallowed, believing it to be his child. Thus was the safety of Zeus ensured<sup>1</sup>. As he grew up his vast powers fully developed themselves: at the suggestion of Gœa, he induced Kronos by strâ-

tagem to vomit up, first the stone which had been given to him,—next, the five children whom he had previously devoured. Hestia, Dēmêtêr, Hērê, Po-seidôn and Hadês, were thus allowed to grow up along with Zeus; and the stone to which the latter owed his preservation was placed near the temple of Delphi, where it ever afterwards stood, as a conspicuous and venerable memorial to the religious Greek<sup>1</sup>.

We have not yet exhausted the catalogue of beings generated during this early period, anterior to the birth of Zeus. Nyx, alone and without any partner, gave birth to a numerous progeny: Thanatos, Hypnos and Oneiros; Mōmos and Orizys (Grief); Klôthô, Lachesis and Atropos, the three Fates; the retributive and equalising Nemesis; Apatê and Philotês (Deceit and amorous Propensity), Gêras (Old Age) and Eris (Contention). From Eris proceeded an abundant offspring, all mischievous and maleficent: Ponos (Suffering), Lêthê, Lâmos (Famine), Phonos and Machê (Slaughter and Battle), Dysnomia and Atê (Lawlessness and reckless Impulse), and Horkos, the ever-watchful sanctioner of oaths, as well as the inexorable punisher of voluntary perjury<sup>2</sup>.

Gaea, too, intermarrying with Pontus, gave birth to Nereus, the just and righteous old man of the sea; to Thaumas, Phorkys and Kêtô. From Ne-

reus, and Doris daughter of Oceanus, proceeded the fifty Nereids or Sea-nymphs. Thaumás also married Elektra daughter of Oceanus, and had by her Iris and the two Harpies, Aello and Okypeto, —winged and swift as the winds. From Phorkys and Kêto sprung the Dragon of the Hesperides, and the monstrous Grææ and Gorgons: the blood of Medusa, one of the Gorgons, when killed by Perseus, produced Chrysaor and the horse Pegasus; Chrysaor and Kallirrhoe gave birth to Geryôn as well as to Echidna,—a creature half-nymph and half-serpent, unlike both to gods and to men. Other monsters arose from the union of Echidna with Typhaon,—Orthros, the two-headed dog of Geryôn; Cerberus, the dog of Hades, with fifty heads, and the Lernaean Hydra. From the latter proceeded the Chimæra, the Sphinx of Thêbes, and the Nemean lion<sup>1</sup>.

A powerful and important progeny, also, was that of Styx, daughter of Oceanus, by Pallas; she had Zêlos and Nikê (Imperiousness and Victory), and Kratos and Bia (Strength and Force). The hearty and early co-operation of Styx and her four sons with Zeus was one of the main causes which enabled him to achieve his victory over the Titans.

Zeus had grown up not less distinguished for mental capacity than for bodily force. He and his brothers now determined to wrest the power from the hands of Kronos and the Titans, and a long and desperate struggle commenced, in which all the gods and all the goddesses took part. Zeus

convoked them to Olympus, and promised to all who would aid him against Kronos, that their functions and privileges should remain undisturbed. The first who responded to the call, came with her four sons, and embraced his cause, was Styx. Zeus took them all four as his constant attendants, and conferred upon Styx the majestic distinction of being the Horkos, or oath-sanctioner of the Gods,—what Horkos was to men, Styx was to the Gods<sup>1</sup>.

Still further to strengthen himself, Zeus released the other Uranids who had been imprisoned in Tartarus by their father,—the Cyclôpes and the Centimanes,—and prevailed upon them to take part with him against the Titans. The former supplied him with thunder and lightning, and the latter brought into the fight their boundless muscular strength<sup>2</sup>. Ten full years did the combat continue; Zeus and the Kronids occupying Olympus, and the Titans being established on the more southerly mountain-chain of Othrys. All nature was convulsed, and the distant Oceanus, though he took no part in the struggle, felt the boiling, the noise, and the shock, not less than Grea and Poutus. The thunder of Zeus, combined with the crags and mountains torn up and hurled by the Centimanes, at length prevailed, and the Titans were defeated and thrust down into Tartarus. Iapetos, Kronos, and the remaining Titans (Oceanus excepted) were imprisoned, perpetually and irrevocably, in that subterranean dungeon, a wall

of brass being built around them by Poseidôn, and the three Centimanes being planted as guards. Of the two sons of Iapetos, Menœtius was made to share this prison, while Atlas was condemned to stand for ever at the extreme west, and to bear upon his shoulders the solid vault of heaven<sup>1</sup>.

Typhœus.

Thus were the Titans subdued, and the Kronids with Zeus at their head placed in possession of power. They were not, however, yet quite secure; for Gæa, intermarrying with Tartarus, gave birth to a new and still more formidable monster called Typhœus, of such tremendous properties and promise, that, had he been allowed to grow into full development, nothing could have prevented him from vanquishing all rivals and becoming supreme. But Zeus foresaw the danger, smote him at once with a thunderbolt from Olympus, and burnt him up: he was cast along with the rest into Tartarus, and no further enemy remained to question the sovereignty of the Kronids<sup>2</sup>.

Dynasty of Zeus.

With Zeus begins a new dynasty and a different order of beings. Zeus, Poseidôn, and Hadês agree upon the distribution before noticed, of functions and localities: Zeus retaining the Æthêr and the atmosphere, together with the general presiding

Apollodorus, on the other hand, gives this latter in some detail, but dispatches the Titans in a few words (1. 2. 4; 1. 6. 1). The Gigantes seem to be only a second edition of the Titans, — sort of duplication to which the legendary poets were often inclined.

function ; Poseidôn obtaining the sea, and administering subterranean forces generally ; and Hades ruling the under-world, or region in which the half-animated shadows of departed men reside.

It has been already stated, that in Zeus, his brothers and his sisters, and his and their divine progeny, we find the *present* Gods ; that is, those, for the most part, whom the Homeric and Hesiodic Greeks recognised and worshipped. The wives of Zeus were numerous as well as his offspring. First he married Mêtis, the wisest and most sagacious of the goddesses ; but Gaia and Uranos forewarned him that if he permitted himself to have children by her, they would be stronger than himself and dethrone him. Accordingly when Mêtis was on the point of being delivered of Athênê, he swallowed her up, and her wisdom and sagacity thus became permanently identified with his own being<sup>1</sup>. His head was subsequently cut open, in order to make way for the exit and birth of the goddess Athênê<sup>2</sup>. By Themis, Zeus begat the Hôræ ; by Eurynomê, the three Charites or Graces ; by Mnêmosynê, the Muses ; by Lêtô (Latona), Apollo and Artemis ; and by Dêmêtêr, Persêphônê. Last of all he took for his wife Hêrê, who maintained permanently the dignity of queen of the Gods ; by her he had Hêbê, Arês, and Eileithyia. Hermês also was born to him by Maïa, the daughter of Atlas : Hêphæstos was born to Hêrê, according to some accounts, by Zeus ; according to others, by her own unaided generative force<sup>3</sup>. He was born lame, and Hêrê

was ashamed of him; she wished to secrete him away, but he made his escape into the sea, and found shelter under the maternal care of the Nereids Thetis and Eurynomê<sup>1</sup>.

Our enumeration of the divine race, under the presidency of Zeus, will thus give us<sup>2</sup>,—

General dis-  
tribution  
of the di-  
vine race.

1. The twelve great gods and goddesses of Olympus,—Zeus, Poseidôn, Apollo, Arês, Hêphæstos, Hermês, Hêrê, Athênê, Artemis, Aphroditê, Hestia, Dêmêtêr.

2. An indefinite number of other deities, not included among the Olympic, seemingly because the number *twelve* was complete without them, but some of them not inferior in power and dignity to many of the twelve :—Hadês, Hêlios, Hekâtê, Dionysos, Lêtô, Diônê, Persephonê, Selênê, Themis, Eôs, Harmonia, the Charites, the Muses, the Eileithyia, the Matri, the Oceanids and the Nereids, Prôteus, Eldothea, the Nymphs, Leukothea, Phorkys, Æolus, Nemesis, &c.

3. Deities who perform special services to the greater gods :—Iris, Hêbê, the Horæ, &c.

4. Deities whose personality is more faintly and unsteadily conceived :—Atê, the Litæ, Eris, Thanatos, Hypnos, Kratos, Bia, Ossa, &c.<sup>3</sup> The same name is here employed sometimes to designate the person, sometimes the attribute or event not personified,—an unconscious transition of ideas, which, when consciously performed, is called Allegory.

5. Monsters, offspring of the Gods :—the Harpies, the Gorgons, the Grææ, Pegæus, Chrysaor,

From the gods we slide down insensibly, first to heroes, and then to men; but before we proceed to this new mixture, it is necessary to say a few words on the theogony generally. I have given it briefly as it stands in the Hesiodic Theogonia, because that poem—in spite of great incoherence and confusion, arising seemingly from diversity of authorship as well as diversity of age—presents an ancient and genuine attempt to cast the divine foretime into a systematic sequence. Homer and Hesiod were the grand authorities in the Pagan world respecting theogony; but in the *Iliad* and *Odyssey* nothing is found except passing allusions and implications, and even in the *Hymns* (which were commonly believed in antiquity to be the productions of the same author as the *Iliad* and the *Odyssey*) there are only isolated, unconnected narratives. Accordingly men habitually took their information respecting their theogonic antiquities from the Hesiodic poem, where it was ready laid out before them; and the legends consecrated in that work acquired both an extent of circulation and a firm hold on the national faith, such as independent legends could seldom or never rival. Moreover the scrupulous and sceptical Pagans, as well as the open assailants of Paganism in later times, derived their subjects of attack from the same source; so that it has been absolutely necessary to recount in their naked simplicity the

Hesiodic stories, in order to know what it was that Plato deprecated and Xenophanès denounced. The strange proceedings ascribed to Uranos, Kronos and Zeus, have been more frequently alluded to, in the way of ridicule or condemnation, than any other portion of the mythical world.

Points of  
difference  
between  
Homer and  
Hesiod.

But though the Hesiodic theogony passed as orthodox among the later Pagans<sup>1</sup>, because it stood before them as the only system anciently set forth and easily accessible, it was evidently not the only system received at the date of the poem itself. Homer knows nothing of Uranos, in the sense of an arch-God anterior to Kronos. Uranos and Gæa, like Oceanus, Téthys and Nyx, are with him great and venerable Gods, but neither the one nor the other present the character of predecessors of Kronos and Zeus<sup>2</sup>. The Cyclôpes, whom Hesiod ranks as sons of Uranos and fabricators of thunder, are in Homer neither one nor the other: they are not noticed in the *Iliad* at all, and in the *Odyssey* they are gross gigantic shepherds and cannibals, having nothing in common with the Hesiodic Cyclôpa except the one round central eye<sup>3</sup>. Of the three Centimanes enumerated by Hesiod, Briareus only is mentioned in Homer, and to all appearance, not as the son of Uranos, but as the son of Poseidôn; not as aiding Zeus in his combat against the Titans, but as rescuing him at a critical

moment from a conspiracy formed against him by Hêrê, Poseidôn and Athênê<sup>1</sup>. Not only is the Hesiodic Uranos (with the Uranids) omitted in Homer, but the relations between Zeus and Kronos are also presented in a very different light. No mention is made of Kronos swallowing his young children: on the contrary, Zeus is the eldest of the three brothers instead of the youngest, and the children of Kronos live with him and Rhea; there the stolen intercourse between Zeus and Hêrê first takes place without the knowledge of their parents<sup>2</sup>. When Zeus puts Kronos down into Tartarus, Rhea consigns her daughter Hêrê to the care of Oceanus: no notice do we find of any terrific battle with the Titans as accompanying that event. Kronos, Iapetos, and the remaining Titans are down in Tartarus, in the lowest depths under the earth, far removed from the genial rays of Hêlios; but they are still powerful and venerable, and Hypnos makes Hêrê swear an oath in their name, as the most inviolable that he can think of<sup>3</sup>.

In Homer, then, we find nothing beyond the simple fact that Zeus thrust his father Kronos together with the remaining Titans into Tartarus; an event to which he affords us a tolerable parallel in certain occurrences even under the presidency of Zeus himself. For the other gods make more than one rebellious attempt against Zeus, and are only put down, partly by his unparalleled strength,

partly by the presence of his ally the Centimane Briareus. Kronos, like Laertes or Pélens, has become old, and has been supplanted by a force vastly superior to his own. The Homeric epic treats Zeus as present, and, like all the interesting heroic characters, a father must be assigned to him: that father has once been the chief of the Titans, but has been superseded and put down into Tartarus along with the latter, so soon as Zeus and the superior breed of the Olympic gods acquired their full development.

Amplified  
theogony  
of Zeus.

That antithesis between Zeus and Kronos—between the Olympic gods and the Titans—which Homer has thus briefly brought to view, Hesiod has amplified into a theogony, with many things new, and some things contradictory to his predecessor; while Eumelus or Arktinus in the poem called *Titanomachia* (now lost) also adopted it as their special subject<sup>1</sup>. As Stasinus, Arktinus, Leschêa, and others, enlarged the Legend of Troy by composing poems relating to a supposed time anterior to the commencement, or subsequent to the termination of the *Iliad*,—as other poets recounted adventures of Odysseus subsequent to his landing in

<sup>1</sup> See the few fragments of the *Titanomachia*, in Dürstler, *Epic. Græc. Fragm.* p. 5; and Heine, *ad Apollon. l. 2*. Perhaps there was more than one poem on the subject, though it seems that Arktinus had only read one (*viii.* p. 277).

In the *Titanomachia*, the generations anterior to Zeus were still further lengthened by making Uranos the son of *Ukber* (Fr. 4. Dürstler). *Egeon* was also represented as son of *Pontos* and *Gæa*, and as having fought in the ranks of the Titans: in the *Iliad* he (the same who is called *Hyperion*) is the last ally of Zeus.

A *Titanography* was ascribed to Musæus (*Schol. Apollon. Rhod. iii.* 1178; compare *Lactant. de Fals. Rel.* i. 31).

Ithaka,—so Hesiod enlarged and systematised, at the same time that he corrupted, the skeleton theogony which we find briefly indicated in Homer. There is violence and rudeness in the Homeric gods, but the great genius of Grecian epic is no way accountable for the stories of Uranos and Kronos,—the standing reproach against Pagan legendary narrative.

How far these stories are the invention of Hesiod himself is impossible to determine<sup>1</sup>. They bring

<sup>1</sup> That the Hesiodic Theogony is referable to an age considerably later than the Homeric poems, appears now to be the generally admitted opinion; and the reasons for believing so are, in my opinion, satisfactory. Whether the Theogony is composed by the same author as the Works and Days is a disputed point. The German literati in the days of Pausanias decidedly denied the identity, and ascribed it to their Herosol (ix. 31. 4, ix. 35. 1), and Volcker (*Mythologie des Japetischen Geschlechtes*, p. 14) maintains the same opinion, as well as Götting (Pref. ad Herod. xxi.). K. O. Müller (*History of Grecian Literature*, ch. S. § 4) thinks that there is not sufficient evidence to form a decisive opinion.

Under the name of Hesiod (in that vague language which is usual in antiquity respecting authorship, but which modern critics have too much mended by speaking of the Hesiodic school, sect, or family) passed many different poems, belonging to three classes quite distinct from each other, but all disparate from the Homeric epic.—1. The poems of legend cast into historical and genealogical verse, such as the *Euta*, the *Catalogue of Women*, &c. 2. The poems of a didactic or ethical tendency, such as the *Works and Days*, the *Precepts of Chiron*, the *Art of Augural Prophecy*, &c. 3. Separate and short mythical compositions, such as the *Shield of Herakles*, the *Marriage of Korymbos* (which, however, was of disputed authenticity, Athous. ii. p. 49), the *Epithalamium of Pelops and Thetis*, &c. (See Markschaffel, *Prefat. ad Fragment. Hesiod.* p. 40.)

The Theogony belongs chiefly to the first of these classes, but it has also a dash of the second in the legend of Prometheus, &c. Moreover in the portion which respects Ithaka, it has both a mystic character and a distinct bearing upon present life and manners, which we may also trace in the allusion to Kylon and Polos. These circumstances place it in the same age with the *Works and Days*, perhaps in the half

us down to a cast of fancy more coarse and indelicate than the Homeric, and more nearly resembling some of the Holy Chapters (*ἱεροὶ λόγοι*) of the more recent mysteries, such (for example) as the tale of Dionysos Zagreus. There is evidence in the Theogony itself that the author was acquainted with local legends current both at Krête and at Delphi; for he mentions both the mountain-cave in Krête wherein the new-born Zeus was hidden, and the stone near the Delphian temple—the identical stone which Kronos had swallowed—

century preceding 700 B.C., and little, if at all, anterior to Archilochos. The poem is evidently conceived upon one scheme, yet the parts are so disorderly and incoherent, that it is difficult to say how much is interpolation. Hermann has well dissected the exordium: see the preface to Gaisford's *Hesiod* (*Poetae Minori*, p. 63).

K. O. Müller tells us (*et sup.* p. 10), "The Titans, according to the notions of Hesiod, represent a system of things in which elementary beings, natural powers, and notions of order and regularity are united to form a whole. The Cyclopes denote the transient disturbances of this order of nature by storms, and the Hekatoncheires, or hundred-handed Giants, signify the fearful power of the greater revolutions of nature." The poem affords little presumption that any such ideas were present to the mind of its author, as, I think, will be seen if we read 140-155, 630-745.

The Titans, the Cyclopes, and the Hekatoncheires, can no more be construed into physical phenomena than Chrysaor, Pegasus, Echidna, the Geras, or the Gorgons. Zeus, like Hēraklēs, or Jaxōn, or Perseus, if his adventures are to be described, must have enemies, worthy of himself and his vast type, whom it is some credit for him to overthrow. Those who contend with him or assist him must be conceived on a scale fit to be drawn on the same imposing canvas: the dwarfish proportions of man will not satisfy the sentiment of the poet or his audience respecting the grandeur and glory of the gods. To obtain creations of adequate sublimity for such an object, the poet may occasionally borrow analogies from the striking accidents of physical nature, and when such an allusion manifests itself clearly, the critic does well to point it out. But it seems to me a mistake to treat these approximations to physical phenomena as forming the main scheme of the poet,—to look for them everywhere, and to procure them where there is little or no indication.

“placed by Zeus himself as a sign and wonder to mortal men.” Both these two monuments, which the poet expressly refers to, and had probably seen, imply a whole train of accessory and explanatory local legends—current probably among the priests of Krête and Delphi, between which places, in ancient times, there was an intimate religious connection. And we may trace further in the poem,—that which would be the natural feeling of Krétan worshipers of Zeus,—an effort to make out that Zeus was justified in his aggression on Kronos, by the conduct of Kronos himself both towards his father and towards his children: the treatment of Kronos by Zeus appears in Hesiod as the retribution foretold and threatened by the mutilated Uranos against the son who had outraged him. In fact the relations of Uranos and Gæa are in almost all their particulars a mere copy and duplication of those between Kronos and Rhea, differing only in the mode whereby the final catastrophe is brought about. Now castration was a practice thoroughly abhorrent both to the feelings and to the customs of Greece<sup>1</sup>; but it was seen with melancholy frequency in the domestic life as

Homeric  
myths  
traceable  
to Kreta  
and Delphi

<sup>1</sup> The strongest evidences of this feeling are exhibited in Herodotus, iii. 48; viii. 105. See an example of this mutilation inflicted upon a youth named Adamos by the Thracian king Kotys, in Aristot. Polit. v, §. 12, and the tale about the Corinthian Perander, Herod. iii. 48.

It is an instance of this habit, so frequent among the Attic tragedians, of describing Amator or Phrygian ministers to the Trojans, when Sophocles in his last play *Troilus* (sup. Ind. Poët. v. 166) introduced one of the characters of his drama as having been castrated by order of Hector. Denoting your *ἑταῖρος* *ῥαϊνός* *ῥαϊνός* *ῥαϊνός*—probably the *ῥαϊνός* or guardian and companion of the youthful *Troilus*. See Webster, *Grecianish*. Troil. ind. 2. p. 125.

well as in the religious worship of Phrygia and other parts of Asia, and it even became the special qualification of a priest of the Great Mother Cybelé<sup>1</sup>, as well as of the Ephesian Artemis. The employment of the sickle ascribed to Kronos seems to be the product of an imagination familiar with the Asiatic worship and legends, which were connected with and partially resembled the Krétan<sup>2</sup>. And this deduction becomes the more probable when we connect it with the first genesis of iron, which Hesiod mentions to have been produced for the express purpose of fabricating the fatal sickle; for metallurgy finds a place in the early legends both of the Trojan and of the Krétan Ida, and the three Idaean Dactyls, the legendary inventors of it, are assigned sometimes to one and sometimes to the other<sup>3</sup>.

Orphic  
theogony.

As Hesiod had extended the Homeric series of gods by prefixing the dynasty of Uranos to that of Kronos, so the Orphic theogony lengthened it still

Hence emerged in process of time the first-born god Phánēs, or Mêtis, or Hêrikapæos, a person of double sex, who first generated the Kosmos, or mundane system, and who carried within him the seed of the gods. He gave birth to Nyx, by whom he begat Uranos and Gæa; as well as to Hêlios and Selênê<sup>2</sup>.

From Uranos and Gæa sprang the three Mœræ, or Fates, the three Centimanes and the three Cyclôpes: these latter were cast by Uranos into Tartaros, under the foreboding that they would rob him of his dominion. In revenge for this maltreatment of her sons, Gæa produced of herself the fourteen Titans, seven male and seven female: the former were Kœos, Krios, Phorkys, Kronos, Oceanus, Hyperîon and Iapetos; the latter were Themis, Tethys, Mnêmosynê, Theia, Diônê, Phœbé and Rhea<sup>3</sup>. They received the name of Titans because they avenged upon Uranos the expulsion

<sup>1</sup> See the scanty fragments of the Orphic theogony in Hermann's edition of the Orphics, pp. 448, 504, which it is difficult to understand and piece together, even with the aid of Lobeck's elaborate examination (*Aglaophamus*, p. 470, &c.). The fragments are chiefly preserved by Proclus and the later Platonists, who seem to entangle them almost inexhaustibly with their own philosophical floss.

The first few lines of the Orphic Argonautica contain a brief summary of the chief points of the theogony.

<sup>2</sup> See Lobeck, *Aglaoph.* p. 472-476, 490-500, *Mêtis anipha phœros ôên êdritê Hêrikapæos*; again, *ôêlês êal yewerw epurêph ôên Hêrikapæos*. Compare Lactant. ii. 8, 4; *Indas*, v. *ôêlês*; *Athenagoras*, ii. 246; *Diodor.* i. 27.

This egg system, as might be expected, in the cosmogony set forth by the Birds, Aristophanes, *Av.* 650. Nyx gives birth to an egg, out of which arise the golden Erên, from Hêos and Chaos spring the race of birds.

of their elder brothers. Six of the Titans, headed by Kronos the most powerful of them all, conspiring against Uranos, castrated and dethroned him: Oceanus alone stood aloof and took no part in the aggression. Kronos assumed the government and fixed his seat on Olympos; while Oceanus remained apart, master of his own divine stream'. The reign of Kronos was a period of tranquillity and happiness, as well as of extraordinary longevity and vigour.

Kronos and Rhea gave birth to Zeus and his brothers and sisters. The concealment and escape of the infant Zeus, and the swallowing of the stone by Kronos, are given in the Orphic Theogony substantially in the same manner as by Hesiod, only in a style less simple and more mysticised. Zeus is concealed in the cave of Nyx, the seat of Phanès himself, along with Eidè and Adrasteia, who nurse and preserve him, while the armed dance and sonorous instruments of the Kurètes prevent his infant cries from reaching the ears of Kronos. When grown up, he lays a snare for his father, intoxicates him with honey, and having surprised him in the depth of sleep, enchains and castrates him.

In the *Æneid* *Æolus* of Æschylus, the old attendants of the god Phœnyx were said to have been cut up and boiled in a cauldron, and rendered again young, by Medea. Pterekydēs and Simonidēs said that Jason himself had been so dealt with. Schol. Aristoph. *Fagut*, 1321.

*Comptosia tinctoria* sp. Schult. Apoll. Minut. iv, 563.

Thus exalted to the supreme mastery, he swallowed and absorbed into himself *Métis*, or *Phanês*, with all the pre-existing elements of things, and then generated all things anew out of his own being and conformably to his own divine ideas<sup>1</sup>. So scanty are the remains of this system, that we find it difficult to trace individually the gods and goddesses sprung from Zeus beyond Apollo, Dionysos, and Persephonê,—the latter being confounded with Artemis and Hekaté.

But there is one new personage, begotten by Zeus, who stands pre-eminently marked in the Orphic Theogony, and whose adventures constitute one of its peculiar features. Zagreus, "the horned child," is the son of Zeus by his own daughter Persephonê: he is the favourite of his father, a child of magnificent promise, and predestined, if he grow up, to succeed to supreme dominion as well as to the handling of the thunderbolt. He is seated, whilst an infant, on the throne beside Zeus, guarded by Apollo and the *Kurêtes*. But the jealous *Hêrê* intercepts his career and incites the Titans against him, who, having first smeared their faces with plaster, approach him on the throne, tempt his

<sup>1</sup> The Catapotes of *Phanês* by Zeus is one of the most memorable points of the Orphic Theogony. Lœbbeck, p. 519; also *Fragm.* vi. p. 456 of Hermann's Orphica.

From this absorption and subsequent reproduction of all things by Zeus, flowed the magnificent string of Orphic predictions about him,—

Zeus ἀρχή, Ζεὺς πάτερ, Διὸς δ' ἐκ σπέρματος ἐκέρσας.—

an allusion to which is traceable even in Plato. *de Legg.* ii. p. 710. Ptolemy, *de Defectu Oracul.* T. ii. p. 372, c. 46. (Bookerm. l. 11) is the most ancient writer remaining to us who mentions the name of *Phanês*, in a line said to be preserved from Orpheus, whatever however *Phanês* is identified with *Dionysos*. Compare *Metaphys.* *seventh* l. 10.

Such is the tissue of violent fancies comprehended under the title of the Orphic Theogony, and read as such, it appears, by Plato, Isokrates and Aristotle. It will be seen that it is based upon the Hesiodic Theogony, but according to the general expansive tendency of Grecian legend, much new matter is added: Zeus has in Homer one predecessor, in Hesiod two, and in Orpheus four.

The Hesiodic Theogony, though later in date than the *Iliad* and *Odyssey*, was coeval with the earliest period of what may be called Grecian history, and certainly of an age earlier than 700 B.C. It appears to have been widely circulated in Greece, and being at once ancient and short, the general public consulted it as their principal source of information respecting divine antiquity. The Orphic Theogony belongs to a later date, and contains the Hesiodic ideas and persons, enlarged and mystically disguised: its vein of invention was less popular, adapted more to the contemplation of a sect specially prepared than to the taste of a casual audience, and it appears accordingly to have obtained currency chiefly among purely speculative men<sup>1</sup>.

century, though it is now lost. The extracts which we find seem all to countenance the belief that the Hesiodic Theogony formed the basis upon which they worked. See about Akusilaos, Plato, *Sympos.* p. 178. Clem. Alex. *Strom.* p. 627.

<sup>1</sup> The Orphic Theogony is never cited in the ample *Scholia* on Homer, though Homer is often alluded to. (See *Lobeck, Aglaoph.* p. 542.) Nor can it have been present to the minds of Xenophanes and Heraclitus, as representing any widely diffused Grecian belief: the former, who so severely condemned Homer and Hesiod, would have found Orpheus much more deserving of his censure; and the latter would hardly have omitted Orpheus from his memorable denunciations — *Holmstedt's* *deus et philosophus*. *Hesiodus ypo de theologia et theosophia, cum de theologia ypo de theosophia*. *Deus, Liber ix. l.* Isokrates treats Orpheus

Among the majority of these latter, however, it acquired greater veneration, and above all was supposed to be of greater antiquity, than the Hesiodic. The belief in its superior antiquity (disallowed by Herodotus, and seemingly also by Aristotle<sup>1</sup>), as well as the respect for its contents, increased during the Alexandrine age and through the declining centuries of Paganism, reaching its maximum among the New-Platonists of the third and fourth century after Christ: both the Christian assailants, as well as the defenders, of paganism, treated it as the most ancient and venerable summary of the Grecian faith. Orpheus is celebrated by Pindar as the harper and companion of the Argonautic maritime heroes: Orpheus and Musæus, as well as Pamphôs and Olên, the great supposed authors of theogonic, mystical, oracular, and prophetic verses and hymns, were generally considered by literary Greeks as older than either Hesiod or Homer<sup>2</sup>: and such was also the

as the most estimable of all the poets. See Buina, p. 229; ii. p. 319, Bekk. The Theogony of Orpheus, as conceived by Apollonius Rhodius (1. 504) in the third century B.C., and by Nigidius in the first century A.C., (Servius ad Virgil. *Ecl.* iv. 10) seems to have been on a more contracted scale than that which is given in the text. But neither of them notice the tale of Zagreus, which we know to be as old as Orpheus.

<sup>1</sup> This opinion of Herodotus is implied in the remarkable passage about Homer and Hesiod, ii. 53, though he never once names Orpheus—only alluding once to "Orphic ceremonies," ii. 51. He speaks more than once of the prophecies of Musæus. Aristotle denied the just existence and reality of Orpheus. See Cicero de Nat. Deor. i. 35.

<sup>2</sup> Pindar, *Pyth.* iv. 177. Plato seems to consider Orpheus as more ancient than Homer, *Compars. Theor.* p. 179; Krayino, p. 402; De Republ. ii. p. 364. The order in which Aristophanes (and Hippus of Elis, ap. Clem. Alex. *Str.* vi. p. 694) mentions them indicates the same view, *Ramus*, 1838. It is unnecessary to cite the later chronologists, among whom the belief in the antiquity of Orpheus was universal; he was commonly described as one of the Nine Muses. An-

common opinion of modern scholars until a period comparatively recent. It has now been shown, on sufficient ground, that the compositions which passed under these names emanate for the most part from poets of the Alexandrine age, and subsequent to the Christian æra; and that even the earliest among them, which served as the stock on which the later additions were engrafted, belong to a period far more recent than Hesiod; probably to the century preceding Onomakritus (a.c. 610-510). It seems, however, certain, that both Orpheus and Musæus were names of established reputation at the time when Onomakritus flourished; and it is distinctly stated by Pausanias that the latter was himself the author of the most remarkable and characteristic myths of the Orphic Theogony—the discription of Zagreus by the Titans, and his resurrection as Dionysos<sup>1</sup>.

The names of Orpheus and Musæus (as well as that of Pythagoras<sup>2</sup>, looking at one side of his

deeds) seems to have deiced that he was a Thracian, regarding the Thracians as incurably stupid and illiterate. Ambrosiën, *Fragm.* 36, ed. Didot. Ephorus treated him as having been a pupil of the Iliac Dactyls of Phrygia (see Diodôr. v. 64), and as having learnt from them his *καλὴν καὶ μυστήρια*, which he was the first to introduce into Greece. The earliest mention which we find of Orpheus, is that of the poet Ibykus (about a.c. 580), *δομικὸν δὲ Ὀρφεῖ*. *Ibyc. Fragm.* 9, p. 341, ed. Schneidewin.

<sup>1</sup> Pausan. viii. 37, 3. *Τῶντοι δὲ πρῶτος ἐκ τούτων ἐσθλόμενος Ὀρφεύς, θεοὺς εἶναι σφῶν ὅσα καὶ καλεώμεθα Τυτάρων· καὶ ἔστιν ἐκ τούτων ἕως τοῦ παρὰ δὲ Ὀμήρου Ὀνομασμένοι, παραλαβὴν τῶν Τυτῶν τὴν ἑσθίαν, ἀποκρίναι τὴν συνθήκην ἔργων, καὶ εἶναι τῶν Τυτῶν καὶ ἀντίον τῶν τοῦ ἑσθίαν ἀποκρίναι ἀποκρίναι.* Both the date, the character, and the function of Onomakritus are distinctly marked by Herodotus, vi. 6.

<sup>2</sup> Herodotus believed in the derivation both of the Orphic and Pythagorean regulations from Egypt—*ἐκλεγεμέναι δὲ τούτων οὐκ Ὀρφεύου ἀποκρίναι καὶ Πυθαγόρου, ἀλλὰ δὲ Λιβυγενέων* (i. 1). He

character) represent facts of importance in the history of the Grecian mind—the gradual influx of Thracian, Phrygian, and Egyptian, religious ceremonies and feelings, and the increasing diffusion of special mysteries<sup>1</sup>, schemes for religious purification, and orgies (I venture to anglicise the Greek word, which contains in its original meaning no implication of the ideas of excess to which it was afterwards diverted) in honour of some particular god—distinct both from the public solemnities and from the gentile solemnities of primitive Greece,—celebrated apart from the citizens generally, and approachable only through a certain course of preparation and initiation—sometimes even forbidden to be talked of in the presence of the uninitiated, under the severest threats of divine judgement. Occasionally such voluntary combinations assumed the form of permanent brotherhoods, bound together by periodical solemnities, as well as by vows of

knows the names of those Greeks who have borrowed from Egypt the doctrine of the metempsychosis, but he will not mention them (ii. 123); he can hardly allude to any one but the Pythagoreans, many of whom he probably knew in Italy. See the curious extract from Xenophanes respecting the doctrine of Pythagoras, *Diogen. Laert.* viii. 37; and the quotation from the *Silli* of Timon, *Περὶ τῶν ἀποδείξεων τῆς ἀθανάτου ψυχῆς*, &c. Compare *Plutarch* in *Vit. Pythag.* c. 31.

The same general contrast is to be found in *Plutarch*, *Prolegomena*, p. 316; the opinion of *Plutarch*, ix. 20, 4. The poems of *Moschos* seem to have borne considerable analogy to the *Melampodic* attributed to *Homer* (see *Plutarch*, *Alcibiades*, vi. p. 621), and healing charms are ascribed to *Orpheus* as well as to *Moschos*. See *Plutarch*, *Alcibiades*, 1046.

an ascetic character: thus the Orphic life (as it was called) or regulation of the Orphic brotherhood, among other injunctions partly arbitrary and partly abstinent, forbade animal food universally, and on certain occasions, the use of woollen clothing<sup>1</sup>. The great religious and political fraternity of the Pythagoreans, which acted so powerfully on the condition of the Italian cities, was one of the many manifestations of this general tendency, which stands in striking contrast with the simple, open-hearted, and demonstrative worship of the Homeric Greeks.

Festivals at seed-time and harvest—at the vintage and at the opening of the new wine—were doubtless coeval with the earliest habits of the Greeks; the latter being a period of unusual joviality. Yet in the Homeric poems, Dionysos and Démêter, the patrons of the vineyard and the corn-field, are seldom mentioned, and decidedly occupy little place in the imagination of the poet as compared with the other gods: nor are they of any conspicuous importance even in the Hesiodic Theogony. But during the interval between Hesiod and Onomakritos, the revolution in the religious mind of Greece was such as to place both these deities in the front rank. According to the Orphic doctrine, Zagreus, son of Persephonê, is destined to be the successor of Zeus, and although the violence of the Titans intercepts this lot, yet even when he rises again from his discription under the name of Dionysos, he is the colleague and co-equal of his divine father.

Especially in regard to the worship of Démêter and Dionysos.

This remarkable change, occurring as it did during the sixth and a part of the seventh century before the Christian era, may be traced to the influence of communication with Egypt (which only became fully open to the Greeks about B.C. 660), as well as with Thrace, Phrygia, and Lydia. From hence new religious ideas and feelings were introduced, which chiefly attached themselves to the characters of Dionysos and Dêmêter. The Greeks identified these two deities with the great Egyptian Osiris and Isis, so that what was borrowed from the Egyptian worship of the two latter naturally fell to their equivalents in the Grecian system<sup>1</sup>. Moreover the worship of Dionysos (under what name cannot be certainly made out) was indigenous in Thrace<sup>2</sup>, as that of the Great Mother was in Phrygia, and in Lydia—together with those violent ecstasies and manifestations of temporary frenzy, and that clashing of noisy instruments, which we find afterwards characterizing it in Greece. priated to the worship of Dionysos, which contrasted so pointedly with the quiet solemnity of the Pæan addressed to Apollo—were all originally Phrygian.

From all these various countries, novelties, unknown to the Homeric men, found their way into the Grecian worship: and there is one amongst them which deserves to be specially noticed, because it marks the generation of the new class of ideas in their theology. Homer mentions many persons guilty of private or involuntary homicide, and compelled either to go into exile or to make pecuniary satisfaction; but he never once describes any of them to have either received or required purification for the crime<sup>1</sup>. Now in the times subsequent to Homer, purification for homicide comes to be considered as indispensable: the guilty person is regarded as unfit for the society of man or the worship of the gods until he has received it, and special ceremonies are prescribed whereby it is to be administered. Herodotus tells us that the ceremony of purification was the same among the

The complete and intimate manner in which Euripides identifies the Bacchic rites of Dionysus with the Phrygian ceremonies in honour of the Great Mother, is very remarkable. The fine description given by Lucrætiæ (*li. 683-660*) of the Phrygian worship is much enriched by his unattainable allegorizing.

Lydians and among the Greeks<sup>1</sup>: we know that it formed no part of the early religion of the latter, and we may perhaps reasonably suspect that they borrowed it from the former. The oldest instance known to us of expiation for homicide was contained in the epic poem of the Milesian Arktinus<sup>2</sup>, wherein Achillès is purified by Odysseus for the murder of Thersitès: several others occurred in the later or Hesiodic epic—Héraklès, Péleus, Bellerophôn, Alkmæôn, Amphiktyôn, Præmander, Triopas,—from whence they probably passed through the hands of the logographers to Apollodôrus, Diodôrus, and others<sup>3</sup>. The purification of the murderer was originally operated, not by the hands of any priest or specially sanctified man, but by those of a chief or king, who goes through the appropriate ceremonies in the manner recounted by Herodotus in his pathetic narrative respecting Croesus and Adrastus.

<sup>1</sup> Herodot. i. 35—ἐστὶ δὲ παλαιὰ καὶ ἡ εὐθύσις τοῖσι Λυδοῖσι καὶ τοῖσι Ἕλλησι. One remarkable proof, amongst many, of the deep hold which this idea took of the greatest minds in Greece, that serious mischief would fall upon the community if family quarrels or homicide remained without religious expiation, is to be found in the objections which Aristotle urges against the community of women proposed in the Platonic Republic. It could not be known what individuals stood in the relation of father, son or brother: if, therefore, wrong or murder of kindred should take place, the appropriate religious atonements (αἱ ἐπιτάξεις ἁλώσις) could not be applied, and the crime would go unpunished. religious ceremonies as a means of removing it, appears thus to have got footing in Grecian practice subsequent to the time of Homer. The peculiar rites or orgies, composed or put together by Onomakritus, Methapus<sup>1</sup>, and other men of more than the ordinary piety, were founded upon a similar mode of thinking and adapted to the same mental exigencies. They were voluntary religious manifestations, superinduced upon the old public sacrifices of the king or chiefs on behalf of the whole society, and of the father on his own family hearth. They marked out the details of divine service proper to appease or gratify the god to whom they were addressed, and to procure for the believers who went through them his blessings and protection here or hereafter—the exact performance of the divine service in all its specialty was held necessary, and thus the priests or Hierophants, who alone were familiar with the ritual, acquired a commanding position<sup>2</sup>. Generally speaking, these peculiar orgies obtained their admission and

The minds of men were prone to the belief that what they were suffering arose from the displeasure of some of the gods, and as they found that the ordinary sacrifices and worship were insufficient for their protection, so they grasped at new suggestions proposed to them with the view of regaining the divine favour<sup>1</sup>. Such suggestions were more usually copied, either in whole or in part, from the religious rites of some foreign locality, or from some other portion of the Hellenic world; and in this manner many new sects or voluntary religious fraternities, promising to relieve the troubled conscience and to reconcile the sick or suffering with the offended gods, acquired permanent establishment as well as considerable influence. They were generally under the superintendence of hereditary families of priests, who imparted the rites of confirmation and purification to communicants generally; no one who went through the prescribed ceremonies being excluded. In many cases, such ceremonies fell into the hands of jugglers, who volunteered their services to wealthy men, and degraded their profession as well by obtrusive venality as by extravagant promises<sup>2</sup>: sometimes the

price was lowered to bring them within reach of the poor and even of slaves. But the wide diffusion, and the number of voluntary communicants of these solemnities, proves how much they fell in with the feeling of the time and how much respect they enjoyed—a respect, which the more conspicuous establishments, such as Eleusis and Samothrace, maintained for several centuries. And the visit of the Kretan Epimenides to Athens—in the time of Solon, and at a season of the most serious disquietude and dread of having offended the gods—illustrates the tranquillizing effect of new orgies<sup>1</sup> and rites of absolution, when enjoined by a man standing high in the favour of the gods and reputed to be the son of a nymph. To the same age belong the *χρημῶν* and *καθάρσις* of Abaris and his marvellous journey through the air upon an arrow (Herodot. iv. 36).

of Greece.

Amongst the special rites and orgies of the character just described, those which enjoyed the greatest Pan-Hellenic reputation were attached to the Idæan Zeus in Krète, to Démêtêr at Eleusis, to the Kabeiri in Samothrace, and to Dionysos at Delphi and Thebes<sup>1</sup>. That they were all to a great degree analogous, is shown by the way in which they unconsciously run together and become confused in the minds of various authors: the ancient inquirers themselves were unable to distinguish one from the other, and we must be content to submit to the like ignorance. But we see enough to satisfy us of the general fact, that during the century and a half which elapsed between the opening of Egypt to the Greeks and the commencement of their struggle with the Persian kings, the old religion was largely adulterated by importations from Egypt, Asia Minor<sup>2</sup>, and Thrace.

Greece (Strabo, i. p. 474; Diogen. Laërt. i. 10). Among the poems ascribed to Hesiod were composed not only the *Métempsuchon*, but also *dey pnyon* and *egyptiaca dei ripueris*. Pausan. ix. 31. 4.

<sup>1</sup> Among other illustrations of this general resemblance, some have counted an epiphany of Kallimachos upon an aged priestess, who passed from the service of Démêtêr to that of the Kabeiri, then to that of Cybele, having the superintendence of many young women. The rites grew to be more furious and ecstatic, exhibiting the utmost excitement, bodily as well as mental: the legends became at once more coarse, more tragical, and less pathetic. The manifestations of this frenzy were strongest among the women, whose religious susceptibilities were often found extremely unmanageable<sup>1</sup>, and who had everywhere congregative occasional ceremonies of their own, apart from the men—indeed, in the case of the colonists; especially of the Asiatic colonists, the women had been originally women of the country, and as such retained to a great degree their non-Hellenic manners and feelings<sup>2</sup>. original sentiment of the worship of Demons (wholly or partially bad, and intermediate between gods and men), and their religious ceremonies as of a corresponding character: the Greeks were borrowers from them, according to him, both of the doctrine and of the ceremonies.

<sup>1</sup> Strabo, vii. p. 227. *Ἄνθρωποι γὰρ τῆς διακολομένης ἀρχαίας αἰῶνος τῶν γυναικῶν αἰσῆται δὲ καὶ τοῖς θεοῖς ἀποσπασθέντες ἐκ τῆς ἐνὶ πόλει ἐπιεικείας τῶν θεῶν, καὶ ἐνθῆραι, καὶ νόστιμα ποιεῖν. Plato (The Legg. ii. pp. 180, 210) takes great pains to restrain this tendency on the part of sick or suffering persons, especially women, to introduce new sacred rites into his city.*

<sup>2</sup> Herodot. i. 146. The wives of the Ionic original settlers at Miletus were Karian women, whose husbands they slew.

The violence of the Karian worship are attested by what Herodotus says of the Karian residents in Egypt, at the festival of Isis at Busiris. The Egyptians at this festival manifested their feeling by beating themselves, the Karians by cutting their faces with knives (ii. 61). The Karian *palora* became proverbial for funeral wailings (Plato, Legg. vii. p. 800); the unmeasured effusions and demonstrations of sorrow for the departed, sometimes accompanied with cutting and mutilation self-inflicted by the mourner, was a distinguishing feature in Asiatic and Egyptian as compared with Greek. Plutarch, *Comelatus ad Apollon.* c. 22, p. 123. Mourning feeling was, in fact, a sort of desecration of the genuine and primitive Greek festival, which was a season of cheerful harmony and social enjoyment, wherein the god was believed to sympathise (*σὺναισθεῖν*). nysos<sup>1</sup>, whom the legends described as clothed in feminine attire, and leading a troop of frenzied women, inspired a temporary ecstasy, and those who resisted the inspiration, being supposed to disobey his will, were punished either by particular judgments or by mental terrors; while those who gave full loose to the feeling, in the appropriate season and with the received solemnities, satisfied his exigencies, and believed themselves to have procured immunity from such disquietudes for the future<sup>2</sup>. Crowds of women, clothed with fawn-skins and bearing the sanctified thyrsus, flocked to the solitudes of Parnassus, or Kitharrôn, or Taygetus, during the consecrated triennial period, passed the night there with torches, and abandoned themselves to demonstrations of frantic excitement, with dancing and clamorous invocation of the god: they were said to tear animals limb from limb, to devour the raw flesh, and to cut themselves without feel-

ness, in so far as they refer to the festivals of Greece, apply to the foreign importations, not to the native character, of Grecian worship.

<sup>1</sup> The Lydian Hérahle was conceived and worshiped as a man in female attire; this idea occurs often in the Asiatic religions. Plato (*Lagg.* vii. p. 780) gives a similar theory of the healing effect of the Korybantic rites, which cured vagus and insupportable terrors of the mind by means of dancing and music conjoined with religious ceremonies—*καὶ τὰ τῶν Κερκυβάντων θιάσματα τελούμενα* (the practitioners were women), *αὐτὰς τῶν ἐκτρώσεως μαχρίναι δύναιτο*—*ὃ τῶν ἑλθεῖν αὐταῖς κύματα τρομακτικώτατα τῶν ἐνθάδε φύσεως ὄντων καὶ παντὸς κύματος—ἀρχαῖον αὐτὰς καὶ ἀνιδρωμένους μετὰ θεῶν, οἷον ὅτι καλλοκρηπύνας ἐκιδρωμένους θύσαντες, ἀντιπρὸςθεον ἀντιπρὸςθεον ἦσαν ἐκτρώσαντες ὅσους ἐκτρώσαντες ἔγχεον.*

ing the wound<sup>1</sup>. The men yielded to a similar impulse by noisy revels in the streets, sounding the cymbals and tambourine, and carrying the image of the god in procession<sup>2</sup>. It deserves to be remarked that the Athenian women never practised these periodical mountain excursions, so common among the rest of the Greeks: they had their feminine solemnities of the Thesmophoria<sup>3</sup>, mournful in their character and accompanied with fasting, and their separate congregations at the temples of Aphrodite, but without any extreme or unseemly demonstrations. The state festival of the Dionysia, in the city of Athens, was celebrated with dramatic entertainments, and the once rich harvest of Athenian tragedy and comedy was thrown up under its auspices. The ceremonies of the Kurætes in Krête, originally armed dances in honour of the Idæan Zeus, seem also to have borrowed from Asia so much of fury, of self-infliction, and of mysticism, that they became at last inextricably confounded with the Phrygian Korybantes or worshipers of the Great Mother; though it appears that Grecian

Thracian  
and Egypt-  
ian influ-  
ence upon  
Greece.

The influence of the Thracian religion upon that of the Greeks cannot be traced in detail, but the ceremonies contained in it were of a violent and fierce character, like the Phrygian, and acted upon Hellas in the same general direction as the latter. And the like may be said of the Egyptian religion, which was in this case the more operative, inasmuch as all the intellectual Greeks were naturally attracted to go and visit the wonders on the banks of the Nile; the powerful effect produced upon them is attested by many evidences, but especially by the interesting narrative of Herodotus. Now the Egyptian ceremonies were at once more licentious, and more profuse in the outpouring both of joy and sorrow, than the Greek<sup>1</sup>; but a still greater difference sprang from the extraordinary power, separate mode of life, minute observances, and elaborate organisation, of the priesthood. The ceremonies of Egypt were multitudinous, but the legends concerning them were framed by the priests, and as a general rule, seemingly, known to the priests alone: at least they were not intended to be publicly talked of, even by pious men. They were "holy stories," which it was sacrilege publicly to mention, and which from this very prohibition only took firmer hold of the minds of the Greek visitors who heard them. And thus the element of secrecy and mystic silence—foreign

<sup>1</sup> "Egyptiorum munus fere plangendum gerunt, Græci plerumque choris, lachryis autem streptu cytharistarum et tympanistarum et choralium." (Apuleius. De Genio Socratis, i. li. p. 149, Oxford.)

to Homer, and only faintly glanced at in Hesiod—if it was not originally derived from Egypt, at least received from thence its greatest stimulus and diffusion. The character of the legends themselves was naturally affected by this change from publicity to secrecy: the secrets when revealed would be such as to justify by their own tenor the interdict on public divulgation: instead of being adapted, like the Homeric mythe, to the universal sympathies and hearty interest of a crowd of bearers, they would derive their impressiveness from the tragical, mournful, extravagant, or terror-striking character of the incidents<sup>1</sup>. Such a tendency, which appears explicable and probable even on general grounds, was in this particular case rendered still more certain by the coarse taste of the Egyptian priests: That any recondite doctrine, religious or philosophical, was attached to the mysteries or contained in the holy stories, has never been shown, and is to the last degree improbable, though the affirmative has been asserted by many learned men.

Herodotus seems to have believed that the worship and ceremonies of Dionysos generally were derived by the Greeks from Egypt, brought over by Kadmos and taught by him to Melampus: and the latter appears in the Hesiodic Catalogue as

<sup>1</sup> The legend of Dionysos and Prosymnos, as it stands in Clemens, would never have found place in an epic poem (Admonit. ad Gent. p. 22, Sylb.). Compare page 14 of the same work, where however he so confounds together Phrygian, Bacchic, and Eleusinian mysteries, that we cannot distinguish them apart.

The author called Demetrius Phalereus says about the legends belonging to these circumstances—*Δὲ μὲν ὁ πρῶτος λόγος ἐν ἀλλοτρίοις ἀπὸ τοῦ Σειθίου καὶ ὁ δεύτερος διὰ τοῦ Ἰσχυρίου καὶ τοῦ Ἰσχυρίου*. (De Interpretatione, c. 101.)

having cured the daughters of Prætus of the mental distemper, with which they had been smitten by Dionysos for rejecting his ritual. He cured them by introducing the Bacchic dance and fanatical excitement: this mythical incident is the most ancient mention of the Dionysiac solemnities presented in the same character as they bear in Euripides. It is the general tendency of Herodotus to apply the theory of derivation from Egypt far too extensively to Grecian institutions: the orgies of Dionysos were not originally borrowed from thence, though they may have been much modified by connection with Egypt as well as with Asia. The remarkable mythe composed by Onomakritus respecting the dismemberment of Zagreus was founded upon an Egyptian tale very similar respecting the body of Osiris, who was supposed to be identical with Dionysos<sup>1</sup>: nor was it unsuitable to the reckless fury of the Bacchanals during their state of temporary excitement, which found a still more awful expression in the mythe of Pentheus, — torn in pieces by his own mother Agavè at the head of her companions in the ceremony, as an intruder upon the feminine rites as well as a scoffer at the god<sup>2</sup>. A passage in the *Iliad* (the authenticity

<sup>1</sup> See the curious treatise of Plutarch, *De Isid. et Osirid.* c. 11–14, p. 366, and his elaborate attempt to allegorise the legend. See Prægus. 84. from one of his lost works, tom. v. p. 291. ed. Wyttich.

<sup>2</sup> Aeschylus had dramatised the story of Pentheus as well as that of Lykurgos: one of his tetralogies was the *Lykurgos* (Gudolf, *Aesch.* Prægus. 113). A short allusion to the story of Pentheus appears in *Eumenid.* 25. Compare Sophokl. *Antigon.* 285, and the Scholia.

The mythical Thracian Orpheus was attached as Eponymos to a new sect, who seem to have celebrated the ceremonies of Dionysos with peculiar care, minuteness and fervour, besides observing various rules in respect to food and clothing. It was the opinion of Herodotus, that these rules, as well as the Pythagorean, were borrowed from Egypt. But whether this be the fact or not, the Orphic brotherhood is itself both an evidence, and a cause, of the increased importance of the worship of Dionysos, which indeed is attested by the great dramatic poets of Athens.

The Homeric Hymns present to us, however, the religious ideas and legends of the Greeks at an earlier period, when the enthusiastic and mystic tendencies had not yet acquired their full development. dence of Egyptian, Asiatic, or Thracian adulterations. The difference is striking between the god Dionysos as he appears in the Homeric hymn and in the *Bacchæ* of Euripides. The hymnographer describes him as standing on the sea-shore, in the guise of a beautiful and richly-clothed youth, when Tyrrhenian pirates suddenly approach: they seize and bind him and drag him on board their vessel. But the bonds which they employ burst spontaneously, and leave the god free. The steersman, perceiving this with affright, points out to his companions that they have unwittingly laid hands on a god,—perhaps Zeus himself, or Apollo, or Poseidon. He conjures them to desist, and to replace Dionysos respectfully on the shore, lest in his wrath he should visit the ship with wind and hurricane: but the crew deride his scruples, and Dionysos is carried prisoner out to sea with the ship under full sail. Miraculous circumstances soon attest both his presence and his power. Sweet-scented wine is seen to flow spontaneously about the ship, the sail and mast appear adorned with vine- and ivy-leaves, and the oar-pegs with garlands. The terrified crew now too late entreat the helmsman to steer his course for the shore, and crowd round him for protection on the poop. But their destruction is at hand: Dionysos assumes the form of a lion—a bear is seen standing near him—this bear rushes with a loud roar upon the captain, while the crew leap overboard in their agony of fright, and are changed into dolphins. There remains none but the discreet and pious steersman, to whom Dionysos addresses words of affectionate encou-

agement, revealing his name, parentage, and dignity<sup>1</sup>.

This hymn, perhaps produced at the Naxian festival of Dionysos, and earlier than the time when the dithyrambic chorus became the established mode of singing the praise and glory of that god, is conceived in a spirit totally different from that of the Bacchic Teletæ, or special rites which the Bacchæ of Euripidès so abundantly extol,—rites introduced from Asia by Dionysos himself at the head of a thiasus or troop of enthusiastic women,—inflaming with temporary frenzy the minds of the women of Thebes,—not communicable except to those who approach as pious communicants,—and followed by the most tragical results to all those who fight against the god<sup>2</sup>. The Bacchic Teletæ, and the Bacchic feminine frenzy, were importations from abroad, as Euripidès represents them, engrafted upon the joviality of the primitive Greek Dionysia; they

*Alteration of the primitive Grecian idea of Dionysos.*

<sup>1</sup> See Homer, Hymn 5, *Διονύσου ἡ Ἀφροίτη*.—The satirical drama of Euripidès, the *Cyclus*, extends and alters this old legend. Dionysos is carried away by the Tyrrhenian pirates, and Silenus at the head of the Bacchantes goes everywhere in search of him (*Har. Cyr.* 112). The pirates are instigated against him by the hatred of Hère, which appears frequently as a cause of mischief to Dionysos (*Bacchæ*, 246). Hère in her anger had driven him mad when a child, and he had wandered in this state over Egypt and Syria; at length he came to Cybela in Phrygia, was purified (*καθάρσει*) by Rhea, and recovered from her female attire (*Ἀπολλοδ.* iii. 4, 1, with Heyne's note). This seems to have been the legend adopted to explain the old verse of the *Iliad*, as well as the maddening attributes of the god generally.

There was a standing antipathy between the priestesses and the religious establishments of Hère and Dionysos (*Plutarch*, *Ἐπὶ τῷ τῷ Μαρτυρίᾳ Διόδοτου*, c. 2, tom. v. p. 765, ed. Wyt.). Plutarch ridicules the legendary reason commonly assigned for this, and provides a symbolical explanation which he thinks very satisfactory.

<sup>2</sup> Eurip. *Bacch.* 325, 464, &c.

were borrowed, in all probability, from more than one source and introduced through more than one channel, the Orphic life or brotherhood being one of the varieties. Strabo ascribes to this latter a Thracian original, considering Orpheus, Musæus, and Eumolpus as having been all Thracians<sup>1</sup>. It is curious to observe how, in the *Bacchæ* of Euripides, the two distinct and even conflicting ideas of Dionysos come alternately forward; sometimes the old Grecian idea of the jolly and exhilarating god of wine—but more frequently the recent and imported idea of the terrific and irresistible god who unseats the reason, and whose *ustrus* can only be appeased by a willing, though temporary obedience. In the fanatical impulse which inspired the votaries of the Asiatic Rhea or Cybelê, or of the Thracian Kotys, there was nothing of spontaneous joy; it was a sacred madness, during which the soul appeared to be surrendered to a stimulus from without, and accompanied by preternatural strength and temporary sense of power<sup>2</sup>,—altogether distinct from the

Asiatic frenzy grafted on the joviality of the Grecian Dionysus.

<sup>1</sup> Strabo, x. p. 471. Compare Aristot. *Or.* iv. p. 28.

<sup>2</sup> In the *lost Naxos* of Euripides, in which seems to have been included the tale of Pentheus, the goddess Ariadne was introduced, stimulating the Bacchæ, and creating in them spasmodic excitement from head to foot: *ἀνὰ κράτος ἴδωμεν Ἰερινέρον σπασμωδικὸν αἷμα ὑπὲρ αἵμα, &c.* (Fragm. 155, Dindorf.) His tragedy called *Edoni* also gave a terrific representation of the Bacchantes and their fury, exaggerated by the maddening music: *Μυρδονοὶ μέλαι, Μαρὶν ἐκσπυρὶν ἠχολαῖοι* (Fr. 64).

Such also is the reigning sentiment throughout the greater part of the *Bacchæ* of Euripides; it is brought out still more impressively in the mournful *Alys* of Catullus:—

*Dea magna, Dea Cybele, Dindymi Dea, Domum.*

*Preceat a me non tuus sit furor omnis, heu, domus!*

*Alius age incitatus, alius age tribules!*"

We have only to compare this fearful influence with the description

unrestrained hilarity of the original Dionysia, as we see them in the rural demes of Attica, or in the gay city of Tarentum. There was indeed a side on which the two bore some analogy, inasmuch as, according to the religious point of view of the Greeks, even the spontaneous joy of the vintage-feast was conferred by the favour and enlivened by the companionship of Dionysos. It was upon this analogy that the framers of the Bacchic orgies proceeded; but they did not the less disfigure the genuine character of the old Grecian Dionysia.

Dionysos is in the conception of Pindar the Paredros or companion in worship of Demêter<sup>1</sup>. The worship and religious estimate of the latter has by that time undergone as great a change as that of the former, if we take our comparison with the brief description of Homer and Hesiod: she has

of Dikæspolis and his exuberant joviality in the festival of the rural Dionysia (Aristoph. *Acharn.* 1051 seq.; see also *Plat. Legg.* i. p. 687), to see how completely the foreign imitations recoloured the old Grecian Dionysia, — *Διονύσου πολυγύφτου*; — who appears also in the scene of *Dionysos* and *Ariadne* in the *Symposium* of Xenophon, c. 9. The simplicity of the ancient Dionysiac processions is dwelt upon by Plutarch, *De Capulino Divitiarum*, p. 627; and the original dithyramb addressed by Archilochos to Dionysos is an effusion of drunken hilarity (*Archiloch. Frag.* 69, Schuud.).

<sup>1</sup> Pindar, *Isthm.* vi. 3. *ῥαδιμαγμένην ἐνὶ πόλει Διμήτρεσσι*, — the epithet marks the approximation of Demêter to the Mother of the Gods, ἡ ἑσπέραιος κοίτης τ' ἐστὶν, οὐκ ἔστι θεῶν αἰθέρος ἑστία (Homer, *Hyman.* xii.), — the Mother of the Gods was worshipped by Pindar himself along with Pan: she had in his time her temple and ceremonies at Thèbes (*Pyth.* iii. 78; *Frug.* *Dithyr.* 3, and the *Scholia ad l.*) as well as, probably, at Athens (*Pausan.* i. 3. 3).

Dionysos and Demêter are also brought together in the chorus of Sophocles, *Antigonè*, 1072 *ῥαδιμαγμένην* *Ἐλευσινίαν* *ἑστίαν* *ἡ* *κοίτην*; and in Kallimachos, *Hyman. Chref.* 70. *Βακχίαν* or *Dionυσίαν* are in the Attic tragedians constantly commended with the *Demêtrian* *ἐσθλόν*, originally so different, — a permutation of the *ἑσθλόν* *κοίτην* *ἐσθλόν* by the *ἑσθλόν* *κοίτην* *ἐσθλόν*. See Strabo, x. p. 465.

acquired<sup>1</sup> much of the awful and soul-disturbing attributes of the Phrygian Cybelê. In Homer Dêmêtêr is the goddess of the corn-field, who becomes attached to the mortal man Jasîôn; an unhappy passion, since Zeus, jealous of the connection between goddesses and men, puts him to death. In the Hesiodic Theogony, Dêmêtêr is the mother of Persephonê by Zeus, who permits Hadês to carry off the latter as his wife; moreover Dêmêtêr has, besides, by Jasîôn a son called Plutos, born in Krête. Even from Homer to Hesiod, the legend of Dêmêtêr has been expanded and her dignity exalted; according to the usual tendency of Greek legend, the expansion goes on still further. Through Jasîôn, Dêmêtêr becomes connected with the mysteries of Samothrace; through Persephonê, with those of Eleusis. The former connection it is difficult to follow out in detail, but the latter is explained and traced to its origin in the Homeric Hymn to Dêmêtêr.

Eleusinian  
mysteries.

Though we find different statements respecting the date as well as the origin of the Eleusinian mysteries, yet the popular belief of the Athenians, and the story which found favour at Eleusis, ascribed them to the presence and dictation of the goddess Dêmêtêr herself; just as the Bacchic rites are, according to the Bacchæ of Euripidês, first communicated and enforced on the Greeks by the personal visit of Dionysos to Thêbes, the metropolis of the Bacchic ceremonies<sup>2</sup>. In the Eleusinian

<sup>1</sup> Euripidês in his *Thorns in the Helens* (1320 seq.) assigns to Dêmêtêr all the attributes of Rhea, and blends the two completely into one.

legend, preserved by the author of the Homeric Hymn, she comes voluntarily and identifies herself with Eleusis; her past abode in Krète being briefly indicated<sup>1</sup>. Her visit to Eleusis is connected with the deep sorrow caused by the loss of her daughter Persephonê, who had been seized by Hadês, while gathering flowers in a meadow along with the Oceanic Nymphs, and carried off to become his wife in the under-world. In vain did the reluctant Persephonê shriek and invoke the aid of her father Zeus: he had consented to give her to Hadês, and her cries were heard only by Hekatê and Hêlios. Dêmêtêr was inconsolable at the disappearance of her daughter, but knew not where to look for her: she wandered for nine days and nights with torches in search of the lost maiden without success. At length Hêlios, the "spy of Gods and men," revealed to her, in reply to her urgent prayer, the rape of Persephonê, and the permission given to Hadês by Zeus. Dêmêtêr was smitten with anger and despair: she renounced Zeus and the society of Olympus, abstained from nectar and ambrosia, and wandered on earth in grief and fasting until her form could no longer be known. In this condition she came to Eleusis, then governed by the prince Keleos. Sitting down by a well at the wayside in the guise of an old woman, she was found by the daughters of Keleos, who came thither with their pails of brass for water. In reply to their questions, she told them that she had been

brought by pirates from Krête to Thorikos, and had made her escape: she then solicited from them succour and employment as a servant or as a nurse. The damsels prevailed upon their mother Metaneira to receive her, and to entrust her with the nursing of the young Dêmophoôn, their late-born brother, the only son of Keleos. Dêmêtêr was received into the house of Metaneira, her dignified form still borne down by grief: she sat long silent and could not be induced either to smile or to taste food, until the maid-servant Iambê, by jests and playfulness, succeeded in amusing and rendering her cheerful. She would not taste wine, but requested a peculiar mixture of barley-meal with water and the herb mint<sup>1</sup>.

The child Dêmophoôn, nursed by Dêmêtêr, thrived and grew up like a god, to the delight and astonishment of his parents: she gave him no food, but anointed him daily with ambrosia, and plunged him at night in the fire like a torch, where he remained unburnt. She would have rendered him immortal had she not been prevented by the indiscreet curiosity and alarm of Metaneira, who secretly looked in at night, and shrieked with horror at the sight of her child in the fire<sup>2</sup>. The indignant goddess, setting the infant on the ground, now revealed her true character to Metaneira: her wan and aged look disappeared, and she stood confirst in the genuine majesty of her divine shape, diffusing a dazzling brightness which illuminated the whole

house. "Foolish mother," she said, "thy want of faith has robbed thy son of immortal life. I am the exalted Dêmêtêr, the charm and comfort both of gods and men: I was preparing for thy son exemption from death and old age; now it cannot be but he must taste of both. Yet shall he be ever honoured, since he has sat upon my knee, and slept in my arms. Let the people of Eleusis erect for me a temple and altar on yonder hill above the fountain: I will myself prescribe to them the orgies which they must religiously perform in order to propitiate my favour<sup>1</sup>."

The terrified Metaneira was incapable even of lifting up her child from the ground: her daughters entered at her cries, and began to embrace and tend their infant brother, but he sorrowed and could not be pacified for the loss of his divine nurse. All night they strove to appease the goddess<sup>2</sup>.

Strictly executing the injunctions of Dêmêtêr, Keleos convoked the people of Eleusis and erected the temple on the spot which she had pointed out. It was speedily completed, and Dêmêtêr took up her abode in it,—apart from the remaining gods, still pining with grief for the loss of her daughter, and withholding her beneficent aid from mortals.

*Ὀψυα δ' αὖτ' ἐπεὶ ἐπαθήσασθαι, δὲ δὲ θεῶν  
ἐλέγχεσθαι ἔρδονεν: ἐπεὶ νόον Ὀδυσσεύς.*

The same story is told in regard to the infant Achilles. His mother Thetis was taking similar measures to render him immortal, when his father Pelus interfered and prevented the consummation. Thetis immediately left him in great wrath (*Apollon. Rhod.* iv. 546).

*εὐὲ δ' οὐ παύσασθαι θεῶν.  
Χαίρονται γὰρ ἐὼς μὲν ἔχουσ' ἑσθλὰν ἑλπίδα.*

And thus she remained a whole year,—a desperate and terrible year<sup>1</sup>: in vain did the oxen draw the plough, and in vain was the barley-seed cast into the furrow,—Démêtér suffered it not to emerge from the earth. The human race would have been starved and the gods would have been deprived of their honours and sacrifice, had not Zeus found means to conciliate her. But this was a hard task: for Démêtér resisted the entreaties of Iris and of all the other goddesses and gods whom Zeus successively sent to her. She would be satisfied with nothing less than the recovery of her daughter. At length Zeus sent Hermès to Hades, to bring Persephonê away: Persephonê joyfully obeyed, but Hades prevailed upon her before she departed to swallow a grain of pomegranate, which rendered it impossible for her to remain the whole year away from him<sup>2</sup>.

With transport did Démêtér receive back her lost daughter, and the faithful Hekaté sympathised in the delight felt by both at the reunion<sup>3</sup>. It was now an easier undertaking to reconcile her with the gods. Her mother Rhea, sent down expressly by Zeus, descended from Olympus on the fertile Rharian plain, then smitten with barrenness like the rest of the earth: she succeeded in appeasing the indignation of Démêtér, who consented again to put forth her relieving hand. The buried seed came up in abundance, and the earth was covered with fruit and flowers. She would have wished to retain Persephonê constantly with her, but

this was impossible; and she was obliged to consent that her daughter should go down for one-third of each year to the house of Hades, departing from her every spring at the time when the seed is sown. She then revisited Olympus, again to dwell with the gods; but before her departure, she communicated to the daughters of Keleos, and to Keleos himself, together with Triptolemus, Dioklès and Eumolpus, the divine service and the solemnities which she required to be observed in her honour<sup>1</sup>. And thus began the venerable mysteries of Eleusis, at her special command: the lesser mysteries, celebrated in February, in honour of Persephonè; the greater, in August, to the honour of Dêmêtêr herself. Both are jointly patronesses of the holy city and temple.

*Dêmêtêr

the mystic  
ritual of  
Eleusis.*

Such is a brief sketch of the temple legend of Eleusis, set forth at length in the Homeric Hymn to Dêmêtêr. It is interesting not less as a picture of the Mater Dolorosa (in the mouth of an Athenian, Dêmêtêr and Persephonè were always The Mother and Daughter, by excellence), first an agonised sufferer, and then finally glorified,—the weal and woe of man being dependent upon her kindly feeling,—than as an illustration of the nature and growth of Grecian legend generally. Though we now read this Hymn as pleasing poetry, to the Eleusinians, for whom it was composed, it was

genuine and sacred history. They believed in the visit of Dêmêtêr to Eleusis, and in the Mysteries as a revelation from her, as implicitly as they believed in her existence and power as a goddess. The Eleusinian psalmist shares this belief in common with his countrymen, and embodies it in a continuous narrative, in which the great goddesses of the place, as well as the great heroic families, figure in inseparable conjunction. Keleos is the son of the Eponymous hero Eleusis, and his daughters, with the old epic simplicity, carry their basons to the well for water. Eumolpus, Triptolemus, Dioklês, heroic ancestors of the privileged families who continued throughout the historical times of Athens to fulfil their special hereditary functions in the Eleusinian solemnities, are among the immediate recipients of inspiration from the goddess: but chiefly does she favour Metaneira and her infant son Dêmosthôn, for the latter of whom her greatest boon is destined, and intercepted only by the weak faith of the mother. Moreover every incident in the Hymn has a local colouring and a special reference. The well overshadowed by an olive-tree near which Dêmêtêr had rested, the stream Kallikhoras and the temple-hill, were familiar and interesting places in the eyes of every Eleusinian: the peculiar posset prepared from barley-meal with mint was always tasted by the Mysts (or communicants) after a prescribed fast, as an article in the ceremony,—while it was also the custom, at a particular spot in the processional march, to permit the free interchange of personal jokes and taunts upon individuals for the general amusement. And these

two customs are connected in the Hymn with the incidents, that Dēmêtêr herself had chosen the posset as the first interruption of her long and melancholy fast, and that her sorrowful thoughts had been partially diverted by the coarse playfulness of the servant-maid Iambê. In the enlarged representation of the Eleusinian ceremonies, which became established after the incorporation of Eleusis with Athens, the part of Iambê herself was enacted by a woman, or man in woman's attire, of suitable wit and imagination, who was posted on the bridge over the Kephissos, and addressed to the passers-by in the procession<sup>1</sup>, especially the great men of Athens, saucy jeers probably not less piercing than those of Aristophanês on the stage. The torch-bearing Hekatê received a portion of the worship in the nocturnal ceremonies of the Eleusinia: this too is traced, in the Hymn, to her kind and affectionate sympathy with the great goddesses.

Though all these incidents were sincerely believed by the Eleusinians as a true history of the past, and as having been the real initiatory cause of their own solemnities, it is not the less certain that they are simply mythes or legends, and not to be treated as history, either actual or exaggerated. They do not take their start from realities of the past, but from realities of the present, combined with retrospective feeling and fancy, which fills up the blank of the aforesaid in a manner at once plausible and

<sup>1</sup> Aristophanês, *Vesp.* 1363. *Busch. v. Trogus. Scythia, v. Trogus. pifor.* Compare also the details of the ceremony, *Clement Alexandr. Admon. ad Gent.* p. 13. A similar licence of unrestrained jocularity appears in the story of Dēmêtêr in Sicily (*Theodor. v. 4*); see also *Pausan. vi. 27. 4*), and in the worship of Demis and Auxesia at Egina (*Herodot. v. 83*).

impressive. What proportion of fact there may be in the legend, or whether there be any at all, it is impossible to ascertain and useless to inquire; for the story did not acquire belief from its approximation to real fact, but from its perfect harmony with Eleusinian faith and feeling, and from the absence of any standard of historical credibility. The little town of Eleusis derived all its importance from the solemnity of the *Dēmētria*, and the Hymn which we have been considering (probably at least as old as 600 a.c.) represents the town as it stood before its absorption into the larger unity of Athens, which seems to have produced an alteration of its legends and an increase of dignity in its great festival. In the faith of an Eleusinian, the religious as well as the patriotic antiquities of his native town were connected with this capital solemnity. The divine legend of the sufferings of *Dēmētēr* and her visit to Eleusis was to him that which the heroic legend of *Adrastus* and the *Siege of Thebes* was to a *Sikyonian*, or that of *Erechtheus* and *Athénē* to an *Athenian*—grouping together in the same scene and story the goddess and the heroic fathers of the town. If our information were fuller, we should probably find abundance of other legends respecting the *Dēmētria*: the *Gephyraei* of Athens, to whom belonged the celebrated *Harmodios* and *Aristogiton*, and who possessed special *Orgies* of *Dēmētēr the Sorrowful*, to which no man foreign to their *Gens* was ever admitted<sup>1</sup>, would doubtless have told stories not only different but contradictory; and even in other Eleusinian mythes we

discover Eumolpus as king of Eleusis, son of Poseidon, and a Thracian, completely different from the character which he bears in the Hymn before us<sup>1</sup>. Neither discrepancies nor want of evidence, in reference to alleged antiquities, shocked the faith of a non-historical public. What they wanted was a picture of the past, impressive to their feelings and plausible to their imagination: and it is important to the reader to remember, while he reads either the divine legends which we are now illustrating or the heroic legends to which we shall soon approach, that he is dealing with a past which never was present,—a region essentially mythical, neither approachable by the critic nor mensurable by the chronologer.

Different legends respecting Demeter elsewhere.

The tale respecting the visit of Démêtêr, which was told by the ancient Gens, called the Phytalids<sup>2</sup>, in reference to another temple of Démêtêr between Athens and Eleusis, and also by the Megarians in reference to a Démêtrion near their city, acquired under the auspices of Athens still further extension. The goddess was reported to have first communicated to Triptolemus at Eleusis the art of sowing corn, which by his intervention was disseminated all over the earth. And thus the Athenians took credit to themselves for having been the medium of communication from the gods to man of all the inesti-

<sup>1</sup> Pausan. i. 36, 3; Apollodôr. li. 15, 4. Heyne in his Note admits several persons named Eumolpus. Compare Isokrôtês, Panegyri. p. 55. Philochorus the Attic antiquary could not have received the legend of the Eleusinian Hymn, from the different account which he gave respecting the rape of Persephone (Philoch. Fragra. 46, ed. Dilôt), and also respecting Kekrops (Fr. 28, ibid.).

mable blessings of agriculture which they affirmed to have been first exhibited on the fertile Rharian plain near Eleusis. Such pretensions are not to be found in the old Homeric hymn. The festival of the Thesmophoria, celebrated in honour of *Dēmôtēr Thesmophoros* at Athens, was altogether different from the Eleusinia, in this material respect, as well as others, that all males were excluded, and women only were allowed to partake in it: the surname *Thesmophoros* gave occasion to new legends in which the goddess was glorified as the first authoress of laws and legal sanctions to mankind<sup>1</sup>. This festival for women apart and alone, was also celebrated at Thebes, at Paros, at Ephesus, and in many other parts of Greece<sup>2</sup>.

Altogether, *Dēmôtēr* and *Dionysos*, as the Grecian counterparts of the Egyptian *Isis* and *Osiris*, seem to have been the great recipients of the new sacred rites borrowed from Egypt, before the worship of *Isis* in her own name was introduced into Greece: their solemnities became more frequently reclusive and mysterious than those of the other deities. The importance of *Dēmôtēr* to the collective nationality of Greece may be gathered from the fact that her temple was erected at *Thermopylæ*, the spot where the *Amphiktyonic* assemblies were held, close by the temple of the Eponymous hero *Amphiktyôn* himself, and under the surname of the *Amphiktyonic Dēmôtēr*<sup>3</sup>.

We now pass to another and not less important celestial personage—Apollo.

The legends of Délos and Delphi, embodied in the Homeric Hymn to Apollo, indicate, if not a greater dignity, at least a more widely diffused worship, of that god than even of Démêtêr. The Hymn is, in point of fact, an aggregate of two separate compositions, one emanating from an Ionic bard at Délos, the other from Delphi. The first details the birth, the second the mature divine efficiency, of Apollo; but both alike present the unaffected charm as well as the characteristic peculiarities of Grecian mythical narrative. The hymnographer sings; and his hearers accept in perfect good faith, a history of the past; but it is a past, imagined partly as an introductory explanation to the present, partly as a means of glorifying the god. The island of Délos was the accredited birth-place of Apollo, and is also the place in which he chiefly delights, where the great and brilliant Ionic festival is periodically convened in his honour. Yet it is a rock narrow, barren and uninviting: how came so glorious a privilege to be awarded to it? This the poet takes upon himself to explain. Lêtô, pregnant with Apollo and persecuted by the jealous Hêrê, could find no spot wherein to give birth to her offspring. In vain did she address herself to numerous places in Greece, the Asiatic coast and the intermediate islands; all were terrified at the wrath of Hêrê, and refused to harbour her. As a last resort, she approached the rejected and repulsive island of Délos, and promised that if shelter were granted to her in her forlorn condi-

tion, the island should become the chosen resort of Apollo as well as the site of his temple with its rich accompanying solemnities<sup>1</sup>. Dêlos joyfully consented, but not without many apprehensions that the potent Apollo would despise her unworthiness, and not without exacting a formal oath from Lêtô, —who was then admitted to the desired protection, and duly accomplished her long and painful labour. Though Diônê, Rhea, Themis and Amphitritê came to soothe and succour her, yet Hêrê kept away the goddess presiding over childbirth, Eileithyia, and thus cruelly prolonged her pangs. At length Eileithyia came, and Apollo was born. Hardly had Apollo tasted, from the hands of Themis, the immortal food, nectar and ambrosia, when he burst at once his infant bands, and displayed himself in full divine form and strength, claiming his characteristic attributes of the bow and the harp, and his privileged function of announcing beforehand to mankind the designs of Zeus. The promise made by Lêtô to Dêlos was faithfully performed: amidst the numberless other temples and groves which men provided for him, he ever preferred that island as his permanent residence, and there the Ionians with their wives and children, and all their "bravery," congregated periodically from their different cities to glorify him. Dance and song and athletic contests adorned the solemnity, while the countless

<sup>1</sup> According to another legend, Lêtô was said to have been conveyed from the Hyperboreans to Dêlos in twelve days, in the form of a she-wolf, to escape the jealous eye of Hêrê. In connection with this legend, it was affirmed that the she-wolves always brought forth their young only during these twelve days in the year (Aristot. Hist. Animal. vi. 35).

ships, wealth, and grace of the multitudinous Ionians had the air of an assembly of gods. The Delian maidens, servants of Apollo, sang hymns to the glory of the god, as well as of Artemis and L    , intermingled with adventures of foregone men and women, to the delight of the listening crowd. The blind itinerant bard of Chios, (composer of this the Homeric hymn, and confounded in antiquity with the author of the *Iliad*) having found honour and acceptance at this festival, commends himself, in a touching farewell strain, to the remembrance and sympathy of the Delian maidens<sup>1</sup>.

But D     was not an oracular spot: Apollo did not manifest himself there as revealer of the futures of Zeus. A place must be found where this beneficent function, without which mankind would perish under the innumerable doubts and perplexities of life, may be exercised and rendered available. Apollo himself descends from Olympus to make choice of a suitable site: the hymnographer knows a thousand other adventures of the god which he might sing, but he prefers this memorable incident, the charter and patent of consecration for the Delphian temple. Many different places did Apollo inspect: he surveyed the country of the Magn    s and the Perrh    bians, came to I    kos, and passed over from thence to Eub    a and the plain of L    anton. But even this fertile spot did not please him: he crossed the Euripus to B    otia, passed by Teum    ssus and Mykal    ssus, and the then inaccessible and unoccupied forest on which the city of Th    bes afterwards stood. He

next proceeded to Onchêstos, but the grove of Poseidôn was already established there; next across the Kêphissus to Okalea, Haliartus, and the agreeable plain and much-frequented fountain of Delphusa, or Tilphusa. Pleased with the place, Apollo prepared to establish his oracle there, but Tilphusa was proud of the beauty of her own site, and did not choose that her glory should be eclipsed by that of the god<sup>1</sup>. She alarmed him with the apprehension that the chariots which contended in her plain, and the horses and mules which watered at her fountain would disturb the solemnity of his oracle; and she thus induced him to proceed onward to the southern side of Parnassus, overhanging the harbour of Krissa. Here he established his oracle, in the mountainous site not frequented by chariots and horses, and near to a fountain, which however was guarded by a vast and terrific serpent, once the nurse of the monster Typhadôn. This serpent Apollo slew with an arrow, and suffered its body to rot in the sun; hence the name of the place, Pythô<sup>2</sup>, and the surname of the Pythian Apollo. The plan of his temple being marked out, it was built by Trophônios and Agamêdês, aided by a crowd of forward auxiliaries from the neighbourhood. He now discovered with indignation, however, that Tilphusa had cheated him, and went back with swift step to resent it. "Thou shalt not thus," he said, "succeed in thy fraud and retain thy beautiful water: the glory of the place shall be mine, and not thine alone." Thus saying, he tumbled down a crag upon the fountain,

and obstructed her limpid current; establishing an altar for himself in a grove hard by near another spring, where men still worship him as Apollo Tilphusios, because of his severe vengeance upon the once beautiful Tilphusa<sup>1</sup>.

Apollo next stood in need of chosen ministers to take care of his temple and sacrifice, and to pronounce his responses at Pythô. Descrying a ship, "containing many and good men," bound on traffic from the Minoian Knossos in Krète, to Pylos in Peloponnêsus, he resolved to make use of the ship and her crew for his purpose. Assuming the shape of a vast dolphin, he splashed about and shook the vessel so as to strike the mariners with terror, while he sent a strong wind, which impelled her along the coast of Peloponnêsus into the Corinthian Gulf, and finally to the harbour of Krissa, where she ran aground. The affrighted crew did not dare to disembark: but Apollo was seen standing on the shore in the guise of a vigorous youth, and inquired who they were and what was their business. The leader of the Krétans recounted in reply their miraculous and compulsory voyage, when Apollo revealed himself as the author and contriver of it, announcing to them the honourable function and the dignified post to which he destined them<sup>2</sup>. They followed him by his orders to the rocky Pytho on Parnassus, singing the solemn Io-Paian such as it is sung in Krète, while the god himself marched at their head, with his fine form and lofty step, playing on the harp. He showed them the temple and site of the oracle, and directed them to worship him as Apollo

Dolphinios, because they had first seen him in the shape of a dolphin. "But how," they inquired, "are we to live in a spot where there is neither corn, nor vine, nor pasturage?" "Ye silly mortals," answered the god, "who look only for toil and privation, know that an easier lot is yours. Ye shall live by the cattle whom crowds of pious visitors will bring to the temple: ye shall need only the knife to be constantly ready for sacrifice. Your duty will be to guard my temple, and to officiate as ministers at my feasts: but if ye be guilty of wrong or insolence, either by word or deed, ye shall become the slaves of other men, and shall remain so for ever. Take heed of the word and the warning."

Such are the legends of Dêlos and Delphi, according to the Homeric Hymn to Apollo. The specific functions of the god, and the chief localities of his worship, together with the surnames attached to them, are thus historically explained, being connected with his past acts and adventures. Though these are to us only interesting poetry, yet to those who heard them sung they possessed all the requisites of history, and were fully believed as such; not because they were partially founded in reality, but because they ran in complete harmony with the feelings; and, so long as that condition was fulfilled, it was not the fashion of the time to canvass truth or falsehood. The narrative is purely personal, without any discernible symbolised doctrine

or allegory, to serve as a supposed ulterior purpose : the particular deeds ascribed to Apollo grow out of the general preconceptions as to his attributes, combined with the present realities of his worship. It is neither history nor allegory, but simple myth or legend.

The worship of Apollo is among the most ancient, capital, and strongly marked facts of the Grecian world, and widely diffused over every branch of the race. It is older than the *Iliad* or *Odyssey*, in the latter of which both Pytho and Délos are noted, though Délos is not named in the former. But the ancient Apollo is different in more respects than one from the Apollo of later times. He is in an especial manner the god of the Trojans, unfriendly to the Greeks, and especially to Achilles ; he has, moreover, only two primary attributes, his bow and his prophetic powers, without any distinct connection either with the harp, or with medicine, or with the sun, all which in later times he came to comprehend. He is not only, as Apollo Karueius, the chief god of the Doric race, but also (under the surname of Patrôus) the great protecting divinity of the gentile-tie among the Ionians<sup>1</sup> : he is moreover the guide and stimulus to Grecian colonization, scarcely any colony being ever sent out without encouragement and direction from the oracle at Delphi : Apollo Archêgetês is one of his great surnames<sup>2</sup>. His temple lends sanctity to the

meetings of the Amphiktyonic assembly, and he is always in filial subordination and harmony with his father Zeus: Delphi and Olympia are never found in conflict. In the *Iliad*, the warm and earnest patrons of the Greeks are Hērē, Athēnē, and Poseidōn: here too Zeus and Apollo are seen in harmony, for Zeus is decidedly well-inclined to the Trojans, and reluctantly sacrifices them to the importunity of the two great goddesses<sup>1</sup>. The worship of the Sminthian Apollo, in various parts of the Troad and the neighbouring territory, dates before the earliest periods of Æolic colonization<sup>2</sup>: hence the zealous patronage of Troy ascribed to him in the *Iliad*. Altogether, however, the distribution and partialities of the gods in that poem are different from what they become in later times,—a difference which our means of information do not enable us satisfactorily to explain. Besides the Delphian temple, Apollo had numerous temples throughout Greece, and oracles at Abæ in Phōkīs, on the Mount Ptoon, and at Tegyra in Beotia, where he was said to have been born<sup>3</sup>, at Branchidæ near Milētus, at Klarus in Asia Minor, and at Patara in Lykia. He was not the only oracular god: Zeus at Dodona and at Olympia gave responses also: the gods or heroes Trophōnius,

The two legends of Delphi and Délos, above noticed, form of course a very insignificant fraction of the narratives which once existed respecting the great and venerated Apollo. They serve only as specimens, and as very early specimens<sup>1</sup>, to illustrate what these divine myths were, and what was the turn of Grecian faith and imagination. The constantly recurring festivals of the gods caused an incessant demand for new myths respecting them, or at least for varieties and reproductions of the old myths. Even during the third century of the Christian æra, in the time of the rhetor Menander, when the old forms of Paganism were waning and when the stock of myths in existence was extremely abundant, we see this demand in great force; but it was incomparably more operative in those earlier times when the creative vein of the Grecian mind yet retained its pristine and unfaded richness. Each god had many different surnames, temples, groves, and solemnities; with each of which was connected more or less of mythical narrative, originally hatched in the prolific and spontaneous fancy of a believing neighbourhood, to be afterwards expanded, adorned and diffused by the song of the

<sup>1</sup> The legend which Ephorus followed about the establishment of the Delphian temple was something radically different from the Homeric Hymn (Ephori. *Fragm.* 70, ed. Diels): his narrative went far to politerise and rationalise the story. The progeny of Apollo was very numerous, and of the most diverse attributes; he was father of the Korymbantes (Pherekydis. *Fragm.* 6, ed. Diels), as well as of Adelpus and Aristæus (Schol. Apollon. Rhod. ii. 500; Apollonide. vi. 44.).

poet. The earliest subject of competition<sup>1</sup> at the great Pythian festival was the singing of a hymn in honour of Apollo: other *agones* were subsequently added, but the ode or hymn constituted the fundamental attribute of the solemnity: the Pythia at Sikyon and elsewhere were probably framed on a similar footing. So too at the ancient and celebrated Charilésia, or festival of the Charites, at Orchomenos, the rivalry of the poets in their various modes of composition both began and continued as the predominant feature<sup>2</sup>: and the inestimable treasures yet remaining to us of Attic tragedy and comedy, are gleanings from the once numerous dramas exhibited at the solemnity of the Dionysia. The Ephesians gave considerable rewards for the best hymns in honour of Artemis, to be sung at her temple<sup>3</sup>. And the early lyric poets of Greece, though their works have not descended to us, devoted their genius largely to similar productions, as may be seen by the titles and fragments yet remaining.

Both the Christian and the Mahomedan religions have begun during the historical age, have been

<sup>1</sup> Zenobio, *lc.* p. 421. Menander the Rhetor (*Ap. Wals. Coll. Rhet.* l. ix. p. 136) gives an elaborate classification of hymns to the gods, distinguishing them into nine classes, — *εὐχαῖαι*, *δευσιμαρτυρίαι*, *φρονεταί*, *προφηταί*, *προκαίρυμαί*, *παραμυθίαι*, *εὐχαῖαι*, *δευσιμαρτυρίαι*, *φρονεταί* — the second class had reference to the temporary absence or departure of a god to some distant place, which were often admitted in the ancient religion. Sappho and Alkman in their lyric hymns invoked the gods from many different places, — *τίς μιν γῆρ' ἀπὸ ποῦ ἐν μυσίῳ περ ἔσται*, *μυρία δὲ τόπων, ἱεὶ δὲ τόπων, ἀναδύνει* — also Aphrodite and Apollo, &c. All these songs were full of adventures and details respecting the gods, — in other words, of legendary matter.

propagated from one common centre, and have been erected upon the ruins of a different pre-existing faith. With none of these particulars did Grecian Paganism correspond. It took rise in an age of imagination and feeling simply without the restraints, as well as without the aid, of writing or records, of history or philosophy: it was, as a general rule, the spontaneous product of many separate tribes and localities, imitation and propagation operating as subordinate causes; it was moreover a primordial faith as far as our means of information enable us to discover. These considerations explain to us two facts in the history of the early Pagan mind: first, the divine mythes, the matter of their religion, constituted also the matter of their earliest history; next, these mythes harmonised with each other only in their general types, but differed incurably in respect of particular incidents. The poet who sang a new adventure of Apollo, the trace of which he might have heard in some remote locality, would take care that it should be agreeable to the general conceptions which his hearers entertained respecting the god. He would not ascribe the cestus or amorous influences to Athênê, nor armed interference and the *ægis* to Aphrodité; but, provided he maintained this general keeping, he might indulge his fancy without restraint in the particular events of the story<sup>1</sup>. The feelings and faith of his hearers went along with him, and there

State of mind and circumstances out of which Grecian mythes arose.

<sup>1</sup> The birth of Apollo and Artemis from Zeus and Lêtô is among the oldest and most generally admitted facts in the Grecian divine legends. Yet Æschylus did not scruple to describe Artemis publicly as daughter of Deméter (Æschylus, *Herodot.* ii. 126; *Pausan.* vii. 37. 3). Herodotus thinks

were no critical scruples to hold them back: to scrutinize the alleged proceedings of the Gods was repulsive, and to disbelieve them impious. And thus these divine mythes, though they had their root simply in religious feelings, and though they presented great discrepancies of fact, served nevertheless as primitive matter of history to an early Greek: they were the only narratives, at once publicly accredited and interesting, which he possessed. To them were aggregated the heroic mythes (to which we shall proceed presently),—indeed the two are inseparably blended, gods, heroes and men almost always appearing in the same picture,—analogous both in their structure and their genesis, and differing chiefly in the circumstance that they sprang from the type of a hero instead of from that of a god.

We are not to be astonished if we find Aphroditê, in the *Iliad*, born from Zeus and Dionê,—and in the *Theogony* of Hesiod, generated from the foam on the sea after the mutilation of Uranos; nor if in the *Odyssey* she appears as the wife of Hêphæstos, while in the *Theogony* the latter is married to Aglaia, and Aphroditê is described as mother of three children by Arês<sup>1</sup>. The Homeric hymn to Aphroditê details the legend of Aphroditê and

that he copied this innovation from the Egyptians, who affirmed that Apollis and Artemis were the sons of Dionysos and Isis.

The number and discrepancies of the mythos respecting each god are attested by the fruitless attempts of learned Greeks to escape the necessity of rejecting any of them by multiplying homonymous personages, — three persons named Zeus; five named Athênê; six named Apollon. *Ant. Anchisæa, which is presupposed in the *Iliad* as the parentage of *Æneas*: but the author of the hymn, probably sung at one of the festivals of *Aphroditè* in Cyprus, represents the goddess as ashamed of her passion for a mortal, and as enjoining *Anchisæa* under severe menaces not to reveal who the mother of *Æneas* was<sup>1</sup>, while in the *Iliad* *Aphroditè* she has no scruple in publicly owning him, and he passes everywhere as her acknowledged son. *Aphroditè* is described in the hymn as herself cold and unimpressible, but ever active and irresistible in inspiring amorous feelings to gods, to men, and to animals. Three goddesses are recorded as memorable exceptions to her universal empire,—*Athênè*, *Artemis*, and *Hestia* or *Vesta*. *Aphroditè* was one of the most important of all the goddesses in the mythical world; for the number of interesting, pathetic and tragical adventures deducible from misplaced or unhappy passion was of course very great; and in most of these cases the intervention of *Aphroditè* was usually prefixed, with some legend to explain why she manifested herself. Her range of action grows wider in the later epic and lyric and tragic poets than in *Homer*<sup>2</sup>.

The character of *Isaphis* the huntress, well-known from the first idyll of *Theocritus*, and illustrating the destroying force of *Aphroditè*, appears to have been first introduced into Greek poetry by *Stesichorus*. Athenê.

Athênê, the man-goddess<sup>1</sup>, born from the head of Zeus, without a mother and without feminine sympathies, is the antithesis partly of Aphroditê, partly of the effeminate or womanised god Dionysos—the latter is an importation from Asia, but Athênê is a Greek conception—the type of composed, majestic and unrelenting force. It appears however as if this goddess had been conceived in a different manner in different parts of Greece. For we find ascribed to her, in some of the legends, attributes of industry and home-keeping; she is represented as the companion of Hêphæstos, patronising handicraft, and expert at the loom and the spindle: the Athenian potters worshiped her along with Promêtheus. Such traits of character do not square with the formidable ægis and the massive and crushing spear which Homer and most of the mythes assign to her. There probably were at first at least two different types of Athênê, and their coalescence has partially obliterated the less marked of the two<sup>2</sup>. Athênê is the constant and watchful

Athenê owes his renown to the Alexandrine poets and their contemporary sovereigns (see Bion's *hymn* and the *Adonismachia* of Theocritus). The favourites of Aphroditê, even as counted up by the diligence of Clemens Alexandrinus, are however very few in number. (*Admonitio ad Gent.* p. 12, Syll.)

The learned article of

protectress of Hēraklēs : she is also locally identified with the soil and people of Athens, even in the *Iliad* : Erechtheus, the Athenian, is born of the earth, but Athênē brings him up, nourishes him, and lodges him in her own temple, where the Athenians annually worship him with sacrifice and solemnities<sup>1</sup>. It was altogether impossible to make Erechtheus son of Athênē,—the type of the goddess forbade it; but the Athenian myth-creators, though they found this barrier impassable, strove to approach to it as near as they could, and the description which they give of the birth of Erichthonios, at once un-Homeric and unseemly, presents something like the phantom of maternity<sup>2</sup>.

The huntress Artemis, in Arcadia and in Greece Artemis  
proper generally, exhibits a well-defined type with which the legends respecting her are tolerably consistent. But the Ephesian as well as the Tauric Artemis partakes more of the Asiatic character, and has borrowed the attributes of the Lydian Great Mother as well as of an indigenous Tauric Virgin<sup>3</sup>: this Ephesian Artemis passed to the colo-

nies of Phokæa and Milêtus<sup>1</sup>. The Homeric Artemis shares with her brother Apollo in the dexterous use of the far-striking bow, and sudden death is described by the poet as inflicted by her gentle arrow. The jealousy of the gods at the withholding of honours and sacrifices, or at the presumption of mortals in contending with them,—a point of character so frequently recurring in the types of the Grecian gods,—manifests itself in the legends of Artemis; the memorable Kalydônian boar is sent by her as a visitation upon (Enëus, because he had omitted to sacrifice to her, while he did honour to other gods<sup>2</sup>. The Arcadian heroine Atalanta is however a reproduction of Artemis, with little or no difference, and the goddess is sometimes confounded even with her attendant nymphs.

Poseidôn.

The mighty Poseidôn, the earth-shaker and the ruler of the sea, is second only to Zeus in power, but has no share in those imperial and superintending capacities which the Father of Gods and men exhibits. He numbers a numerous heroic progeny, usually men of great corporeal strength, and many of them belonging to the Æolic race: the great Neleid family of Pylus trace their origin up to him; and he is also the father of Polyphêmus the Cyclops, whose well-earned suffering he cruelly revenges upon Odysseus. The island of Kalauria is his Delôs<sup>3</sup>, and there was held in it

favourite resort of Artemis (Kallimach. Hymn. Dima. 18), and these localities were always causes predisposing to fanatical excitement.

<sup>1</sup> Strabo, iv. p. 179.

<sup>2</sup> Strabo, vii. p. 371.

<sup>3</sup> Ibid. iv. 523.

According to the old poem called Kallimach. described to Musæus, the oracle of Delphi originally belonged to Poseidôn and Gæa, jointly: from Gæa it passed to Themis, and from her to

an old local Amphiktyony, for the purpose of rendering to him joint honour and sacrifice: the isthmus of Corinth, Heliké in Achaia, and Onchêstos in Boeotia, are also residences which he much affects, and where he is solemnly worshiped. But the abode which he originally and specially selected for himself was the Acropolis of Athens, where by a blow of his trident he produced a well of water in the rock: Athênê came afterwards and claimed the spot for herself, planting in token of possession the olive-tree which stood in the sacred grove of Pandrosos: and the decision either of the autochthonous Cecrops, or of Erechtheus, awarded to her the preference, much to the displeasure of Poseidôn. Either on this account, or on account of the death of his son Eumolpus, slain in assisting the Eleusinians against Erechtheus, the Attic mythes ascribed to Poseidôn great enmity against the Erechtheid family, which he is asserted to have ultimately overthrown: Theseus, whose glorious reign and deeds succeeded to that family, is said to have been really his son<sup>1</sup>. In several other places,—in Ægina, Argos and Naxos,—Poseidôn had disputed the privileges of patron-god with Zeus, Hêrê and Dionysos: he was worsted in all, but bore his defeat patiently<sup>2</sup>. Poseidôn endured a long slavery, in common with Apollo, gods as they were<sup>3</sup>, under Laomedôn, king of Troy, at the command and con-

Apollo, to whom Poseidôn also made over his share as a compensation for the surrender of Kalauria to him. (Pausan. 2. 6. 3.)

damnation of Zeus: the two gods rebuilt the walls of the city, which had been destroyed by Héraklès. When their time was expired, the insolent Laomedon withheld from them the stipulated reward, and even accompanied its refusal with appalling threats; and the subsequent animosity of the god against Troy was greatly determined by the sentiment of this injustice<sup>1</sup>. Such periods of servitude, inflicted upon individual gods, are among the most remarkable of all the incidents in the divine legends. We find Apollo on another occasion condemned to serve Admētus, king of Pheræ, as a punishment for having killed the Cyclopes, and Héraklès also is sold as a slave to Omphalé. Even the fierce Arès, overpowered and imprisoned for a long time by the two Alóids<sup>2</sup>, is ultimately liberated only by extraneous aid. Such narratives attest the discursive range of Grecian fancy in reference to the gods, as well as the perfect commingling of things and persons, divine and human, in their conceptions of the past. The god who serves is for the time degraded; but the supreme god who commands the servitude is in the like proportion exalted, whilst the idea of some sort of order and government among these superhuman beings was never lost sight of. Nevertheless the mythes respecting the servitude of the gods became obnoxious afterwards, along with many others, to severe criticism on the part of philosophers.

The proud, jealous, and bitter Hêrè,—the goddess of the once-wealthy Mykênæ, the *dux et focus* of the Trojan war, and the ever-present protectress

of JASON in the Argonautic expedition<sup>1</sup>,—occupies an indispensable station in the mythical world. As the daughter of Kronos and wife of Zeus, she fills a throne from whence he cannot dislodge her, and which gives her a right perpetually to grumble and to thwart him<sup>2</sup>. Her unmeasured jealousy of the female favourites of Zeus, and her antipathy against his sons, especially against HÉRACLÈS, has been the suggesting cause of innumerable mythes: the general type of her character stands here clearly marked, as furnishing both stimulus and guide to the mythopœic fancy. The "Sacred Wedding," or marriage of Zeus and HÉRÈ, was familiar to epithalamic poets long before it became a theme for the spiritualizing ingenuity of critics.

Héphaistos is the son of HÉRÈ without a father, Héphaistos. and stands to her in the same relation as Athênè to Zeus: her pride and want of sympathy are manifested by her casting him out at once in consequence of his deformity<sup>3</sup>. He is the god of fire—especially of fire in its practical applications to handicraft—and is indispensable as the right-hand and instrument of the gods. His skill and his deformity appear alternately as the source of mythical stories: wherever exquisite and effective fabrication is intended to be designated, Héphaistos is announced as the maker, although in this function the type of his character is reproduced in Dædalos. In the Attic legends he appears intimately united both with Prométhèus and with Athênè, in conjunction with whom he was worshiped at Kolônai near Athens.

Hestia.

The chaste, still, and home-keeping Hestia, goddess of the family hearth, is far less fruitful in mythical narratives, in spite of her very superior dignity, than the knavish, smooth-tongued, keen, and acquisitive Hermês. His function of messenger of the gods brings him perpetually on the stage, and affords ample scope for portraying the features of his character. The Homeric hymn to Hermês describes the scene and circumstances of his birth, and the almost instantaneous manifestation, even in infancy, of his peculiar attributes. It explains the friendly footing on which he stood with Apollo,—the interchange of gifts and functions between them,—and lastly, the inviolate security of all the wealth and offerings in the Delphian temple, exposed as they were to thieves without any visible protection. Such was the innate cleverness and talent of Hermês; that on the day he was born he invented the lyre, stringing the seven chords on the shell of a tortoise!—and also stole the cattle of Apollo in Pieria, dragging them backwards to his cave in Arcadia, so that their track could not be detected. To the remonstrances of his mother Maia, who points out to him the danger of offending Apollo, Hermês replies, that he aspires to rival the dignity

and functions of Apollo among the immortals, and that if his father Zeus refuses to grant them to him, he will employ his powers of thieving in breaking open the sanctuary at Delphi, and in carrying away the gold and the vestments, the precious tripods and vessels<sup>1</sup>. Presently Apollo discovers the loss of his cattle, and after some trouble finds his way to the Kyllénian cavern, where he sees Hermès asleep in his cradle. The child denies the theft with effrontery, and even treats the surmise as a ridiculous impossibility: he persists in such denial even before Zeus, who however detects him at once, and compels him to reveal the place where the cattle are concealed. But the lyre was as yet unknown to Apollo, who has heard nothing except the voice of the Muses and the sound of the pipe. So powerfully is he fascinated by hearing the tones of the lyre from Hermès, and so eager to become possessed of it, that he is willing at once to pardon the past theft, and even to conciliate besides the friendship of Hermès<sup>2</sup>. Accordingly a bargain is struck between the two gods and sanctioned by Zeus. Hermès surrenders to Apollo the lyre, inventing for his own use the syrinx or panpipe, and receiving from Apollo in exchange the golden rod of wealth, with empire over flocks and herds as well as over horses and oxen and the wild animals of the woods. He presses to obtain the gift of prophecy, but Apollo is under a special vow not to

impart that privilege to any god whatever. He instructs *Hermès* however how to draw information, to a certain extent, from the *Mœræ* or Fates themselves; and assigns to him, over and above, the function of messenger of the gods to *Hadēs*.

Although *Apollo* has acquired the lyre, the particular object of his wishes, he is still under apprehension that *Hermès* will steal it away from him again, together with his bow, and he exacts a formal oath by *Styx* as security. *Hermès* promises solemnly that he will steal none of the acquisitions, nor ever invade the sanctuary of *Apollo*; while the latter on his part pledges himself to recognise *Hermès* as his chosen friend and companion, amongst all the other sons of *Zeus*, human or divine<sup>1</sup>.

So came to pass, under the sanction of *Zeus*, the marked favour shown by *Apollo* to *Hermès*. But *Hermès* (concludes the hymnographer, with frankness unusual in speaking of a god) "does very little good: he avails himself of the darkness of night to cheat without measure the tribes of mortal men<sup>2</sup>."

approached the rich and seemingly accessible treasures of Delphi, engender a string of expository incidents; cast into a quasi-historical form, and detailing how it happened that *Hermès* had bound himself by especial convention to respect the Delphian temple. The types of *Apollo* seem to have been different in different times and parts of Greece: in some places he was worshiped as *Apollo Nomios*<sup>1</sup>, or the patron of pasture and cattle; and this attribute, which elsewhere passed over to his son *Aristæus*, is by our hymnographer voluntarily surrendered to *Hermès*, combined with the golden rod of fruitfulness. On the other hand, the lyre did not originally belong to the Far-striking King, nor is he at all an inventor: the hymn explains both its first invention and how it came into his possession. And the value of the incidents is thus partly expository, partly illustrative, as expanding in detail the general preconceived character of the *Kylénian* god.

To *Zeus* more amours are ascribed than to any of the other gods;—probably because the Grecian kings and chieftains were especially anxious to trace their lineage to the highest and most glorious of all,—each of these amours having its representative progeny on earth<sup>2</sup>. Such subjects were among the most promising and agreeable for the interest of mythical narrative, and *Zeus* as a lover thus became the father of a great many legends, branching out into innumerable interferences, for which his sons, all of them distinguished individuals, and

many of them persecuted by Hérè, furnished the occasion. But besides this, the commanding functions of the Supreme God, judicial and administrative, extending both over gods and men, was a potent stimulus to the mythopoeic activity. Zeus has to watch over his own dignity,—the first of all considerations with a god: moreover as *Horkios*, *Xenios*, *Ktésios*, *Meilichios*, (a small proportion of his thousand surnames,) he guaranteed oaths and punished perjurers, he enforced the observance of hospitality, he guarded the family hoard and the crop realized for the year, and he granted expiation to the repentant criminal<sup>1</sup>. All these different functions created a demand for mythos, as the means of translating a dim, but serious, presentiment into distinct form, both self-explaining and communicable to others. In enforcing the sanctity of the oath or of the tie of hospitality, the most powerful of all arguments would be a collection of legends respecting the judgements of Zeus *Horkios* or *Xenios*; the more impressive and terrific such legends were, the greater would be their interest, and the less would any one dare to disbelieve them. They constituted the natural outpourings of a strong and common sentiment, probably without any deliberate ethical intention; the preconceptions of the divine agency, expanded into legend, form a product analogous to the idea of the divine features and symmetry embodied in the bronze or the marble statue.

But it was not alone the general type and attributes of the gods which contributed to put in action

<sup>1</sup> See Herodotus, i. 44. Xenoph. Anabasis, vii. 8, 4. Plutarch, Themist., c. 12.

the mythopœic propensities. The rites and solemnities forming the worship of each god, as well as the details of his temple and its locality, were a fertile source of mythes, respecting his exploits and sufferings, which to the people who heard them served the purpose of past history. The exegetes, or local guide and interpreter, belonging to each temple, preserved and recounted to curious strangers these traditional narratives, which lent a certain dignity even to the minutiae of divine service. Out of a stock of materials thus ample, the poets extracted individual collections, such as the "Causes" (Αἰτια) of Kallimachus, now lost, and such as the *Fæsti* of Ovid are for the Roman religious antiquities<sup>1</sup>.

Mythes arising out of the religious ceremonies.

It was the practice to offer to the gods in sacrifice the bones of the victim only, enclosed in fat: how did this practice arise? The author of the Hesiodic Theogony has a story which explains it: Prometheus tricked Zeus into an imprudent choice, at the period when the gods and mortal men first came to an arrangement about privileges and duties (in *Mekônâ*). Prometheus, the tutelary representative of man, divided a large steer into two portions: on the one side he placed the flesh and guts, folded up in the omentum and covered over

with the skin; on the other, he put the bones enveloped in fat. He then invited Zeus to determine which of the two portions the gods would prefer to receive from mankind. Zeus "with both hands" decided for and took the white fat, but was highly incensed on finding that he had got nothing at the bottom except the bones<sup>1</sup>. Nevertheless the choice of the gods was now irrevocably made: they were not entitled to any portion of the sacrificed animal beyond the bones and the white fat; and the standing practice is thus plausibly explained<sup>2</sup>. I select this as one amongst a thousand instances to illustrate the genesis of legend out of religious practices. In the belief of the people, the event narrated in the legend was the real producing cause of the practice: but when we come to apply a sound criticism, we are compelled to treat the event as existing only in its narrative legend, and the legend itself as having been, in the greater number of cases, engen-

In the second line of this citation, the poet tells us that Zeus was through the trick, and was imposed upon by his own consent, fore-knowing that after all the malicious consequences of the proceeding would be visited on man. But the last lines, and indeed the whole drift of the legend, imply the contrary of this: Zeus was really taken in, and was in consequence very angry. It is curious to observe how the religious feelings of the poet drive him to save in words the prominence of Zeus, though in doing so he contradicts and nullifies the whole point of the story.

dered by the practice,—thus reversing the supposed order of production.

In dealing with Grecian mythes generally, it is convenient to distribute them into such as belong to the Gods and such as belong to the Heroes, according as the one or the other are the prominent personages. The former class manifest, more palpably than the latter, their real origin, as growing out of the faith and the feelings, without any necessary basis, either of matter of fact or allegory; moreover, they elucidate more directly the religion of the Greeks, so important an item in their character as a people. But in point of fact, most of the mythes present to us Gods, Heroes and Men, in juxtaposition one with the other, and the richness of Grecian mythical literature arises from the infinite diversity of combinations thus opened out; first by the three class-types, God, Hero, and Man; next by the strict keeping with which each separate class and character is handled. We shall now follow downward the stream of mythical time, which begins with the Gods, to the Heroic legends, or those which principally concern the Heroes and Heroines; for the latter were to the full as important in legend as the former.

Gods, Heroes, and men, appear together in the mythos.

## CHAPTER II.

### LEGENDS RELATING TO HEROES AND MEN.

THE Hesiodic theogony gives no account of anything like a creation of man, nor does it seem that such an idea was much entertained in the legendary vein of Grecian imagination; which commonly carried back the present men by successive generations to some primitive ancestor, himself sprung from the soil, or from a neighbouring river or mountain, or from a god, a nymph, &c. But the poet of the Hesiodic "Works and Days" has given us a narrative conceived in a very different spirit respecting the origin of the human race, more in harmony with the sober and melancholy ethical tone which reigns through that poem<sup>1</sup>.

Races of  
men as they  
appear in  
the Hesiodic  
"Works  
and Days."

The Golden.

First (he tells us) the Olympic gods made the golden race,—good, perfect, and happy men, who lived from the spontaneous abundance of the earth, in ease and tranquillity like the gods themselves: they suffered neither disease nor old-age, and their death was like a gentle sleep. After death they became, by the award of Zeus, guardian terrestrial dæmons, who watch unseen over the proceedings of mankind—with the regal privilege of dispensing

<sup>1</sup> Hesiod, as cited in the *Etymologicum Magnum* (probably the Hesiodic Catalogue of Women, as Markschaffel considers it, placing it Fragm. 133), gives the parentage of a certain Proitos, who must probably be intended as the first of men: Ἠμίονος, ὁ δὲ πρῶτος Ἐδμήτορος ἢ Μεγάρου, ἀπὸ Ἠέρας τὴν ἀνδρῶν ἀνέχθησαν ἢ δὲ Ἡρακλῆος, ἀπὸ Ἠέρας τὴν Αἰδώς, καὶ τὸν Ἠμίονον.

to them wealth, and taking account of good and bad deeds<sup>1</sup>.

Next, the gods made the silver race,—unlike The Silver. and greatly inferior, both in mind and body, to the golden. The men of this race were reckless and mischievous towards each other, and disdainful of the immortal gods, to whom they refused to offer either worship or sacrifice. Zeus in his wrath buried them in the earth: but there they still enjoy a secondary honour, as the Blest of the underworld<sup>2</sup>.

Thirdly, Zeus made the brazen race, quite different from the silver. They were made of hard The Brazen. ash-wood, pugnacious and terrible: they were of immense strength and adamant soul, neither raising nor touching bread. Their arms, their houses, and their implements were all of brass: there was then no iron. This race, eternally fighting, perished by each other's hands, died out, and descended without name or privilege to Hades<sup>3</sup>.

Next, Zeus made a fourth race, far juster and The Heroic.

better than the last preceding. These were the Heroes or demigods, who fought at the sieges of Troy and Thêbes. But this splendid stock also became extinct: some perished in war, others were removed by Zeus to a happier state in the islands of the Blest. There they dwell in peace and comfort, under the government of Kronos, reaping thrice in the year the spontaneous produce of the earth<sup>1</sup>.

The Iron.

The fifth race, which succeeds to the Heroes, is of iron: it is the race to which the poet himself belongs, and bitterly does he regret it. He finds his contemporaries mischievous, dishonest, unjust, ungrateful, given to perjury, careless both of the ties of consanguinity and of the behests of the gods: Nemesis and Ædôs (Ethical Self-reproach) have left earth and gone back to Olympus. How keenly does he wish that his lot had been cast either earlier or later<sup>2</sup>! This iron race is doomed to continual guilt, care, and suffering, with a small infusion of good; but the time will come when Zeus will put an end to it. The poet does not venture to predict what sort of race will succeed.

Such is the series of distinct races of men, which Hesiod, or the author of the "Works and Days," enumerates as having existed down to his own time. I give it as it stands, without placing much confidence in the various explanations which critics have

offered. It stands out in more than one respect from the general tone and sentiment of Grecian legend: moreover the sequence of races is neither natural nor homogeneous,—the heroic race not having any metallic denomination, and not occupying any legitimate place in immediate succession to the brazen. Nor is the conception of the dæmons in harmony either with Homer or with the Hesiodic theology. In Homer, there is scarcely any distinction between gods and dæmons, while the gods are stated to go about and visit the cities of men in various disguises for the purpose of inspecting good and evil proceedings<sup>1</sup>. But in the poem now before us, the distinction between gods and dæmons is generic. The latter are invisible tenants of earth, remnants of the once happy golden race whom the Olympic gods first made: the remnants of the second or silver race are not dæmons, nor are they tenants of earth, but they still enjoy an honourable posthumous existence as the Blest of the under-world. Nevertheless the Hesiodic dæmons are in no way authors or abettors of evil: on the contrary, they form the unseen police of the gods, for the purpose of repressing wicked behaviour in the world.

Different both from the Thersites and from Homer.

We may trace, I think, in this quintuple succession of earthly races, set forth by the author of the "Works and Days," the confluence of two veins of sentiment, not consistent one with the other, yet both co-existing in the author's mind. The drift of his poem is thoroughly didactic and ethical: though deeply penetrated with the injustice and suffering which darken the face of human life, he neverthe-

less strives to maintain, both in himself and in others, a conviction that on the whole the just and laborious man will come off well<sup>1</sup>, and he enforces in considerable detail the lessons of practical prudence and virtue. This ethical sentiment, which dictates his appreciation of the present, also guides his imagination as to the past. It is pleasing to him to bridge over the chasm between the gods and degenerate man, by the supposition of previous races,—the first altogether pure, the second worse than the first, and the third still worse than the second; and to show further how the first race passed by gentle death-sleep into glorious immortality; how the second race was sufficiently wicked to drive Zeus to bury them in the under-world, yet still leaving them a certain measure of honour; while the third was so desperately violent as to perish by its own animosities, without either name or honour of any kind. The conception of the golden race passing after death into good guardian-demons, which some suppose to have been derived from a comparison with oriental angels, presents itself to the poet partly as approximating this race

Ethical vein  
of senti-  
ment.

<sup>1</sup> There are some lines, in which he appears to believe that, under the present wicked and treacherous rulers, it is not the interest of any man to be just (Opp. Di. 276):—

Νῦν δὲ τῶν μὲν νόμις ἐν ἀσέβεισιν ἔστιν  
ἔστι μὲν τῶν νόμων ὅτι καὶ ἐστὶ δίκαιον

ἔστιν, εἰ μὴ καὶ ὅτι δίκαιον ἀδικήσαντι ἔστιν

Ἀλλὰ τοῦ πόλεως ἰδὲ καὶ τοῦ τοῦ δίκαιον ἐπιτιμώμενον.

On the whole, however, his conviction is on the contrary.

Plutarch rejects the above line lines, seemingly, on no other ground than because he thought them unusual and unworthy of Hesiod (see Proclus ad loc.). But they fall in perfectly with the temper of the poem: and the role of Plutarch is inadmissible, in determining the critical question of what is genuine or spurious.

to the gods, partly as a means of constituting a triple gradation of post-obituary existence, proportioned to the character of each race whilst alive. The denominations of gold and silver, given to the two first races, justify themselves, like those given by Simonidēs of Amorgos and by Phokylidēs to the different characters of women, derived from the dog, the bee, the mare, the ass, and other animals; and the epithet of brazen is specially explained by reference to the material which the pugnacious third race so plentifully employed for their arms and other implements.

So far we trace intelligibly enough the moralising vein: we find the revolutions of the past so arranged as to serve partly as an ethical lesson, partly as a suitable preface to the present<sup>1</sup>. But fourth in the list comes "the divine race of Heroes"; and here a new vein of thought is opened by the poet. The symmetry of his ethical past is broken up, in order to make way for these cherished beings of the national faith. For though the author of the "Works and Days" was himself of a didactic cast of thought, like Phokylidēs, or Solon, or Theognis, yet he had present to his feelings, in common with

Intersected  
by the  
mythical.

<sup>1</sup> Aratus (*Phænomen.* 167) gives only three successive races,—the golden, silver, and brazen; Ovid ascribes to these the iron race (*Metamorph.* l. 89-144); neither of them notice the heroic race.

The observations both of Bottmann (*Mythos der ältesten Menschengeschlechter*, i. u. p. 12 of the *Mythologus*) and of Völcker (*Mythologie des Japanischen Geschlechtes* § 6, pp. 250-273) on this series of distinct races, are ingenious, and may be read with profit. Both recognise the disparate character of the fourth link in the series, and each accounts for it in a different manner. My own view comes nearer to that of Völcker, with some considerable differences; amongst which one is, that he rejects the verses respecting the dreams, which seem to me essential parts of the whole scheme.

his countrymen, the picture of Grecian foretime, as it was set forth in the current myths, and still more in Homer and those other epical productions which were then the only existing literature and history. It was impossible for him to exclude, from his sketch of the past, either the great persons or the glorious exploits which these poems ennobled; and even if he himself could have consented to such an exclusion, the sketch would have become repulsive to his hearers. But the chiefs who figured before Thêbes and Troy could not be well identified either with the golden, the silver, or the brazen race: moreover it was essential that they should be placed in immediate contiguity with the present race, because their descendants, real or supposed, were the most prominent and conspicuous of existing men. Hence the poet is obliged to assign to them the fourth place in the series, and to interrupt the descending ethical movement in order to interpolate them between the brazen and the iron race, with neither of which they present any analogy. The iron race, to which the poet himself unhappily belongs, is the legitimate successor, not of the heroic, but of the brazen. Instead of the fierce and self-annihilating pugnacity which characterizes the latter, the iron race manifests an aggregate of smaller and meaner vices and mischiefs. It will not perish by suicidal extinction—but it is growing worse and worse, and is gradually losing its vigour, so that Zeus will not vouchsafe to preserve much longer such a race upon the earth.

We thus see that the series of races imagined by the poet of the "Works and Days" is the product of

two distinct and incongruous veins of imagination,—the didactic or ethical blending with the primitive mythical or epical. His poem is remarkable as the most ancient didactic production of the Greeks, and as one of the first symptoms of a new tone of sentiment finding its way into their literature, never afterwards to become extinct. The tendency of the “Works and Days” is anti-heroic: far from seeking to inspire admiration for adventurous enterprise, the author inculcates the strictest justice, the most unremitting labour and frugality, and a sober, not to say anxious, estimate of all the minute specialities of the future. Prudence and probity are his means,—practical comfort and happiness his end. But he deeply feels, and keenly exposes, the manifold wickedness and shortcomings of his contemporaries, in reference to this capital standard. He turns with displeasure from the present men, not because they are too feeble to hurl either the spear of Achilles or some vast boundary-stone, but because they are rapacious, knavish, and unprincipled.

The  
“Works  
and Days”  
contains didactic  
poems.

The dæmons first introduced into the religious atmosphere of the Grecian world by the author of the “Works and Days,” as generically different from the gods, but as essentially good, and as forming the intermediate agents and police between gods and men,—are deserving of attention as the seed of a doctrine which afterwards underwent many changes, and became of great importance, first as one of the constituent elements of pagan faith, then as one of the helps to its subversion. It will be recollected that the buried remnants of the half-

wicked silver race, though they are not recognized as *dæmons*, are still considered as having a substantive existence, a name, and dignity, in the under-world. The step was easy, to treat them as *demons* also, but as *demons* of a defective and malignant character: this step was made by Empedoclès and Xenocratès, and to a certain extent countenanced by Plato<sup>1</sup>. There came thus to be admitted among the pagan philosophers *dæmons* both good and bad, in every degree: and these *dæmons* were found available as a means of explaining many phenomena for which it was not convenient to admit the agency of the gods. They served to relieve the gods from the odium of physical and moral evils, as well as from the necessity of constantly meddling in small affairs; and the objectionable ceremonies of the pagan world were defended upon the ground that in no other way could the exigencies of such malignant beings be appeased. They were most frequently noticed as causes of evil, and thus the name (*dæmon*) came insensibly to convey with it a bad sense,—the idea of an evil being as contrasted with the goodness of a god. So it was found by the Christian writers when they commenced their controversy with paganism. One branch of their argument led them to identify the pagan gods with *dæmons* in the evil sense, and the insensible change in the received meaning of the word lent them a specious assistance. For they could easily show that not only in Homer, but in the general language of early pagans, all the gods generally were spoken of as

dæmons—and therefore, verbally speaking, Clemens and Tatian seemed to affirm nothing more against Zeus or Apollo than was involved in the language of paganism itself. Yet the audience of Homer or Sophoklês would have strenuously repudiated the proposition, if it had been put to them in the sense which the word *dæmon* bore in the age and among the circle of these Christian writers.

In the imagination of the author of the "Works and Days," the dæmons occupy an important place, and are regarded as being of serious practical efficiency. When he is remonstrating with the rulers around him upon their gross injustice and corruption, he reminds them of the vast number of these immortal servants of Zeus who are perpetually on guard amidst mankind, and through whom the visitations of the gods will descend even upon the most potent evildoers<sup>1</sup>. His supposition that the dæmons were not gods, but departed men of the golden race, allowed him to multiply their number indefinitely, without too much cheapening the divine dignity.

Function  
of the  
Heroic  
dæmons.

As this poet has been so much enslaved by the current legends as to introduce the Heroic race into a series to which it does not legitimately belong, so he has under the same influence inserted in another part of his poem the mythe of Pandôra and Promêtheus<sup>2</sup>, as a means of explaining the primary diffusion, and actual abundance, of evil among mankind. Yet this mythe can in no

way consist with his quintuple scale of distinct races, and is in fact a totally distinct theory to explain the same problem,—the transition of mankind from a supposed state of antecedent happiness to one of present toil and suffering. Such an inconsistency is not a sufficient reason for questioning the genuineness of either passage; for the two stories, though one contradicts the other, both harmonise with that central purpose which governs the author's mind,—a querulous and didactic appreciation of the present. That such was his purpose appears not only from the whole tenor of his poem, but also from the remarkable fact that his own personality, his own adventures and kindred, and his own sufferings, figure in it conspicuously. And this introduction of self imparts to it a peculiar interest. The father of Hesiod came over from the Æolic Kymê, with the view of bettering his condition, and settled at Askra in Boeotia, at the foot of Mount Helicon. After his death his two sons divided the family inheritance: but Hesiod bitterly complains that his brother Persês cheated and went to law with him, and obtained through corrupt judges an unjust decision. He farther reproaches his brother with a preference for the suits and unprofitable bustle of the agora, at a time when he ought to be labouring for his subsistence in the field. Askra indeed was a miserable place, repulsive both in summer and winter. Hesiod had never crossed the sea, except once from Aulis to Eubœa, whither he went to attend the funeral-games of Amphidamas, the chief of Chalkis: he

sung a hymn, and gained as prize a tripod, which he consecrated to the muses in Helicon<sup>1</sup>.

These particulars, scanty as they are, possess a peculiar value, as the earliest authentic memorandum respecting the doing or suffering of any actual Greek person. There is no external testimony at all worthy of trust respecting the age of the "Works and Days": Herodotus treats Hesiod and Homer as belonging to the same age, four hundred years before his own time; and there are other statements besides, some placing Hesiod at an earlier date than Homer, some at a later. Looking at the internal evidences, we may observe that the pervading sentiment, tone and purpose of the poem is widely different from that of the *Iliad* and *Odyssey*, and analogous to what we read respecting the compositions of Archilochus and the Amorgian Simonidæ. The author of the "Works and Days" is indeed a preacher and not a satirist: but with this distinction, we find in him the same predominance of the present and the positive, the same disposition to turn the muse into an exponent of his own personal wrongs, the same employment of *Æsopic* fable by way of illustration, and the same unfavourable estimate of the female sex<sup>2</sup>, all of which may be traced in the two poets

<sup>2</sup> Compare the fable (*above*) in the "Works and Days," v. 200, with those in Archilochus, Fr. xxviii. and xxix., Gaisford, respecting the fox and the ape; and the legend of Pandora (v. 95 and v. 705) with the fragment of Simonidæ of Amorgos respecting women (Fr. vii. ed. Welcker, v. 95-115); also Phokylidæ ap. Stobæum Florileg. lxxi.

above-mentioned, placing both of them in contrast with the Homeric epic. Such an internal analogy, in the absence of good testimony, is the best guide which we can follow in determining the date of the "Works and Days," which we should accordingly place shortly after the year 700 B.C. The style of the poem might indeed afford a proof that the ancient and uniform hexameter, though well-adapted to continuous legendary narrative or to solemn hymns, was somewhat monotonous when called upon either to serve a polemical purpose or to impress a striking moral lesson. When poets, then the only existing composers, first began to apply their thoughts to the cut and thrust of actual life, aggressive or didactic, the verse would be seen to require a new, livelier and smarter metre; and out of this want grew the elegiac and the iambic verse, both seemingly contemporaneous, and both intended to supplant the primitive hexameter for the short effusions then coming into vogue.

## CHAPTER III.

## LEGEND OF THE IAPETIDS.

THE SONS of the Titan god Iapetus, as described in the Hesiodic theogony, are Atlas, Menœtius, Promêtheus and Epimêtheus<sup>1</sup>. Of these, Atlas alone is mentioned by Homer in the *Odyssey*, and even he not as the son of Iapetus: the latter himself is named in the *Iliad* as existing in Tartarus along with Kronos. The Homeric Atlas "knows the depths of the whole sea, and keeps by himself those tall pillars which hold the heaven apart from the earth".

As the Homeric theogony generally appears much expanded in Hesiod, so also does the family of Iapetus, with their varied adventures. Atlas is here described, not as the keeper of the intermediate pillars between heaven and earth, but as himself condemned by Zeus to support the heaven on his head and hands<sup>2</sup>; while the fierce Menœtius is thrust down to Erebus as a punishment for his ungovernable insolence. But the remaining two brothers, Promêtheus and Epimêtheus, are among the most interesting creations of Grecian legend,

Hesiod stretches far beyond the simplicity of the Homeric conception:

and distinguished in more than one respect from all the remainder.

Promê-  
theus and  
Epimê-  
theus.

First, the main battle between Zeus and the Titan gods is a contest of force purely and simply—mountains are hurled and thunder is launched, and the victory remains to the strongest. But the competition between Zeus and Promêtheus is one of craft and stratagem: the victory does indeed remain to the former, but the honours of the fight belong to the latter. Secondly, Promêtheus and Epimêtheus (the fore-thinker and the after-thinker<sup>1</sup>) are characters stamped at the same mint and by the same effort, the express contrast and antithesis of each other. Thirdly, mankind are here expressly brought forward, not indeed as active partners in the struggle, but as the grand and capital subjects interested,—as gainers or sufferers by the result. Promêtheus appears in the exalted character of champion of the human race, even against the formidable superiority of Zeus.

In the primitive or Hesiodic legend, Promêtheus is not the creator or moulder of man; it is only the later additions which invest him with this character<sup>2</sup>. The race are supposed as existing, and Promêtheus, a member of the dispossessed body of

<sup>2</sup> Apollonius, l. 7. 1. Nor is he such either in *Æschylus*, or in the Platonic fable (*Protag.* c. 30), though this version became at last the most popular. Some hardened lumps of clay, remnants of that which had been employed by Promêtheus in moulding man, were shown to *Pausanias* at *Paupœna* in *Phœlis* (*Paus.* x. 4. 3).

The first Epigram of *Erinna* (*Anthol.* i. p. 58, ed. Bernh.) seems to allude to Promêtheus as moulder of man. The expression of *Aristophanes* (*Aves*, 689)—*ἀδάπανα πλάσιν*—does not necessarily refer to Promêtheus.

Titan gods, comes forward as their representative and defender. The advantageous bargain which he made with Zeus on their behalf, in respect to the partition of the sacrificial animals, has been recounted in the preceding chapter. Zeus felt that he had been outwitted, and was exceeding wroth. In his displeasure he withheld from mankind the inestimable comfort of fire, so that the race would have perished, had not Prometheus stolen fire, in defiance of the command of the Supreme Ruler, and brought it to men in the hollow of a fennel<sup>1</sup>.

Continued

Prometheus  
and Zeus.

Zeus was now doubly indignant, and determined to play off a still more ruinous stratagem. Hephæstos, by his direction, moulded the form of a beautiful virgin; Athênê dressed her, Aphrodîtê and the Charites bestowed upon her both ornament and fascination, while Hermês infused into her the mind of a dog, a deceitful spirit, and treacherous words<sup>2</sup>. The messenger of the gods conducted this "fascinating mischief" to mankind, at a time when Prometheus was not present. Now Epimetheus had received from his brother peremptory injunctions not to accept from the hands of Zeus any present whatever; but the beauty of Pandôra (so the newly-formed female was called) was not to be resisted. She was received and admitted among men, and from that moment their comfort and tranquillity was exchanged for suffering of every kind<sup>3</sup>. The evils to which mankind are liable had been before enclosed in a cask in their own keeping; Pandôra in her malice removed the lid of the cask,

and out flew these thousand evils and calamities, to exercise for ever their destroying force. Hope alone remained imprisoned, and therefore without efficacy, as before—the inviolable lid being replaced before she could escape. Before this incident (says the legend) men had lived without disease or suffering; but now both earth and sea are full of mischiefs, while maladies of every description stalk abroad by day as well as by night<sup>1</sup>, without any hope for man of relief to come.

Pandora in  
the Theo-  
gony.

The Theogony gives the legend here recounted, with some variations—leaving out the part of Epimetheus altogether, as well as the cask of evils. Pandora is the ruin of man, simply as the mother and representative of the female sex<sup>2</sup>. And the variations are thus useful, as they enable us to

<sup>1</sup> Opp. Di. 23. Pandora does not bring with her the cask, as the common version of this story would have us suppose: the cask exists fast closed in the custody of Epimetheus, or of man himself, and Pandora commits the fatal treachery of removing the lid. The case is analogous to that of the closed bag of unfavourable winds which Eolus gives into the hands of Odysseus, and which the guilty companions of the latter force open, to the entire ruin of his hopes (Odys. x. 19-24). The idea of the two casks on the threshold of Zeus, lying ready for dispensation—one full of evils, the other of benefits—is Hesiodic (Hesiod. *av.* 527) :—

Οὐκὶ γὰρ ἐκ κείνης κατακέραια δὲ δαδὲ κέλει, &c.

Plutarch assimilates to this the κείνη opened by Pandora, *Consolat. ad Apollon.* c. 7, p. 103. The explanation here given of the Hesiodic passage relating to Hope, is drawn from an able article in the *Wiener Jahrbücher*, vol. 107 (1845), p. 229, by Ritsch; a review of Schumann's translation of the *Prolegomena* of Herby lies. The diseases and evils are co-operative so long as they remain shut up in the cask: the same mischief-making influence which lets them out to their calamitous work, takes care that Hope shall still continue a powerless prisoner in the inside.

<sup>2</sup> Theog. 550. —

Ἐκ τῆς γῆς γένετ' ἄνθρωπος ἀδάμωτος ἀθάνατος,

Ἦῖνος μὲν θνητὸν περ' ἀνθρώπου, καὶ κτήνη τε, &c.

distinguish the essential from the accessory circumstances of the story.

" Thus (says the poet, at the conclusion of his narrative) it is not possible to escape from the purposes of Zeus<sup>1</sup>." His mythe, connecting the calamitous condition of man with the malevolence of the supreme god, shows, first, by what cause such an unfriendly feeling was raised; next, by what instrumentality its deadly results were brought about. The human race are not indeed the creation, but the protected flock of Prométhéus, one of the elder or dispossessed Titan gods: when Zeus acquires supremacy, mankind along with the rest become subject to him, and are to make the best bargain they can, respecting worship and service to be yielded. By the stratagem of their advocate Prométhéus, Zeus is cheated into such a partition of the victims as is eminently unprofitable to him: whereby his wrath is so provoked, that he tries to subtract from man the use of fire. Here however his scheme is frustrated by the theft of Prométhéus: but his second attempt is more successful, and he in his turn cheats the unthinking Epiméthéus into the acceptance of a present (in spite of the peremptory interdict of Prométhéus) by which the whole of man's happiness is wrecked. This legend grows out of two feelings; partly as to the relations of the gods with man, partly as to the relation of the female sex with the male. The present gods are unkind towards man, but the old gods, with whom man's lot was ori-

ginally cast, were much kinder—and the ablest among them stands forward as the indefatigable protector of the race. Nevertheless, the mere excess of his craft proves the ultimate ruin of the cause which he espouses. He cheats Zeus out of a fair share of the sacrificial victim, so as both to provoke and justify a retaliation which he cannot be always at hand to ward off: the retaliation is, in his absence, consummated by a snare laid for Epimætheus and voluntarily accepted. And thus, though Hesiod ascribes the calamitous condition of man to the malevolence of Zeus, his piety suggests two exculpatory pleas for the latter: mankind have been the first to defraud Zeus of his legitimate share of the sacrifice—and they have moreover been consenting parties to their own ruin. Such are the feelings, as to the relation between the gods and man, which have been one of the generating elements of this legend. The other element, a conviction of the vast mischief arising to man from women, whom yet they cannot dispense with, is frequently and strongly set forth in several of the Greek poets—by Simonidês of Amorgos and Phokylidês, not less than by the notorious misogynist Euripidês.

But the miseries arising from woman, however great they might be, did not reach Promætheus himself. For him, the rash champion who had ventured "to compete in sagacity" with Zeus, a different punishment was in store. Bound by heavy chains to a pillar, he remained fast imprisoned for several generations: every day did an eagle prey

upon his liver, and every night did the liver grow afresh for the next day's suffering. At length Zeus, eager to enhance the glory of his favourite son Héraklès, permitted the latter to kill the eagle and rescue the captive<sup>1</sup>.

Punish-  
ment of  
Promé-  
theus.

Such is the Prométhean mythe as it stands in the Hesiodic poems; its earliest form, as far as we can trace. Upon it was founded the sublime tragedy of Æschylus, "The Enchained Prométheus," together with at least one more tragedy, now lost, by the same author<sup>2</sup>. Æschylus has made several important alterations; describing the human race, not as having once enjoyed and subsequently lost a state of tranquillity and enjoyment, but as originally feeble and wretched. He suppresses both the first trick played off by Prométheus upon Zeus respecting the partition of the victim—and the final formation and sending of Pandora—which are the two most marked portions of the Hesiodic story; while on the other hand he brings out prominently and enlarges upon the theft of fire<sup>3</sup>, which in Hesiod is but slightly touched. If he has thus relinquished the antique simplicity of the story, he has rendered more than ample compensation by imparting to it a grandeur of *idéal*, a large reach of thought combined with appeals to our earnest and admiring sympathy, and a pregnancy of suggestion in re-

Tragedien, vol. i. p. 30). The story of Prométheus had also been handled by Sappho in one of her lost songs (Servius ad Virgil. Eclog. vi. 42).

gard to the relations between the gods and man, which soar far above the Hesiodic level—and which render his tragedy the most impressive, though not the most artistically composed, of all Grecian dramatic productions. Promêtheus there appears not only as the heroic champion and sufferer in the cause and for the protection of the human race, but also as the gifted teacher of all the arts, helps, and ornaments of life, amongst which fire is only one<sup>1</sup>: all this against the will and in defiance of the purpose of Zeus, who, on acquiring his empire, wished to destroy the human race and to beget some new breed<sup>2</sup>. Moreover, new relations between Promêtheus and Zeus are superadded by Æschylus. At the commencement of the struggle between Zeus and the Titan gods, Promêtheus had vainly attempted to prevail upon the latter to conduct it with prudence; but when he found that they obstinately declined all wise counsel, and that their ruin was inevitable, he abandoned their cause and joined Zeus. To him and to his advice Zeus owed the victory: yet the monstrous ingratitude and tyranny of the latter is now manifested by nailing him to a rock, for no other crime than because he frustrated the purpose of extinguishing the human race, and furnished to them the means of living with tolerable comfort<sup>3</sup>. The new ruler Zeus, insolent with his

victory over the old gods, tramples down all right, and sets at naught sympathy and obligation, as well towards gods as towards man. Yet the prophetic Promêtheus, in the midst of intense suffering, is consoled by the foreknowledge that the time will come when Zeus must again send for him, release him, and invoke his aid, as the sole means of averting from himself dangers otherwise insurmountable. The security and means of continuance for mankind have now been placed beyond the reach of Zeus—whom Promêtheus proudly defies, glorying in his generous and successful championship<sup>1</sup>, despite the terrible price which he is doomed to pay for it.

As the Æschylean Promêtheus, though retaining the old lineaments, has acquired a new colouring, soul and character, so he has also become identified with a special locality. In Hesiod there is no indication of the place in which he is imprisoned; but Æschylus places it in Scythia<sup>2</sup>, and the general belief of the Greeks supposed it to be on Mount Caucasus. So long and so firmly did this belief continue, that the Roman general Pompey, when in command of an army in Colchis, made with his companion, the literary Greek Theophrastus, a special march to view the spot in Caucasus where Promêtheus had been transfixed<sup>3</sup>.

## CHAPTER IV.

## HEROIC LEGENDS.—GENEALOGY OF ARGOS.

HAVING briefly enumerated the gods of Greece, with their chief attributes as described in legend, we come to those genealogies which connected them with historical men.

*Structure  
and pur-  
poses of  
Grecian ge-  
nealogies.*

In the retrospective faith of a Greek, the ideas of worship and ancestry coalesced. Every association of men, large or small, in whom there existed a feeling of present union, traced back that union to some common initial progenitor; that progenitor being either the common god whom they worshiped, or some semi-divine person closely allied to him. What the feelings of the community require is, a continuous pedigree to connect them with this respected source of existence, beyond which they do not think of looking back. A series of names, placed in filiation or fraternity, together with a certain number of family or personal adventures ascribed to some of the individuals among them, constitute the ante-historical past through which the Greek looks back to his gods. The names of this genealogy are, to a great degree, gentile or local names familiar to the people,—rivers, mountains, springs, lakes, villages, demes, &c.,—embodied as persons, and introduced as acting or suffering. They are moreover called kings or chiefs, but the existence of a body of subjects surrounding

them is tacitly implied rather than distinctly set forth; for their own personal exploits or family proceedings constitute for the most part the whole matter of narrative. And thus the genealogy was made to satisfy at once the appetite of the Greeks for romantic adventure, and their demand for an unbroken line of filiation between themselves and the gods. The eponymous personage, from whom the community derive their name, is sometimes the begotten son of the local god, sometimes an indigenous man sprang from the earth, which is indeed itself divinized.

To connect the Grecian community with their common god.

It will be seen from the mere description of these genealogies that they included elements human and historical, as well as elements divine and extra-historical. And if we could determine the time at which any genealogy was first framed, we should be able to assure ourselves that the men then represented as present, together with their fathers and grandfathers, were real persons of flesh and blood. But this is a point which can seldom be ascertained; moreover, even if it could be ascertained, we must at once set it aside, if we wish to look at the genealogy in the point of view of the Greeks. For to them, not only all the members were alike real, but the gods and heroes at the commencement were in a certain sense the most real; at least, they were the most esteemed and indispensable of all. The value of the genealogy consisted, not in its length, but in its continuity; not (according to the feeling of modern aristocracy) in the power of setting out a prolonged series of human fathers and grandfathers,

Lower members of the genealogy historical—higher members non-historical.

The non-historical portion equally beloved, and valued, by the Greeks.

but in the sense of ancestral union with the primitive god. And the length of the series is traceable rather to humility, inasmuch as the same person who was gratified with the belief that he was descended from a god in the fifteenth generation, would have accounted it criminal insolence to affirm that a god was his father or grandfather. In presenting to the reader those genealogies which constitute the supposed primitive history of Hellas, I make no pretence to distinguish names real and historical from fictitious creations; partly because I have no evidence upon which to draw the line, and partly because by attempting it I should altogether depart from the genuine Grecian point of view.

Number of  
such genea-  
logies—  
prevailing  
every frac-  
tion of  
Greece.

Nor is it possible to do more than exhibit a certain selection of such as were most current and interesting; for the total number of them which found place in Grecian faith exceeds computation. As a general rule, every deme, every gens, every aggregate of men accustomed to combined action, religious or political, had its own. The small and unimportant demes into which Attica was divided had each its ancestral god and heroes, just as much as the great Athens herself. Even among the villages of Phokis, which Pausanias will hardly permit himself to call towns, deductions of legendary antiquity were not wanting. And it is important to bear in mind, when we are reading the legendary genealogies of Argos, or Sparta, or Thêbes, that these are merely samples amidst an extensive class, all perfectly analogous, and all exhibiting the religious and patriotic retrospect of some fraction of the Hellenic world. They are no

more matter of historical tradition than any of the thousand other legendary genealogies which men delighted to recall to memory at the periodical festivals of their gens, their deme, or their village.

With these few prefatory remarks, I proceed to notice the most conspicuous of the Grecian heroic pedigrees, and first, that of Argos.

The earliest name in Argeian antiquity is that of Inachus, the son of Oceanus and Tēthys, who gave his name to the river flowing under the walls of the town. According to the chronological computations of those who regarded the mythical genealogies as substantive history, and who allotted a given number of years to each generation, the reign of Inachus was placed 1986 *B.C.*, or about 1100 years prior to the commencement of the recorded Olympiads<sup>1</sup>.

Argonian genealogy—  
Inachus.

The sons of Inachus were Phorōneus and Ægialeus; both of whom however were sometimes represented as autochthonous or indigenous men, the one in the territory of Argos, the other in that of Sikyōn. Ægialeus gave his name to the north-western region of the Peloponnēus, on the southern coast of the Corinthian Gulf<sup>2</sup>. The name of Phorōneus was of great celebrity in the Argeian mythical genealogies, and furnished both the title and the subject of the ancient poem called Phorōnis, in which he is styled "the father of mortal men"<sup>3</sup>.

Phorōneus.

<sup>1</sup> Apollodōr, ii. 1. Mr. Fynes Clinton does not admit the historical reality of Inachus; but he places Phorōneus seventeen generations, or 570 years prior to the Trojan war, 278 years earlier than the first recorded Olympiad. See *Fasti Hellenici*, vol. iii. & i. p. 39.

<sup>2</sup> Pausan. p. 2, 4.

<sup>3</sup> See *Metam. Pagan. Epœ. Græc.* p. 27. The Argonian author

He is said to have imparted to mankind, who had before him lived altogether isolated, the first notion and habits of social existence, and even the first knowledge of fire: his dominion extended over the whole Peloponnésus. His tomb at Argos, and seemingly also the place, called the Phorónic city, in which he formed the first settlement of mankind, were still shown in the days of Pausanias<sup>1</sup>. The offspring of Phorónéus, by the nymph Teledikê, were Apis and Niobê. Apis, a harsh ruler, was put to death by Thetxida and Telehin, having given to Peloponnésus the name of Apia<sup>2</sup>: he was succeeded by Argos, the son of his sister Niobê by the god Zeus. From this sovereign Pelopon-

<sup>1</sup> Apollodôr. ii. 1, 1; Pausan. ii. 16, 5; 19, 5; 20, 3.

<sup>2</sup> Apia in Æschylus is totally different: an *torpéparos* or medical character, son of Apollo, who comes across the gulf from Naupactus, purifies the territory of Argos from noxious mists, and gives to it the name of *Apia* (Æschyl. *Suppl.* 258). Compare Steph. Byz. v. Ἀπία; Soph. *Oedip. Col.* 1301. The name Ἀπία for Peloponnésus remains still a mystery, even after the attempt of Buttmann (*Lexilogus.* s. 19) to throw light upon it.

Eusebius asserts that Niobê was the wife of Inachus and mother of Phorónéus, and pointedly contradicts those who call her daughter of Phorónéus—*φύσις δὲ τὰς Νιδίης φωνήεντος εἰνα θυγατέρα, εἰς τὴν οἴα δαΐδα* (Chron. p. 23, ed. Scalig.): his positive time is curious, upon such a matter.

Hellankus in his *Argolien* stated that Phorónéus had three sons, Pelagus, Iasus and Agénôr, who at the death of their father divided his possessions by lot. Pelagus acquired the country near the river Krenisus, and built the citadel of Larion; Iasus obtained the portion near to Ellis. After their deaths, the younger brother Agénôr invaded and conquered the country, at the head of a large body of Iones. It was from these three persons that Argos derived three epithets which are attached to it in the Homeric poems—*Ἀργὸν Πελαργικόν, Ἰασικόν, Ἀγρόπορον* (Hellank. *Pr.* 38; ed. Dilect; *Phrychi.* v. Ἀργος). This is a specimen of the way in which legendary persons as well as legendary

nêsus was denominated Argos. By his wife Evadnê, daughter of Strymôn<sup>1</sup>, he had four sons, Ekbasus, Peiras, Epidaurus, and Kriasus. Ekbasus was succeeded by his son Agênôr, and he again by his son Argos Panoptês,—a very powerful prince, who is said to have had eyes distributed over all his body, and to have liberated Peloponêsus from several monsters and wild animals which infested it<sup>2</sup>: Akusilaus and Æschylus make this Argos an earth-born person, while Pherekydês reports him as son of Aresidôr. Iasus was the son of Argos Panoptês by Ismênê, daughter of Asôpus. According to the authors whom Apollodôrus and Pausanias prefer, the celebrated Iô was <sup>his</sup> daughter: but the Hæ-<sup>10</sup> siodic epic (as well as Akusilaus) represented her as daughter of Peiras, while Æschylus and Kastor the chronologist affirmed the primitive king Inachus to have been her father<sup>3</sup>. A favourite theme, as well for the ancient genealogical poets as for the Attic tragedians, were the adventures of Iô; of whom, while priestess of Hêrê, at the ancient and renowned Hêræon between Mykênæ and Argos,

events were got up to furnish an explanation of Homeric epithets: we may remark as singular, that Helianthus seems to apply Πελωργικὸν Ἄργον to a portion of Peloponêsus, while the Homeric Catalogue applies it to Thersites.

Düntzer: among the varieties of the story, one was that Argos was changed into a peacock (Schol. Aristoph. Aves, 102). Macrobius (i. 19) considers Argos as an allegorical expression of the starry heaven; an idea which Pausanias also upholds in one of the recent Abhandlungen of the Berlin Academy, 1837, p. 121 seq.

Zeus became amorous. When Hêrê discovered the intrigue and taxed him with it, he denied the charge, and metamorphosed Iô into a white cow. Hêrê, requiring that the cow should be surrendered to her, placed her under the keeping of Argos Panoptês; but this guardian was slain by Hermês, at the command of Zeus: and Hêrê then drove the cow Iô away from her native land by means of the incessant stinging of a gad-fly, which compelled her to wander without repose or sustenance over an immeasurable extent of foreign regions. The wandering Iô gave her name to the Ionian Gulf, traversed Egeus and Illyria, passed the chain of Mount Hæmus and the lofty summits of Caucasus, and swam across the Thracian or Cimmerian Bosphorus (which also from her derived its appellation) into Asia. She then went through Scythia, Cimmeria, and many Asiatic regions, until she arrived in Egypt, where Zeus at length bestowed upon her rest, restored her to her original form, and enabled her to give birth to his black son Epaphos<sup>1</sup>.

<sup>1</sup> *Æschyl.* *Prom.* v. 790-830; *Apollod.* ii. 1. *Æschylus* in the *Suppliants* gives a different version of the wanderings of Iô from that which appears in the *Promethæus*: in the former drama he carries her through Phrygia, Mysia, Lydia, Pamphylia and Cilicia into Egypt (*Suppl.* 544-566): nothing is there said about *Promethæus*, or *Caucasus* or *Scythia*, &c.

The track set forth in the *Suppliants* is thus geographically intelligible: that in the *Promethæus* (though the most noticed of the two) deserves all comprehension, even as a constant fiction; nor has the recitation of the commentators been successful in clearing it up. See *Schütz*, *Excurs. iv. ad Prometh.* *Vind.* pp. 141-142; *Welcker*, *Æschylische Trilogie*, pp. 127-146, and especially *Völcker*, *Mythische Geographie der Griech. und Römer*, part i. pp. 3-13.

The Greek inhabitants at Tarsus in Cilicia traced their origin to

Such is a general sketch of the adventures which the ancient poets, epic, lyric, and tragic, and the logographers after them, connect with the name of the Argeian Iô—one of the numerous tales which the fancy of the Greeks deduced from the amorous dispositions of Zeus and the jealousy of Hêrê. That the scene should be laid in the Argeian territory appears natural, when we recollect that both Argos and Mykênæ were under the special guardianship of Hêrê, and that the Hêreion between the two was one of the oldest and most celebrated temples in which she was worshiped. It is useful to compare this amusing fiction with the representation reported to us by Herodotus, and derived by him as well from Phœnicians as from Persian antiquarians, of the circumstances which occasioned the transit of Iô from Argos to Egypt,—an event recognised by all of them as historical matter of fact. According to the Persians, a Phœnician vessel had arrived at the port near Argos, freighted with goods intended for sale to the inhabitants of the country. After the vessel had remained a few days, and disposed of most of her cargo, several Argeian women, and among them Iô the king's

Romance of Iô identical by Persians and Phœnicians.

Argos: their story was, that Triptolemus had been sent forth from that town in quest of the wandering Iô, that he had followed her to Tyre, and then renounced the search in despair. He and his companions then settled partly at Tarsus, partly at Antioch (Strabo, *xv.* 673; *xv.* 760). This is the story of Kadmos and Europa inverted, as happens so often with the Grecian myths.

Romer calls Herakles "Apyrophierna"; but this epithet hardly affords sufficient proof that he was acquainted with the myths of Iô, as Völscher supposes: it cannot be traced higher than Hesiod. According to some authors, whom Cicero copies, it was on account of the murder of Argos that Herakles was obliged to leave Greece and go into Egypt: then it was that he taught the Egyptians laws and letters (*De Natur. Dion.* iii. 22).

daughter, coming on board to purchase, were seized and carried off by the crew, who sold Iô in Egypt<sup>1</sup>. The Phœnician antiquarians, however, while they admitted the circumstance that Iô had left her own country in one of their vessels, gave a different colour to the whole by affirming that she emigrated voluntarily, having been engaged in an amour with the captain of the vessel, and fearing that her parents might come to the knowledge of her pregnancy. Both Persians and Phœnicians described the abduction of Iô as the first of a series of similar acts between Greeks and Asiatics, committed each in revenge for the preceding. First came the rape of Eurôpê from Phœnicia by Grecian adventurers,—perhaps, as Herodotus supposed, by Krêtans: next, the abduction of Mèdeia from Kolchis by Jasôn, which occasioned the retaliatory act of Paris, when he stole away Helena from Menelaos. Up to this point the seizures of women by Greeks from Asiatics, and by Asiatics from Greeks, had been equivalents both in number and in wrong. But the Greeks now thought fit to equip a vast conjoint expedition to recover Helen, in the course of which they took and sacked Troy. The invasions of Greece by Darius and Xerxes were intended, according to the Persian antiquarians, as a long-delayed retribution for the injury inflicted on the Asiatics by Agamemnôn and his followers<sup>2</sup>.

<sup>1</sup> The story in *Parthénia* (Narrat. I) is built upon this version of Iô's adventures.

<sup>2</sup> Herodot. i. 1-6. Pausanias (ii. 15, 1) will not undertake to determine whether the account given by Herodotus, or that of the old legend, respecting the cause which carried Iô from Argos to Egypt, is the true one: Ephorus (sup. Schol. Apoll. Rhod. ii. 168) repeats the abduction

The account thus given of the adventures of Iô, when contrasted with the genuine legend, is interesting, as it tends to illustrate the phenomenon which early Grecian history is constantly presenting to us,—the way in which the epical furniture of an unknown past is recast and newly coloured so as to meet those changes which take place in the retrospective feelings of the present. The religious and poetical character of the old legend disappears: nothing remains except the names of persons and places, and the voyage from Argos to Egypt: we have in exchange a sober, quasi-historical narrative, the value of which consists in its bearing on the grand contemporary conflicts between Persia and Greece, which filled the imagination of Herodotus and his readers.

*Legendary abductions of heroines adapted to the feelings prevalent during the Persian war.*

To proceed with the genealogy of the kings of Argos, Iasus was succeeded by Krotôpus, son of his brother Agênôr; Krotôpus by Sthenelas, and he again by Cielandôr<sup>1</sup>. In the reign of the latter,

of Iô to Egypt by the Phœnicians, adjoining a strange account of the etymology of the name Bosphorus. The remarks of Plutarch on the narrative of Herodotus are curious: he alludes in one place of the *compê-dieu* (real feeling) of Herodotus, that the latter inserts an incredible narrative respecting Iô, daughter of Inachus, "whom all Greeks believe to have been divinized by foreigners, to have given name to seas and straits, and to be the source of the most illustrious regal families." He also blames Herodotus for rejecting Epaphros, Iô, Iasus and Argos, as highest members of the Persian genealogy. He calls Herodotus *φειδιστάτης* (Plutarch, *De Malign. Herodoti*, c. xl. xii. xiv. pp. 356, 357).

<sup>1</sup> It would be an unprofitable fatigue to enumerate the multiplied and irreconcilable discrepancies in regard to every step of this old Argive genealogy. Whoever desires to see them brought together, may consult Schubart, *Questions in Antiquarum Hæcicis*, Marburg, 1832, caps. 1 and 2.

The remarks which Schubart makes (p. 35) upon Petit-Radel's Chronological Tables will be assented to by those who follow the numbering

Danaos and  
the Da-  
næides.

Danaos came with his fifty daughters from Egypt to Argos; and here we find another of those romantic adventures which so agreeably decorate the barrenness of the mythical genealogies. Danaos and Ægyptos were two brothers descending from Epaphos, son of Io: Ægyptos had fifty sons, who were eager to marry the fifty daughters of Danaos, in spite of the strongest repugnance of the latter. To escape such a necessity, Danaos placed his fifty daughters on board of a pentecoster (or vessel with fifty oars) and sought refuge at Argos; touching in his voyage at the island of Rhodes, where he erected a statue of Athênê at Lindos, which was long exhibited as a memorial of his passage. Ægyptos and his sons followed them to Argos and still pressed their suit, to which Danaos found himself compelled to assent; but on the wedding night he furnished each of his daughters with a dagger, and enjoined them to murder their husbands during the hour of sleep. His orders were obeyed by all, with the single exception of Hypermnêstra, who preserved her husband Lynkeus, incurring displeasure and punishment from her father. He afterwards, however, pardoned her; and when, by the voluntary abdication of Gelanôr, he became king of Argos, Lynkeus was recognised as his son-in-law

string of contradictions, without any sufficient reason to believe that any one of them is more worthy of trust than the remainder, which he has cited:—*"Videntur illi, quomodo genealogias heroicas, et chronologice rationes, in commodum redigant. Ipse alioquin, probe perscrutatus, stemmata vera, historicis fide comprobata, in systema chronologicum redigi posset: ut ore per secula tradita, a posteris referta, neque mutata, prout fabula postulare volebat, ab historicarum deinde consuetudine restituta, crederet, brevia, qualia præstant stemmata—chronologicæ secundum annos distributæ vincula semper recenserentur esse."*

and ultimately succeeded him. The remaining daughters, having been purified by Athênê and Hermès, were given in marriage to the victors in a gymnastic contest publicly proclaimed. From Danaos was derived the name of Danai, applied to the inhabitants of the Argeian territory<sup>1</sup>, and to the Homic Greek generally.

From the legend of the Danaïdes we pass to two barren names of kings, Lynkeus and his son Abas. The two sons of Abas were Akrisios and Prætos, who, after much dissension, divided between them the Argeian territory; Akrisios ruling at Argos, and Prætos at Tiryns. The families of both formed the theme of romantic stories. To pass over for the present the legend of Bellerophôn, and the unrequited passion which the wife of Prætos conceived for him, we are told that the daughters of Prætos, beautiful, and solicited in marriage by suitors from all Greece, were smitten with leprosy and driven mad, wandering in unseemly guise throughout Peloponnêsus. The visitation had overtaken them, according to Hesiod, because they refused to take part in the Bacchic rites; according to Pherekydês and the Argeian Akusilaos<sup>2</sup>, because they had

treated scornfully the wooden statue and simple equipments of Hêrê: the religious character of the old legend here displays itself in a remarkable manner. Unable to cure his daughters, Prætos invoked the aid of the renowned Pylian prophet and leech, Melampus son of Amythaôn, who undertook to remove the malady on condition of being rewarded with the third part of the kingdom. Prætos indignantly refused these conditions: but the state of his daughters becoming aggravated and intolerable, he was compelled again to apply to Melampus; who, on the second request, raised his demands still higher, and required another third of the kingdom for his brother Bias. These terms being acceded to, he performed his part of the covenant. He appeased the wrath of Hêrê by prayer and sacrifice; or, according to another account, he approached the deranged women at the head of a troop of young men, with shouting and ecstatic dance,—the ceremonies appropriate to the Bacchic worship of Dionysos,—and in this manner effected their cure. Melampus, a name celebrated in many different Grecian mythes, is the legendary founder and progenitor of a great and long-continued family of prophets. He and his brother Bias became kings of separate portions of the Argeian territory: he is recognised as ruler there even in the *Odyssey*, and the prophet Theoklymenos, his grandson, is protected and carried to Ithaka by Telemachus<sup>1</sup>. Herodotus also alludes to the cure of the women, and to the double kingdom of Melampus and Bias in the Argeian land: he recognises Melampus as the

first person who introduced to the knowledge of the Greeks the name and worship of Dionysos; with its appropriate sacrifices and phallic processions. Here again he historicises various features of the old legend in a manner not unworthy of notice<sup>1</sup>.

But Danaë, the daughter of Akrisios, with her son Perseus, acquired still greater celebrity than her cousins the Proetides. An oracle had apprised Akrisios that his daughter would give birth to a son by whose hand he would himself be slain. To guard against this danger, he imprisoned Danaë in a chamber of brass under ground. But the god Zeus had become amorous of her, and found means to descend through the roof in the form of a shower of gold: the consequence of his visits was the birth of Perseus. When Akrisios discovered that his daughter had given existence to a son, he enclosed both the mother and the child in a coffer, which he cast into the sea<sup>2</sup>. The coffer was carried to the isle of Seriphos, where Diktys, brother of the king Polydektês, fished it up, and rescued both Danaë and Perseus. Instead of the Proetides, or daughters of Proitos, it is the Argive women generally whom he represents Melampus as having cured, and the Argives generally who sent to Pythia to invoke his aid; the heroic personality which pervades the primitive story has disappeared.

Kallimachos notices the Proetid virgins as the parties suffering from madness, but he treats Artemis as the healing influence (*Hymn. ad Dianam*, 203).

three Gorgons, are among the most marvellous and imaginative in all Grecian legend: they bear a stamp almost Oriental. I shall not here repeat the details of those unparalleled hazards which the special favour of Athéné enabled him to overcome, and which ended in his bringing back from Libya the terrific head of the Gorgon Medusa, endued with the property of turning every one who looked upon it into stone. In his return, he rescued Andromeda, daughter of Képheus, who had been exposed to be devoured by a sea-monster, and brought her back as his wife. Akrisios trembled to see him after this victorious expedition, and retired into Thessaly to avoid him; but Perseus followed him thither, and having succeeded in calming his apprehensions, became competitor in a gymnic contest where his grandfather was among the spectators. By an incautious swing of his quoit, he unintentionally struck Akrisios, and caused his death: the predictions of the oracle were thus at last fulfilled. Stung with remorse at the catastrophe, and unwilling to return to Argos, which had been the principality of Akrisios, Perseus made an exchange with Megapenthês, son of Prætos king of Tiryns. Megapenthês became king of Argos, and Perseus of Tiryns: moreover, the latter founded, within ten miles of Argos, the far-famed city of Mykênæ. The massive walls of this city, like those of Tiryns, of which remains are yet to be seen, were built for him by the Lykian Cyclopes<sup>1</sup>.

seid dynasty of Mykênæ. It should be noticed, however, that there were among the ancient legends contradictory accounts of the foundation of this city. Both the *Odyssey* and the Great Eoini enumerated, among the heroines, Mykênê, the Eponyma of the city; the former poem classifying her with Tyrô and Alkmêônê, the latter describing her as the daughter of Inachus and wife of Arcastôr. And Akusilaus mentioned an Eponymus Mykênæus, the son of Spartôn and grandson of Phorôneus<sup>1</sup>.

dynasty.

The prophetic family of Melampus maintained itself in one of the three parts of the divided Argæian kingdom for five generations, down to Amphiaras and his sons Alkmæôn and Amphilochos. The dynasty of his brother Bias, and that of Megapenthês, son of Proetos, continued each for four generations: a list of barren names fills up the interval<sup>2</sup>. The Perseids of Mykênæ boasted a descent long and glorious, heroic as well as historical, continuing down to the last kings of Sparta<sup>3</sup>. The issue of Perseus was numerous: his son Alkæos was father of Amphitryôn; another of his sons, Elektryôn, was father of Alkmênê<sup>4</sup>; a third, Sthenelos, father of Euryatheus.

After the death of Perseus, Alkæos and Amphi-

tryôn dwell at Tyrys. The latter became engaged in a quarrel with Elektryôn respecting cattle, and in a fit of passion killed him<sup>1</sup>: moreover the piratical Taphians from the west coast of Akarnania invaded the country, and slew the sons of Elektryôn, so that Alkmênô alone was left of that family. She was engaged to wed Amphytryôn; but she bound him by oath not to consummate the marriage until he had avenged upon the Têlebœæ the death of her brothers. Amphytryôn, compelled to flee the country as the murderer of his uncle, took refuge in Thêbes, whither Alkmênô accompanied him: Sthenelos was left in possession of Tyrys. The Kadmeians of Thêbes, together with the Lokrians and Phokians, supplied Amphytryôn with troops, which he conducted against the Têlebœæ and the Taphians<sup>2</sup>: yet he could not have subdued them without the aid of Komethô, daughter of the Taphian king Pierelaus, who conceived a passion for him, and cut off from her father's head the golden lock to which Pôseidôn had attached the gift of immortality<sup>3</sup>. Having conquered and

may be probably assigned to an epoch between the 39th and 40th Olympiad.

As we must have adopted a totally different legend respecting the birth of Hêraklês and the circumstances preceding it, among which the death of her father and brothers are highly influential. Nor could we have accepted the received chronology of the sieges of Thêbes and Troy.

<sup>1</sup> So runs the old legend in the Hesiodic Shield of Hêraklês (12-82). Apollodôros (or Pherekydês, whom he follows) softens it down, and represents the death of Elektryôn as accidentally caused by Amphytryôn. (Apollod. ii. 4, 6. Pherekydês, Fragm. 27, Diind.)

expelled his enemies, Amphitryôn returned to Thêbes, impatient to consummate his marriage: but Zeus on the wedding-night assumed his form and visited Alkmênê before him: he had determined to produce from her a son superior to all his prior offspring,—“a specimen of invincible force both to gods and men<sup>1</sup>.” At the proper time, Alkmênê was delivered of twin sons: Hêraklês, the offspring of Zeus,—the inferior and unhonoured Iphiklês, offspring of Amphitryôn<sup>2</sup>.

Zeus and  
Alkmênê.

When Alkmênê was on the point of being delivered at Thêbes, Zeus publicly boasted among the assembled gods, at the instigation of the mischief-making Atê, that there was on that day about to be born on earth, from his breed, a son who should rule over all his neighbours. Hêrê treated this as an empty boast, calling upon him to bind himself by an irremissible oath that the prediction should be realized. Zeus incautiously pledged his solemn word; upon which Hêrê darted swiftly down from Olympus to the Achaïc Argos, where the wife of Sthenelos (son of Perseus, and therefore grandson of Zeus) was already seven months gone with child. By the aid of the Eileithyïæ, the special goddesses of parturition, she caused Eurystheus, the son of Sthenelos, to be born before his time on that very day, while she retarded the delivery of Alkmênê. Then returning to Olympus, she announced the fact to Zeus: “The good man Eurystheus, son of the Perseid Sthenelos, is this day born of thy loins:

the sceptre of the Argeians worthily belongs to him." Zeus was thunderstruck at the consummation which he had improvidently bound himself to accomplish. He seized Atë his evil counsellor by the hair, and hurled her for ever away from Olympus: but he had no power to avert the ascendancy of Eurystheus and the servitude of Hēraklēs. "Many a pang did he suffer, when he saw his favourite son going through his degrading toil in the tasks imposed upon him by Eurystheus<sup>1</sup>."

*Homeric legend of his birth: its explanatory value.*

The legend, of unquestionable antiquity, here transcribed from the *Iliad*, is one of the most pregnant and characteristic in the Grecian mythology. It explains, according to the religious ideas familiar to the old epic poets, both the distinguishing attributes and the endless toil and endurances of Hēraklēs,—the most renowned and most ubiquitous of all the semi-divine personages worshiped by the Hellēnes,—a being of irresistible force, and especially beloved by Zeus, yet condemned constantly to labour for others and to obey the commands of a worthless and cowardly persecutor. His recompense is reserved to the close of his career, when his afflicting trials are brought to a close; he is then admitted to the godhead and receives in marriage Hébē<sup>2</sup>. The twelve labours, as they are called, too notorious to be here detailed, form a very small fraction of the exploits of this mighty

being, which filled the Hérakleian epics of the ancient poets. He is found not only in most parts of Hellas, but throughout all the other regions then known to the Greeks, from Gadès to the river Thermôddôn in the Euxine and to Scythia, overcoming all difficulties and vanquishing all opponents. Distinguished families are everywhere to be traced who bear his patronymic, and glory in the belief that they are his descendants. Among Achæans, Kadmeians, and Dôrians, Héraklès is venerated: the latter especially treat him as their principal hero,—the Patron Hero-God of the race: the Hérakleids form among all Dôrians a privileged gens, in which at Sparta the special lineage of the two kings was included.

His character lends itself to mythes countless in number as well as disparate in their character. The irresistible force remains constant, but it is sometimes applied with reckless violence against friends as well as enemies, sometimes devoted to the relief of the oppressed. The comic writers often brought him out as a coarse and stupid glutton, while the Athenian philosopher Prodikos, without at all distorting the type, extracted from it the simple, impressive, and imperishable apologue still known as the Choice of Hercules.

After the death and apotheosis of Héraklès, his son Hyllôs and his other children were expelled and persecuted by Eurystheus; the fear of whose vengeance deterred both the Trachinian king Kêyx and the Thebans from harbouring them. The Athenians alone were generous enough to brave the risk of offering them shelter. Eurystheus

invaded Attica, but perished in the attempt by the hand of Hyllos, or by that of Iolaos, the old companion and nephew of Héraklès<sup>1</sup>. The chivalrous courage which the Athenians had on this occasion displayed in behalf of oppressed innocence, was a favourite theme for subsequent eulogy by Attic poets and orators.

All the sons of Eurystheus lost their lives in the battle along with him, so that the Perseid family was now represented only by the Hérakleids, who collected an army and endeavoured to recover the possessions from which they had been expelled. The united forces of Íónians, Achæans, and Arcadians, then inhabiting Peloponnêsus, met the invaders at the isthmus, when Hyllos, the eldest of the sons of Héraklès, proposed that the contest should be determined by a single combat between himself and any champion of the opposing army. It was agreed, that if Hyllos were victorious, the Hérakleids should be restored to their possessions—if he were vanquished, that they should forgo all claim for the space of a hundred years, or fifty years, or three generations,—for in the specification of the time, accounts differ. Echemos, the hero of Tegea in Arcadia, accepted the challenge, and Hyllos was slain in the encounter; in consequence of which the Hérakleids retired, and resided along with the Dôrians under the protection of Ægimios, son of Dôrus<sup>2</sup>. As soon as the stipulated period of truce had expired, they renewed their attempt upon Peloponnêsus conjointly with the Dôrians,

and with complete success: the great Dorian establishments of Argos, Sparta, and Messênia were the result. The details of this victorious invasion will be hereafter recounted.

Sikyôn, Philos, Epidauros, and Trœzen<sup>1</sup> all boasted of respected eponyms and a genealogy of dignified length, not exempt from the usual discrepancies—but all just as much entitled to a place on the tablet of history as the more renowned Æolids or Hêracleids. ## CHAPTER V.

## DEUKALIÖN, HELLÉN, AND SONS OF HELLÉN.

IN the Hesiodic Theogony, as well as in the "Works and Days," the legend of Promêtheus and Epimêtheus presents an import religious, ethical, and social, and in this sense it is carried forward by Æschylus; but to neither of the characters is any genealogical function assigned. The Hesiodic Catalogue of Women brought both of them into the stream of Grecian legendary lineage, representing Deukaliön as the son of Promêtheus and Pandöra, and seemingly his wife Pyrrha as daughter of Epimêtheus<sup>1</sup>.

Deukaliön,  
son of Pro-  
mêtheus.

Deukaliön is important in Grecian mythical narrative under two points of view. First, he is the person specially saved at the time of the general deluge: next, he is the father of Hellên, the great eponym of the Hellenic race; at least this was the more current story, though there were other statements which made Hellên the son of Zeus.

The name of Deukaliön is originally connected with the Lokrian towns of Kynos and Opus, and with the race of the Leleges, but he appears finally as settled in Thessaly, and ruling in the portion of

that country called Phthiôtis<sup>1</sup>. According to what seems to have been the old legendary account, it is the deluge which transferred him from the one to the other; but according to another statement, framed in more historicising times, he conducted a body of Kurêtes and Leleges into Thessaly, and expelled the prior Pelasgian occupants<sup>2</sup>.

The enormous iniquity with which earth was contaminated—as Apollodôrus says, by the then existing brazen race, or as others say, by the fifty monstrous sons of Lykaôn—provoked Zeus to send a general deluge<sup>3</sup>. An unrelenting and terrible rain laid the whole of Greece under water, except the highest

<sup>1</sup> Hesiod. Catalog. Fragm. 21; Gaisf. lxx. Düntzer—

Ἦντι γὰρ Δευκλὼς Ἀσπίων ἑγγύστερ λαῶν,  
τοῖσι δὲ σὺν Κρονίδῃσι Ζεὺς, ἰσθόσθι μῆδον εἰδὼς,  
Ἀετῶν δὲ γένος Ζεὺς πῶλε Δευκαλίαν.

The reputed lineage of Deukaliôn continued in Phthia down to the time of Diogenetichus, if we may judge from the old Pithian Pherekydês, whom he introduced in one of his dialogues as a disputant, and whom he expressly announced as a descendant of Deukaliôn (Cicero, *Tuscul. Disp.* l. 10).

<sup>2</sup> The latter account is given by Hellan. Helle. i. 17; the former seems to have been given by Hellanikus, who affirmed that the ark after the deluge stopped upon Mount Othrys, and not upon Mount Parnassus (Schol. Pind. *ut sup.*), the former being suitable for a settlement in Thessaly.

Pyrrhia is the eponymous heroine of Pyrrhia or Pyrrha, the ancient name of a portion of Thessaly (Rhinius, *Fragm.* 18, p. 71, ed. Düntzer).

Hellanicus had written a work, now lost, entitled *Δευκαλιωνία*: all the fragments of it which are cited have reference to places in Thessaly, Lokris and Phokia. See Preller, ad Hellanikou, p. 12 (Dörpf. 1840). Probably Hellanikus is the main source of the important position occupied by Deukaliôn in Grecian legend. Theseyktus and Alestionôrus represented Deukaliôn as having founded the oracles of Dodôna, immediately after the deluge (Etym. Mag. v. *Δευκαλιων*).

<sup>3</sup> Apollodôrus connects this deluge with the wickedness of the brazen race in Hesiod, according to the practice general with the logographers of stringing together a sequence out of legends totally unconnected with each other (l. 7, 2).

mountain-tops, whereon a few stragglers found refuge. Deukaliôn was saved in a chest or ark, which he had been forewarned by his father Prométhëus to construct. After floating for nine days on the water, he at length landed on the summit of Mount Parnassus. Zeus having sent Hermês to him, promising to grant whatever he asked, he prayed that men and companions might be sent to him in his solitude; accordingly Zeus directed both him and Pyrrha to cast stones over their heads: those cast by Pyrrha became women, those by Deukaliôn men. And thus the "stony race of men" (if we may be allowed to translate an etymology which the Greek language presents exactly, and which has not been disdained by Hesiod, by Pindar, by Epicharmus, and by Virgil,) came to tenant the soil of Greece<sup>1</sup>. Deukaliôn on landing from the ark sacrificed a grateful offering to Zeus Phyxios, or the God of escape; he also erected altars in Thessaly to the twelve great gods of Olympus<sup>2</sup>.

The reality of this deluge was firmly believed throughout the historical ages of Greece: the chro-

nologers, reckoning up by genealogies, assigned the exact date of it, and placed it at the same time as the conflagration of the world by the rashness of Phaëton, during the reign of Krotôpas, king of Argos, the seventh from Inachus<sup>1</sup>. The meteorological work of Aristotle admits and reasons upon this deluge as an unquestionable fact, though he alters the locality by placing it west of Mount Pindus, near Dôdôna and the river Achelôus<sup>2</sup>. He at the same time treats it as a physical phenomenon, the result of periodical cycles in the atmosphere,—thus departing from the religious character of the old legend, which described it as a judgement inflicted by Zeus upon a wicked race. Statements founded upon this event were in circulation throughout Greece even to a very late date. The Megarians affirmed that Megaros, their hero, son of Zeus by a local nymph, had found safety from the waters on the lofty summit of their mountain Geraneia, which had not been completely submerged. And in the magnificent temple of the Olympian Zeus at Athens, a cavity in the earth was shown, through which it was affirmed that the waters of the deluge had retired. Even in the time of Pau-

The Parian marble placed this deluge in the reign of Kranaos at Athens, 752 years before the first recorded Olympiad, and 1522 years before the Christian æra; Apollodorus also places it in the reign of Kranaos, and in that of Nyctimus in Arcadia (iii. 8, 2; 14, 5).

The deluge and the *ekpyrosis* or conflagration are connected together also in Servius ad Virgil. Æneid. vi. 41: he refers both of them into a "*mutatamen temporum*."

Hellén and  
Amphik-  
tyón.

The offspring of Deukaliôn and Pyrrha were two sons, Hellén and Amphiktyón, and a daughter, Prôtogeneia, whose son by Zeus was Aethlius: it was however maintained by many, that Hellén was the son of Zeus and not of Deukaliôn. Hellén had by a nymph three sons, Dôrus, Xuthus, and Æolus. He gave to those who had been before called Greeks<sup>2</sup>, the name of Hellènes, and partitioned his territory among his three children. Æolus reigned in Thessaly; Xuthus received Peloponnêsus, and had by Kreûsa as his sons, Achæus and Iôn; while Dôrus occupied the country lying opposite to the Peloponnêsus, on the northern side of the Corinthian Gulf. These three gave to the inhabitants of their respective countries the names of Æolians, Achæans and Iônians, and Dôrians<sup>3</sup>.

<sup>1</sup> Pausan. i. 18, 7; 40, 1. According to the Parian marble (a. 5), Deukaliôn had come to Athens after the deluge, and had there himself founded the temple of the Olympian Zeus. The etymology and allegorization of the names of Deukaliôn and Pyrrha, given by Völcker in his ingenious *Mythologie des ligetischen Geschlechts* (Gießen, 1824), p. 343, appears to me not at all convincing.

<sup>2</sup> Such is the statement of Apollodorus (i. 7, 3); but I cannot bring myself to believe that the name (Ἰσπεῖροι) Greeks is at all old in the legend, or that the passage of Hesiod, in which Greeks and Latins purport to be mentioned, is genuine.

See Hesiod, *Theogon.* 1013. and *Catalog.* *Frags.* xxix. ed. Götting. with the note of Götting; also Wachsmuth, *Hellen. Alterth.* i. 1. p. 311, and Bernhardt, *Griech. Literatur.* vol. i. p. 167.

<sup>3</sup> Apollod. i. 7, 4.

Such is the genealogy as we find it in Apollo-dôrus. In so far as the names and filiation are concerned, many points in it are given differently, or implicitly contradicted, by Euripidês and other writers. Though as literal and personal history it deserves no notice, its import is both intelligible and comprehensive. It expounds and symbolises the first fraternal aggregation of Hellênic men, together with their territorial distribution and the institutions which they collectively venerated.

Sons of

Dôrus,  
Xuthos,  
Eolus.

There were two great holding-points in common for every section of Greeks: One was the Amphiktyonic assembly, which met half-yearly, alternately at Delphi and at Thermopylæ; originally and chiefly for common religious purposes, but indirectly and occasionally embracing political and social objects along with them. The other was, the public festivals or games, of which the Olympic came first in importance; next, the Pythian, Nemean and Isthmian,—institutions which combined religious solemnities with recreative effusion and hearty sympathies, in a manner so imposing and so unparalleled. Amphiktyôn represents the first of these institutions, and Aëthlius the second. As the Amphiktyonic assembly was always especially connected with Thermopylæ and Thessaly, Amphiktyôn is made the son of the Thessalian Deukaliôn; but as the Olympic festival was nowise locally connected with Deukaliôn, Aëthlius is represented as having Zeus for his father, and as touching Deukaliôn only through the maternal line. It will be seen presently, that the only matter predicated respecting Aëthlius is, that he set-

Division of  
Hellas :  
Æolian,  
Dorian,  
Ionian.

Having thus got Hellas as an aggregate with its main cementing forces, we march on to its subdivision into parts, through Æolus, Dôrus and Xuthus, the three sons of Hellên<sup>1</sup>; a distribution which is far from being exhaustive: nevertheless, the genealogists whom Apollodôrus follows recognise no more than three sons.

The genealogy is essentially post-Homeric; for Homer knows Hellas and the Hellênes only in connexion with a portion of Achaia Phthiôtis. But as it is recognised in the Hesiodic Catalogue<sup>2</sup>—composed probably within the first century after the commencement of recorded Olympiads, or before 676 B.C.—the peculiarities of it, dating from so early a period, deserve much attention. We may remark, first, that it seems to exhibit to us Dôrus and Æolus as the only pure and genuine offspring of Hellên. For their brother Xuthus is not enrolled as an eponymus; he neither founds

<sup>1</sup> How literally and implicitly even the ablest Greeks believed in eponymous persons, such as Hellên and Iôn, as the real progenitors of the races called after him, may be seen by this, that Aristotle gives this common descent as the definition of γένος (*Metaphysic.* iv. p. 118, *Brasilis*):—

Γένος λέγεται, τὸ μὲν.....τὸ δὲ, ἂν' οἱ ἀπὸ πρώτου κινήσαντες εἰ τὸ εἶδος. Οὗτω γὰρ λέγεται οἱ μὲν, "Ἕλληνες τὸ γένος, οἱ δὲ, "Ἰωνες" τῶν οἱ μὲν ἀπὸ "Ἑλλαντος, οἱ δὲ ἀπὸ "Ἰωνος, εἶναι πρώτους κινήσαντας.

nor names any people; it is only his sons Achæus and Iôn, after his blood has been mingled with that of the Erechtheid Kreûsa, who become eponyms and founders, each of his own separate people. Next, as to the territorial distribution, Xuthus receives Peloponnêsus from his father, and unites himself with Attica (which the author of this genealogy seems to have conceived as originally unconnected with Hellên) by his marriage with the daughter of the indigenous hero, Erechtheus. The issue of this marriage, Achæus and Iôn, present to us the population of Peloponnêsus and Attica conjointly as related among themselves by the tie of brotherhood, but as one degree more distant both from Dôrians and Æolians. Æolus reigns over the regions about Thessaly, and calls the people in those parts Æolians; while Dôrus occupies "the country over against Peloponnêsus on the opposite side of the Corinthian Gulf," and calls the inhabitants after himself, Dôrians<sup>1</sup>. It is at once evident that this designation is in no way applicable to the confined district between Parnassus and Ceta, which alone is known by the name of Dôris, and its inhabitants by that of Dô-

rians, in the historical ages. In the view of the author of this genealogy, the Dôrians are the original occupants of the large range of territory north of the Corinthian Gulf, comprising Ætôlia, Phôkis, and the territory of the Ozolian Lokrians. And this farther harmonises with the other legend noticed by Apollodôrus, when he states that Ætôlus, son of Endymiôn, having been forced to expatriate from Peloponnêsus, crossed into the Kurétid territory<sup>1</sup>, and was there hospitably received by Dôrus; Laodokus and Polypoetês, sons of Apollo and Phthia. He slew his hosts, acquired the territory, and gave to it the name of Ætôlia: his son Pleurôn married Xanthippê, daughter of Dôrus; while his other son, Kalydôn, marries Æolia, daughter of Amythaôn. Here again we have the name of Dôrus, or the Dôrians, connected with the tract subsequently termed Ætôlia. That Dôrus should in one place be called the son of Apollo and Phthia, and in another place the son of Hellên by a nymph, will surprise no one accustomed to the fluctuating personal nomenclature of these old legends: moreover the name of Phthia is easy to reconcile with that of Hellên, as both are identified with the same portion of Thessaly, even from the days of the Iliad.

This story, that the Dôrians were at one time the occupants, or the chief occupants, of the range

of territory between the river Achelôus and the northern shore of the Corinthian Gulf, is at least more suitable to the facts attested by historical evidence than the legends given in Herodotus, who represents the Dôrians as originally in the Phthiôtid; then as passing under Dôrus, the son of Hellên, into the Histieôtid, under the mountains of Ossa and Olympus; next, as driven by the Kadmeians into the regions of Pindus; from thence passing into the Dryopid territory, on Mount Ceta; lastly, from thence into Peloponnêsus<sup>1</sup>. The received story was, that the great Dôrian establishments in Peloponnêsus were formed by invasion from the north, and that the invaders crossed the gulf from Naupaktus,—a statement which, however disputable with respect to Argos, seems highly probable in regard both to Sparta and Messênia. That the name of Dôrians comprehended far more than the inhabitants of the insignificant tetrapolis of Dôris Proper, must be assumed, if we believe that they conquered Sparta and Messênia: both the magnitude of the conquest itself, and the passage of a large portion of them from Naupaktus, harmonise with the legend as given by Apollodôrus, in which the Dôrians are represented as the principal inhabitants of the northern shore of the gulf. The statements which we find in Herodotus, respecting the early migrations of the Dôrians, have been considered as possessing greater historical value than those of the fabulist Apollodôrus. But both are equally matter of legend, while the brief indications of the latter seem to be most in har-

mony with the facts which we afterwards find attested by history.

It has already been mentioned that the genealogy which makes Æolus, Xuthus and Dörus sons of Helliên, is as old as the Hesiodic Catalogue; probably also that which makes Helliên son of Deukaliôn. Aëthlius also is an Hesiodic personage: whether Amphiktyôn be so or not, we have no proof<sup>1</sup>. They could not have been introduced into the legendary genealogy until after the Olympic games and the Amphiktyonic council had acquired an established and extensive reverence throughout Greece.

Respecting Dörus the son of Helliên, we find neither legends nor legendary genealogy; respecting Xuthus, very little beyond the tale of Kreüsa and Iôn, which has its place more naturally among the Attic fables. Achæus however, who is here represented as the son of Xuthus, appears in other stories with very different parentage and accompaniments. According to the statement which

Apollodorus, and Pherekydès before him (Frag. 51. Eddot), called Protogeneia daughter of Deukaliôn; Pindar (Olymp. ix. 64) designated her as daughter of Opus. One of the stratagems mentioned by the Scholiast to get rid of this genealogical discrepancy was, the supposition that Deukaliôn had two names (θεσπρόντι); that he was also named Opus. (Schol. Pind. Olymp. ix. 35.)

That the Deukalids or posterity of Deukaliôn reigned in Thessaly, was mentioned both by Hesiod and Bekatarea, ap. Schol. Apollon. Rhod. iv. 265.

we find in Dionysius of Halikarnassus, Achæus, Phthius and Pelasgus are sons of Poseidôn and Larissa. They migrate from Peloponnêsus into Thessaly, and distribute the Thessalian territory between them, giving their names to its principal divisions: their descendants in the sixth generation were driven out of that country by the invasion of Deukaliôn at the head of the Kurêtes and the Leleges<sup>1</sup>. This was the story of those who wanted to provide an eponymus for the Achæans in the southern districts of Thessaly: Pausanias accomplishes the same object by different means, representing Achæus the son of Xuthus as having gone back to Thessaly and occupied the portion of it to which his father was entitled. Then, by way of explaining how it was that there were Achæans at Sparta and at Argos, he tells us that Archander and Architelês, the sons of Achæus, came back from Thessaly to Peloponnêsus, and married two daughters of Danaus: they acquired great influence at Argos and Sparta, and gave to the people the name of Achæans after their father Achæus<sup>2</sup>.

<sup>1</sup> Dionys. H. A. R. i. 17.

<sup>2</sup> Pausan. vii. 1. 1-3. Herodotus also mentions (ii. 97) Archander, son of Phthius and grandson of Achæus, who married the daughter of Danaus. Larcher (*Essai sur la Chronologie d'Herodote*, ch. s. p. 321) tells us that this cannot be the Danaus who came from Egypt, the father of the fifty daughters, who must have lived two centuries earlier, as may be proved by chronological arguments: this must be another Danaus, according to him.

Strabo seems to give a different story respecting the Achæans in Peloponnêsus: he says that they were the original population of the peninsula, that they came in from Phthia with Pelops, and inhabited Ionia, which was from them called Argos Achæum, and that on the conquest of the Dôrians, they moved into Achæia properly so called, expelling the Iônians therefrom (Strabo, vii. p. 365). This narrative is, I presume, borrowed from Ephorus.

Euripidēs also deviates very materially from the Hesiodic genealogy in respect to these eponymous persons. In the drama called *Iôn*, he describes *Iôn* as son of *Kreûsa* by *Apollo*, but adopted by *Xuthus*: according to him, the real sons of *Xuthus* and *Kreûsa* are *Dôrus* and *Achæus*<sup>1</sup>,—eponyms of the *Dôrians* and *Achæans* in the interior of *Peloponnêsus*. And it is a still more capital point of difference, that he omits *Hellên* altogether—making *Xuthus* an *Achæan* by race, the son of *Æolus*, who is the son of *Zeus*<sup>2</sup>. This is the more remarkable, as in the fragments of two other dramas of Euripidēs, the *Melanippê* and the *Æolus*, we find *Hellên* mentioned both as father of *Æolus* and son of *Zeus*<sup>3</sup>. To the general public even of the most instructed city of Greece, fluctuations and discrepancies in these mythical genealogies seem to have been neither surprising nor offensive.

## CHAPTER VI.

## THE ÆOLIDS, OR SONS AND DAUGHTERS OF ÆOLUS.

IF two of the sons of Hellên, Dôrus and Xuthus, present to us families comparatively unnoticed in mythical narrative, the third son, Æolus, richly makes up for the deficiency. From him we pass to his seven sons and five daughters, amidst a great abundance of heroic and poetical incident.

In dealing however with these extensive mythical families, it is necessary to observe, that the legendary world of Greece, in the manner in which it is presented to us, appears invested with a degree of symmetry and coherence which did not originally belong to it. For the old ballads and stories which were sung or recounted at the multiplied festivals of Greece, each on its own special theme, have been lost: the religious narratives, which the Exegêtês of every temple had present to his memory, explanatory of the peculiar religious ceremonies and local customs in his own town or Dême, have passed away: all these primitive elements, originally distinct and unconnected, are removed out of our sight, and we possess only an aggregate result, formed by many confluent streams of fable, and connected together by the agency of subsequent poets and logographers. Even the earliest agents in this work of connecting and systematising—the Hesiodic poets—have been

*Legends of Greece, originally isolated, afterwards thrown into order.*

hardly at all preserved. Our information respecting Grecian mythology is derived chiefly from the prose logographers who followed them, and in whose works, since a continuous narrative was above all things essential to them, the fabulous personages are woven into still more comprehensive pedigrees, and the original isolation of the legends still better disguised. Hekataeus, Pherekydês, Hellanikus, and Akusilaus lived at a time when the idea of Hellas as one great whole, composed of fraternal sections, was deeply rooted in the mind of every Greek; and when the fancy of one or a few great families, branching out widely from one common stem, was more popular and acceptable than that of a distinct indigenous origin in each of the separate districts. These logographers, indeed, have themselves been lost; but Apollodôrus and the various scholiasts, our great immediate sources of information respecting Grecian mythology, chiefly borrowed from them: so that the legendary world of Greece is in fact known to us through them, combined with the dramatic and Alexandrine poets, their Latin imitators, and the still later class of scholiasts—except indeed such occasional glimpses as we obtain from the *Iliad* and the *Odyssey*, and the remaining Hesiodic fragments, which exhibit but too frequently a hopeless diversity when confronted with the narratives of the logographers.

Though *Æolus* (as has been already stated) is himself called the son of *Hellên* along with *Dôrus* and *Xuthus*, yet the legends concerning the *Æolids*, far from being dependent upon this genealogy,

are not all even coherent with it: moreover the name of Æolus in the legend is older than that of Hellên, inasmuch as it occurs both in the *Iliad* and *Odyssey*<sup>1</sup>. Odysseus sees in the under-world the beautiful Tyrô, daughter of Salmôneus, and wife of Krêtheus, son of Æolus.

Æolus is represented as having reigned in Thes-saly: his seven sons were Krêtheus, Sisyphus, Athamas, Salmôneus, Deïôn, Magnês and Periêrês; his five daughters, Canacê, Aleynê, Peisidikê, Calycê and Perimêdê. The fables of this race seem to be distinguished by a constant introduction of the god Poseidôn, as well as by an unusual prevalence of haughty and presumptuous attributes among the Æolid heroes, leading them to affront the gods by pretences of equality, and sometimes even by defiance. The worship of Poseidôn must probably have been diffused and pre-eminent among a people with whom these legends originated.

#### SECTION I.—SONS OF ÆOLUS.

Salmôneus is not described in the *Odyssey* as son of Æolus, but he is so denominated both in the Hesiodic Catalogue, and by the subsequent logographers. His daughter Tyrô became enamoured of the river Enipeus, the most beautiful of all streams that traverse the earth: she frequented

the banks assiduously, and there the god Poseidôn found means to indulge his passion for her, assuming the character of the river-god himself. The fruit of this alliance were the twin brothers, Pelias and Nêleus: Tyrô afterwards was given in marriage to her uncle Krêtheus, another son of Æolus, by whom she had Æsôn, Pherês and Amythaôn—all names of celebrity in the heroic legends<sup>1</sup>. The adventures of Tyrô formed the subject of an affecting drama of Sophoklês, now lost. Her father had married a second wife, named Sidêrô, whose cruel counsels induced him to punish and torture his daughter on account of her intercourse with Poseidôn. She was shorn of her magnificent hair, beaten and ill-used in various ways, and confined in a loathsome dungeon. Unable to take care of her two children, she had been compelled to expose them immediately on their birth in a little boat on the river Enipeus; they were preserved by the kindness of a herdsman, and when grown up to manhood, rescued their mother, and revenged her wrongs by putting to death the iron-hearted Sidêrô<sup>2</sup>. This pathetic tale respecting the long imprisonment of Tyrô is substituted by Sophoklês in place of the Homeric legend, which

represented her to have become the wife of Krætheus and mother of a numerous offspring<sup>1</sup>.

Her father, the unjust Salmôneus, exhibited in his conduct the most insolent impiety towards the gods. He assumed the name and title even of Zeus, and caused to be offered to himself the sacrifices destined for that god: he also imitated the thunder and lightning, by driving about with brazen caldrons attached to his chariot and casting lighted torches towards heaven. Such wickedness finally drew upon him the wrath of Zeus, who smote him with a thunderbolt, and effaced from the earth the city which he had founded, with all its inhabitants<sup>2</sup>.

<sup>1</sup> A third story, different both from Homer and from Sophoklês, respecting Tyro, is found in Hygion's (Fab. 12.); it is of a tragical cast, and borrowed, like so many other tales in that collection, from one of the lost Greek dramas.

Where the city of Salmoneus was situated, the ancient investigators were not agreed; whether in the Pisatid, or in Elis, or in Thessaly (see Strabo, viii. p. 366). Euripidês in his *Rolus* placed him on the banks of the Alpheios (Eurip. Fragm. Ed. 1). A village and fountain in the Pisatid bore the name of Salmônai; but the mention of the river Eupens seems to mark Thessaly as the original seat of the legend. But the *numé* of the tale preserved by Apollodôreus (Virgil in the *Æneid*, vi. 586, has retouched it) marks its ancient date: the final circumstance of that tale was, that the city and its inhabitants were annihilated.

and prosperity; but he had offended the goddess Hêrê by killing Sidêrô upon her altar, and the effects of her wrath were manifested in his relations with his nephew Jasn<sup>1</sup>.

Nêleus quitted Thessaly, went into Peloponnêsus, and there founded the kingdom of Pylos. He purchased, by immense marriage presents, the privilege of wedding the beautiful Chlôris, daughter of Amphidôn, king of Orchomenôs, by whom he had twelve sons and but one daughter<sup>2</sup>—the fair and captivating Pêrô, whom suitors from all the neighbourhood courted in marriage. But Nêleus, "the haughtiest of living men<sup>3</sup>," refused to entertain the pretensions of any of them; he would grant his daughter only to that man who should bring to him the oxen of Iphiklos, from Phylakê in Thessaly. These precious animals were carefully guarded, as well by herdsmen as by a dog whom neither man nor animal could approach. Nevertheless, Bias, the son of Amythaôn, nephew of Nêleus, being desperately enamoured of Pêrô, prevailed upon his brother Melampus to undertake for his sake the perilous adventure, in spite of the prophetic knowledge of the latter, which forewarned him that though he would ultimately succeed, the prize must be purchased by severe captivity and suffering. Melampus, in attempting to steal the oxen, was seized and put in prison; from whence nothing but his prophetic powers rescued him. Being acquainted with the language of

worms, he heard these animals communicating to each other, in the roof over his head, that the beams were nearly eaten through and about to fall in. He communicated this intelligence to his guards, and demanded to be conveyed to another place of confinement, announcing that the roof would presently fall in and bury them. The prediction was fulfilled, and Phylakos, father of Iphiklos, full of wonder at this specimen of prophetic power, immediately caused him to be released. He further consulted him respecting the condition of his son Iphiklos, who was childless; and promised him the possession of the oxen on condition of his suggesting the means whereby offspring might be ensured. A vulture having communicated to Melampus the requisite information, Podarkês, the son of Iphiklos, was born shortly afterwards. In this manner Melampus obtained possession of the oxen, and conveyed them to Pylos, ensuring to his brother Bias the hand of Pêrô<sup>1</sup>. How this great legendary character, by miraculously healing the deranged daughters of Prôtos, procured both for himself and for Bias dominion in Argos, has been recounted in a preceding chapter.

miraculous gifts. Poseidôn, the divine father of the race, had bestowed upon him the privilege of changing his form at pleasure into that of any bird, beast, reptile, or insect<sup>1</sup>. He had occasion for all these resources, and he employed them for a time with success in defending his family against the terrible indignation of Hêraklês, who, provoked by the refusal of Nêleus to perform for him the ceremony of purification after his murder of Iphitus, attacked the Nêleids at Pylos. Periklymenos by his extraordinary powers prolonged the resistance, but the hour of his fate was at length brought upon him by the intervention of Athênê, who pointed him out to Hêraklês while he was perched as a bee upon the hero's chariot. He was killed, and Hêraklês became completely victorious, overpowering Poseidôn, Hêrê, Arês, and Hadês, and even wounding the three latter, who assisted in the defence. Eleven of the sons of Nêleus perished by his hand, while Nestôr, then a youth, was preserved only by his accidental absence at Gerêna, away from his father's residence<sup>2</sup>.

According to the Homeric legend, Nêleus himself was not killed by Hêraklês; subsequent poets or logographers, whom Apollodôrûs follows, seem to have thought it an injustice, that the offence given by Nêleus himself should have been avenged upon his sons and not upon himself; they therefore altered the legend upon this point, and rejected the passage in the *Iliad* as spurious (see *Schol. Ven. ad Iliad.* xi. 682).

The refusal of purification by Nêleus in Hêraklês is a genuine legendary cause; the commentators, who were disposed to spread a coating of history over these transactions, introduced another cause,—

The proud house of the Nêleids was now reduced to Nestôr; but Nestôr singly sufficed to sustain its eminence. He appears not only as the defender and avenger of Pylos against the insolence and rapacity of his Epeian neighbours in Elis, but also as aiding the Lapithæ in their terrible combat against the Centaurs, and as companion of Thêseus, Peirithôus, and the other great legendary heroes who preceded the Trojan war. In extreme old age his once marvellous power of handling his weapons has indeed passed away, but his activity remains unimpaired, and his sagacity as well as his influence in counsel is greater than ever. He not only assembles the various Grecian chiefs for the armament against Troy, perambulating the districts of Hellas along with Odysseus, but takes a vigorous part in the siege itself, and is of pre-eminent service to Agamemnôn. And after the conclusion of the siege, he is one of the few Grecian princes who returns to his original dominions, and is found, in a strenuous and honoured old age, in the midst of his children and subjects,—sitting with the sceptre of authority on the stone bench before his house at Pylos,—offering sacrifice to Poseidôn, as his father Nêleus had done before him,—and mourning only over the death of his favourite son Antilochus, who had fallen, along with so many brave companions in arms, in the Trojan war<sup>1</sup>.

Nestôr and  
his exploits

Nêleus, as king of Pylos, had aided the Orestomenius in their war against Hêraklês and the Thêbans (see Sch. Ven. ad *Iliad.* xi. 689).

The neighbourhood of Pylos was distinguished for its ancient worship both of Poseidôn and of Hêraklês; there were abundant local legends respecting them (*see Strabô, viii. pp. 344, 345*).

<sup>1</sup> About Nestôr, *Iliad.* i. 260-275; ii. 370; iii. 670-770; *Odys.* iii. 5, 110, 402.

After Nestôr the line of the Nêleids numbers undistinguished names,—Bôrus, Penthilus, and Andropompus,—three successive generations down to Melanthus, who on the invasion of Peloponnêsus by the Herakleids, quitted Pylos and retired to Athens, where he became king, in a manner which I shall hereafter recount. His son Kodrus was the last Athenian king; and Nêleus, one of the sons of Kodrus, is mentioned as the principal conductor of what is called the Ionic emigration from Athens to Asia Minor<sup>1</sup>. It is certain that during the historical age, not merely the princely family of the Kodrids in Milêtus, Ephesus, and other Ionic cities, but some of the greatest families even in Athens itself, traced their heroic lineage through the Nêleids up to Poseidôn: and the legends respecting Nestôr and Periklymenos would find especial favour amidst Greeks with such feelings and belief. The Kodrids at Ephesus, and probably some other Ionic towns, long retained the title and honorary precedence of kings, even after they had lost the substantial power belonging to the office. They stood in the same relation, embodying both religious worship and supposed ancestry, to the Nêleids and Poseidôn, as the chiefs of the Æolic colonies to Agamemnôn and Orestês. The Athenian despot Peisistratus was named after the son of Nestôr in the *Odyssey*; and we may safely presume that the heroic worship of the Nêleids

was as carefully cherished at the Ionic Miletus as at the Italian Metapontum<sup>1</sup>.

Having pursued the line of Salmóneus and Néleus to the end of its legendary career, we may now turn back to that of another son of Æolus, Kréthæus,—a line hardly less celebrated in respect of the heroic names which it presents. Alkêstis, the most beautiful of the daughters of Pelias<sup>2</sup>, was promised by her father in marriage to the man who could bring him a lion and a boar tamed to the yoke and drawing together. Admêtus, son of Pherês, the eponymus of Pherræ in Thessaly, and thus grandson of Kréthæus, was enabled by the aid of Apollo to fulfil this condition, and to win her<sup>3</sup>; for Apollo happened at that time to be in his service as a slave (condemned to this penalty by Zeus for having put to death the Cyclopès), in which capacity he tended the herds and horses with such success, as to equip Eumêlus (the son of Admêtus) to the Trojan war with the finest horses in the Grecian army. Though menial duties were imposed upon him, even to the drudgery of grinding in the mill<sup>4</sup>, he yet carried away with him a grateful and friendly sentiment towards his mortal master, whom he interfered to rescue from the wrath of the goddess Artemis, when she was indig-

Admētus was about to perish by a premature death, when Apollo, by earnest solicitation to the Fates, obtained for him the privilege that his life should be prolonged, if he could find any person to die a voluntary death in his place. His father and his mother both refused to make this sacrifice for him, but the devoted attachment of his wife Alkēstis disposed her to embrace with cheerfulness the condition of dying to preserve her husband. She had already perished, when Hēraklēs, the ancient guest and friend of Admētus, arrived during the first hour of lamentation; his strength and daring enabled him to rescue the deceased Alkēstis even from the grasp of Thanatōs (Death), and to restore her alive to her disconsolate husband<sup>1</sup>.

recounts not infrequently among the incidents of the mythical world. The poet Panyasis (ap. Clem. Alexand. *Adm.* ad Genz. p. 23)—

The old legend followed out the fundamental idea with remarkable consistency: Laomedon, as the temporary master of Poseidon and Apollo, threatens to bind them hand and foot, to sell them in the distant islands, and to cut off the ears of both, when they come to ask for their stipulated wages (*Iliad*, xii. 455). It was a new turn given to the story by the Alexandrine poets, when they introduced the motive of love, and made the sacrifice voluntary on the part of Apollo (*Kallimachos*, *Hymn*. *Apoll.* 49; *Tibullus*, *Eleg.* ii. 3, 11-30).

<sup>1</sup> Eurip. *Alkēstis*, Arg.; *Apollod.* i. 9, 15. To bring this beautiful legend more into the colour of history, a new version of it was subsequently framed: Hēraklēs was eminently skilled in medicine, and saved the life of Alkēstis when she was about to perish from a desperate malady (*Plutarch*, *Amator.* c. 17, vol. iv. p. 53, *Wyt.*).

sheltered Pélœus when obliged to fly his country in consequence of the involuntary murder of Eurytion. Kréthôis, the wife of Akastus, becoming enamoured of Pélœus, made to him advances which he repudiated. Exasperated at his refusal, and determined to procure his destruction, she persuaded her husband that Pélœus had attempted her chastity: upon which Akastus conducted Pélœus out upon a hunting excursion among the woody regions of Mount Pélion, contrived to steal from him the sword fabricated and given by Hêphæstos; and then left him, alone and unarmed, to perish by the hands of the Centaurs or by the wild beasts. By the friendly aid of the Centaur Cheirôn, however, Pélœus was preserved, and his sword restored to him: returning to the city, he avenged himself by putting to death both Akastus and his perfidious wife<sup>1</sup>.

But amongst all the legends with which the name of Pelias is connected, by far the most memorable is that of Jason and the Argonautic expedition. Jason was son of Æsôn, grandson of Krêtheus, and thus great-grandson of Æolus. Pelias, having consulted the oracle respecting the security of his dominion at Iôlkos, had received in answer a warning to beware of the man who should appear before him with only one sandal. He was celebrating a festival in honour of Poseidôn, when it so happened that Jason appeared before him with one of his feet unsandaled: he had lost one sandal in wading through the swollen current of the river

<sup>1</sup> The legend of Akastus and Pélœus was given in great detail in the Catalogue of Hesiod (Catalog. Fragn. 20-21, Markschaff.); Schol. Pindar. Nem. iv. 25; Schol. Apoll. Rhod. l. 224; Apollod. lib. 1.3, 2.

Anauros. Pelias immediately understood that this was the enemy against whom the oracle had forewarned him. As a means of averting the danger, he imposed upon Jasôn the desperate task of bringing back to Iôlikos the Golden Fleece,—the fleece of that ram which had carried Phryxos from Achaia to Kolchis, and which Phryxos had dedicated in the latter country as an offering to the god Arês. The result of this injunction was the memorable expedition—of the ship *Argô* and her crew called the Argonauts, composed of the bravest and noblest youths of Greece—which cannot be conveniently included among the legends of the *Æolids*, and is reserved for a separate chapter.

The voyage of the *Argô* was long protracted, and Pelias, persuaded that neither the ship nor her crew would ever return, put to death both the father and mother of Jasôn, together with their infant son. *Æeôn*, the father, being permitted to choose the manner of his own death, drank bull's blood while performing a sacrifice to the gods. At length, however, Jasôn did return, bringing with him not only the golden fleece, but also *Mêdea*, daughter of *Æêtês*, king of Kolchis, as his wife,—a woman distinguished for magical skill and cunning, by whose assistance alone the Argonauts had succeeded in their project. Though determined to avenge himself upon Pelias, Jasôn knew he could only succeed by stratagem: he remained with his companions at a short distance from Iôlikos, while *Mêdea*, feigning herself a fugitive from his ill-usage, entered the town alone, and procured access to the daughters of Pelias. her magical powers she soon obtained unqualified ascendancy over their minds. For example, she selected from the flocks of Pelias a ram in the extremity of old age, cut him up and boiled him in a caldron with herbs, and brought him out in the shape of a young and vigorous lamb<sup>1</sup>: the daughters of Pelias were made to believe that their old father could in like manner be restored to youth. In this persuasion they cut him up with their own hands and cast his limbs into the caldron, trusting that Médæa would produce upon him the same magical effect. Médæa pretended that an invocation to the moon was a necessary part of the ceremony: she went up to the top of the house as if to pronounce it, and there lighting the fire-signal concerted with the Argonauts, Jasôn and his companions burst in and possessed themselves of the town. Satisfied with having thus revenged himself, Jasôn yielded the principality of Iôlkos to Akastus, son of Pelias, and retired with Médæa to Corinth. Thus did the goddess Hêrè gratify her ancient wrath against Pelias: she had constantly watched over Jasôn, and had carried the "all-notorious" Argô through its innumerable perils, in order that Jasôn might bring home Médæa to accomplish the ruin of his uncle<sup>2</sup>. The mis-

<sup>1</sup> This incident was contained in one of the earliest dramas of Euripides, the *Hekabê*, now lost. Mœnes of Choriend (Progrimmus, *op. Mus. ad. Euseb.*, p. 415), who gives an extract from the argument, says that the poet "extremam mentisendi lineam attingit."

The *Trigramm* of Sophokles seems also to have turned upon the same catastrophe (see *Fragm.* 479, Dindorf).

than her displeasure against Pelias; at least it is specially noticed in the *Odyssey*, as the great cause of the escape of the ship *Argô*: 'ΑΑΑ' 'Ηγή παρήμενος, ἐνὶ φθόγῳ ἦν Ἴφρων (xii. 70). In the Hesiodic Theogony Pelias stands to Jason in the same relation as Eurytheneus to Hēraklēs,—a severe taskmaster as well as a wicked and insolent man,—ἐξαιρετὴς Πηλεὶ καὶ ἀνείσβαλος, ἡττομένηργος (Theog. 995). Apollodorus Rhodius keeps the wrath of Hērē against Pelias in the foreground, i. 14; iii. 1134; iv. 242; see also Hygin. f. 13.

There is great diversity in the stories given of the proximate circumstances connected with the death of Pelias: Eurip. *Méd.* 491; Apollonius, i. 2, 27; Diodor. iv. 50-52; Ovid. *Metam.* vii. 162, 209, 207, 347; Pausan. viii. 11, 2; Schol. ad *Lycoph.* 175.

In the legend of Akastus and Pelops, as recounted above, Akastus was made to perish by the hand of Pelops. I do not take upon me to reconcile these contradictions.

Pausanias mentions that he could not find in any of the poets, so far as he had read, the names of the daughters of Pelias, and that the painter Mikôn had given to them names (*ὀνόματα δ' αὖτε παρὰ μὲν Ἰστρον ἰδόντα, ὅσα γ' ἐπιλέγειντα ἔμεν, &c.*, Pausan. viii. 11, 1). Yet their names are given in the authors whom Diodorus copied; and Alkestis, at any rate, was most memorable. Mikôn gave the names Asteropeia and Antinôô, altogether different from those in Diodorus. Both Diodorus and Hyginus exonerate Alkestis from all share in the death of her father (Hygin. f. 24).

The old poem called the *Nóctroi* (see Argum. ad Eurip. *Méd.*, and Schol. Aristophan. *Equit.* 1321) recounted, that Médœa had boiled in a caldron the old Æson, father of Jason, with herbs and incantations, and that she had brought him out young and strong. Ovid copies this (*Metam.* vii. 162-203). It is singular that Pherekydês and Simplicius and that she had performed this process upon Jason himself (Schol. Aristoph. l. c.). Diogenes (ap. Stobæ. *Florileg.* t. xxix. 92) rationalizes the story, and converts Médœa from an enchantress into an improving and regenerating preceptor. The death of Æson, as described in the text, is given from Diodorus and Apollodorus. Médœa seems to have been worshipped as a goddess in other places besides Corinth (see Athenagor. *Legat. pro Christ.* 12; Macrobius, i. 12, p. 247, Gronov.).

<sup>1</sup> These funeral games in honour of Pelias were among the most renowned of the mythical incidents: they were celebrated in a special poem

Jasón and Médea retired from Iolkos to Corinth, where they resided ten years: their children were —Medeios, whom the Centaur Cheiron educated in the regions of Mount Pélion<sup>1</sup>,—and Mermerus and Pherès, born at Corinth. After they had resided there ten years in prosperity, Jasón set his affections on Glaukè, daughter of Kreôn<sup>2</sup> king of Corinth; and as her father was willing to give her to him in marriage, he determined to repudiate Médea, who received orders forthwith to leave Corinth. Stung with this insult and bent upon revenge, Médea prepared a poisoned robe, and sent it as a marriage present to Glaukè: it was unthinkingly accepted and put on, and the body of the unfortunate bride was burnt up and consumed. Kreôn, her father, who tried to tear from her the burning garment, shared her fate and perished. The exulting Médea escaped by means of a chariot with winged serpents furnished to her by her grandfather Hèlios: she placed herself under the protection of Ægèus at Athens, by whom she had a son named Médus. She left her young children in the sacred enclosure of the Akrean Hèrè, relying on the protection of the altar to

Kleros; Athen. iv. 172). How familiar the details of them were to the mind of a literary Greek is indirectly attested by Plutarch, Sympot. i. 2, vol. iii. p. 762, Wyll.

<sup>1</sup> Herodotus, Theopompus, 998.

<sup>2</sup> According to the Schol. ad Eurip. Méd. 20, Jasón marries the daughter of Hippodámia the son of Kreôn, who is the son of Lykastos. Lykastos, after the departure of Polycrates from Corinth, reigned twenty-seven years; then Kreôn reigned thirty-six years; then came Hippodámia.

ensure their safety; but the Corinthians were so exasperated against her for the murder of Kreôn and Glaukê, that they dragged the children away from the altar and put them to death. The miserable Jason perished by a fragment of his own ship Argô, which fell upon him while he was asleep under it<sup>1</sup>, being hauled on shore, according to the habitual practice of the ancients.

The first establishment at Ephyrê, or Corinth,

<sup>1</sup> Apollodor. l. 3, 27; Diodor. iv. 54. The Médæ of Euripidês, which has fortunately been preserved to us, is too well known to need express reference. He makes Médæ the destroyer of her own children, and borrows from this circumstance the most pathetic touches of his exquisite drama. Parnotiskos accused him of having been bribed by the Corinthians to give this tale in the legend; and we may regard the accusation as a proof that the older and more current tale imputed the murder of the children to the Corinthians (schol. Eurip. Méd. 275, where Didymos gives the story out of the old poem of Krenophylus). See also Elien. V. ii. v. 21; Pausan. ii. 3, 6.

The most significant fact in respect to the fable is, that the Corinthians celebrated periodically a propitiatory sacrifice to Hêrê Athena and to Mênestes and Phérês, as an atonement for the sin of having violated the sanctuary of the altar. The legend grew out of this religious ceremony, and was so arranged as to explain and account for it (see Eurip. Méd. 1876, with the Schol. Diodor. iv. 53).

Mênestes and Phérês were the names given to the children of Médæ and Jason in the old Naxosian Version, in which, however, the legend must have been recounted quite differently, since they said that Jason and Médæ had gone from Iolkos, not to Corinth, but to Corcyra; and that Mênestes had perished in hunting on the opposite continent of Epirus. Klemmân gives another ancient genealogical poet, called the children of Médæ and Jason Kriôpis and Médos (Pausan. ii. 3, 7); Diodorus gives them different names (iv. 54). Hesiod in the Theogony speaks only of Médos as the son of Jason.

Médæ does not appear either in the Iliad or Odyssey: in the former we find Agamêdê, daughter of Angês, "who knows all the poisons (or medicines) which the earth nourishes" (Iliad. xi. 740); in the latter we have Cirê, sister of Médos father of Médæ, and living in the Egean island (Odys. x. 70). Cirê is daughter of the god Hêlios, as Médæ is his grand-daughter,—she is herself a goddess. She is in many points the parallel of Médæ: she forewarns and protects Odysseus throughout his dangers, as Médæ aids Jason: according to the

He was more than a match even for the arch-thief Autolykus, the son of Hermês, who derived from his father the gift of changing the colour and shape of stolen goods, so that they could no longer be recognised: Sisyphus, by marking his sheep under the foot, detected Autolykus when he stole them, and obliged him to restore the plunder. His penetration discovered the amour of Zeus with the nymph Ægina, daughter of the river-god Asôpus. Zeus had carried her off to the island of Cênônê (which subsequently bore the name of Ægina); upon which Asôpus, eager to recover her, inquired of Sisyphus whither she was gone; the latter told him what had happened, on condition that he should provide a spring of water on the summit of the Aero-Corinthus. Hæsidic story she has two children by Odysseus, Agrius and Latona (Theogon. 800).

Odysseus goes to Ephyrê to woo the son of Mermæus, to procure poison for his arrow: Eustathius treats this Mermæus as the son of Alcides (see Odys. i. 270, and Eust.). As Ephyrê is the legendary name of Corinth, we may presume this to be a thread of the same mythical tissue.

summit, rolled back again in spite of all his efforts with irresistible force into the plain<sup>1</sup>.

In the application of the *Æolid* genealogy to Corinth, Sisyphus, the son of *Æolus*, appears as the first name: but the old Corinthian poet *Eu-melos* either found or framed an heroic genealogy for his native city independent both of *Æolus* and *Sisyphus*. According to this genealogy, *Ephyré*, daughter of *Océanis* and *Téthys*, was the primitive tenant of the Corinthian territory, *Asôpus* of the *Sikyônian*: both were assigned to the god *Hélios*, in adjusting a dispute between him and *Poseidôn*, by *Briareus*. *Hélios* divided the territory between his two sons *Æétès* and *Alôeus*: to the former he assigned Corinth, to the latter *Sikyôn*. *Æétès*, obeying the admonition of an oracle, emigrated to *Kolchis*, leaving his territory under the rule of *Bunus*, the son of *Hermès*, with the stipulation that it should be restored whenever either he or

<sup>1</sup> Respecting *Sisyphus*, see *Apollodôr.* i. 2, 3; iii. 12, 6. *Pausan.* ii. 5, 1. *Schœl.* ad *Hom.* i. 180. Another legend about the amour of *Sisyphus* with *Tyrô*, is in *Hygin.* fab. 60, and about the manner in which he overreached even *Haidês* (*Pherekydês* ap. *Schol.* *Hom.* vi. 153). The stone rolled by *Sisyphus* in the under-world appears in *Odys.* xi. 592. The name of *Sisyphus* was given during the historical age to men of craft and stratagem, such as *Damylidês* (*Xenoph.* *Hellenic.* iii. 1, 8). He passed for the real father of *Odysseus*, though *Heyne* (ad *Apollodôr.* i. ii. 3) treats this as another *Sisyphus*, whereby he destroys the suitableness of the predixes as regards *Odysseus*. The duplication and triplication of synonymous personages is an ordinary resource for the purpose of reducing the legends into a seeming chronological sequence.

Even in the days of *Lunulus* a religious mystery was observed respecting the tombs of *Sisyphus* and *Nôleus*,—the latter had also died at Corinth,—no one could say where they were buried (*Pausan.* ii. 2, 2).

*Sisyphus* even overreached *Persephonê*, and made his escape from the under-world (*Theogon.* 702).

any of his descendants returned. After the death of Buncos, both Corinth and Sikyón were possessed by Epópeus, son of Alóeus, a wicked man. His son Marathón left him in disgust and retired into Attica, but returned after his death and succeeded to his territory, which he in turn divided between his two sons Corinthos and Sikyón, from whom the names of the two districts were first derived. Corinthos died without issue, and the Corinthians then invited Médea from Iólkos as the representative of Ætēs: she with her husband Jasón thus obtained the sovereignty of Corinth<sup>1</sup>. This legend of Eumélus, one of the earliest of the genealogical poets, so different from the story adopted by Neophrôn or Euripidēs, was followed certainly by Simonidēs and seemingly by Theopompus<sup>2</sup>. The incidents in it are imagined and arranged with a view to the supremacy of Médea; the emigration of Ætēs and the conditions under which he transferred his sceptre, being so laid out as to confer upon Médea an hereditary title to the throne. The Corinthians paid to Médea and to her children<sup>3</sup> solemn worship, either divine or heroic, in conjunction with Hērō Akraea<sup>4</sup>, and this was sufficient

to give to Mèdeia a prominent place in the genealogy composed by a Corinthian poet, accustomed to blend together gods, heroes and men in the antiquities of his native city. According to the legend of Eumêlos, Jasn became (through Mèdeia) king of Corinth; but she concealed the children of their marriage in the temple of Hêrê, trusting that the goddess would render them immortal. Jasn, discovering her proceedings, left her and retired in disgust to Iolkos; Mèdeia also, being disappointed in her scheme, quitted the place, leaving the throne in the hands of Sisyphus, to whom, according to the story of Theopompus, she had become attached<sup>1</sup>. Other legends recounted, that Zeus had contracted a passion for Mèdeia, but that she had rejected his suit from fear of the displeasure of Hêrê; who, as a recompense for such fidelity, rendered her children immortal<sup>2</sup>; moreover Mèdeia had erected, by special command of Hêrê, the celebrated temple of Aphrodite at Corinth. The tenor of these fables manifests their connection with the temple of Hêrê: and we may consider the legend of Mèdeia as having been originally quite independent of that of Sisyphus, but fitted on to it, in seeming chronological sequence, so as to satisfy the feelings of those Æolids of Corinth who passed for his descendants.

Sisyphus had for his sons Glaukos and Ornytiôn. From Glaukos sprang Bellerophôn, whose romantic

adventures commence with the Iliad, and are further expanded by subsequent poets: according to some accounts he was really the son of Poseidōn, the prominent deity of the Æolid family<sup>1</sup>. The youth and beauty of Bellerophōn rendered him the object of a strong passion on the part of Anteia, wife of Prætos king of Argos. Finding her advances rejected, she contracted a violent hatred towards him, and endeavoured by false accusations to prevail upon her husband to kill him: Prætos refused to commit the deed under his own roof, but despatched him to his son-in-law the king of Lykia in Asia Minor, putting into his hands a folded tablet full of destructive symbols. Conformably to these suggestions, the most perilous undertakings were imposed upon Bellerophōn. He was directed to attack the monster Chimæra and to conquer the warlike Solymi as well as the Amazons: as he returned victorious from these enterprises, an ambuscade was laid for him by the bravest Lykian warriors, all of whom he slew. At length the Lykian king recognised him "as the genuine son of a god," and gave him his daughter in marriage together with half of his kingdom. The grandchildren of Bello-

Welcker (*Griechische Tragedie*, ii. p. 777-800) has ingeniously put together all that can be divined respecting the two plays of Euripides.

phôn, Glaukôa and Sarpêdôn,—the latter a son of his daughter Laodameia by Zeus,—combat as allies of Troy against the host of Agamemnôn<sup>1</sup>. Respecting the winged Pegasus, Homer says nothing; but later poets assigned to Bellerophôn this miraculous steed, whose parentage is given in the Hesiodic Theogony, as the instrument both of his voyage and of his success<sup>2</sup>. Heroic worship was paid at Corinth to Bellerophôn, and he seems to have been a favourite theme of recollection not only among the Corinthians themselves, but also among the numerous colonists whom they sent out to other regions<sup>3</sup>.

From Ornytiôn, the son of Sisyphus, we are conducted through a series of three undistinguished family names,—Thoos, Damophôn, and the brothers Propodas and Hyanthidas,—to the time of the Dorian occupation of Corinth<sup>4</sup>, which will be hereafter recounted.

—Athamas.

We now pass from Sisyphus and the Corinthian fables to another son of Æolus, Athamas, whose family history is not less replete with mournful and tragical incidents, abundantly diversified by the poets. Athamas, we are told, was king of Orchomenos; his wife Nephelê was a goddess, and he had by her two children, Phryxus and Hellê. After a certain time he neglected Nephelê, and took to

himself as a new wife Inô, the daughter of Kadmos, by whom he had two sons, Learchus and Melikertês. Inô, looking upon Phryxus with the hatred of a step-mother, laid a snare for his life. She persuaded the women to roast the seed-wheat, which, when sown in this condition, yielded no crop, so that famine overspread the land. Athamas sent to Delphi to implore counsel and a remedy: he received for answer, through the machinations of Inô with the oracle, that the barrenness of the fields could not be alleviated except by offering Phryxus as a sacrifice to Zeus. The distress of the people compelled him to execute this injunction, and Phryxus was led as a victim to the altar. But the power of his mother Nephele snatched him from destruction, and procured for him from Harmons a ram with a fleece of gold, upon which he and his sister Hellê mounted and were carried across the sea. The ram took the direction of the Euxine sea and Kolchis: when they were crossing the Hellespont, Hellê fell off into the narrow strait, which took its name from that incident. Upon this, the ram, who was endued with speech, consoled the terrified Phryxus, and ultimately carried him safe to Kolchis: Ætês, king of Kolchis son of the god Hêlios and brother of Circê, received Phryxus kindly, and gave him his daughter Chalkiopê in marriage. Phryxus sacrificed the ram to Zeus Phryxios, suspending the golden fleece in the sacred grove of Arês.

his own son Learehus, and would also have put to death his other son Melikertês, if Inô had not snatched him away. She fled with the boy across the Megarian territory and Mount Geraneia, to the rock Moluris, overhanging the Saronic Gulf: Athamas pursued her, and in order to escape him she leaped into the sea. She became a sea-goddess under the title of Lenkothea; while the body of Melikertês was cast ashore on the neighbouring territory of Schœnus, and buried by his uncle Sisyphus, who was directed by the Nereids to pay to him heroic honours under the name of Palæmôn. The Isthmian games, one of the great periodical festivals of Greece, were celebrated in honour of the god Poseidôn, in conjunction with Palæmôn as a hero. Athamas abandoned his territory, and became the first settler of a neighbouring region called from him Athamantia, or the Athamantian plain<sup>1</sup>.

*Ἦτο νηλεὲς ἐν θεῶν, ἢ δὲ Διὸς

Compare Valckenart, *Diatribe in Eurip.*; Apollodôr. l. 9, 1-2; Schol. ad Pindar. *Argum.* ad Isthm. p. 180. The many varieties of the fable of Athamas and his family may be seen in Hygin. *fab.* 1-5; Phléostophanes *ep.* Schol. *Iliad.* vii. 56: it was a favourite subject with the tragedians, and was handled by Æschylus, Sôphoklês and Euripidês in more than one drama (see Welcker, *Griechische Tragöde*, vol. i. p. 312-332; vol. ii. p. 512). Heyne says that the proper reading of the name is *Phœirus*, not *Phryxus*,—incorrectly, I think: *σπέφει* connects the name both with the story of roasting the wheat (*σπρέψαν*), and also with the country *σπέρψα*, of which it was pretended that Phryxus was the Eponymus. Inô, or Lenkothea, was worshipped as a heroine at Megara as well as at Corinth (Pausan. l. 12, 3): the celebrity of the Isthmian games carried her worship, as well as that of Palæmôn, throughout most parts of Greece (Clem. *De Nat. Deor.* iii. 16). She is the only personage of this family noticed either in the *Iliad* or *Odyssey*: in the latter poem she is a sea-goddess, who has once been a mortal daughter of

The legend of Athamas connects itself with some sanguinary religious rites and very peculiar family customs, which prevailed at Alos, in Achaia Phthiôtis, down to a time<sup>1</sup> later than the historian Herodotus, and of which some remnant existed at Orchomenos even in the days of Plutarch. Athamas was worshiped at Alos as a hero, having both a chapel and a consecrated grave, attached to the temple of Zeus Laphystios. On the family of which he was the heroic progenitor, a special curse and disability stood affixed. The eldest of the race was forbidden to enter the prytaneion or government-house: if he was found within the doors of the building, the other citizens laid hold of him on his going out, surrounded him with garlands, and led him in solemn procession to be sacrificed as a victim at the altar of Zeus Laphystios. The prohibition carried

Local root of the legend of Athamas.

Kadmaia; she saves Odysseus from imminent danger at sea by presenting to him her epheleporos (Odysseus, v. 435; see the refinements of Aratidis, *Orat.* iii. p. 27). The voyage of Phryxos and Helle to Kolchis was related in the Hesiodic *Eoiai*: we find the names of the children of Phryxos by the daughter of Aëtia quoted from that poem (Schol. ad Apollon. Rhod. ii. 1123); both Hesiod and Pherekydes mentioned the golden fleece of the ram (Eratosthen. *Catasterism.* 19; Pherekyd. *Fragment.* 53, Didot).

Hekataeus preserved the remnant of the speaking ram (Schol. Apoll. Rhod. i. 356); but Hellanikus dropped the story of Helle having fallen into the sea: according to him she died at Paktyê in the Chersonesus (Schol. Apoll. Rhod. ii. 1144).

The poet Asius seems to have given the genealogy of Athamas by Themistê much in the same manner as we find it in Apollodorus (Pausan. ix. 23, 3).

According to the ingenious refinements of Dionysius and Palsephatus (Schol. ad Apoll. Rhod. ii. 1144; Palsephat. de *Incred.* c. 31) the ram of Phryxos was after all a man named Krios, a faithful attendant who aided in his escape; others imagined a ship with a ram's head at the bow.

<sup>1</sup> Plutarch, *Quæst. Græc.* c. 38, p. 239. Schol. Apoll. Rhod. ii. 656.

with it an exclusion from all the public meetings and ceremonies, political as well as religious, and from the sacred fire of the state: many of the individuals marked out had therefore been bold enough to transgress it. Some had been seized on quitting the building and actually sacrificed; others had fled the country for a long time to avoid a similar fate.

The guides who conducted Xerxès and his army through southern Thessaly detailed to him this existing practice, coupled with the local legend, that Athamas, together with Inò, had sought to compass the death of Phryxus, who however had escaped to Kolchis; that the Achæans had been enjoined by an oracle to offer up Athamas himself as an expiatory sacrifice to release the country from the anger of the gods; but that Kytissorus, son of Phryxus, coming back from Kolchis, had intercepted the sacrifice of Athamas<sup>1</sup>, whereby the anger of the gods remained still unappeased, and an undying curse rested upon the family<sup>2</sup>.

That such human sacrifices continued to a greater or less extent, even down to a period later than Herodotus, among the family who worshiped Athamas as their heroic ancestor, appears certain:

<sup>1</sup> Of the Athamas of Sophoklès, turning upon this intended, but not consummated sacrifice, little is known, except from a passage of Aristophanes and the Scholia upon it (Nubæ, 258.)—

ἐπὶ τῷ στήθεσσι; ἄνθρωποι, ἡσυχίαν, ἡσυχίαν,  
 ἄνθρωποι μετὰ τὸν Ἀθήναιον ἄνθρωποι μὴ θύοντες.

Athamas was introduced in this drama with a garland on his head, on the point of being sacrificed as an expiation for the death of his son Phryxus, whom Héraklès interrogates and rescues him.

mention is also made of similar customs in parts of Arcadia, and of Thessaly, in honour of Pæleus and Cheirôn<sup>1</sup>. But we may reasonably presume, that in the period of greater humanity which Herodotus witnessed, actual sacrifice had become very rare. The curse and the legend still remained, but were not called into practical working, except during periods of intense national suffering or apprehension, during which the religious sensibilities were always greatly aggravated. We cannot at all doubt, that during the alarm created by the presence of the Persian king with his immense and ill-disciplined host, the minds of the Thessalians must have been keenly alive to all that was terrific

Respecting the ἀνέστησαν at the temple of Zanis Lykams in Arcadia, see Plato, *Republ.* viii. p. 556. Pausanias (viii. p. 28, 5) seems to have shrunk, when he was upon the spot, even from inquiring what they were—a striking proof of the fearful ideas which he had conceived of them. Plutarch (*De Defectu Oracul.* c. 14) speaks of τὰς αἰδῶς ἐννοήσεις ἀδυσσεύσας. The Schol. ad *Iyconphron.* 229, gives a story of children being sacrificed to Melikertes at Tenedos; and Apollonius (ad Porphyry, *de Abstemitiâ*, §. 55, see Apollon. *Frugis.* 20, ad. Plot.) said that the Lacedæmonians had sacrificed a man to Actæ—καὶ Αἰσχυρίαντος φησὶν ὁ Ἀπολλόδοτος τῷ Ἀπὸ θύου ἀδυσσεύσας. About Salamis in Cyprus, see Lactantius, *De Falsâ Religione*, i. c. 21. “Apud Cypri Salaminum, humanum humani Jovi Tournus immolavit, idque sacrificium posteris tradidit: quod est unper Hadriano imperante sublatum.”

Respecting human sacrifices in historical Greece, consult a good section in K. F. Hermann's *Gottesdienstliche Alterthümer der Griechen* (sect. 27). Such sacrifices had been a portion of primitive Grecian religion, but had gradually become obsolete everywhere—except in one or two solitary cases, which were spoken of with horror. Even in these cases, too, the reality of the fact, in later times, is not beyond suspicion.

in their national stories, and all that was expiatory in their religious solemnities. Moreover, the mind of Xerxès himself was so awe-struck by the tale, that he revered the dwelling-place consecrated to Athamas. The guides who recounted to him the romantic legend, gave it as the historical and generating cause of the existing rule and practice: a critical inquirer is forced (as has been remarked before) to reverse the order of precedence, and to treat the practice as having been the suggesting cause of its own explanatory legend.

The family history of Athamas, and the worship of Zeus Laphystios, are expressly connected by Herodotus with Alos in Achæa Phthiôtis—one of the towns enumerated in the *Iliad* as under the command of Achilles. But there was also a mountain called Laphystion, and a temple and worship of Zeus Laphystios between Orchomenos and Korôneia, in the northern portion of the territory known in the historical ages as Boeotia. Here too the family story of Athamas is localised, and Athamas is presented to us as king of the districts of Korôneia, Haliartus and Mount Laphystion: he is thus interwoven with the Orchomenian genealogy<sup>1</sup>. Andreus (we are told), son of the river Pénceios, was the first person who settled in the region: from him it received the name Andréia. Athamas, coming subsequently to Andreus, received from him the territory of Korôneia and Haliartus with Mount Laphystion: he gave in marriage to Andreus Euippè, daughter of his son Leucôn, and the issue of this marriage was Éteoklês, said to be

the son of the river Képhissos. Korónos and Haliartus, grandsons of the Corinthian Sisyphus, were adopted by Athamas, as he had lost all his children. But when his grandson Presbôn, son of Phryxus, returned to him from Kolchis, he divided his territory in such manner that Korónos and Haliartus became the founders of the towns which bore their names. Almôn, the son of Sisyphus, also received from Eteoklês a portion of territory, where he established the village Almônes<sup>1</sup>.

With Eteoklês began, according to a statement in one of the Hesiodic poems, the worship of the Charites or Graces, so long and so solemnly continued at Orchomenos in the periodical festival of the Charitésia, to which many neighbouring towns and districts seem to have contributed<sup>2</sup>. He also distributed the inhabitants into two tribes—Eteokleia and Képhissias. He died childless, and was succeeded by Almos, who had only two daughters, Chrysê and Chrysogeneia. The son of Chrysê by the god Arês was Phlegyas, the father and founder of the warlike and predatory Phlegyæ, who despoiled every one within their reach, and assaulted not only the pilgrims on their road to Delphi, but even the treasures of the temple itself. The offended god punished them by continued thunder, by earthquakes, and by pestilence, which extinguished all this impious race, except a scanty remnant who fled into Phokis.

rived the name both of Minyas for the people, and of Orchomenos for the town<sup>1</sup>. During the reign of Orchomenos, Hyëttus came to him from Argos, having become an exile in consequence of the death of Molyros : Orchomenos assigned to him a portion of land, where he founded the village called Hyëttus<sup>2</sup>. Orchomenos, having no issue, was succeeded by Klymenos, son of Presbôn, of the house of Athamas : Klymenos was slain by some Thébans during the festival of Poseidôn at Onchêstos ; and his eldest son, Erginus, to avenge his death, attacked the Thébans with his utmost force ;—an attack, in which he was so successful, that the latter were forced to submit, and to pay him an annual tribute.

The Orchomenian power was now at its height : both Minyas and Orchomenos had been princes of surpassing wealth, and the former had built a spacious and durable edifice which he had filled with gold and silver. But the success of Erginus against Thêbes was soon terminated and reversed by the hand of the irresistible Hêraklês, who rejected with disdain the claim of tribute, and even mutilated the envoys sent to demand it : he not only emancipated Thêbes, but broke down and impoverished Orchomenos<sup>3</sup>. married a young wife, from which match sprang the illustrious heroes, or gods, Trophônios and Agamédês; though many (amongst whom is Pausanias himself) believed Trophônios to be the son of Apollo<sup>1</sup>. Trophônios, one of the most memorable persons in Grecian mythology, was worshiped as a god in various places, but with especial sanctity as Zeus Trophônios at Lebadeia: in his temple at this town, the prophetic manifestations outlasted those of Delphi itself<sup>2</sup>. Trophônios and Agamédês, enjoying matchless renown as architects, built<sup>3</sup> the temple of Delphi, the thalamus of Amphitryon at Thêbes, as well as the inaccessible vault of Hyrieus at Hyria, in which they are said to have left one stone removeable at pleasure so as to reserve for themselves a secret entrance. They entered so frequently, and stole so much gold and silver, that Hyrieus, astonished at his losses, at length spread a fine net, in which Agamédês was inextricably caught: Trophônios cut off his brother's head and carried it away, so that the body, which alone remained, was insufficient to identify the thief. Like Amphiaraos, whom he resembles in more than one respect, Trophônios was swallowed up by the earth near Lebadeia<sup>4</sup>.

From Trophônus and Agamêdês the Orchomenian genealogy passes to Askalaphos and Ialmenos, the sons of Arês by Astyochê, who are named in the Catalogue of the Iliad as leaders of the thirty ships from Orchomenos against Troy. Azeus, the grandfather of Astyochê in the Iliad, is introduced as the brother of Erginus<sup>1</sup> by Pausanias, who does not carry the pedigree lower.

The genealogy here given out of Pausanias is deserving of the more attention, because it seems to have been copied from the special history of Orchomenos by the Corinthian Kallippus, who again borrowed from the native Orchomenian poet, Chersias; the works of the latter had never come into the hands of Pausanias. It illustrates forcibly the principle upon which these mythical genealogies were framed, for almost every personage in the series is an Eponymus. Andreus gave his name to the country, Athamas to the Athamantian plain; Minyas, Orchomenos, Korônus, Haliartus, Almôs and Hyêtos, are each in like manner connected with some name of people, tribe, town or village; while Chrysê and Chrysogencia have their origin in the reputed ancient wealth of Orchomenos. Abundant discrepancies are found, however, in respect to this old genealogy, if we look to other accounts. According to

amplified, is told by Herodotus (ii. 121), respecting the treasury-vault of Rhampantus, king of Egypt. Charax (ap. Schol. Aristoph. Nub. 506) gives the same tale, but places the scene in the treasury-vault of Augeas, king of Elis, which he says was built by Trophônus, to whom he assigns a totally different genealogy. The romantic adventures of the tale rendered it eminently fit to be interwoven at some point or another of legendary history, in any country.

one statement, Orchomenos was the son of Zeus by Isoné, daughter of Danaos; Minyas was the son of Orchomenos (or rather of Poseidôn) by Hermippé, daughter of Bœôtos; the sons of Minyas were Presbôn, Orchomenos, Athamas and Diachthôndas<sup>1</sup>. Others represented Minyas as son of Poseidôn by Kallirrhôé, an Oceanic nymph<sup>2</sup>, while Dionysius called him son of Arês, and Aristodêmos, son of Aleas; lastly, there were not wanting authors who termed both Minyas and Orchomenos sons of Eteoklês<sup>3</sup>. Nor do we find in any one of these genealogies the name of Amphion, the son of Iasus, who figures so prominently in the *Odyssey* as king of Orchomenos, and whose beautiful daughter Chlôris is married to Néleus. Pausanias mentions him, but not as king, which is the denomination given to him in Homer<sup>4</sup>.

The discrepancies here cited are hardly necessary in order to prove that these Orchomenian genealogies possess no historical value. Yet some probable inferences appear deducible from the general tenor of the legends, whether the facts and persons of which they are composed be real or fictitious.

Throughout all the historical age, Orchomenos is a member of the Bœôtian confederation. But the Bœôtians are said to have been immigrants into the territory which bore their name from Thessaly; and prior to the time of their immigra-

tion, Orchomenos and the surrounding territory appear as possessed by the Minyæ, who are recognised in that locality both in the *Iliad* and in the *Odyssey*<sup>1</sup>, and from whom the constantly recurring Eponymus, king Minyas, is borrowed by the genealogists. Poetical legend connects the Orchomenian Minyæ on the one side, with Pylos and Triphylia in Peloponnésus; on the other side, with Plithiôtis and the town of Iolkos in Thessaly; also with Corinth<sup>2</sup>, through Sisyphus and his sons. Pherekydès represented Néleus, king of Pylos, as having also been king of Orchomenos<sup>3</sup>. In the region of Triphylia, near to or coincident with Pylos, a Minyæian river is mentioned by Homer; and we find traces of residents called Minyæ even in the historical times, though the account given by Herodotus of the way in which they came thither is strange and unsatisfactory<sup>4</sup>.

Thesprôtians into Thessaly, of the Bœôtiens into Bœôtia, and of the Dôrians and Ætôlians into Peloponnêsus, at a date which we have no means of determining, the Minyæ and tribes fraternally connected with them seem to have occupied a large portion of the surface of Greece, from Iôlkos in Thessaly to Pylos in the Peloponnêsus. The wealth of Orchomenos is renowned even in the *Iliad*<sup>1</sup>; and when we study its topography in detail, we are furnished with a probable explanation both of its prosperity and its decay. Orchomenos was situated on the northern bank of the lake Kôpais, which receives not only the river Kâphisos from the valleys of Phôkis, but also other rivers from Parnassus and Helicôn. The waters of the lake find more than one subterranean egress—partly through natural rifts and cavities in the limestone mountains, partly through a tunnel pierced artificially more than a mile in length—into the plain on the north-eastern side, from whence they flow into the Eubœan sea near Larymna<sup>2</sup>; and it appears that, so long as these channels were diligently watched and kept clear, a large portion of the lake was in the con-

<sup>1</sup> *Iliad*, ix. 381.

<sup>2</sup> See the description of these channels or Katabothra in Colonel Leake's *Travels in Northern Greece*, vol. ii. c. 13, p. 231-293, and still more elaborately in Fiedler, *Reise durch alle Theile des Königreichs Griechenland*, Leipzig, 1840. He traced fifteen perpendicular shafts each for the purpose of admitting air into the tunnel, the first separated from the last by about 5900 feet: they are now of course overgrown and stopped up (vol. i. p. 114).

Forchhammer states the length of this tunnel as considerably greater than what is here mentioned. He also gives a plan of the Lake Kôpais with the surrounding region, which I have placed at the end of the second volume of this History. See also *supra*, vol. ii. ch. iii.

dition of alluvial land, pre-eminently rich and fertile. But when the channels came to be either neglected, or designedly choked up by an enemy, the water accumulated to such a degree, as to occupy the soil of more than one ancient town, to endanger the position of Kôpæ, and to occasion the change of the site of Orchomenos itself from the plain to the declivity of Mount Hyphanteion. An engineer, Kratês, began the clearance of the obstructed water-courses in the reign of Alexander the Great, and by his commission—the destroyer of Thêbes being anxious to re-establish the extinct prosperity of Orchomenos. He succeeded so far as partially to drain and diminish the lake, whereby the site of more than one ancient city was rendered visible: but the revival of Thêbes by Kassander, after the decease of Alexander, arrested the progress of the undertaking, and the lake soon regained its former dimensions, to contract which no farther attempt was made<sup>1</sup>.

According to the Thêban legend<sup>2</sup>, Hêraklês, after his defeat of Erginus, had blocked up the exit of the waters, and converted the Orchomenian plain into a lake. The spreading of these waters is thus connected with the humiliation of the Minyæ; and there can be little hesitation in ascribing to these ancient tenants of Orchomenos, before it be-

<sup>1</sup> We owe this interesting fact to Strabo, who is however both concise and unsatisfactory, viii. p. 496-497. It was affirmed that there had been two ancient towns, named Eleusis and Athênæ, originally founded by Cecrops, situated on the lake, and thus overflown (Strab. l. c. 'Αθήναι, Βίοντι, Λαίρτι, iv. 23. came borotised, the enlargement and preservation of these protective channels. Nor could such an object have been accomplished, without combined action and acknowledged ascendancy on the part of that city over its neighbours, extending even to the sea at Larymna, where the river Kêphisos discharges itself. Of its extended influence, as well as of its maritime activity, we find a remarkable evidence in the ancient and venerated Amphiktyony at Kalauria. The little island so named, near the harbour of Trézên, in Peloponnesus, was sacred to Poseidôn, and an asylum of inviolable sanctity. At the temple of Poseidôn, in Kalauria, there had existed, from unknown date, a periodical sacrifice, celebrated by seven cities in common—Hermionê, Epidaurus, Ægina, Athens, Prasîæ, Nauplia, and the Minyean Orchomenos. This ancient religious combination dates from the time when Nauplia was independent of Argos, and Prasîæ of Sparta; Argos and Sparta, according to the usual practice in Greece, continued to fulfil the obligation each on the part of its respective dependent<sup>1</sup>. Six out of the seven states are at once sea-towns, and near enough to Kalauria to account for their participation in this Amphiktyony. But the junction of Orchomenos, from its comparative remoteness, becomes inexplicable, except on the supposition that its territory reached the sea, and that it enjoyed a considerable maritime

traffic—a fact which helps to elucidate both its legendary connection with Iolkos, and its partnership in what is called the Ionic emigration<sup>1</sup>. The mythical genealogy, whereby Ptôos, Schœneus and Erythrios are enumerated among the sons of Athamas, goes farther to confirm the idea that the towns and localities on the south-east of the lake recognised a fraternal origin with the Orchomenian Minyæ, not less than Korôneia and Haliartus on the south-west<sup>2</sup>.

The great power of Orchomenos was broken down and the city reduced to a secondary and half-dependent position by the Bœotians of Thêbes; at what time, and under what circumstances, history has not preserved. The story, that the Thêban hero, Hêraklês, rescued his native city from servitude and tribute to Orchomenos, since it comes from a Kadmeian and not from an Orchomenian legend, and since the details of it were favourite subjects of commemoration in the Thêban temples<sup>3</sup>, affords a presumption that Thêbes was really once dependent on Orchomenos. Moreover the savage mutilations inflicted by the hero on the tribute-seeking envoys, so faithfully portrayed in his surname Rhinakolonstês, infuse into the mythe a portion of that bitter feeling which so long prevailed between Thêbes and Orchomenos, and which led the Thêbans, as soon as the battle of Leuctra had placed supremacy in their hands, to destroy

and depopulate their rival<sup>1</sup>. The ensuing generation saw the same fate retorted upon Thêbes, combined with the restoration of Orchomenos. The legendary grandeur of this city continued, long after it had ceased to be distinguished for wealth and power, imperishably recorded both in the minds of the nobler citizens and in the compositions of the poets: the emphatic language of Pausanias shows how much he found concerning it in the old epic<sup>2</sup>.

## SECTION II.—DAUGHTERS OF ÆOLUS.

With several of the daughters of Æolus memorable mythical pedigrees and narratives are connected. Alcyone married Kêyx, the son of Eôs-phoros, but both she and her husband displayed in a high degree the overweening insolence common in the Æolic race. The wife called her husband Zeus, while he addressed her as Hêrê, for which presumptuous act Zeus punished them by changing both into birds<sup>3</sup>.

The Scholiast gives a sense to these words much narrower than they really bear. See Diodor. xv. 79; Pausan. ix. 15. In the oration which Isokrates places in the mouth of a Platæon, complaining of the oppressions of Thêbes, the ancient servitude and tribute to Orchomenos is cast in the teeth of the Thêbians (Isokrat. Opus. Platæic. vol. iii. p. 32, Auger).

<sup>4</sup> Apollodorus, l. 7, 4. A Kêyx, —king of Trachin,—the friend of Hê-

Canacé—  
the Alôids.

Canacé had by the god Poseidôn several children, amongst whom were Epôpeus and Alôeus<sup>1</sup>. Alôeus married Iphimédea, who became enamoured of the god Poseidôn, and boasted of her intimacy with him. She had by him two sons, Otos and Ephialtês, the huge and formidable Alôids,—Titanic beings, nine fathoms in height and nine cubits in breadth, even in their boyhood, before they had attained their full strength. These Alôids defied and insulted the gods in Olympus; they paid their court to Hêrê and Artemis, and they even seized and bound Arês, confining him in a brazen chamber for thirteen months. No one knew where he was, and the intolerable chain would have worn him to death, had not Erîbrea, the jealous stepmother of the Alôids, revealed the place of his detention to Her-

raklês and protector of the Hômeklêds to the extent of his power (Hesiod. Scut. Hercul. 355-473; Apollodôr. b. 7, 6; Hekate. Fragm. 353, Didot).

<sup>1</sup> Canacé, daughter of Æolus, is a subject of deep tragical interest both in Euripides and Ovid. The eleventh Heroic Epistle of the latter, founded mainly on the lost tragedy of the former called *Æolus*, purports to be from Canacé to Mæneus, and contains a pathetic description of the ill-fated passion between a brother and sister; see the Fragments of the *Æolus* in Dindorf's collection. In the tale of Kamos and Byblis, both children of Miltos, the results of an incestuous passion are different, but hardly less melancholy (Parthenios, Narr. xl.).

Mæneus, the son of Æolus, is the primitive settler of the island of Lesbos (Hom. Hymn. Apoll. 57); moreover in the *Odyssey*, Æolus, son of Hippodâm, the dispenser of the winds, has six sons and six daughters, and marries the former to the latter (*Odys.* x. 7). The two persons called Æolus are brought into connection genealogically (see Schol. ad *Odys.* l. c., and Dindorf. fr. 57), but it seems probable that Euripides was the first to place the names of Mæneus and Canacé in that relation which suffers upon them their poetical celebrity. Sosthenes (ap. Stobæum, t. 614; p. 404) can hardly be considered to have borrowed from any older source than Euripides. Welcker (*Griech. Tragödien*, vol. ii. p. 860) puts together all that can be known respecting the structure of the lost drama of Euripides.

mēs, who carried him surreptitiously away when at the last extremity; nor could Arēs obtain any atonement for such an indignity. Otus and Ephialtēs even prepared to assault the gods in heaven, piling up Ossa on Olympus and Pelion on Ossa, in order to reach them. And this they would have accomplished had they been allowed to grow to their full maturity; but the arrows of Apollo put a timely end to their short-lived career<sup>1</sup>.

The genealogy assigned to Calyccē, another

For the different forms given to this ancient Homeric legend, see Heyne, ad *Apollodōr.* l. c., and Hyginus, l. 28. The Aloids were noticed in the Hesiodic poems (*ap. Schol. Apoll. Rhod.* i. 482). Odysseus does not see them in Hades, as Hērēs by mistake says; he sees their mother Epimēdea. Virgil (*Æn.* vi. 582) assigns to them a place among the sufferers of punishment in Tartarus.

Euandrus, the Corinthian poet, designated Alceus as son of the god Hēlios and brother of Hētiēs, the father of Mēdea (*Roschl. Fragm.* 2, Markschaffel). "The scene of their death was subsequently laid in Naxos (*Pindar, Pyth.* iv. 88); their tombs were seen at Anthēdōn in Boiōtia (*Pausan.* ix. 23, 4). The very curious legend alluded to by Pausanias from Hegesincos, the author of an *Atthis*,—to the effect that Otus and Ephialtēs were the first to establish the worship of the Muses in Heliōus, and that they founded Askra along with Hēkklēs, the son of Poseidōn,—is one which we have no means of tracing farther (*Pausan.* ix. 29, 1).

The story of the Aloids, as Theodorus gives it (τ. 51, 52), diverges on almost every point; it is evidently borrowed from some Naxian archæologist, and the only information which we collect from it is, that Otus and Ephialtēs received heroic honours at Naxos. The views of O. Müller (*Orchomenos*, p. 387) appear to me mutually vague and fanciful.

Ephialtēs takes part in the combat of the giants against the gods (*Apollodōr.* i. 6, 2), where Heyne remarks, as in so many other cases, "Ephialtēs hic non confundendus cum altero Aloei filio." An observation just indeed, if we are supposed to be dealing with personages and adventures historically real—but altogether misleading in regard to those legendary characters. For here the general conception of Ephialtēs and his attributes is in both cases the same; but the particular adventures ascribed to him cannot be made to coexist, as here, one with the other.

daughter of Æolus, conducts us from Thessaly to Elis and Ætolia. She married Aethlius (the son of Zeus by Prôtogeneia, daughter of Deukaliôn and sister of Hellên), who conducted a colony out of Thessaly and settled in the territory of Elis. He had for his son Endymiôn, respecting whom the Hesiodic Catalogue and the Eoiai related several wonderful things. Zeus granted him the privilege of determining the hour of his own death, and even translated him into heaven, which he forfeited by daring to pay court to Hêrê: his vision in this criminal attempt was cheated by a cloud, and he was cast out into the under-world<sup>1</sup>. According to other stories, his great beauty caused the goddess Sêlêne to become enamoured of him, and to visit him by night during his sleep:—the sleep of Endymiôn became a proverbial expression for enviable, undisturbed, and deathless repose<sup>2</sup>. Endymiôn had for issue (Pausanias gives us three different accounts, and Apollodôrus a fourth, of the name of his wife) Epeios, Ætôlus, Prœon, and a daughter Eurykydê. He caused his three sons to run a race on the stadium at Olympia, and Epeios, being victorious, was rewarded by becoming his successor in the kingdom: it was after him that the people were denominated Epeians.

Both the story here mentioned, and still more, the etymological signification of the names Aethlius

<sup>1</sup> Hesiod, Akousians and Pherekydês, ap. Schol. Apollôn. Rhod. iv. 57. *Ἦν δ' αὖτ' ἑνὶ δαίμονι τυπὴν*. The Scholium is very full of matter, and exhibits many of the divergences in the tale of Endymiôn: see also Apollodôr. i. 7, 5; Pausan. v. 1, 2; Conon, Narr. 14.

and Endymiôn, seem plainly to indicate (as has before been remarked) that this genealogy was not devised until after the Olympic games had become celebrated and notorious throughout Greece.

Epeios had no male issue, and was succeeded by his nephew Eleios, son of Eurykydê by the god Poseidôn: the name of the people was then changed from Epeians to Eleians. Ætôlus, the brother of Epeios, having slain Apis, son of Phorôneus, was compelled to flee from the country: he crossed the Corinthian gulf and settled in the territory then called Kurêtis, but to which he gave the name of Ætôlia<sup>1</sup>.

The son of Eleios,—or, according to other accounts, of the god Hêlios, of Poseidôn, or of Phorbas<sup>2</sup>,—is Augeas, whom we find mentioned in the *Iliad* as king of the Epeians or Eleians. Nestôr gives a long and circumstantial narrative of his own exploits at the head of his Pylian countrymen against his neighbours the Epeians and their king Augeas, whom he defeated with great loss, slaying Mulios, the king's son-in-law, and acquiring a vast booty<sup>3</sup>. Augeas was rich in all sorts of rural wealth, and possessed herds of cattle so numerous, that the dung of the animals accumulated in the stable or cattle-enclosures beyond all power of

<sup>1</sup> Pausan. v. l. 3-6; Apollodôr. i. 7, 6.

<sup>2</sup> Apollodôr. ii. 5, 5; Schol. Apol. Rhod. i. 172. In all probability, the old legend made Augeas the son of the god Hêlios: Hêlios, Augeas and Agamêddê are a triple series parallel to the Corinthian genealogy, Hêlios, Mêtis and Mêtis; not to mention that the etymology of Augeas connects him with Hêlios. Theocritus (ix. 55) designates him as the son of the god Hêlios, through whose favour his cattle are able to prosper and multiply with such astonishing success (ix. 117).

endurance. Eurystheus, as an insult to Hēraklēs, imposed upon him the obligation of cleansing this stable: the hero, disdaining to carry off the dung upon his shoulders, turned the course of the river Alpheios through the building, and thus swept the encumbrance away<sup>1</sup>. But Augeas, in spite of so signal a service, refused to Hēraklēs the promised reward, though his son Phyleus protested against such treachery, and when he found that he could not induce his father to keep faith, retired in sorrow and wrath to the island of Dulichiōn<sup>2</sup>. To avenge the deceit practised upon him, Hēraklēs invaded Elis; but Augeas had powerful auxiliaries, especially his nephews, the two Molionids (sons of Poseidōn by Molionē, the wife of Aktōr), Eurytos and Kleatos. These two miraculous brothers, of transcendent force, grew together,—having one body, but two heads and four arms<sup>3</sup>. Such was

<sup>1</sup> Diodor. iv. 13. Ὑβρεως ὄντων Ἑρακλῆος προσέταξε κολλῆσαι ἃ δὲ Ἑρακλῆς τὰ μὲν τοῖς ἄλλοις ἔφευγε καὶ αὐτῇ ἀποδοῦναι, ἐκείνων τῇ δὲ τῇ ὕβρεως πληρύνει, &c. (Pausan. v. 1, 7; Apollodot. ii. 5, 5.)

It may not be improper to remark that this fable indicates a purely pastoral condition, or at least a singularly rude state of agriculture; and the way in which Pausanias recounts it goes even beyond the genuine story: *ὡς αὖ τὰ πολλὰ τῆς χώρας νῦν ἔδη θωπεύειν ἀγρὸν ἔστιν ἐκ τῶν βοσκημάτων τῆς πόλεως*. The slaves of Odysseus however know what use to make of the dung heaped before his outer fence (Odys. xvi. 299); not so the purely carnivorous and pastoral Cyclops (Odys. ix. 329). The stalling, into which the cattle go from their pasture, is called *κόσπος* in Homer, — *ἐλθεῖναι ἐν κόσπῳ, ἐπὶ βοσκήῃ κορπεύωνται* (Odys. x. 411); compare Hes. xviii. 575. — *διεχέμφθ' δ' ἀπὸ κόσπου ἐπεσπίνοντο πίδαοι*.

The Augeas of Theocritus has abundance of wheat-land and vineyard, as well as cattle: he ploughs his land three or four times, and digs his vineyard diligently (xx. 20–32).

<sup>2</sup> The wrath and retirement of Phyleus is mentioned in the *Iliad* (ii. 683), but not the cause of it.

their irresistible might, that Hēraklēs was defeated and repelled from Elis: but presently the Eleians sent the two Molionid brothers as *Theōri* (sacred envoys) to the Isthmian games, and Hēraklēs, placing himself in ambush at Kleônæ, surprised and killed them as they passed through. For this murderous act the Eleians in vain endeavoured to obtain redress both at Corinth and at Argos; which is assigned as the reason for the self-ordained exclusion, prevalent throughout all the historical age, that no Eleian athlētē would ever present himself as a competitor at the Isthmian games<sup>1</sup>. The Molionids being thus removed, Hēraklēs again invaded Elis, and killed Augeas along with his children,—all except Phyleus, whom he brought over from Dulichiōn, and put in possession of his father's kingdom. According to the more gentle narrative which Pausanias adopts, Augeas was not killed, but pardoned at the request of Phyleus<sup>2</sup>. He was worshiped as a hero<sup>3</sup> even down to the time of that author.

poems and by Pherekydēs (Schol. Ven. ad Il. xi. 716-750, et ad Il. xiii. 638), but not in the *Iliad*. The poet Ibykus (Fragm. 11, Schneid. ap. Athenæ. ii. 67) calls them *Δίους Ιωνογλυκότες, ἰσχυροτάτους*, 'Αμφότεροι πρηνέστες ἐν δόλῳ δόρυπαρ'.

There were temples and divine honours to Zeus Molōn (Lactantius, de Falsa Religione, l. 22).

<sup>1</sup> Pausan. v. 2, 4. The inscription cited by Pausanias proves that this was the reason assigned by the Eleian athlētæ themselves for the exclusion; but there were several different stories.

<sup>2</sup> Apollodōr. ii. 7, 2. Diodōr. iv. 33. Pausan. v. 2, 2; 3, 2. It seems evident from these accounts that the genuine legend represented Hēraklēs as having been defeated by the Molionids: the unkillable evasions both of Apollodōrus and Diodōrus betray this. Pindar (Olymp. xi. 25-50) gives the story without any flattery to Hēraklēs.

<sup>3</sup> Pausan. v. 3, 1.

It was on occasion of this conquest of Elis, according to the old mythe which Pindar has ennobled in a magnificent ode, that Hêraklès first consecrated the ground of Olympia and established the Olympic games. Such at least was one of the many fables respecting the origin of that memorable institution<sup>1</sup>.

Phyleus, after having restored order in Elis, retired again to Dulichiôn, and left the kingdom to his brother Agasthenês, which again brings us into the Homeric series. For Polyxenos, son of Agasthenês, is one of the four commanders of the Epeïan forty ships in the *Iliad*, in conjunction with the two sons of Burytos and Kteatos, and with Diôrês son of Amarynceus. Megês, the son of Phyleus, commands the contingent from Dulichiôn and the Echinades<sup>2</sup>. Polyxenos returns safe from Troy, is succeeded by his son Amphimachos,—named after the Epeïan chief who had fallen before Troy,—and he again by another Eleïos, in whose time the Dôrians and the Hêracleïds invade Peloponnêsus<sup>3</sup>. These two names, barren of actions or attributes, are probably introduced by the genealogists whom Pausanias followed, to fill up the supposed interval between the Trojan war and the Dôrian invasion.

We find the ordinary discrepancies in respect to the series and the members of this genealogy. Thus

<sup>1</sup> The Armenian copy of Eusebius gives a different genealogy respecting Elis and Pisa: Aithlios, Epeïos, Eudyniôn, Alexinos; next Eoomans and Pêlops, then Hêraklès. Some counted *ten* generations, others *three*, between Hêraklès and Iphitos, who renewed the discontinued Olympic games (see Armen. Euseb. copy, c. xxvii. p. 140).

some called Epeios son of Aethlius, others son of Endymion<sup>1</sup>: a third pedigree, which carries the sanction of Aristotle and is followed by Conon, designated Eleios, the first settler of Elis, as son of Poseidon and Eurypylê, daughter of Endymion, and Epeios and Alexis as the two sons of Eleios<sup>2</sup>. And Pindar himself, in his ode to Epharmostus the Lokrian, introduces with much emphasis another king of the Epeians named Opus, whose daughter, pregnant by Zeus, was conveyed by that god to the old and childless king Lokrus: the child when born, adopted by Lokrus and named Opus, became the eponymous hero of the city so called in Lokris<sup>3</sup>. Moreover Hekateus the Milesian not only affirmed (contrary both to the Iliad and the Odyssey) that the Epeians and the Eleians were different people, but also added that the Epeians had assisted Hēraklēs in his expedition against Augeas and Elis; a narrative very different from that of Apollodōrus and Pausanias, and indicating besides that he must have had before him a genealogy varying from theirs<sup>4</sup>.

of the Corinthian gulf, between the rivers Euénus and Achelôus, received from him the name of Ætôlia instead of that of Kurêtis: he acquired possession of it after having slain Dôrus, Laodokus and Polypætes, sons of Apollo and Phthia, by whom he had been well received. He had by his wife Pronoë (the daughter of Phorbas) two sons, Pleurôn and Kalydôn, and from them the two chief towns in Ætôlia were named<sup>1</sup>. Pleurôn married Xanthippê, daughter of Dôrus, and had for his son Agênôr, from whom sprang Porthêus, or Porthaôn, and Demonikê: Euénos and Thestius were children of the latter by the god Arês<sup>2</sup>.

Porthêus had three sons, Agrius, Melas and Ceneus: among the offspring of Thestius were Althæa and Lêda<sup>3</sup>,—names which bring us to a period of interest in the legendary history. Lêda

the Egyptians and Phœnicians (cp. Strabo, iii. p. 357); but must have had before him a different story and different genealogy from that which is given in the text.

<sup>1</sup> Apollodôr. i. 7, 6. Dôrus, son of Apollo and Phthia, killed by Ætôlus, after having hospitably received him, is here mentioned. Nothing at all is known of this; but the conjunction of names is such as to render it probable that there was some legend connected with them: possibly the assistance given by Apollo to the Kurites against the Ætolians, and the death of Melæger by the hand of Apollo, related both in the Boiæ and the Mûnyas (Pausan. x. 31, 2), may have been grounded upon it. The story connects itself with what is stated by Apollodôr about Dôrus son of Hellên (see *supra*, p. 125).

<sup>2</sup> According to the ancient genealogical poet Anna, Thestius was son of Aglæa the son of Pleurôn (Asii Fragm. 6, p. 413, ed. Marksch.). Compare the genealogy of Ætôlia and the general remarks upon it, in Brandstätter, Geschichte des Ætol. Landes, &c., Berlin, 1814, p. 231 *seq.*

<sup>3</sup> Respecting Lêda, see the statements of Hyginus, Phœryllia, Heklanikus, &c. (Schol. Apollôn, Rhod. i. 146). The reference to the Corinthian of Euripides is curious: it is a specimen of the matters upon which these old genealogical poems dwell.

marries Tyndareus and becomes mother of Helena and the Dioscuri: Althæa marries Cæneus, and has, among other children, Meleager and Deianeira; the latter being begotten by the god Dionysus, and the former by Arès<sup>1</sup>. Tydeus also is his son, the father of Diomêdês: warlike eminence goes hand in hand with tragic calamity among the members of this memorable family.

We are fortunate enough to find the legend of Althæa and Meleager set forth at considerable length in the *Iliad*, in the speech addressed by Phoenix to appease the wrath of Achilles. Cæneus, king of Kalydôn, in the vintage sacrifices which he offered to the gods, omitted to include Artemis; the misguided man either forgot her or cared not for her<sup>2</sup>; and the goddess, provoked by such an insult, sent against the vineyards of Cæneus a wild boar of vast size and strength, who tore up the trees by the root, and laid prostrate all their fruit. So terrible was this boar, that nothing less than a numerous body of men could venture to attack him: Meleager, the son of Cæneus, however, having got together a considerable number of companions, partly from the Kurêtes of Pleurôn, at length slew him. But the anger of Artemis was not yet appeased, and she raised a dispute among the com-

<sup>2</sup> *Ἡ λάβη, ἣ οὐκ ἐπέσπευε δάσκαρον δι' ἧρας θύψης* (*Iliad*, ix. 533). The destructive influence of Atê is mentioned before, v. 502. The party of Xenophôn reproduces this ancient circumstance.—*Οἶστος δ' ἐν γῆρι ἐκταχθήσεται τῆς θύρας*, &c. (*De Venat.* c. 1).

batants respecting the possession of the boar's head and hide—the trophies of victory. In this dispute Meleager slew the brother of his mother Althæa, prince of the Kurêtes of Pleurôn: these Kurêtes attacked the Ætôlians of Kalydôn in order to avenge their chief. So long as Meleager contended in the field the Ætôlians had the superiority. But he presently refused to come forth, indignant at the curses imprecated upon him by his mother: for Althæa, wrung with sorrow for the death of her brother, flung herself upon the ground in tears, beat the earth violently with her hands, and implored Hades and Persephonê to inflict death upon Meleager,—a prayer which the unrelenting Erinnys in Erebus heard but too well. So keenly did the hero resent this behaviour of his mother, that he kept aloof from the war; and the Kurêtes not only drove the Ætôlians from the field, but assailed the walls and gates of Kalydôn, and were on the point of overwhelming its dismayed inhabitants. There was no hope of safety except in the arm of Meleager; but Meleager lay in his chamber by the side of his beautiful wife Kleopatra, the daughter of Idas, and heeded not the necessity. While the shouts of expected victory were heard from the assailants at the gates, the ancient men of Ætôlia and the priests of the gods earnestly besought Meleager to come forth<sup>1</sup>, offering him his choice of the fattest land in the plain of Kalydôn. His dearest friends, his father Ceneus, his sisters, and

<sup>1</sup> These priests formed the Chorus in the *Meleager* of Sophocles (Schol. ad *Iliad.* ix. 573).

even his mother herself added their supplications, but he remained inflexible. At length the Kurêtes penetrated into the town and began to burn it: at this last moment, Kleopatra his wife addressed to him her pathetic appeal, to avert from her and from his family the desperate horrors impending over them all. Meleager could no longer resist: he put on his armour, went forth from his chamber, and repelled the enemy. But when the danger was over, his countrymen withheld from him the splendid presents which they had promised, because he had rejected their prayers, and had come forth only when his own haughty caprice dictated<sup>1</sup>.

Such is the legend of Meleager in the *Iliad*: a verse in the second book mentions simply the death of Meleager, without farther details, as a reason why Thoas appeared in command of the *Ætôlians* before Troy<sup>2</sup>. Though the circumstance is indicated only indirectly, there seems little doubt that Homer must have conceived the death of the hero as brought about by the maternal curse: the unrelenting Erinyes executed to the letter the invocations of Althæa, though she herself must have been willing to retract them.

Later poets both enlarged and altered the fable. The Hesiodic *Eoiai*, as well as the old poem called the *Minyas*, represented Meleager as having been slain by Apollo, who aided the Kurêtes in the war; and the incident of the burning brand, though quite at variance with Homer, is at least as old as the tragic poet Phrynechus, earlier than *Æschy-*

lus<sup>1</sup>. The Mæræ, or Fates, presenting themselves to Althæa shortly after the birth of Meleager, predicted that the child would die so soon as the brand then burning on the fire near at hand should be consumed. Althæa snatched it from the flames and extinguished it, preserving it with the utmost care, until she became incensed against Meleager for the death of her brother. She then cast it into the fire, and as soon as it was consumed the life of Meleager was brought to a close.

We know from the sharp censure of Pliny, that Sophoklēs heightened the pathos of this subject by his account of the mournful death of Meleager's sisters, who perished from excess of grief. They were changed into the birds called Meleagrides, and their never-ceasing tears ran together into amber<sup>2</sup>. But in the hands of Euripidēs—whether originally through him or not<sup>3</sup>, we cannot tell—Atalanta became the prominent figure and motive of the piece, while the party convened to hunt the Kalydōnian boar was made to comprise all the distinguished heroes from every quarter of Greece. In fact, as Heyne justly remarks, this event is one of the four aggregate dramas of Grecian heroic life<sup>4</sup>, along with the Argonautic expedition, the siege of Thēbes, and the Trojan war. To accomplish the destruction of the terrific animal which Artemis in

her wrath had sent forth, Meleager assembled not merely the choice youth among the Kurètes and Ætôlians (as we find in the *Iliad*), but an illustrious troop, including Kastôr and Pollux, Idas and Lynkeus, Pêleus and Telâmôn, Thêseus and Peirithous, Ankæus and Kêpheus, Jasôn, Amphiaræus, Admêtus, Eurytiôn and others. Nestôr and Phœnix, who appear as old men before the walls of Troy, exhibited their early prowess as auxiliaries to the suffering Kalydônians<sup>1</sup>. Conspicuous amidst them all stood the virgin Atalanta, daughter of the Arcadian Schœneus; beautiful and matchless for swiftness of foot, but living in the forest as a huntress and unacceptable to Aphroditê<sup>2</sup>. Several of the heroes were slain by the boar, others escaped by various stratagems: at length Atalanta first shot him in the back, next Amphiaræus in the eye, and, lastly, Meleager killed him. Enamoured of the beauty of Atalanta, Meleager made over to her the chief spoils of the animal, on the plea that she had inflicted the first wound. But his uncles, the bro-

<sup>1</sup> The catalogue of these heroes is in Apollodôr. l. 2. 2; Ovid. *Metamor.* vii. 300; Hygin. *fab.* 173. Euripidês, in his play of *Meleager*, gave an enumeration and description of the heroes (see *Frags.* 6 of that play, ed. Matth.). Nestôr, in this picture of Ovid, however, does not appear quite so invincible as in his own speeches in the *Iliad*. The mythographers thought it necessary to assign a reason why Hêraklês was not present at the Kalydônian adventure: he was just at that time in servitude with Omphalê in Lyôn (Apollod., ii. 6. 3). This seems to have been the idea of Ephorus, and it is much in his style of interpretation (see Ephor. *Frags.* 9, ed. Dider).

thers of Thestius, took them away from her, asserting their rights as next of kin<sup>1</sup>, if Meleager declined to keep the prize for himself: the latter, exasperated at this behaviour, slew them. Althæa, in deep sorrow for her brothers and wrath against her son, is impelled to produce the fatal brand which she had so long treasured up, and consign it to the flames<sup>2</sup>. The tragedy concludes with the voluntary death both of Althæa and Kleopatra.

Interesting as the Arcadian huntress, Atalanta, is in herself, she is an intrusion, and not a very convenient intrusion, into the Homeric story of the Kalydônian boar-hunt, wherein another female, Kleopatra, already occupied the fore-ground<sup>3</sup>. But the more recent version became accredited throughout Greece, and was sustained by evidence which few persons in those days felt any inclination to controvert. For Atalanta carried away with her the spoils and head of the boar into Arcadia; and there for successive centuries hung the identical

<sup>2</sup> Diodor. iv. 34. Apollodorus (i. 8; 2-4) gives first the usual narrative, including Atalanta; next, the Homeric narrative with some additional circumstances, but not including either Atalanta or the fire-brand on which Meleager's life depended. He prefaces the latter with the words *et de φανί, &c.* Antoninus Liberalis gives this second narrative only, without Atalanta, from Nikander (Narrat. 2).

The Latin comic poet, Atilius, had devoted one of his tragedies to this subject, taking the general story as given by Euripides: "*Remanet gloria apud me: exuvie dignari Atalante dare,*" seems to be the speech of Meleager. (Atilii Fragm. 5, ap. Poet. Scen. Lat. ed. Bothe, p. 215.) The readers of the *Kanon* will naturally think of the swift and warlike virgin Camilla, as the parallel of Atalanta.

<sup>3</sup> The narrative of Apollodorus reads *εὐκρινίδι—Μελίαρχος ἔχων γυναικα Κλεοπάτραν, βοιδόμοντα ἐν αὐτῇ ἐξ Ἀταλάντης κατακτενέσθαι*, &c. (i. 8, 2).

hide and the gigantic tusks, of three feet in length, in the temple of Athênê Alea at Tegea. Kallimachus mentions them as being there preserved, in the third century before the Christian era<sup>1</sup>; but the extraordinary value set upon them is best proved by the fact that the emperor Augustus took away the tusks from Tegea, along with the great statue of Athênê Alea, and conveyed them to Rome, to be there preserved among the public curiosities. Even a century and a half afterwards, when Pausanias visited Greece, the skin worn out with age was shown to him, while the robbery of the tusks had not been forgotten. Nor were these relics of the boar the only memento preserved at Tegea of the heroic enterprise. On the pediment of the temple of Athênê Alea, unparalleled in Peloponnêsus for beauty and grandeur, the illustrious statuary Skopas had executed one of his most finished reliefs, representing the Kalydônian hunt. Atalanta and Meleager were placed in the front rank of the assailants, and Ankaeus, one of the Tegean heroes, to whom the tusks of the boar had proved fatal<sup>2</sup>, was represented as sinking under his death-wound into the arms of his brother Epichos. And Pausanias observes, that the Tegeans, while they had manifested the same honourable forwardness as other Arcadian communities in the conquest of Troy, the repulse of Xerxês, and the

battle of Dipæa against Sparta—might fairly claim to themselves, through Ankæus and Atalanta, that they alone amongst all Arcadians had participated in the glory of the Kalydônian boar-hunt<sup>1</sup>. So entire and unsuspecting is the faith both of the Tegeans and of Pausanias in the past historical reality of this romantic adventure. Strabo indeed tries to transform the romance into something which has the outward semblance of history, by remarking that the quarrel respecting the boar's head and hide cannot have been the real cause of war between the Kurêtes and the Ætôlians; the true ground of dispute (he contends) was probably the possession of a portion of territory<sup>2</sup>. His remarks on this head are analogous to those of Thucydides and other critics, when they ascribe the Trojan war, not to the rape of Helen, but to views of conquest or political apprehensions. But he treats the general fact of the battle between the Kurêtes and the Ætôlians, mentioned in the *Iliad*, as something

It is numbered among the memorable exploits of Theseus that he vanquished and killed a formidable and gigantic sow, in the territory of Krommyôn near Corinth. According to some critics, this Krommyônes sow was the mother of the Kalydônian boar (Strabo, viii. p. 380).

unquestionably real and historical—recapitulating at the same time a variety of discrepancies on the part of different authors, but not giving any decision of his own respecting their truth or falsehood.

In the same manner as Atalanta was intruded into the Kalydônian hunt, so also she seems to have been introduced into the memorable funeral games celebrated after the decease of Pelias at Iôlkos, in which she had no place at the time when the works on the chest of Kypselus were executed<sup>1</sup>. But her native and genuine locality is Arcadia; where her race-course, near to the town of Methydrion, was shown even in the days of Pausanias<sup>2</sup>. This race-course had been the scene of destruction for more than one unsuccessful suitor. For Atalanta, averse to marriage, had proclaimed that her hand should only be won by the competitor who would surpass her in running: all who tried and failed were condemned to die, and many were the persons to whom her beauty and swiftness, alike unparalleled, had proved fatal. At length Meilanion, who had vainly tried to win her affections by assiduous services in her hunting excursions, ventured to enter the perilous lists. Aware that he could not hope to outrun her except by stratagem, he had obtained by the kindness of Aphroditê, three golden apples from the garden of the Hesperides, which he successively let fall near to

her while engaged in the race. The maiden could not resist the temptation of picking them up, and was thus overcome : she became the wife of Meilaniôn, and the mother of the Arcadian Parthenopæus, one of the seven chiefs who perished in the siege of Thêbes<sup>1</sup>.

<sup>1</sup> Respecting the varieties in this interesting story, see Apollod. iii. 9, 2; Hygin. *l.* 180; Ovid. *Metam.* x. 560-700; Propert. i. 1, 20; *Ælian*, V. B. xiii. 1. *Μελαμένηος σαρπηροειδέος*. Aristophan. *Lysistrat.* 786 and Schol. In the ancient representation on the chest of Kypselus (*Paus.* v. 19, 1), Meilaniôn was exhibited standing near Atalanta, who was holding a fawn: no match or competition in running was indicated.

There is great discrepancy in the naming and patronymic description of the parties in the story. Three different persons are announced as fathers of Atalanta, Schœneus, Jæus, and Mæneleus; the successful lover in Ovid (and seemingly in Euripides also) is called Hippomenes, not Meilaniôn. In the Hesiodic poems Atalanta was daughter of Schœneus; Hellanikus called her daughter of Jæus. See Apollodôr, i. 2.; Kallimach. *Hymn to Dian.* 214, with the note of Sprouheim; Schol. Eurip. *Phœnix*, 150; Schol. Theocrit. *Idyll.* iii. 40; also the ample commentary of Bachel de Méziriac, *sur les Épîtres d'Ovide*, vol. i. p. 366. Servius (ad Virg. *Eclog.* vi. 61; *Æneid*, iii. 113) calls Atalanta a native of Skýria.

Both the ancient scholiasts (see Schol. Apoll. *Rhod.* i. 762) and the modern commentators, Sprouheim and Hayne, seek to escape this difficulty by supposing two Atalantas,—an Arcadian and a Boeotian: assuming the principle of their conjecture to be admissible, they ought to suppose at least three.

Certainly, if personages of the Grecian myths are to be treated as historically real, and their adventures as so many exaggerated or miscoloured facts, it will be necessary to repeat the process of multiplying entities to an infinite extent. And this is one among the many reasons for rejecting the fundamental supposition.

But when we consider these personages as purely legendary, so that an historical basis can neither be affirmed nor denied respecting them, we escape the necessity of such inconvenient stratagems. The test of identity is then to be sought in the attributes, not in the legal description,—in the predicates, not in the subject. Atalanta, whether born of one father or another, whether belonging to one place or another, is beautiful, cold, regular, daring, swift of foot and skilful with the bow,—these attributes constitute her identity. The Scholiast on Theocritus (iii. 40), in vindicating his supposition that there were two

We have yet another female in the family of *Deianeira*. *Geneus*, whose name the legend has immortalised. His daughter *Deianeira* was sought in marriage by the river *Achelôus*, who presented himself in various shapes, first as a serpent and afterwards as a bull. From the importunity of this hateful suitor she was rescued by the arrival of *Héraklēs*, who encountered *Achelôus*, vanquished him and broke off one of his horns, which *Achelôus* ransomed by surrendering to him the horn of *Amaltheia*, endued with the miraculous property of supplying the possessor with abundance of any food or drink which he desired. *Héraklēs*, being rewarded for his prowess by the possession of *Deianeira*, made over the horn of *Amaltheia* as his marriage-present to *Geneus*<sup>1</sup>. Compelled to leave the residence of *Geneus* in consequence of having in a fit of anger struck the youthful attendant *Eunomus*, and in-

In respect to *Parthenopæus*, called by *Euripides* and by so many others the son of *Atalanta*, it is of some importance to add, that *Apollodorus*, *Aristarchus*, and *Antimachus*, the author of the *Thelaul.* assigned to him a pedigree entirely different,—making him an *Ægeian*, the son of *Talos* and *Lysimachê*, and brother of *Admetus*. voluntarily killed him<sup>1</sup>, Hēraklēs retired to Trachin, crossing the river Euēnus at the place where the Centaur Nessus was accustomed to carry over passengers for hire. Nessus carried over Deianeira, but when he had arrived on the other side, began to treat her with rudeness, upon which Hēraklēs slew him with an arrow tinged by the poison of the Lernaean hydra. The dying Centaur advised Deianeira to preserve the poisoned blood which flowed from his wound, telling her that it would operate as a philtre to regain for her the affections of Hēraklēs, in case she should ever be threatened by a rival. Some time afterwards the hero saw and loved the beautiful Iolē, daughter of Eurytos, king of Œchalia: he stormed the town, killed Eurytos, and made Iolē his captive. The misguided Deianeira now had recourse to her supposed philtre: she sent as a present to Hēraklēs a splendid tunic, imbued secretly with the poisoned blood of the Centaur. Hēraklēs adorned himself with the tunic on the occasion of offering a solemn sacrifice to Zeus on the promontory of Kēnēon in Eubœa: but the fatal garment, when once put on, clung to him indissolubly, burnt his skin and flesh, and occasioned an agony of pain from which he was only relieved by death. The same subject was also treated in the *Hesiodic Catalogue*, or in the *Koia* (see *Hesiod*, *Fragment.* 129, ed. *Marksch.*): the number of the children of *Eurytos* was there enumerated.

This exploit seems constantly mentioned as the last performed by *Hēraklēs*, and as immediately preceding his death or apotheosis on *Mount Ôta*: but whether the legend of *Deianeira* and the poisoned tunic be very old, we cannot tell.

The tale of the death of *Iphitos*, son of *Eurytos*, by *Hēraklēs*, is as ancient as the *Odyssey* (xx. 19-40): but it is there stated, that *Eurytos* dying left his memorable bow to his son *Iphitos* (the bow is given afterwards by *Iphitos* to *Odysseus*, and is the weapon so fatal to the suitors);—a statement not very consistent with the story that *Œcholia* was taken and *Eurytos* slain by *Hēraklēs*. It is plain that there were distinct and contradictory legends. Compare *Soph.* *Trachin.* 269-285 (where *Iphitos* dies before *Eurytos*), not only with the passage just cited from the *Odyssey*, but also with *Pherekydes*, *Fragment.* 34, *Diod.*

*Hyginus* (l. 33) differs altogether in the parentage of *Deianeira*: he calls her daughter of *Demameus*; his account of her marriage with *Hēraklēs* is in every respect at variance with *Apollodorus*. In the latter, *Metamorphosis* is the daughter of *Demameus*; *Hēraklēs* rescues her from the importunities of the Centaur *Eurytion* (ii. 5. 4).

<sup>1</sup> See the references in *Apollod.* l. iv. 4-5. *Pindar*, *Isthm.* iv. 22. *Μολύβρις δὲ ποσειδάωνος Δαίη δαυτὶ ἀνέβηδ' ἄλκιμονος Ἑρμῆος Ἀλκίμανος ἀνέβηδ' Ὀβριδῆος κρονίου, &c.*

Argos with Adrastus, whose daughter Deipylê he married. The issue of this marriage was Diomêdês, whose brilliant exploits in the siege of Troy were not less celebrated than those of his father at the siege of Thêbes. After the departure of Tydeus, Ceneus was deposed by the sons of Agrios, and fell into extreme poverty and wretchedness, from which he was only rescued by his grandson Diomêdês, after the conquest of Troy<sup>1</sup>. The sufferings of this ancient warrior, and the final restoration and revenge by Diomêdês, were the subject of a lost tragedy of Euripidês, which even the ridicule of Aristophanês demonstrates to have been eminently pathetic<sup>2</sup>.

Discrepancy  
genealo-  
gies.

Though the genealogy just given of Ceneus is in part Homeric, and seems to have been followed generally by the mythographers, yet we find another totally at variance with it in Hekataeus, which he doubtless borrowed from some of the old poets: the simplicity of the story annexed to it seems to attest its antiquity. Orestheus, son of Deukaliôn, first passed into Aetolia, and acquired the kingdom: he was father of Phytios, who was father of Ceneus. Aetolus was son of Ceneus<sup>3</sup>.

The account of Ephorus again is different (ap. Strabo. x. p. 462); he joins Alkanda with Diomēdēs: but his narrative has the air of a tissue of quasi-historical conjectures, intended to explain the circumstance that the Ætōlian Diomēdēs is king of Argos during the Trojan war.

Pausanias and Apollodōrus affirm that Menes was buried at Glōē between Argos and Mantinea, and they connect the name of this place with him. But it seems more reasonable to consider him as the eponymous hero of Glōchia in Ætōlia.

## CHAPTER VII.

### THE PELOPIDS.

Misfortunes and celebrity of the Pelopids.

AMONG the ancient legendary genealogies, there was none which figured with greater splendour, or which attracted to itself a higher degree of poetical interest and pathos, than that of the Pelopids—Tantalus, Pelops, Atreus and Thyestés, Agamemnon and Menelaus and Ægiathus, Helen and Clytemnestra, Orestés and Elektra and Hermione. Each of these characters is a star of the first magnitude in the Grecian hemisphere: each name suggests the idea of some interesting romance or some harrowing tragedy: the curse, which taints the family from the beginning, inflicts multiplied wounds at every successive generation. So, at least, the story of the Pelopids presents itself, after it had been successively expanded and decorated by epic, lyric and tragic poets. It will be sufficient to touch briefly upon events with which every reader of Grecian poetry is more or less familiar, and to offer some remarks upon the way in which they were coloured and modified by different Grecian authors.

Pelops—  
eponym of  
Peloponnésus.

Pelops is the eponym or name-giver of the Peloponnésus: to find an eponym for every conspicuous local name was the invariable turn of Grecian retrospective fancy. The name Peloponnésus is not to be found either in the *Iliad* or the *Odys-*

sey, nor any other denomination which can be attached distinctly and specially to the entire peninsula. But we meet with the name in one of the most ancient post-Homeric poems of which any fragments have been preserved—the Cyprian Verses—a poem which many (seemingly most persons) even of the contemporaries of Herodotus ascribed to the author of the *Iliad*, though Herodotus contradicts the opinion<sup>1</sup>. The attributes by which the Pelopid Agamemnôn and his house are marked out and distinguished from the other heroes of the *Iliad*, are precisely those which Grecian imagination would naturally seek in an eponymus—superior wealth, power, splendour and regality. Not only Agamemnôn himself, but his brother Menelaus, is “more of a king” even than Nestôr or Diomêdês. The gods have not given to the king of the “much-golden” Mykênæ greater courage, or strength, or ability, than to various other chiefs; but they have conferred upon him a marked superiority in riches, power and dignity, and have thus singled him out as the appropriate leader of the forces<sup>2</sup>. He enjoys this pre-eminence

as belonging to a privileged family and as inheriting the heaven-descended sceptre of Pelops, the transmission of which is described by Homer in a very remarkable way. The sceptre was made "by Hêphæstos, who presented it to Zeus; Zeus gave it to Hermês, Hermês to the charioteer Pelops; Pelops gave it to Atreus, the ruler of men; Atreus at his death left it to Thyestês, the rich cattle-owner; Thyestês in his turn left it to his nephew Agamemnôn to carry, that he might hold dominion over many islands and over all Argos<sup>1</sup>."

Deduction  
of the sceptre of Pe-  
lops.

We have here the unrivalled wealth and power of the "king of men, Agamemnôn," traced up to his descent from Pelops, and accounted for, in harmony with the recognised epical agencies, by the present of the special sceptre of Zeus through the hands of Hermês; the latter being the wealth-giving god, whose blessing is most efficacious in furthering the process of acquisition, whether by theft or by accelerated multiplication of flocks and herds<sup>2</sup>. The wealth and princely character of the Atreids were proverbial among the ancient

A similar contrast is drawn by Nestôr (II. i. 280) between Agamemnôn and Achilles. Nestôr says to Agamemnôn (II. ix. 69)—

*Ἀργείδῃ, σὺ μὲν ἄρχῃ σὺ γὰρ βασιλεύεσσι δὲ ἴσται.*

And this attribute attaches to Menelaus as well as to his brother. For when Diomedês is about to choose his companion for the night expedition into the Trojan camp, Agamemnôn thus addresses him (x. 232):

*Τὸν μὲν δὲ Τρῶν γ' αἰρήσεται, ὃν δ' εὐδὲλγιστα  
θεωρήσεις τὸν ὄψοντα, δαδί μαμμάσι γι πολλοῖσι

epic poets. Paris not only carries away Helen, but much property along with her<sup>1</sup>: the house of Menelaus, when Telemachus visits it in the *Odyssey*, is so resplendent with gold and silver and rare ornament<sup>2</sup>, as to strike the beholder with astonishment and admiration. The attributes assigned to Tantalus, the father of Pelops, are in conformity with the general idea of the family—superhuman abundance and enjoyments, and intimate converse with the gods, to such a degree that his head is turned, and he commits inexpiable sin. But though Tantalus himself is mentioned, in one of the most suspicious passages of the *Odyssey* (as suffering punishment in the under-world), he is not announced, nor is any one else announced, as father of Pelops, unless we are to construe the lines in the *Iliad* as implying that the latter was son of Heracles. In the conception of the author of the *Iliad*, the Pelopids are, if not of divine origin, at least a mortal breed specially favoured and ennobled by the gods—beginning with Pelops, and localised at Mykænæ. No allusion is made to any connection of Pelops either with Pisa or with Lydia.

lops with Mount Sipylus may probably have grown out of the Æolic settlements at Magnésia and Kymê. Both the Lydian origin and the Pisatic sovereignty of Pelops are adapted to times later than the *Iliad*, when the Olympic games had acquired to themselves the general reverence of Greece, and had come to serve as the religious and recreative centre of the Peloponnêsus—and when the Lydian and Phrygian heroic names, Midas and Gygês, were the types of wealth and luxury, as well as of chariot-driving, in the imagination of a Greek. The inconsiderable villages of the Pisatid derived their whole importance from the vicinity of Olympia: they are not deemed worthy of notice in the Catalogue of Homer. Nor could the genealogy which connected the eponym of the entire peninsula with Pisa have obtained currency in Greece unless it had been sustained by pre-established veneration for the locality of Olympia. But if the sovereign of the humble Pisa was to be recognised as forerunner of the thrice-wealthy princes of Mykênæ, it became necessary to assign some explanatory cause of his riches. Hence the supposition of his being an immigrant, son of a wealthy Lydian named Tantalus, who was the offspring of Zeus and Ploutô. Lydian wealth and Lydian chariot-driving rendered Pelops a fit person to occupy his place in the legend, both as ruler of Pisa and progenitor of the Mykenæan Atreids. Even with the admission of these two circumstances there is considerable difficulty, for those who wish to read the legends as consecutive history, in making

the Pelopids pass smoothly and plausibly from Pisa to Mykênæ.

I shall briefly recount the legends of this great heroic family as they came to stand in their full and ultimate growth, after the localisation of Pelops at Pisa had been tacked on as a preface to Homer's version of the Pelopid genealogy.

Tantalus, residing near Mount Sipylus in Lydia, had two children, Pelops and Niobê. He was a man of immense possessions and pre-eminent happiness, above the lot of humanity: the gods communicated with him freely, received him at their banquets, and accepted of his hospitality in return. Intoxicated with such prosperity, Tantalus became guilty of gross wickedness. He stole nectar and ambrosia from the table of the gods, and revealed their secrets to mankind: he killed and served up to them at a feast his own son Pelops. Tantalus. The gods were horror-struck when they discovered the meal prepared for them: Zeus restored the mangled youth to life, and as Dêmêtêr, then absorbed in grief for the loss of her daughter Persephonê, had eaten a portion of the shoulder, he supplied an ivory shoulder in place of it. Tantalus expiated his guilt by exemplary punishment. He was placed in the under-world, with fruit and water seemingly close to him, yet eluding his touch as often as he tried to grasp them, and leaving his hunger and thirst incessant and unappeased<sup>1</sup>. Pindar, in a very remarkable passage,

<sup>1</sup> *Dioidy. iv. 77*. Hom. *Odys. xl. 582*. Pindar gives a different version of the punishment inflicted on Tantalus: a cap-stone was per-

finds this old legend revolting to his feelings: he rejects the tale of the flesh of Pelops having been served up and eaten, as altogether unworthy of the gods<sup>1</sup>.

Niobé.

Niobé, the daughter of Tantalus, was married to Amphion, and had a numerous and flourishing offspring of seven sons and seven daughters. Though accepted as the intimate friend and companion of Lëto, the mother of Apollo and Artemis<sup>2</sup>, she was presumptuous enough to triumph over that goddess, and to place herself on a footing of higher dignity, on account of the superior number of her children. Apollo and Artemis avenged this insult by killing all the sons and all the daughters: Niobé, thus left a childless and disconsolate mother, wept herself to death, and was turned into a rock, which the later Greeks continued always to identify on Mount Sipylus<sup>3</sup>.

Some authors represented Pelops as not being a Lydian, but a king of Paphlagônia; by others it was said that Tantalus, having become detested from his impieties, had been expelled from Asia by Ilus the king of Troy,—an incident which served the

potentially impending over his head, and threatening to fall (Olymp. i. 36; Iliad. vi. 30).

<sup>2</sup> Sappho (Fragm. 82, Schneidewin).—

*Αὐτὴ αὖτὶ Νιόβη μῦθε πρὸς φίλους ἑσθὲν ἑταίρας.*

Sappho assigned to Niobé eighteen children (Ant. Gell. N. A. iv. A. 33. 7); Hesiod gave twenty; Homer twelve (Apollod. iii. 5).

The Lydian historian Xanthus gave a totally different version both of the genealogy and of the misfortunes of Niobé (Parchen. Narr. 33).

double purpose of explaining the transit of Pelops to Greece, and of imparting to the siege of Troy by Agamemnón the character of retribution for wrongs done to his ancestor<sup>1</sup>. When Pelops came over to Greece, he found Cénomaus, son of the god Arès and Harpinna, in possession of the principality of Pisa, immediately bordering on the district of Olympia. Cénomaus, having been apprised by an oracle that death would overtake him if he permitted his daughter Hippodameia to marry, refused to give her in marriage except to some suitor who should beat him in a chariot-race from Olympia to the isthmus of Corinth<sup>2</sup>; the ground here selected for the legendary victory of Pelops deserves attention, inasmuch as it is a line drawn from the assumed centre of Peloponnésus to its extremity, and thus comprises the whole territory with which Pelops is connected as eponym. Any suitor overmatched in the race was doomed to forfeit his life; and the fleetness of the Pisan horses, combined with the skill of the charioteer Myrtilus, had already caused thirteen unsuccessful competitors to perish by the lance of Cénomaus<sup>3</sup>. Pelops entered the lists as a suitor: his prayers moved the god Poseidón to supply him with a golden chariot and winged horses; or according to another story, he captivated the affections of Hippodameia herself, who persuaded the charioteer Myrtilus to loosen the wheels of Cénomaus before he started, so that the latter was overturned and perish-

ed in the race. Having thus won the hand of Hippodameia, Pelops became prince of Pisa<sup>1</sup>. He put to death the charioteer Myrtilus, either from indignation at his treachery to Cœnomaus<sup>2</sup>, or from jealousy on the score of Hippodameia: but Myrtilus was the son of Hermès, and though Pelops erected a temple in the vain attempt to propitiate that god, he left a curse upon his race which future calamities were destined painfully to work out<sup>3</sup>.

Pelops had a numerous issue by Hippodameia: Pittheus, Trœzen and Epidaurus, the eponyms of the two Argolic cities so called, are said to have been among them: Atreus and Thyestês were also his sons, and his daughter Nikippê married Sthenelus of Mykênæ and became the mother of Eurystheus<sup>4</sup>. We hear nothing of the principality of Pisa afterwards: the Pisatid villages become absorbed into the larger aggregate of Elis, after a vain struggle to maintain their separate right of presidency over the Olympic festival. But the legend ran that Pelops left his name to the whole peninsula: according to Thucydidiês, he was en-

<sup>1</sup> Pindar, *Olymp.* l. 140. The chariot race of Pelops and Cœnomaus was represented on the chest of Kypselus at Olympia: the horses of the former were given as having wings (Pausan. v. 17, 4). Plutarchydis gave the same story (op. Schol. ad Soph. *Elect.* 504).

<sup>2</sup> It is noticed by Herodotus and others as a remarkable fact, that no mules were ever bred in the Elisian territory; an Elisian who wished to breed a mule sent his mare for the time out of the region. The Elisians themselves ascribed this phenomenon to a disability brought on the land by a curse from the lips of Cœnomaus (Herod. ix. 30; Plutarch. *Quæst. Græc.* p. 363).

abled to do this because of the great wealth which he had brought with him from Lydia into a poor territory. The historian leaves out all the romantic interest of the genuine legends—preserving only this one circumstance, which, without being better attested than the rest, carries with it, from its common-place and prosaic character, a pretended historical plausibility<sup>1</sup>.

Besides his numerous issue by Hippodameia, Pelops had an illegitimate son named Chrysippus, of singular grace and beauty, towards whom he displayed so much affection as to excite the jealousy of Hippodameia and her sons. Atreus and Thyestes conspired together to put Chrysippus to death, for which they were banished by Pelops and retired to Mykênæ<sup>2</sup>,—an event which brings us into the track of the Homeric legend. For Thucydidês, having found in the death of Chrysippus a suitable ground for the secession of Atreus from Pelops, conducts him at once to Mykênæ; and shows a train of plausible circumstances to account for his having mounted the throne. Eurystheus, king of Mykênæ, was the maternal nephew of Atreus: when he engaged in any foreign expedition, he naturally entrusted the regency to his uncle; the people of Mykênæ thus became accustomed to be governed by him, and he on his part made efforts to conciliate them, so that when Eurystheus was

Atreus,  
Thyestes,  
Chrysippus.

<sup>1</sup> Thucyd. i. 5.

<sup>2</sup> We find two distinct legends respecting Chrysippus: his abduction by Iulus king of Tirhén, on which the last drama of Euripidês called Chrysippus turned (see Welcker, *Griech. Tragödien*, ii. p. 536), and his death by the hands of his half-brothers. Hyginus (l. 25) blends the two together.

defeated and slain in Attica, the Mykænæan people, apprehensive of an invasion from the Hērakleids, chose Atreus as at once the most powerful and most acceptable person for his successor<sup>1</sup>. Such was the tale which Thucydides derived "from those who had learnt ancient Peloponnésian matters most clearly from their forefathers." The introduction of so much sober and quasi-political history, unfortunately unauthenticated, contrasts strikingly with the highly poetical legends of Pelops and Atreus, which precede and follow it.

Atreus and Thyestês are known in the *Iliad* only as successive possessors of the sceptre of Zeus, which Thyestês at his death bequeathes to Agamemnôn. The family dissensions among this fated race commence, in the *Odyssey*, with Agamemnôn the son of Atreus, and Ægisthus the son of Thyestês. But subsequent poets dwell upon an implacable quarrel between the two fathers. The cause of the bitterness was differently represented: some alleged that Thyestês had intrigued with the Krétan Aeropê, the wife of his brother; other narratives mentioned that Thyestês procured for himself surreptitiously the possession of a lamb with a golden fleece, which had been designedly intro-

<sup>1</sup> Thucyd. i. 9. λέγονται δὲ αὐτὸ τὸ Πειλοποννησίον ἀσπίστῶτα πάντα καὶ τὸν πρῶτον ἑδερμένον. According to Hellanikós, Atreus the elder son returns to Pna after the death of Pelops with a great army, and makes himself master of his father's principality (Hellanik., ap. Schol. ad *Iliad.* ii. 106). Hellanikós does not seem to have been so solicitous as Thucydides to bring the story into conformity with Homer. The circumstantial genealogy given in Schol. ad Eurip. *Orest.* 5, makes Atreus and Thyestês reside during their banishment at Makéstus in Triphylia; it is given without any special authority, but may perhaps come from Hellanikós.

duced among the flocks of Atreus by the anger of *Hermès*, as a cause of enmity and ruin to the whole family<sup>1</sup>. Atreus, after a violent burst of indignation, pretended to be reconciled, and invited *Thyestès* to a banquet, in which he served up to him the limbs of his own son. The father ignorantly partook of the fatal meal. Even the all-seeing *Hèlios* is said to have turned back his chariot to the east, in order that he might escape the shocking spectacle of this *Thyestean* banquet: yet the tale of *Thyestean* revenge—the murder of Atreus perpetrated by *Ægisthus*, the incestuous offspring of *Thyestès* by his daughter *Pelopis*—is no less replete with horrors<sup>2</sup>.

Homeric legend is never thus revolting. *Agamemnôn* and *Menelaus* are known to us chiefly with their Homeric attributes, which have not been so darkly overlaid by subsequent poets as those of Atreus and *Thyestès*. *Agamemnôn* and *Menelaus* are affectionate brothers: they marry

*Agamem-  
nôn and  
Menelaus.*

<sup>1</sup> *Aeschyl.* *Agamem.* 1204, 1253, 1604; *Hygin.* 86; *Attic Fragm.* 19. This was the story of the old poem entitled *Alkmaônides*; seemingly also of *Pherekydês*, though the latter rejected the story that *Hermès* had produced the golden lamb with the special view of exciting discord between the two brothers, in order to avenge the death of *Myrtilus* by *Pelops* (see *Schol.* ad *Eurip.* *Orest.* 996).

A different legend, alluded to in *Soph.* *Aj.* 1235 (see *Schol.* ad loc.), recounted that *Atropê* had been detected by her father *Katreus* in unchaste commerce with a low-born person; he entrusted her in his anger to *Nauplius*, with directions to throw her into the sea; *Nauplius* however not only spared her life, but betrothed her to *Pleisthênês*, father of *Agamemnôn* and son of *Atreus*.

The tragedy entitled *Atreus*, of the Latin poet *Attius*, seems to have brought out with painful fidelity the flesh and savage features of this family legend (see *Aul. Gell.* xiii. 2, and the fragments of *Attius* now remaining, together with the tragedy called *Thyestês*, of *Seneca*).

<sup>2</sup> *Hygin.* *fab.* 87-88.

two sisters, the daughters of Tyndareus king of Sparta, Klytemnestra and Helen; for Helen, the real offspring of Zeus, passes as the daughter of Tyndareus<sup>1</sup>. The "king of men" reigns at Mykène; Menelaus succeeds Tyndareus at Sparta. Of the rape of Helen, and the siege of Troy consequent upon it, I shall speak elsewhere: I now touch only upon the family legends of the Atreids. Menelaus, on his return from Troy with the recovered Helen, is driven by storms far away to the distant regions of Phœnicia and Egypt, and is exposed to a thousand dangers and hardships before he again sets foot in Peloponnésus. But at length he reaches Sparta, resumes his kingdom, and passes the rest of his days in uninterrupted happiness and splendour: being moreover husband of the godlike Helen and son-in-law of Zeus, he is even spared the pangs of death. When the fulness of his days is past he is transported to the Elysian fields, there to dwell along with "the golden-haired Rhadamanthus" in a delicious climate and in undisturbed repose<sup>2</sup>.

Far different is the fate of the king of men, Agamemnôn. During his absence, the unwarlike Ægisthus, son of Thyestês, had seduced his wife Klytemnestra, in spite of the special warning of the gods, who, watchful over this privileged family, had sent their messenger Hermês expressly to deter him from the attempt<sup>3</sup>. A venerable bard

<sup>1</sup> So we must say in conformity to the ideas of antiquity: compare Homer, *Iliad*, xvi. 176; and Herodotus, vi. 53.

had been left by Agamemnôn as the companion and monitor of his wife, and so long as that guardian was at hand, Ægisthus pressed his suit in vain. But he got rid of the bard by sending him to perish in a desert island, and then won without difficulty the undefended Klytæmnêstra. Ignorant of what had passed, Agamemnôn returned from Troy victorious and full of hope to his native country; but he had scarcely landed when Ægisthus invited him to a banquet, and there, with the aid of the treacherous Klytæmnêstra, in the very hall of festivity and congratulation, slaughtered him and his companions "like oxen tied to the manger." His concubine Cassandra, the prophetic daughter of Priam, perished along with him by the hand of Klytæmnêstra herself<sup>1</sup>. The boy Orestês, the only male offspring of Agamemnôn, was stolen away by his nurse, and placed in safety at the residence of the Phôkian Strophios.

For seven years Ægisthus and Klytæmnêstra Orestês reigned in tranquillity at Mykênæ on the throne of the murdered Agamemnôn. But in the eighth year the retribution announced by the gods overtook them: Orestês, grown to manhood, returned and avenged his father, by killing Ægisthus, according to Homer; subsequent poets add, his mother also. He recovered the kingdom of Mykênæ, and succeeded Menelaus in that of Sparta. Hermione, the only daughter of Menelaus and Helen, was sent into

the realm of the Myrmidons in Thessaly, as the bride of Neoptolemus, son of Achilles, according to the promise made by her father during the siege of Troy<sup>1</sup>.

Here ends the Homeric legend of the Pelopids, the final act of Orestes being cited as one of unexampled glory<sup>2</sup>. Later poets made many additions: they dwell upon his remorse and hardly-earned pardon for the murder of his mother, and upon his devoted friendship for Pylades; they wove many interesting tales, too, respecting his sisters Iphigenia and Elektra and his cousin Hermione, — names which have become naturalised in every climate and incorporated with every form of poetry.

These poets did not at all scruple to depart from Homer, and to give other genealogies of their own, with respect to the chief persons of the Pelopid family. In the *Iliad* and *Odyssey*, Agamemnon is son of Atreus: in the Hesiodic *Eoiai* and in Stesichorus, he is son of Pleisthenes the son of Atreus<sup>3</sup>. In Homer he is specially marked as reigning at Mykenæ; but Stesichorus, Simonides and Pindar<sup>4</sup> represented him as having both resided and

perished at Sparta or at Amyklæ. According to the ancient Cyprian Verses, Helen was represented as the daughter of Zeus and Nemesis: in one of the Hesiodic poems she was introduced as an Oceanic nymph, daughter of Oceanus and Têthys<sup>1</sup>. The genealogical discrepancies, even as to the persons of the principal heroes and heroines, are far too numerous to be cited, nor is it necessary to advert to them, except as they bear upon the unavailing attempt to convert such legendary parentage into a basis of historical record or chronological calculation.

The Homeric poems probably represent that form of the legend, respecting Agamemnôn and Orestês, which was current and popular among the Æolic colonists. Orestês was the great heroic chief of the Æolic emigration; he, or his sons, or his descendants, are supposed to have conducted the Achæans to seek a new home, when they were no longer able to make head against the invading Dôrians: the great families at Tenedos and other Æolic cities, even during the historical æra, gloried in tracing back their pedigrees to this illustrious source<sup>2</sup>. The legends connected with the heroic worship of these mythical ancestors form the basis of the character and attributes of Agamemnôn and his family, as depicted in Homer, in which Mykenæ

appears as the first place in Peloponnésus, and Sparta only as the second: the former the special residence of "the king of men"; the latter that of his younger and inferior brother, yet still the seat of a member of the princely Pelopids, and moreover the birth-place of the divine Helen. Sparta, Argos and Mykénæ are all three designated in the *Iliad* by the goddess Hêrê as her favourite cities<sup>1</sup>; yet the connection of Mykénæ with Argos, though the two towns were only ten miles distant, is far less intimate than the connection of Mykénæ with Sparta. When we reflect upon the very peculiar manner in which Homer identifies Hêrê with the Grecian host and its leader,—for she watches over the Greeks with the active solicitude of a mother, and her antipathy against the Trojans is implacable to a degree which Zeus cannot comprehend<sup>2</sup>,—and when we combine this with the ancient and venerated Hêreion, or temple of Hêrê, near Mykénæ, we may partly explain to ourselves the pre-eminence conferred upon Mykénæ in the *Iliad* and *Odyssey*. The Hêreion was situated between Argos and Mykénæ; in later times its priestesses were named and its affairs administered

by the Argeians: but as it was much nearer to Mykênæ than to Argos, we may with probability conclude that it originally belonged to the former, and that the increasing power of the latter enabled them to usurp to themselves a religious privilege which was always an object of envy and contention among the Grecian communities. The Æolic colonists doubtless took out with them in their emigration the divine and heroic legends, as well as the worship and ceremonial rites, of the Hēræon; and in those legends the most exalted rank would be assigned to the close-adjoining and administering city.

Mykênæ maintained its independence even down to the Persian invasion. Eighty of its heavy-armed citizens, in the ranks of Leonidas at Thermopylæ, and a number not inferior at Plataea, upheld the splendid heroic celebrity of their city during a season of peril, when the more powerful Argos disgraced itself by a treacherous neutrality. Very shortly afterwards Mykênæ was enslaved and its inhabitants expelled by the Argeians. Though this city so long maintained a separate existence, its importance had latterly sunk to nothing, while that of the Dorian Argos was augmented very much, and that of the Dorian Sparta still more.

The name of Mykênæ is imperishably enthroned in the *Iliad* and *Odyssey*; but all the subsequent fluctuations of the legend tend to exalt the glory of other cities at its expense. The recognition of the Olympic games as the grand religious festival of Peloponnêsus gave vogue to that genealogy which connected Pelops with Pisa or Elis

and withdrew him from Mykénæ. Moreover, in the poems of the great Athenian tragedians, Mykénæ is constantly confounded and treated as one with Argos. If any one of the citizens of the former, expelled at the time of its final subjugation by the Argelians, had witnessed at Athens a drama of Æschylus, Sophoklès, or Euripidès, or the recital of an ode of Pindar, he would have heard with grief and indignation the city of his oppressors made a partner in the heroic glories of his own<sup>1</sup>. But the great political ascendancy acquired by Sparta contributed still farther to degrade Mykénæ, by disposing subsequent poets to treat the chief of the Grecian armament against Troy as having been a Spartan. It has been already mentioned that Stésichorna, Simonidès and Pindar adopted this version of the legend. We know that Zeus Agamemnôn, as well as the hero Ménélaus, was worshiped at the Dorian Sparta<sup>2</sup>; and the feeling of intimate identity, as well as of patriotic pride, which had grown up in the minds of the Spartans connected with the name of Agamemnôn, is forcibly evinced by the reply of the Spartan Syagrus to Gelôn of Syracuse at the time of the Persian invasion of Greece. Gelôn was solicited to lend his aid in the imminent danger of Greece before the battle of Salamis; he offered to furnish an immense auxiliary force, on condition that the supreme command should be allotted to him. deed would the Pelopid Agamemnon cry out (exclaimed Syngrus in rejecting this application), if he were to learn that the Spartans had been deprived of the headship by Gelôn and the Syracusans<sup>1</sup>. Nearly a century before this event, in obedience to the injunctions of the Delphian oracle, the Spartans had brought back from Tegea to Sparta the bones of "the Lædônian Orestês," as Pindar denominates him<sup>2</sup>: the recovery of these bones was announced to them as the means of reversing a course of ill-fortune, and of procuring victory in their war against Tegea<sup>3</sup>. The value which they set upon this acquisition, and the decisive results ascribed to it, exhibit a precise analogy with the recovery of the bones of Thêseus from Skyros by the Athenian Cimôn shortly after the Persian invasion<sup>4</sup>. The remains sought were those of a hero properly belonging to their own soil, but who had died in a foreign land, and of whose protection and assistance they were for that reason deprived. And the superhuman magnitude of the bones, which were contained in a coffin seven cubits long, is well-suited to the legendary grandeur of the son of Agamemnon.

## CHAPTER VIII.

### LACONIAN AND MESSENIAN GENEALOGIES.

Lelex—autochthonous name in Laconia.

THE earliest names in Lacedæmonian genealogy are, an autochthonous Lelex and a Naiad nymph Kleochæria. From this pair sprung a son Eurôtas, and from him a daughter Sparta, who became the wife of Lacedæmôn, son of Zeus and Taygetê, daughter of Atlas. Amyklas, son of Lacedæmôn, had two sons, Kynortas and Hyakinthus—the latter a beautiful youth, the favourite of Apollo, by whose hand he was accidentally killed while playing at quoits: the festival of the Hyakinthin, which the Lacedæmônians generally, and the Amyklæans with special solemnity, celebrated throughout the historical ages, was traced back to this legend. Kynortas was succeeded by his son Periêrês, who married Gorgophonê, daughter of Perseus, and had a numerous issue—Tyndareus, Ikarius, Aphareus, Leukippus, and Hippokoon. Some authors gave the genealogy differently, making Periêrês, son of Æolus, to be the father of Kynortas, and Cæbalus son of Kynortas, from whom sprung Tyndareus, Ikarius and Hippokoon<sup>1</sup>.

Tyndareus and Leda.

Both Tyndareus and Ikarius, expelled by their brother Hippokoon, were forced to seek shelter at the residence of Thestius, king of Kalydôn, whose daughter, Leda, Tyndareus espoused. It is num-

bered among the exploits of the omnipresent Héraklès, that he slew Hippokoon and his sons, and restored Tyndareus to his kingdom, thus creating for the subsequent Hérakleidan kings a mythical title to the throne. Tyndareus, as well as his brothers, are persons of interest in legendary narrative: he is the father of Kastôr—of Timandra, married to Echemus, the hero of Tegea<sup>1</sup>—and of Klytæmnêstra, married to Agamemnôn. Pollux and the ever-memorable Helen are the offspring of Læda by Zeus. Ikarius is the father of Penelopê, wife of Odysseus: the contrast between her behaviour and that of Klytæmnêstra and Helen became the more striking in consequence of their being so nearly related. Aphareus is the father of Idas and Lynkeus, while Leukippus has for his daughters, Phœbê and Ilæira. According to one of the Hesiodic poems, Kastôr and Pollux were both sons of Zeus by Læda, while Helen was neither daughter of Zeus nor of Tyndareus, but of Oceanus and Têthys<sup>2</sup>.

The brothers Kastôr and (Polydeukês, or) Pollux are no less celebrated for their fraternal affection than for their great bodily accomplishments: Kastôr, the great charioteer and horse-master; Pollux, the first of pugilists. They are enrolled both among the hunters of the Kalydônian boar and among the heroes of the Argonautic expedition, in which Pollux represses the insolence of Amykus,

king of the Bebrykes, on the coast of Asiatic Thrace—the latter, a gigantic pugilist, from whom no rival has ever escaped, challenges Pollux, but is vanquished and killed in the fight.

The two brothers also undertook an expedition into Attica, for the purpose of recovering their sister Helen, who had been carried off by Theseus in her early youth, and deposited by him at Aphidna, while he accompanied Peirithous to the under-world, in order to assist his friend in carrying off Persephonê. The force of Kastôr and Pollux was irresistible, and when they re-demanded their sister, the people of Attica were anxious to restore her: but no one knew where Theseus had deposited his prize. The invaders, not believing in the sincerity of this denial, proceeded to ravage the country, which would have been utterly ruined, had not Dekelus, the eponymus of Dekeleia, been able to indicate Aphidna as the place of concealment. The autochthonous Titakus betrayed Aphidna to Kastôr and Pollux, and Helen was recovered: the brothers, in evacuating Attica, carried away into captivity Æthra, the mother of Theseus. In after-days, when Kastôr and Pollux, under the title of the Dioskuri, had come to be worshipped as powerful gods, and when the Athenians were greatly ashamed of this act of Theseus—the revelation made by Dekelus was considered as

entitling him to the lasting gratitude of his country, as well as to the favourable remembrance of the Lacedæmônians, who maintained the Dekeleians in the constant enjoyment of certain honorary privileges at Sparta<sup>1</sup>, and even spared that dême in all their invasions of Attica. Nor is it improbable that the existence of this legend had some weight in determining the Lacedæmônians to select Dekeleia as the place of their occupation during the Peloponnésian war.

The fatal combat between Kastôr and Polydeukês on the one side, and Idas and Lynkeus on the other, for the possession of the daughters of Leukippus, was celebrated by more than one ancient poet, and forms the subject of one of the yet remaining Idylls of Theokritus. Leukippus had formally betrothed his daughters to Idas and Lynkeus; but the Tyndarids, becoming enamoured of them, outbid their rivals in the value of the customary nuptial gifts, persuaded the father to violate his promise, and carried off Phœbê and Ilacîra as their brides. Idas and Lynkeus pursued them and remonstrated against the injustice: according to Theokritus, this was the cause of the combat.

The recovery of Ilcien and the equestrian of Klêira were represented on the ancient chest of Kypselus, with the following curious inscription:—

*Ἰνδοκρίτης Ἐλίου φίλον, αἰδώς δ' Ἀδριανός*

*ἔλαβον.*

*Pausan.* *v.* 19, 1.

But there was another tale, which seems the older, and which assigns a different cause to the quarrel. The four had jointly made a predatory incursion into Arcadia and had driven off some cattle, but did not agree about the partition of the booty—Idas carried off into Messénia a portion of it which the Tyndarids claimed as their own. To revenge and reimburse themselves, the Tyndarids invaded Messénia, placing themselves in ambush in the hollow of an ancient oak. But Lynkeus, endued with preternatural powers of vision, mounted to the top of Taygetus, from whence, as he could see over the whole Peloponnésus, he detected them in their chosen place of concealment. Such was the narrative of the ancient Cyprian Verses. Kastôr perished by the hand of Idas, Lynkeus by that of Pollux. Idas, seizing a stone pillar from the tomb of his father Aphareus, hurled it at Pollux, knocked him down and stunned him; but Zeus, interposing at the critical moment for the protection of his son, killed Idas with a thunderbolt. Zeus would have conferred upon Pollux the gift of immortality, but the latter could not endure existence without his brother: he entreated permission to share the gift with Kastôr, and both were accordingly permitted to live, but only on every other day<sup>1</sup>.

The Dioskuri, or sons of Zeus,—as the two

The combat thus ends more favourably to the Tyndarids; but probably the account least favourable to them is the oldest, since their dignity went on continually increasing, until at last they became great deities.

Spartan heroes, Kastôr and Pollux, were denominated,—were recognised in the historical days of Greece as gods, and received divine honours. This is even noticed in a passage of the *Odyssey*, which is at any rate a very old interpolation, as well as in one of the Homeric hymns. What is yet more remarkable is, that they were invoked during storms at sea, as the special and all-powerful protectors of the endangered mariner, although their attributes and their celebrity seem to be of a character so dissimilar. They were worshiped throughout most parts of Greece, but with pre-eminent sanctity at Sparta.

Great functions and power of the Dioskuri.

Kastôr and Pollux being removed, the Spartan genealogy passes from Tyndareus to Menelaus, and from him to Orestês.

Originally it appears that Messênê was a name for the western portion of Laciônia, bordering on what was called Pylos: it is so represented in the *Odyssey*, and Ephorus seems to have included it amongst the possessions of Orestês and his descendants<sup>1</sup>. Throughout the whole duration of the Messênico-Dârian kingdom, there never was any town called Messênê: the town was first founded by Epameinondas, after the battle of Leuctra. The heroic genealogy of Messênia starts from the same name as that of Laciônia—from the autochthonous Lelex: his younger son, Polykaôn, marries Messênê, daughter of the Argeian Triopas, and settles the country. Pausanias tells us that the posterity of this pair occupied the country for five generations; but he in vain searched the ancient genea-

logical poems to find the names of their descendants<sup>1</sup>. To them succeeded Periêrês, son of Æolus; and Aphareus and Leukippus, according to Pausanias, were sons of Periêrês. Idas and Lynkeus are the only heroes, distinguished for personal exploits and memorable attributes, belonging to Messênia proper. They are the counterpart of the Dioskuri, and were interesting persons in the old legendary poems. Marpêssa was the daughter of Euênus, and wooed by Apollo: nevertheless Idas<sup>2</sup> carried her off by the aid of a winged chariot which he had received from Poseidôn. Euênus pursued them, and when he arrived at the river Lykormas, he found himself unable to overtake them: his grief caused him to throw himself into the river, which ever afterwards bore his name. Idas brought Marpêssa safe to Messênia, and even when Apollo there claimed her of him, he did not fear to risk a combat with the god. But Zeus interfered as mediator, and permitted the maiden to choose which of the two she preferred. She attached herself to Idas, being apprehensive that Apollo would desert her in her old age: on the death of her husband she slew herself. Both Idas and Lynkeus took part in the Argonautic expedition and in the Kalydônian boar-hunt<sup>3</sup>.

<sup>2</sup> *Iliad*, ix. 553. Simonides had handled this story in detail (Schol. *Voss*, II. ix. p. 553). Bacchylides (ap. Schol. *Pindar*, Istmi. iv. 22) celebrated in one of his poems the competition among many eager suitors for the hand of Marpêssa, under circumstances similar to the competition for Hippodamia, daughter of Demion. Many unsuccessful suitors perished by the hand of Euênus: their skulls were affixed to the wall of the temple of Poseidôn.

Idas as full of boast and self-confidence, heedless of the urgency of divine aid. Probably this was the character of the brothers in the old legend, as the enemies of the Dioskuri.

The wrath of the Dioskuri against Messénia was treated, even in the historical times, as the grand cause of the subjection of the Messénians by the Spartans: that wrath had been appeased at the time when Epameinondas reconstituted Messénia (Pausan. iv. 27, 1).

## CHAPTER IX.

## ARCADIAN GENEALOGY.

Pelagus.

THE Arcadian divine or heroic pedigree begins with Pelagus, whom both Hesiod and Asius considered as an indigenous man, though Akusilaos the Argeian represented him as brother of Argos and son of Zeus by Niobê, daughter of Phorôneus: this logographer wished to establish a community of origin between the Argeians and the Arcadians.

Lykaôn and his fifty sons.

Lykaôn, son of Pelagus and king of Arcadia, had, by different wives, fifty sons, the most savage, impious and wicked of mankind: Mænalus was the eldest of them. Zeus, in order that he might himself become a witness of their misdeeds, presented himself to them in disguise. They killed a child and served it up to him for a meal; but the god overturned the table and struck dead with thunder Lykaôn and all his fifty sons, with the single exception of Nyktimus, the youngest, whom he spared at the earnest intercession of the goddess Gaia (the Earth). The town near which the table was overturned received the name of Trapezus (Tabletown).

Legend of Lykaôn—ferocity punished by the Gods.

This singular legend (framed on the same etymological type as that of the ants in Ægina, recounted elsewhere) seems ancient, and may probably belong to the Hesiodic Catalogue. But Pausanias tells us a story in many respects dis-

ferent, which was represented to him in Arcadia as the primitive local account, and which becomes the more interesting, as he tells us that he himself fully believes it. Both tales indeed go to illustrate the same point—the ferocity of Lykaôn's character, as well as the cruel rites which he practised. The latter was the first who established the worship and solemn games of Zeus Lykæus: he offered up a child to Zeus, and made libations with the blood upon the altar. Immediately after having perpetrated this act, he was changed into a wolf<sup>1</sup>.

“Of the truth of this narrative (observes Pausanias) I feel persuaded: it has been repeated by the Arcadians from old times, and it carries probability along with it. For the men of that day, from their justice and piety, were guests and companions at table with the gods, who manifested towards them approbation when they were good,

Deep religious faith  
of Pausanias.

<sup>1</sup> Apollodorus, lib. 3, 1. Hygin. fab. 176. Eccelestia. Catastroph. 8. Pausan. viii. 2, 2-3. A different story respecting the immolation of the child is in Nikolaus Damask. Frag. p. 41, Orelli. Lykaôn is mentioned as the first founder of the temple of Zeus Lykæus in Schol. Eurip. Orest. 1662; but nothing is there said about the human sacrifice or its consequences. In the historical times, the festival and solemnities of the Lykæa do not seem to have been distinguished materially from the other agones of Greece (Pindar, Olymp. viii. 104; Xen. x. 46). Xenias the Attorian, one of the generals in the army of Cyrus the younger, celebrated the solemnity with great magnificence in the march through Asia Minor (Xen. Anab. i. 2, 10). But the fable of the human sacrifice, and the subsequent transmutation of the person who had eaten human food into a wolf, continued to be told in connection with them (Plato, de Republica. viii. c. 15. p. 417). Compare Phry, II. N. viii. 34. This passage of Plato seems to afford distinct indication that the practice of offering human victims at the altar of the Lykæan Zeus was neither prevalent nor recent, but at most only traditional and antiquated; and it therefore firms the sense or invalidates the authority of the Pseudo-Platonic dialogue, Mimos, c. 3.

and anger if they behaved ill, in a palpable manner: indeed at that time there were some, who having once been men, became gods, and who yet retain their privileges as such—Aristæus, the Krætan Britomartiz, Héraklès son of Alkména, Amphiaraus the son of Oiklès, and Pollux and Kastôr besides. We may therefore believe that Lykaôn became a wild beast, and that Niobê, the daughter of Tantalus, became a stone. But in my time, wickedness having enormously increased, so as to overrun the whole earth and all the cities in it, there are no farther examples of men exalted into gods, except by mere title and from adulation towards the powerful: moreover the anger of the gods falls tardily upon the wicked, and is reserved for them after their departure from hence."

The view of  
past and  
present  
world.

Pausanias then proceeds to censure those who, by multiplying false miracles in more recent times, tended to rob the old and genuine miracles of their legitimate credit and esteem. The passage illustrates forcibly the views which a religious and instructed pagan took of his past time—how inseparably he blended together in it gods and men, and how little he either recognised or expected to find in it the naked phenomena and historical laws of connection which belonged to the world before him. He treats the past as the province of legend, the present as that of history; and in doing this he is more sceptical than the persons with whom he conversed, who believed not only in the ancient, but even in the recent and falsely reported miracles. It is true that Pausanias does not always proceed consistently with this position: he

often rationalises the stories of the past, as if he expected to find historical threads of connexion; and sometimes, though more rarely, accepts the miracles of the present. But in the present instance he draws a broad line of distinction between present and past, or rather between what is recent and what is ancient: his criticism is, in the main, analogous to that of Arrian in regard to the Amazons—denying their existence during times of recorded history, but admitting it during the early and unrecorded ages.

In the narrative of Pausanias, the sons of Lykaon, instead of perishing by thunder from Zeus, become the founders of the various towns in Arcadia. And as that region was subdivided into a great number of small and independent townships, each having its own eponym, so the Arcadian heroic genealogy appears broken up and subdivided. Pallas, Orestheus, Phigalus, Trapezeus, Mænalus, Mantinéus, and Tegenatês, are all numbered among the sons of Lykaon, and are all eponyms of various Arcadian towns<sup>1</sup>.

The legend respecting Kallistô and Arkas, the eponym of Arcadia generally, seems to have been originally quite independent of and distinct from that of Lykaon. Eumêlus, indeed, and some other poets made Kallistô daughter of Lykaon; but neither Hesiod, nor Asius, nor Pherekydês, acknowledged any relationship between them<sup>2</sup>. The beautiful Kallistô, companion of Artemis in the chase, had bound herself by a vow of chastity: Zeus, either by persuasion or by force, obtained a

violation of the vow, to the grievous displeasure both of Hêrê and Artemis. The former changed Kallistô into a bear, the latter, when she was in that shape, killed her with an arrow. Zeus gave to the unfortunate Kallistô a place among the stars, as the constellation of the Bear: he also preserved the child Arkas, of which she was pregnant by him, and gave it to the Atlantid nymph Maia to bring up<sup>1</sup>.

Azan,  
Aphêidas,  
Elatus.

Arkas, when he became king, obtained from Triptolemus and communicated to his people the first rudiments of agriculture; he also taught them to make bread, to spin, and to weave. He had three sons—Azan, Aphêidas, and Elatus: the first was the eponym of Azania, the northern region of Arcadia; the second was one of the heroes of Tegen; the third was father of Ischys (rival of Apollo for the affections of Korônîs), as well as of Æpytus and Kyllôn: the name of Æpytus among the heroes of Arcadia is as old as the Catalogue in the *Iliad*<sup>2</sup>.

Aleus,  
Angê, Têle-  
phus.

Aleus, son of Aphêidas and king of Tegen, was the founder of the celebrated temple and worship of Athênê Alea in that town. Lykurgus and Kêphêus were his sons, Angê his daughter, who was seduced by Hêrâklês, and secretly bore to him a child: the father, discovering what had happened,

The tomb of Æpytus, mentioned in the *Iliad*, was shown to Pausanias between Pheneus and Stymphalia (Pausan. viii. 16, 2). Æpytus was a eugomenon of Bêrnê's (Pausan. viii. 47, 3).

The hero Arkas was worshiped at Mantinea, under the special injunction of the Delphian oracle (Pausan. viii. 9, 2).

sent Augè to Nauplius to be sold into slavery: Teuthras, king of Mysia in Asia Minor, purchased her and made her his wife: her tomb was shown at Pergamus on the river Kaikos even in the time of Pausanias<sup>1</sup>.

The child Téléphus, exposed on Mount Parthenius, was wonderfully sustained by the milk of a doe: the herdsmen of Korythus brought him up, and he was directed by the Delphian oracle to go and find his parents in Mysia. Teuthras adopted him, and he succeeded to the throne. In the first attempt of the army of Agamemnon against Troy, on which occasion they mistook their point and landed in Mysia, his valour signally contributed to the repulse of the Greeks, though he was at last vanquished and desperately wounded by the spear of Achilles—by whom however he was afterwards healed, under the injunction of the oracle, and became the guide of the Greeks in their renewed attack upon the Trojans<sup>2</sup>.

<sup>1</sup> Pausan. viii. 4, 5. Apollod. iii. 9, l. Diodor. iv. 33.

A separate legend respecting Augè and the birth of Téléphus was current at Tygea, attached to the temple, statue, and cognomen of Eleithylla in the Tygeatic agora (Pausan. viii. 43, 5).

Hekataeus seems to have narrated in detail the adventures of Augè (Pausan. viii. 4, 4; 47, 3. Hekataei. Fragm. 345, Döder).

Euripides followed a different story about Augè and the birth of Téléphus in his lost tragedy called Augè. (See Strabo, xii. p. 615.) Respecting the *Mural* of Aeschylus, and the two lost dramas, *Adreos* and *Mural* of Sophoklés, little can be made out. See Welcker, *Griechisch. Tragödi.* p. 53, 408-414.)

<sup>2</sup> Téléphus and his exploits were much dwelt upon in the lost old epic poem, the *Cyprian Yeros*. See argument of that poem ap. Düntzer, *Ep. Fragm.* p. 10. His exploits were also celebrated by Pindar (*Olymp.* ix. 70-79); he is enumerated along with Hector, Kyklops, Memnon, the most distinguished opponents of Achilles (*Iliad.* vi. 46). His birth, as well as his adventures, became subjects with most of the great Attic tragedians.

From Lykurgus<sup>1</sup>, the son of Aleus and brother of Augé, we pass to his son Ankleus, numbered among the Argonauts, finally killed in the chase of the Kalydônian boar, and father of Agapenor, who leads the Arcadian contingent against Troy,—(the adventures of his niece, the Tegeatic huntress Atalanta, have already been touched upon,)—then to Echemus, son of Aëropus and grandson of the brother of Lykurgus, Kêpheus. Echemus is the chief heroic ornament of Tegea. When Hyllus, the son of Hêraklês, conducted the Hêracleids on their first expedition against Peloponnêsus, Echemus commanded the Tegean troops who assembled along with the other Peloponnêsiens at the isthmus of Corinth to repel the invasion: it was agreed that the dispute should be determined by single combat, and Echemus, as the champion of Peloponnêsus, encountered and killed Hyllus. Pursuant to the stipulation by which they had bound themselves, the Hêracleids retired, and abstained for three generations from pressing their claim upon Peloponnêsus. This valorous exploit of their great martial hero was cited and appealed to by the Tegeates before the battle of Platœa, as the principal evidence of their claim to the second post in the combined army, next in point of honour to that of the Lacedæmônians, and superior to that of the Athenians: the latter replied to them by producing as counter-evidence the splendid heroic deeds of Athens,—the protection of the Hêracleids

against Eurystheus, the victory over the Kadmeians of Thêbes, and the complete defeat of the Amazons in Attica<sup>1</sup>. Nor can there be any doubt that these legendary glories were both recited by the speakers, and heard by the listeners, with profound and undoubting faith, as well as with heart-stirring admiration.

One other person there is—Iſchys, son of Elatus and grandson of Arkas—in the fabulous genealogy of Arcadia, whom it would be improper to pass over, inasmuch as his name and adventures are connected with the genesis of the memorable god or hero Æsculapius, or Asklepîus. Korônîs, daughter of Phlegyas, and resident near the lake Bœbêis in Thessaly, was beloved by Apollo and became pregnant by him; unfaithful to the god, she listened to the propositions of Iſchys son of Elatus, and consented to wed him: a raven brought to Apollo the fatal news, which so incensed him that he changed the colour of the bird from white, as it previously had been, into black<sup>2</sup>. death; but Apollo preserved the male child of which she was about to be delivered, and consigned it to the Centaur Cheirôn to be brought up. The child was named Askîlêpius, or Æsculapius, and acquired, partly from the teaching of the beneficent leech Cheirôn, partly from inborn and superhuman aptitude, a knowledge of the virtues of herbs and a mastery of medicine and surgery, such as had never before been witnessed. He not only cured the sick, the wounded, and the dying, but even restored the dead to life. Kapanëus, Eriphylê, Hippolytus, Tyndareus and Glaukus were all affirmed by different poets and logographers to have been endued by him with a new life<sup>1</sup>. But Zeus now found himself under the necessity of taking precautions lest mankind, thus unexpectedly protected against sickness and death, should no longer stand in need of the immortal gods: he smote Askîlêpius with thunder and killed him. Apollo was so exasperated by this slaughter of his highly-gifted son, that he killed the Cyclopês who

Stesichorus named Eriphylê—the Naupaktian version, Hippolytus—(compare Serrus ad Virgil. *Æneid.* vii. 761); Panyasis, Tyndareus; a proof of the popularity of this tale among the poets. Pindar says that Æsculapius was “trumped by gold” to raise a man from the dead, and Plato (*Legg.* iii. p. 408) copies him; this seems intended to afford some colour for the subsequent punishment. “*Mercede id optatum* (observes Boeckh. ad Pindar. l. c.) *Æsculapium fecisse receptior ratificio*; Pindari fatisque ipsius, quem tragici secuti sunt; laud dubie a medicorum artis maxime profecta, qui Græcorum medicis nostrisq[ue] communis sunt.” The rapacity of the physicians (granting it to be ever so well-founded, both then and now) appears to me less likely to have operated upon the mind of Pindar, than the disposition to extenuate the cruelty of Zeus, by imputing guilty and sinful views to Askîlêpius. Compare the citation from Diogenarchus, *infra* p. 249, note 1.

had fabricated the thunder, and Zeus was about to condemn him to Tartarus for doing so; but on the intercession of Latôna he relented, and was satisfied with imposing upon him a temporary servitude in the house of Admætus at Phære.

Asklēpius was worshiped with very great solemnity at Trikkæ, at Kôs, at Knidus, and in many different parts of Greece, but especially at Epidaurus, so that more than one legend had grown up respecting the details of his birth and adventures: in particular, his mother was by some called Arsinoë. But a formal application had been made on this subject (so the Epidaurians told Pausanias) to the oracle of Delphi, and the god in reply acknowledged that Asklēpius was his son by Korônis<sup>1</sup>. The tale above recounted seems to have been both the oldest and the most current. It is adorned by Pindar in a noble ode, wherein however he omits all mention of the raven as messenger—not specifying who or what the spy was from whom Apollo learnt the infidelity of Korônis. By many this was considered as an improvement in respect of poetical effect, but it illustrates the mode in which the characteristic details and simplicity of the old fables<sup>2</sup>

Homer, Hymn. ad *Æsculap.* 2. The tale briefly alluded to in the Homeric Hymn. ad *Apollon.* 209, is evidently different: Ischya is there the companion of Apollo, and Korônis is an *Areëdian* chæmel.

Aristidēs, the fervent worshiper of Asklēpius, adopted the story of Korônis, and composed hymns on the *παῖδες Κορωνίδος καὶ γέννησι τοῦ θεοῦ* (Orat. 23. p. 463, Dind.).

They are the leeches of the Grecian army, highly prized and consulted by all the wounded chiefs. Their medical renown was further prolonged in the subsequent poem of Arktinus, the *Iliu-Persis*, wherein the one was represented as unrivalled in surgical operations, the other as sagacious in detecting and appreciating morbid symptoms. It was Podaleirius who first noticed the glaring eyes and disturbed deportment which preceded the suicide of Ajax<sup>2</sup>.

Galen appears uncertain whether Asklepius (as well as Dionysus) was originally a god, or whether he was first a man and then became afterwards a god<sup>3</sup>; but Apollodorus professed to fix the exact date of his apotheosis<sup>4</sup>. Throughout all the histo-

riographical: he supposes that Apollo knew the fact from his own omniscience, without any informant, and he praises Pindar for having thus transformed the old fable. But the words *ὅτι τὰυτ' αὖτις αἰὼνος* seems certainly to imply some informant: to suppose that *αὖτις* means the god's own mind, is a strained interpretation.

rical ages the descendants of Asklēpius were numerous and widely diffused. The many families or gentes called Asklēpiads, who devoted themselves to the study and practice of medicine, and who principally dwelt near the temples of Asklēpius, whither sick and suffering men came to obtain relief—all recognised the god not merely as the object of their common worship, but also as their actual progenitor. Like Solôn, who reckoned Nêleus and Poseidôn as his ancestors, or the Mîlésian Hekatéus, who traced his origin through fifteen successive links to a god—like the privileged gens at Pélion in Thessaly<sup>1</sup>, who considered the wise Centaur Cheirôn as their progenitor, and who inherited from him their precious secrets respecting the medicinal herbs of which their neighbourhood was full,—Asklēpiads, even of the later times, numbered and specified all the intermediate links which separated them from their primitive divine parent. One of these genealogies has been preserved to us, and we may be sure that there were many such, as the Asklēpiads were found in many differ-

Among them were enrolled highly instructed and accomplished men, such as the great Hippocrátēs and the historian Ktésias, who prided themselves on the divine origin of themselves and their gens<sup>2</sup>—so much did the legendary element pervade even the most philosophical and positive minds of historical Greece. Nor can there be any doubt that their means of medical observation must have been largely extended by their vicinity to a temple so much frequented by the sick, who came in confident hopes of divine relief, and who, whilst they offered up sacrifice and prayer to Æsculapius, and slept in his temple in order to be favoured with healing suggestions in their dreams, might, in

Theopompus the historian went at considerable length into the pedigree of the Asklēpiads of Kōs and Knidos, tracing them up to Podalirius and his first settlement at Syrnus in Kreta (see Theopomp. *Fragmenta*, 111, Didot); Polyanthus of Kyrenē composed a special treatise *περὶ τοῦ τοῦ Ἀσκληπιᾶδος γενέσεως* (Sextus Empiric. adv. case the god withheld his supernatural aid, consult his living descendants<sup>1</sup>. The sick visitors at Kōs, or Trikka, or Epidaurus, were numerous and constant, and the tablets usually hung up to record the particulars of their maladies, the remedies resorted to, and the cures operated by the god, formed both an interesting decoration of the sacred ground and an instructive memorial to the Asklepiads<sup>2</sup>.

The genealogical descent of Hippocrátēs and the other Asklepiads from the god Asklepius is not only analogous to that of Hekateus and Solōn from their respective ancestral gods, but also to that of the Lacedæmōnian kings from Hēraklēs, upon the basis of which the whole supposed chronology of the ante-historical times has been built, from Eratosthenēs and Apollodōrus down to the chronologers of the present century<sup>3</sup>. I shall revert to this hereafter.

During the last illness of Alexander the Great, several of his principal officers slept in the temple of Serapis, in the hope that remedies would be suggested to them in their dreams (Arrian, viii. 26).

Pausanias, in describing the various temples of Asklepius which he saw, announces as a fact quite notorious and well-understood, "Here cures are wrought by the god" (ii. 36, 1; iii. 26, 7; vii. 27, 4): see Suidas, v. ## CHAPTER X.

ÆAKES AND HIS DESCENDANTS.—ÆGINA, SALAMIS, AND  
PHTHIA.

THE memorable heroic genealogy of the Æakids establishes a fabulous connection between Ægina, Salamis, and Phthia, which we can only recognise as a fact, without being able to trace its origin.

*Æakus—  
son of Zeus  
and Ægina.*

Æakus was the son of Zeus, born of Ægina, daughter of Asôpus, whom the god had carried off and brought into the island to which he gave her name: she was afterwards married to Aktôr, and had by him Menœtius, father of Patroclus. As there were two rivers named Asôpus, one between Phlius and Sikyôn, and another between Thêbes and Platœa—so the Æginétan heroic genealogy was connected both with that of Thêbes and with that of Phlius: and this belief led to practical consequences in the minds of those who accepted the legends as genuine history. For when the Thébans, in the 68th Olympiad, were hard-pressed in war by Athens, they were directed by the Delphian oracle to ask assistance of their next of kin: recollecting that Thêbê and Ægina had been sisters, common daughters of Asôpus, they were induced to apply to the Æginétans as their next of kin, and the Æginétans gave them aid, first by sending to them their common heroes, the Æakids, next by actual armed force<sup>1</sup>. Pindar dwells emphatically

<sup>1</sup> Herodot. v. 81.

on the heroic brotherhood between Thêbes, his native city, and Ægina<sup>1</sup>.

Æakus was alone in Ægina: to relieve him from this solitude, Zeus changed all the ants in the island into men, and thus provided him with a numerous population, who, from their origin, were called Myrmidons<sup>2</sup>. By his wife Endêis, daughter of Cheirôn, Æakus had for his sons Pêleus and Telamôn: by the Nereid Psamathê, he had Phôkus. A monstrous crime had then recently been committed by Pelôps, in killing the Arcadian prince, Stymphalos, under a simulation of friendship and hospitality: for this the gods had smitten all Greece with famine and barrenness. The oracles affirmed that nothing could relieve Greece from this intolerable misery except the prayers of Æakus, the most pious of mankind. Accordingly envoys from all quarters flocked to Ægina, to prevail upon Æakus to put up prayers for them: on his supplications the gods relented, and the suffering immediately ceased. The grateful Greeks established in Ægina the temple and worship of Zeus Panhellênus, one of the lasting monuments and institutions

<sup>1</sup> Nere. iv. 22. Estlin. vii. 16.

<sup>2</sup> This tale, respecting the transformation of the ants into men, is as old as the Hesiodic Catalogue of Women. See Düntzer, *Fragn. Equæ*. 21, p. 34: evidently an etymological tale from the name Myrmidones. Pausanias throws aside both the etymology and the details of the miracle: he says that Zeus raised men from the earth, at the prayer of Æakus (ii. 29, 2): other authors retained the etymology of Myrmidones from *μύρμηκας*, but gave a different explanation (Kallimachos, *Fragn.* 114. Düntzer): *Μυρμιδόνες ἑσάρηεν* (Strabo, viii. p. 375). *Ῥοογῆς, ἡ σκωρῆς* (Hygin. fab. 52).

According to the Thebanian legend, Myrmidôn was the son of Zeus by Eurymedusa, daughter of Kleitor; Zeus having assumed the disguise of an ant (Clemens Alex. *Admôn.* ad Gent. p. 25. Syll.)

of the island, on the spot where Æakus had offered up his prayer. The statues of the envoys who had come to solicit him were yet to be seen in the Æakeion, or sacred edifice of Æakus, in the time of Pausanias: and the Athenian Isokratēs, in his eulogy of Evagoras, the despot of Salamis in Cyprus (who traced his descent through Teukrus to Æakus), enlarges upon this signal miracle, recounted and believed by other Greeks as well as by the Æginetans, as a proof both of the great qualities and of the divine favour and patronage displayed in the career of the Æakids<sup>1</sup>. Æakus was also employed to aid Poseidōn and Apollo in building the walls of Troy<sup>2</sup>.

Phōkus  
killed by  
Peleus and  
Telamōn.

Peleus and Telamōn, the sons of Æakus, contracting a jealousy of their bastard brother, Phōkus, in consequence of his eminent skill in gymnastic contests, conspired to put him to death. Telamōn flung his quoit at him while they were playing together, and Peleus despatched him by a blow with his hatchet in the back. They then concealed the dead body in a wood, but Æakus, having discovered both the act and the agents, banished the brothers from the island<sup>3</sup>. For both of them eminent destinies were in store.

While we notice the indifference to the moral quality of actions implied in the old Hesiodic legend, when it imputes distinctly and nakedly this proceeding to two of the most admired persons of the heroic world—it is not less instructive to witness the change of feeling which had taken place in the age of Pindar. That warm eulogist of the great Æakid race hangs down his head with shame, and declines to recount, though he is obliged darkly to glance at, the cause which forced the pious Æakus to banish his sons from Ægina. It appears that Kallimachus, if we may judge by a short fragment, manifested the same repugnance to mention it<sup>1</sup>.

Telamon retired to Salamis, then ruled by Kychreus, the son of Poseidôn and Salamis, who had recently rescued the island from the plague of a terrible serpent. This animal, expelled from Salamis, retired to Eleusis in Attica, where it was received and harboured by the goddess Démêtêr in her sacred domicile<sup>2</sup>. Kychreus dying childless

Pindar, however, seems to forget this incident when he speaks in other places of the general character of Pelons (*Olymp.* ii. 76-86. *Isthm.* vii. 40).

Telamôn took part both in the chase of the Kalydônian boar and in the Argonautic expedition: he was also the intimate friend and companion of Hēraklēs, whom he accompanied in his enterprise against the Amazons, and in the attack made with only six ships upon Laomedôn, king of Troy. This last enterprise having proved completely successful, Telamôn was rewarded by Hēraklēs with the possession of the daughter of Laomedôn, Hēsionē—who bore to him Teukros, the most distinguished archer amidst the host of Agamemnôn, and the founder of Salamis in Cyprus<sup>1</sup>.

Peleus went to Phthia, where he married the daughter of Eurytiôn, son of Aktôr, and received from him the third part of his dominions. Taking part in the Kalydônian boar-hunt, he unintentionally killed his father-in-law Eurytiôn, and was obliged to flee to Iolkos, where he received purification from Akastus, son of Pelias: the danger to which he became exposed, by the calumnious accusations of the enamoured wife of Akastus, has already been touched upon in a previous section. Peleus also was among the Argonauts; the

most memorable event in his life however was his marriage with the sea-goddess Thetis. Zeus and Poseidôn had both conceived a violent passion for Thetis. But the former having been forewarned by Promêtheus that Thetis was destined to give birth to a son more powerful than his father, compelled her, much against her own will, to marry Pêleus; who, instructed by the intimations of the wise Cheirôn, was enabled to seize her on the coast called Sêpias in the southern region of Thessaly. She changed her form several times, but Pêleus held her fast until she resumed her original appearance, and she was then no longer able to resist. All the gods were present, and brought splendid gifts to these memorable nuptials: Apollo sang with his harp, Poseidôn gave to Pêleus the immortal horses Xanthus and Balius, and Cheirôn presented a formidable spear, cut from an ash-tree on Mount Pêlion. We shall have reason hereafter to recognise the value of both these gifts in the exploits of Achilles<sup>1</sup>.

The prominent part assigned to Thetis in the *Iliad* is well known, and the post-Homeric poets of

The nuptials of Pêleus and Thetis were much celebrated in the Hesiodic Catalogue, or perhaps in the *Egna* (Dionys. *Epigr. Græc. Frag.* 36, p. 39), and *Egimius*—see Schol. ad Apollon. *Rhod.* iv. 969—where there is a curious attempt of Staphylus to rationalize the marriage of Pêleus and Thetis.

There was a town, seemingly near Pharsalus in Thessaly, called Thetideion. Thetis is said to have been carried by Pêleus to both these places; probably it grew up round a temple and sanctuary of this goddess (Pherekyd. *Frag.* 16, Didot; Hellanik. ap. Steph. Byz. *Hyperboree*).

the Legend of Troy introduced her as actively concurring first to promote the glory, finally to bewail the death, of her distinguished son<sup>1</sup>. Péleus having survived both his son Achilles and his grandson Neoptolemus, is ultimately directed to place himself on the very spot where he had originally seized Thetis, and thither the goddess comes herself to fetch him away, in order that he may exchange the desertion and decrepitude of age for a life of immortality along with the Nêreids<sup>2</sup>. The spot was indicated to Xerxés when he marched into Greece by the Ìônians who accompanied him, and his magi offered solemn sacrifices to her as well as to the other Nêreids, as the presiding goddesses and mistresses of the coast<sup>3</sup>.

Neoptolemus.

Neoptolemus or Pyrrhus, the son of Achilles, too young to engage in the commencement of the siege of Troy, comes on the stage after the death of his father as the indispensable and prominent agent in the final capture of the city. He returns victor from Troy, not to Phthia, but to Epirus, bringing with him the captive Andromachê, widow of Hectôr, by whom Molossus is born to him. He himself perishes in the full vigour of life at Delphi by the machinations of Orestês, son of Agamemnôn. But his son Molossus—like Fleance, the son of Banquo, in Macbeth—becomes the father of the powerful race of Molossian kings, who played so conspicuous

The glories of Ajax, the second grandson of *Æakus*, before Troy, are surpassed only by those of *Achilles*. He perishes by his own hand, the victim of an insupportable feeling of humiliation, because a less worthy claimant is allowed to carry off from him the arms of the departed *Achilles*. His son *Philæus* receives the citizenship of Athens, and the gens or *dème* called *Philaidæ* traced up to him its name and its origin: moreover the distinguished Athenians, *Miltiadès* and *Thucydidès*, were regarded as members of this heroic progeny<sup>2</sup>.

descendant Evagoras was recognised as a Teukrid and as an Æakid even in the time of Isokratēs<sup>1</sup>.

Such was the splendid heroic genealogy of the Æakids,—a family renowned for military excellence. The Æakeion at Ægina, in which prayer and sacrifice were offered to Æakus, remained in undiminished dignity down to the time of Pausanias<sup>2</sup>. This genealogy connects together various eminent gentes in Achaia Phthiôtis, in Ægina, in Salamis, in Cyprus, and amongst the Epirotic Molossians. Whether we are entitled to infer from it that the island of Ægina was originally peopled by Myrmidones from Achaia Phthiôtis, as O. Müller imagines<sup>3</sup>, I will not pretend to affirm. These mythical pedigrees seem to unite together special clans or gentes, rather than the bulk of any community—just as we know that the Athenians generally had no part in the Æakid genealogy, though certain particular Athenian families laid claim to it. ## CHAPTER XI.

## ATTIC LEGENDS AND GENEALOGIES.

Erechtheus  
—ερεχθεύς.  
erichthonius.

THE most ancient name in Attic archæology, as far as our means of information reach, is that of Erechtheus, who is mentioned both in the Catalogue of the Iliad and in a brief allusion of the Odyssey. Born of the Earth, he is brought up by the goddess Athênê, adopted by her as her ward, and installed in her temple at Athens, where the Athenians offer to him annual sacrifices. The Athenians are styled in the Iliad, "the people of Erechtheus". This is the most ancient testimony concerning Erechtheus, exhibiting him as a divine or heroic, certainly a superhuman person, and identifying him with the primitive germination (if I may use a term, the Grecian equivalent of which would have pleased an Athenian ear) of Attic man. And he was recognised in this same character, even at the close of the fourth century before the Christian æra, by the Eutadæ, one of the most ancient and important Gentles at Athens, who boasted of him as their original ancestor: the ge-

nealogy of the great Athenian orator Lykurgus, a member of this family, drawn up by his son Abrôn, and painted on a public tablet in the Erechtheion, contained as its first and highest name, Erechtheus, son of Hêphæstos and the Earth. In the Erechtheion, Erechtheus was worshipped conjointly with Athênâ: he was identified with the god Poseidôn, and bore the denomination of Poseidôn Erechtheus: one of the family of the Butada, chosen among themselves by lot, enjoyed the privilege and performed the functions of his hereditary priest<sup>1</sup>. Herodotus also assigns the same earth-born origin to Erechtheus<sup>2</sup>: but Pindar, the old poem called the Danaïs, Euripidês, and Apollodôrus—all name Erichthonius, son of Hêphæstos and the Earth, as the being who was thus adopted and made the temple-companion of Athênâ, while Apollodôrus in another place identifies Erichthonius with Poseidôn<sup>3</sup>. The Homeric scholiast treated Erechtheus and Erichthonius as the same person under two names<sup>4</sup>: and since, in regard to such

Attic legends—  
originally  
from different  
spots—  
each deme  
had its own.

We may presume, from the testimony of Homer, that the first and oldest conception of Athens and its sacred acropolis places it under the special protection, and represents it as the settlement and favourite abode of Athênê, jointly with Poseidôn; the latter being the inferior, though the chosen companion of the former, and therefore exchanging his divine appellation for the cognomen of Erechtheus. But the country called Attica, which, during the historical ages, forms one social and political aggregate with Athens, was originally distributed into many independent *dêmes* or cantons, and included, besides, various religious clans or hereditary sects, (if the expression may be permitted); that is, a multitude of persons not necessarily living together in the same locality, but bound together by an hereditary communion of sacred rites, and claiming privileges, as well as performing obligations, founded upon the traditional authority of divine persons for whom they had a common veneration. Even down to the beginning of the Peloponnesian war, the *demots* of the various Attic *dêmes*, though long since embodied in the larger political union of Attica, and having no wish for separation, still retained the

agency of *Epitôrhmins*. Etymologicon Magn., *Ἐπιτορμῆς*—Plato (*Kritias*, c. 4) employs *regime* and general language to describe the agency of Hêphæstus and Athênê, which the old fable in Apollodorus (ii. 14, 6) details in coarser terms. See Ovid, *Metam.* ii. 757.

recollection of their original political autonomy. They lived in their own separate localities, resorted habitually to their own temples, and visited Athens only occasionally for private or political business, or for the great public festivals. Each of these aggregates, political as well as religious, had its own eponymous god or hero, with a genealogy more or less extended, and a train of mythical incidents more or less copious, attached to his name, according to the fancy of the local exegetes and poets. The eponymous heroes Marathôn, Dekelns, Kolônns, or Phlyus, had each their own title to worship, and their own position as themes of legendary narrative, independent of Erechthens, or Poseidôn, or Athênê, the patrons of the acropolis common to all of them.

But neither the archaeology of Attica, nor that of its various component fractions, was much dwelt upon by the ancient epic poets of Greece. Thêseus is noticed both in the *Iliad* and *Odyssey* as having carried off from Krête Ariadnê, the daughter of Minos—thus commencing that connection between the Krêtan and Athenian legends which we afterwards find so largely amplified—and the sons of Thêseus take part in the Trojan war<sup>1</sup>. The chief collectors and narrators of the Attic mythes were, the prose-logographers, authors of the many compositions called *Atthides*, or works on Attic archaeology. These writers—Hellanikus, the contemporary of Herodotus, is the earliest composer of an *Atthis* expressly named, though Pherekydês also touched upon the Attic fables—these writers, I say, interwove into one chronological series the

legends which either greatly occupied their own fancy, or commanded the most general reverence among their countrymen. In this way the religious and political legends of Eleusis, a town originally independent of Athens, but incorporated with it before the historical age, were worked into one continuous sequence along with those of the Erechtheids. In this way, Kekrops, the eponymous hero of the portion of Attica called Kekropia, came to be placed in the mythical chronology at a higher point even than the primitive god or hero Erechtheus.

Kekrops.

Ogygēs is said to have reigned in Attica<sup>1</sup> 1020 years before the first Olympiad, or 1796 years *n.c.* In his time happened the deluge of Deukaliōn, which destroyed most of the inhabitants of the country. After a long interval, Kekrops, an indigenous person, half man and half serpent, is given to us by Apollodōrus as the first king of the country: he bestowed upon the land, which had before been called Aktē, the name of Kekropia. In his day there ensued a dispute between Athēnē and Poseidōn respecting the possession of the acropolis at Athens, which each of them coveted. First,

<sup>1</sup> *Hellenika*, *Fragn.* 62; *Philochor.* *Fragn.* B, ap. *Emob. Prep. Evang.* i. 10, p. 483. *Larcher* (*Chronologie d'Hérodote*, ch. ix. s. 1, p. 278) treats both the historical personality and the date of Ogygēs as perfectly well authenticated.

It is not probable that *Philochorus* should have given any calculation of time having reference to Olympiads; and hardly conceivable that *Hellenikus* should have done so. *Justin Martyr* quotes *Hellenikus* and *Philochorus* as having mentioned Moses.—*ὁ ἐξ ἑσθλῆς ἀρχαίας καὶ καλῆς τοῦ Ἰωάννου ἱστορίας Μωϋσέως μνημονεύει*—which is still more incredible even than the assertion of *Eusebius* about their having fixed the date of Ogygēs by Olympiads (see *Philochor.* *Fragn.* 9).

Poseidôn struck the rock with his trident, and produced the well of salt water which existed in it, called the Erechthéis: next came Athênê, who planted the sacred olive-tree ever afterwards seen and venerated in the portion of the Erechtheion called the cell of Pandrosus. The twelve gods decided the dispute: and Kékrops having testified before them that Athênê had rendered this inestimable service, they adjudged the spot to her in preference to Poseidôn. Both the ancient olive-tree and the well produced by Poseidôn were seen on the acropolis, in the temple consecrated jointly to Athênê and Erechtheus, throughout the historical ages. Poseidôn, as a mark of his wrath for the preference given to Athênê, inundated the Thriasian plain with water<sup>1</sup>.

During the reign of Kekrops, Attica was laid waste by Karian pirates on the coast, and by invasions of the Aónian inhabitants from Bœótia. Kekrops distributed the inhabitants of Attica into twelve local sections—Kekropia, Tetrapolis, Epakria, Dekelia, Eleusis, Aphidna, Thorikos, Brau-

<sup>1</sup> Apollod. iii. 14. 1; Herodot. viii. 56; Ovid, *Metam.* vi. 72. The story current among the Athenians represented Kekrops as the judge of this controversy (Xenoph. *Memor.* iii. 5, 10).

The impressions of the trident of Poseidôn were still shown upon the rock in the time of Pausanias (*Parma.* i. 26, 4). For the sanctity of the ancient olive-tree, see the narrative of Herodotus (*l. c.*), relating what happened to it when Xerxes occupied the acropolis. As this tale seems to have attached itself specially to the local peculiarities of the Erechtheion, the part which Poseidôn plays in it is somewhat meagre: that god appears to greater advantage in the neighbourhood of the ἱερὸς Κόλυμβος, as described in the beautiful *Chorus of Sappho* (Phil. Colon. 696-712).

A curious rationalisation of the monstrous form ascribed to Kekrops (Ἀσπίς) is found in Plutarch (*Sero Num. Vindict.* p. 554).

rôn, Kythêrus, Sphêttus, Kêphisîus, Phalêrus. Wishing to ascertain the number of inhabitants, he commanded each man to cast a single stone into a general heap: the number of stones was counted, and it was found that there were twenty thousand<sup>1</sup>.

Kekrops married the daughter of Aktæus, who (according to Pausanias's version) had been king of the country before him, and had called it by the name of Aktæa<sup>2</sup>. By her he had three daughters, Aglaurus, Erse and Pandrosus, and a son, Erysichthôn. Kekrops is called by Pausanias contemporary of the Arcadian Lykaôn, and is favourably contrasted with that savage prince in respect of his piety and humanity<sup>3</sup>. Though he has been often designated in modern histories as an immigrant from Egypt into Attica, yet the far greater number of ancient authorities represent him as indigenous or earth-born<sup>4</sup>.

Erysichthôn died without issue, and Kranaus succeeded him,—another autochthonous person and another eponymous,—for the name Kranai was an old denomination of the inhabitants of Attica<sup>5</sup>.

<sup>1</sup> Philochor. ap. Strabo. ix. p. 397.

<sup>2</sup> The Parian chronological marble designates Aktæus as an autochthonous person. *Marmor Parium*, Epoch. B. Pausan. i. 2, 5. Philochorus treated Aktæus as a fictitious name (Fragm. 8, *ut sup.*).

<sup>3</sup> Pausan. iiii. 2, 2. The three daughters of Kekrops were not mentioned in the mythos (Ovid, *Metam.* ii. 739); the tale of Kephalus, son of Herakl by Herakle, who was stolen away by the goddess Eris in Hônora in consequence of his surpassing beauty, was told in more than one of the Homeric poems (Pausan. i. 3, 1; *Hærod. Thurog.* 295). See also Euripid. *Ion.* 265.

<sup>4</sup> Jul. Africanus also (*ap. Euseb.* x. 2. p. 496-498) calls Kekrops γηγενής and αὐτοχθόνος.

<sup>5</sup> *Hærod.* viii. 44. Κραναι Ἀττικῶν, Pindar.

Kranaus was dethroned by Amphiktyôn, by some called an autochthonous man; by others, a son of Deukaliôn: Amphiktyôn in his turn was expelled by Erichthonius, son of Hêphæstos and the Earth,—the same person apparently as Erechtheus, but inserted by Apollodôrus at this point of the series. Erichthonius, the pupil and favoured companion of Athênê, placed in the acropolis the original Palladium or wooden statue of that goddess, said to have dropped from heaven: he was moreover the first to celebrate the festival of the Panathenæa. He married the nymph Pasithea, and had for his son and successor Pandiôn<sup>1</sup>. Erichthonius was the first person who taught the art of breaking in horses to the yoke, and who drove a chariot and four<sup>2</sup>.

Kranaus—  
Pandiôn.

In the time of Pandiôn, who succeeded to Erichthonius, Dionysus and Dêmôtêr both came into Attica: the latter was received by Kekops at Eleusis<sup>3</sup>. Pandiôn married the nymph Zeuxippê, and had twin sons, Erechtheus and Butês, and two daughters, Proknê and Philomêla. The two latter are the subjects of a memorable and well-known legend. Pandiôn having received aid in repelling the Thêbans from Têreus, king of Thrace, gave him his daughter Proknê in marriage, by whom he had a son, Itys. The beautiful Philumêla, going to visit her sister, inspired the barbarous Thracian with an irresistible passion: he violated her person, confined her in a distant pastoral hut, and pretended

that she was dead, cutting out her tongue to prevent her from revealing the truth. After a long interval, Philomêla found means to acquaint her sister of the cruel deed which had been perpetrated: she wove into a garment words describing her melancholy condition, and despatched it by a trusty messenger. Proknê, overwhelmed with sorrow and anger, took advantage of the free egress enjoyed by women during the Bacchanalian festival to go and release her sister: the two sisters then revenged themselves upon Têreus by killing the boy Itys, and serving him up for his father to eat: after the meal had been finished, the horrid truth was revealed to him. Têreus snatched a hatchet to put Proknê to death: she fled, along with Philomêla, and all the three were changed into birds—Proknê became a swallow, Philomêla a nightingale, and Têreus an hoopoe<sup>1</sup>. This tale, so popular with the poets, and so illustrative of the general character of Grecian legend, is not less remarkable in another point of view—that the great historian Thucydides seems to allude to it as an historical fact<sup>2</sup>, not however directly mentioning the final metamorphosis.

<sup>1</sup> Apollod. iii. 14, 8; Æsch. Supplic. 61; Soph. Elektr. 107; Ovid. Metamorph. vi. 425-670. Hyginus gives the fable with some additional circumstances, fab. 45. Antoninus Liberalis (Narr. 11), or Bœrus, from whom he copies, has composed a new narrative by combining together the names of Pandareus and Adonis, as given in the Odyssey, xix. 523, and the adventures of the old Atis fable. The hoopoe still continued the habit of chasing the nightingale; it was to the Athenians a present fact. See Schol. Aristoph. Avæ, 212.

<sup>2</sup> Thucyd. ii. 29. He makes express mention of the nightingale in connection with the story, though not of the metamorphosis. See below, chap. xvi. So also does Pausanias mention and reason upon it

After the death of Pandion, Erechtheus succeeded to the kingdom, and his brother, Butes, became priest of Poseidon Erichthonius, a function which his descendants ever afterwards exercised, the Butadae or Eteobutadae. Erechtheus seems to appear in three characters in the fabulous history of Athens—as a god, Poseidon Erichtheus<sup>1</sup>—as a hero, Erechtheus, son of the Earth—and now, as a king, son of Pandion: so much did the ideas of divine and human rule become confounded and blended together in the imagination of the Greeks in reviewing their early times.

The daughters of Erechtheus were not less celebrated in Athenian legend than those of Pandion. Prokris, one of them, is among the heroines seen by Odysseus in Hades: she became the wife of Kephalus, son of Deionês, and lived in the Attic dême of Thorikus. Kephalus tried her fidelity by pretending that he was going away for a long period; but shortly returned, disguising his person and bringing with him a splendid necklace. He presented himself to Prokris without being recognised, and succeeded in triumphing over her

as a real incident; he founds upon it several moral reflections (l. 5, 4, x. 4, 5): the author of the *Adyn* 'Ερωτικός, ascribed to Demosthenes, treats it in the same manner, as a fact ennobling the tribe Pandionis, of which Pandion was the eponymus. The same author, in touching upon Kekrops, the eponymus of the Kekropis tribe, cannot believe literally the story of his being half man and half serpent: he rationalises it, by saying that Kekrops was so called because in wisdom he was like a man, in strength like a serpent (Demosth. p. 1327, 1328, Reiske). Herodotus glances at the fable (Opp. II. 566), *ἡ Εὐρυκλὴ Πανδίωνος ἔσπερος χελιδὼν*; see also Aelian, V. II. iii. 20. The subject was handled by Sophocles in his lost *Troens*.

chastity. Having accomplished this object, he revealed to her his true character: she earnestly besought his forgiveness, and prevailed upon him to grant it. Nevertheless he became shortly afterwards the unintentional author of her death: for he was fond of hunting, and staid out a long time on his excursions, so that Prokris suspected him of visiting some rival. She determined to watch him by concealing herself in a thicket near the place of his midday repose; and when Kephalus implored the presence of Nephelê (a cloud) to protect him from the sun's rays, she suddenly started from her hiding-place: Kephalus, thus disturbed, cast his hunting-spear unknowingly into the thicket and slew his wife. Erechtheus interred her with great magnificence, and Kephalus was tried for the act before the court of Areopagus, which condemned him to exile<sup>1</sup>.

Kreïssa, another daughter of Erechtheus, seduced by Apollo, becomes the mother of Iôn, whom she exposes immediately after his birth, in the cave north of the acropolis, concealing the fact from every one. Apollo prevails upon Hermês to convey the new-born child to Delphi, where he is brought up as a servant of the temple, without knowing his parents. Kreïssa marries Xuthus, son of Æolus, but continuing childless, she goes with Xuthus to the Delphian oracle to inquire for a remedy. The god presents to them Iôn, and desires them to adopt him as their son: their son

Achæus is afterwards born to them, and Iôn and Achæus become the eponyms of the Iônians and Achæans<sup>1</sup>.

Oreithyia, the third daughter of Erechtheus, was stolen away by the god Boreas while amusing herself on the banks of the Ilissus, and carried to his residence in Thrace. The two sons of this marriage, Zôtês and Kalais, were born with wings: they took part in the Argonautic expedition, and engaged in the pursuit of the Harpies: they were slain at Ténos by Héraklês. Kleopatra, the daughter of Boreas and Oreithyia, was married to Phineus, and had two sons, Plexippus and Pandion; but Phineus afterwards espoused a second wife, Idæa, the daughter of Dardanus, who, detesting the two sons of the former bed, accused them falsely of attempting her chastity, and persuaded Phineus in his wrath to put out the eyes of both. For this cruel proceeding he was punished by the Argonauts in the course of their voyage<sup>2</sup>.

<sup>1</sup> Upon this story of Iôn is founded the tragedy of Euripides which bears that name. I conceive many of the points of that tragedy to be of the invention of Euripides himself; but to represent Iôn as son of Apollo, not of Xuthus, seems a genuine Attic legend. Respecting this drama, see O. Müller, *Hist. of Dorians*, ii. 2. 13-15. I doubt however the distinction which he draws between the Ionians and the other population of Attica.

The tale of Phineus is told very differently in the Argonautic expedition as given by Apollonius Rhodius, ii. 180. From Sophocles we learn that this was the Attic version.

The two winged sons of Boreas and their chase of the Harpies were noticed in the Hesiodic Catalogue (see Schol. Apollon. Rhod. ii. 206). But whether the Attic legend of Oreithyia was recognised in the Hesiodic poems seems not certain.

Both Æschylus and Sophocles composed dramas on the subject of Oreithyia (Longin. de Sublimit. c. 3). "Oreithyia Atheniensis, *Ælia Tr.*

On more than one occasion the Athenians derived, or at least believed themselves to have derived, important benefits from this marriage of Boreas with the daughter of their primæval hero: one inestimable service, rendered at a juncture highly critical for Grecian independence, deserves to be specified<sup>1</sup>. At the time of the invasion of Greece by Xerxés, the Grecian fleet was assembled at Chalkis and Artemision in Eubœa, awaiting the approach of the Persian force, so overwhelming in its numbers as well by sea as on land. The Persian fleet had reached the coast of Magnésia and the south-eastern corner of Thessaly without any material damage, when the Athenians were instructed by an oracle "to invoke the aid of their son-in-law." Understanding the advice to point to Boreas, they supplicated his aid and that of Orëithyia most earnestly, as well by prayer as by sacrifice<sup>2</sup>, and the event corresponded to their wishes. A furious north-easterly wind immediately arose, and continued for three days to afflict the Persian fleet as it lay on an unprotected coast: the number of ships driven ashore, both vessels of war and of provision, was immense, and the injury done to the armament was never thoroughly repaired. Such

was the powerful succour which the Athenians derived, at a time of their utmost need, from their son-in-law Boreas; and their gratitude was shown by consecrating to him a new temple on the banks of the Ilissus.

The three remaining daughters of Erechtheus—he had six in all<sup>1</sup>—were in Athenian legend yet more venerated than their sisters, on account of having voluntarily devoted themselves to death for the safety of their country. Eumolpus of Eleusis was the son of Poseidôn and the eponymous hero of the sacred gens called the Eumolpids, in whom the principal functions, appertaining to the mysterious rites of Dêmêtêr at Eleusis, were vested by hereditary privilege. He made war upon Erechtheus and the Athenians, with the aid of a body of Thracian allies; indeed it appears that the legends of Athens, originally foreign and unfriendly to those of Eleusis, represented him as having been himself a Thracian born and an immigrant into Attica<sup>2</sup>. parentage, the discrepancies much exceed even the measure of licence usual in the legendary genealogies, and some critics, both ancient and modern, have sought to reconcile these contradictions, by the usual stratagem of supposing two or three different persons of the same name. Even Pausanias, so familiar with this class of unworn witnesses, complains of the want of native Eleusinian genealogists<sup>1</sup>, and of the extreme licence of fiction in which other authors had indulged.

In the Homeric Hymn to Dēmêtêr, the most ancient testimony before us,—composed, to all appearance, earlier than the complete incorporation of Eleusis with Athens,—Eumolpus appears (to repeat briefly what has been stated in a previous chapter) as one of the native chiefs or princes of Eleusis, along with Triptolemus, Dioklês, Polyxêinus and Doli-chus: Keleos is the king, or principal among these chiefs, the son or lineal descendant of the eponymous Eleusis himself. To these chiefs, and to the three daughters of Keleos, the goddess Dēmêtêr comes in her sorrow for the loss of her daughter Persephonê: being hospitably entertained by Ke-

See the learned and valuable comments of Lobbeck in his *Aglaoptamus*, tom. i. p. 206-213: in regard to the discrepancies of this narrative he observes, I think, with great justice (p. 211), "quo uno exemplo ex innumerabilibus delicto, arguitur eorum temeritas, qui ex variis discordantibus poetarum et mythographorum narratimculis, antiquæ fæmæ formam et quasi lineamenta reconstituere posse sperant."

leos she reveals her true character, commands that a temple shall be built to her at Eleusis, and prescribes to them the rites according to which they are to worship her<sup>1</sup>. Such seems to have been the ancient story of the Eleusinians respecting their own religious antiquities: Keleos, with Metaneira his wife, and the other chiefs here mentioned, were worshiped at Eleusis, and from thence transferred to Athens as local gods or heroes<sup>2</sup>. Eleusis became incorporated with Athens, apparently not very long before the time of Solon; and the Eleusinian worship of Dēmôtēr was then received into the great religious solemnities of the Athenian state, to which it owes its remarkable subsequent extension and commanding influence. In the Atticised worship of the Eleusinian Dēmôtēr, the Eumolpids and the Kērýkes were the principal hereditary functionaries: Eumolpus, the eponym of this great family, came thus to play the principal part in the Athenian legendary version of the war between Athens and Eleusis. An oracle had pronounced

that Athens could only be rescued from his attack by the death of the three daughters of Erechtheus; their generous patriotism consented to the sacrifice, and their father put them to death. He then went forth confidently to the battle, totally vanquished the enemy, and killed Eumolpus with his own hand<sup>1</sup>. <sup>1</sup> Apollodôr. iii. 15, 4. Some said that Immarthus, son of Eumolpus, had been killed by Erechtheus (Pausan. i. 5, 2); others, that both Eumolpus and his son had experienced this fate (Schol. ad Eurip. Phœnissæ. 834). But we learn from Pausanias himself what the story in the matter of the Erechtheion was,—that Erechtheus killed Eumolpus (i. 27, 3).

<sup>2</sup> Cœteris, Nat. Dœr. iii. 137; Philochor. ap. Schol. Adsp. Col. 100. Three daughters of Erechtheus perished, and three daughters were worshipped (Apollodôr. iii. 15, 4; Hesychius. Ζεῖρος τριτάτην; Eurip. Erechtheus, Fragm. 3, Bœckh); but both Euripides and Apollodorus said that Erechtheus was only required to sacrifice, and only did sacrifice, one,—the other two died themselves voluntarily, from affection for their sister. I cannot but think (in spite of the opinion of Welcker to the contrary, Griechisch. Tragœd. ii. p. 722) that the genuine legend represented Erechtheus as having sacrificed all three, as appears in the Iliad of Euripides (276):—

Ιὸς. Παιτὶς Ἐρεχθίδος νῦν ἔχοντι ἀντιπάλους;

Οἷκον. Ἐπὶ πρὸ γυναικὸς ἀφάρτου κατήλυον ἐταίρι.

Ἰὸς. Σὺ δ' ἔλατ' ἑκατέρῃ τὰς ἀντιπάλους μὲν;

Οἷκον. Ἐπὶ τὰς αὐτὰς πατρίδι ἦν δὲ ἀντιπάλαι.

Compare with this passage, Demosthen. *Adyn.* 'Εισαγωγ. p. 1397. Reisk. Just before, the death of the three daughters of Kekrops, for infringing the commands of Athena, had been mentioned. Euripides modified this in his *Erechtheus*, for he there introduced the number Proithes sacrificing to the immolation of one daughter, for the rescue of the country from a foreign invader: to purpose to a mother the immolation of three daughters at once, would have been too revolting. In most instances we find the strongly marked features, the distinct and glaring incidents as well as the dark contrasts, looking to the Hesiodic or old Post-Homeric legend; the changes made afterwards go to soften, dilute, and to complicate, in proportion as the feelings of the public become milder and more humane; sometimes however the later poets add new horrors.

names and their exalted devotion were cited along with those of the warriors of Marathon, in the public assembly of Athens, by orators who sought to arouse the languid patriot, or to denounce the cowardly deserter; and the people listened both to one and the other with analogous feelings of grateful veneration, as well as with equally unsuspecting faith in the matter of fact<sup>1</sup>.

Though Erechtheus gained the victory over Eumolpus, yet the story represents Poseidôn as having put an end to the life and reign of Erechtheus, who was (it seems) slain in the battle. He was succeeded by his son Kekrops II., and the latter again by his son Pandiôn II.<sup>2</sup>,—two names unmarked by any incidents, and which appear to be mere duplication of the former Kekrops and Pandiôn, placed there by the genealogisers for the purpose of filling up what seemed to them a chronological chasm. The Attic legends were associated chiefly with a few names of respected eponymous personages; and if the persons called the children of Pandiôn were too numerous to admit of their being conveniently ascribed to one father, there was no difficulty in supposing a second prince of the same name.

Apollodôrus passes at once from Erechtheus to his son Kekrops II., then to Pandiôn II., next to

the four sons of the latter, Ægeus, Pallas, Nisus and Lykus. But the tragedians here insert the story of Xuthus, Kreüsa, and Iôn; the latter being the son of Kreüsa by Apollo, but given by the god to Xuthus, and adopted by the latter as his own. Iôn becomes the successor of Erechtheus, and his sons (Teleon, Hoplès, Argadès and Aigikorès) become the eponyms of the four ancient tribes of Athens, which subsisted until the revolution of Kleisthenès. Iôn himself is the eponym of the Ionic race both in Asia, in Europe, and in the Ægean islands: Dôrus and Achæus are the sons of Kreüsa by Xuthus, so that Iôn is distinguished from both of them by being of divine parentage<sup>1</sup>. According to the story given by Philochorus, Iôn rendered such essential service in rescuing the Athenians from the attack of the Thracians under Eumolpus, that he was afterwards made king of the country, and distributed all the inhabitants into four tribes or castes, corresponding to different modes of life, —soldiers, husbandmen, goatherds, and artisans<sup>2</sup>. And it seems that the legend explanatory of the origin of the festival Boëdromia, originally important enough to furnish a name to one of the Athenian months, was attached to the aid thus rendered by Iôn<sup>3</sup>.

We pass from Iôn to persons of far greater my-

thical dignity and interest,—Ægeus and his son Théséus.

Pandion had four sons, Ægeus, Nisus, Lykus, and Pallas, between whom he divided his dominions. Nisus received the territory of Megaris, which had been under the sway of Pandion, and there founded the seaport of Nisæa. Lykus was made king of the eastern coast, but a dispute afterwards ensued, and he quitted the country altogether, to establish himself on the southern coast of Asia Minor among the Termilæ, to whom he gave the name of Lykians<sup>1</sup>. Ægeus, as the eldest of the four, became king of Athens; but Pallas received a portion both of the south-western coast and the interior, and he as well as his children appear as frequent enemies both to Ægeus and to Théséus. Pallas is the eponym of the *dème* Palléné, and the stories respecting him and his sons seem to be connected with old and standing feuds among the different *dèmes* of Attica, originally independent communities. These feuds penetrated into the legend, and explain the story which we find that Ægeus and Théséus were not genuine Erechtheids, the former being denominated a supposititious child to Pandion<sup>2</sup>.

Ægeus<sup>3</sup> has little importance in the mythical

history except as the father of Théséus: it may even be doubted whether his name is anything more than a mere cognomen of the god Poseidôn, who was (as we are told) the real father of this great Attic Héraklès. As I pretend only to give a very brief outline of the general territory of Grecian legend, I cannot permit myself to recount in detail the chivalrous career of Théséus, who is found both in the Kalydônian boar-hunt and in the Argonautic expedition—his personal and victorious encounters with the robbers Sinis, Prokrustès, Periphètès, Scirôn, and others—his valuable service in ridding his country of the Krommyonian sow and the Marathônian bull—his conquest of the Minotaur in Krète, and his escape from the dangers of the labyrinth by the aid of Ariadnè, whom he subsequently carries off and abandons—his many amorous adventures, and his expeditions both against the Amazons and into the underworld along with Peirithous<sup>1</sup>.

Respecting the unions of Théséus, later especially seems to have entered into great details: but some of them were noticed both in the Hesiodic poems and by Kikrops, not to mention Pherekydès (Athen. xiii. p. 557). Peirithous, the intimate friend and companion of Théséus, is the eponymous hero of the Attic tribe or gens Peirithoidæ (Ephorist vii. Photium, v. *Peirithoidæ*).

Thucydides delineates the character of Theseus as a man who combined sagacity with political power, and who conferred upon his country the inestimable benefit of uniting all the separate and self-governing demes of Attica into one common political society<sup>1</sup>. From the well earned reverence attached to the assertion of Thucydides, it has been customary to reason upon this assertion as historically authentic, and to treat the romantic attributes which we find in Plutarch and Diodorus as if they were fiction superinduced upon this basis of fact. Such a view of the case is in my judgment erroneous. The athletic and amorous knight-errant is the old version of the character—the profound and long-sighted politician is a subsequent correction, introduced indeed by men of superior mind, but destitute of historical warranty, and arising out of their desire to find reasons of their own for concurring in the veneration which the general public paid more easily and heartily to their national hero. Theseus, in the *Iliad* and *Odyssey*, fights with the Lapithæ against the Centaurs: Theseus, in the Hesiodic poems, is misguided by his passion for the beautiful *Æglé*, daughter of *Panopeus*<sup>2</sup>: and the Theseus described in Plutarch's biography is in great part a continuation and expansion of these same or similar attributes, mingled with many local legends, explain-

ing, like the *Fæsti* of Ovid, or the lost *Aitia* of Kallimachus, the original genesis of prevalent religious and social customs<sup>1</sup>. Plutarch has doubtless greatly softened down and modified the adventures which he found in the Attic logographers as well as in the poetical epics called *Théséïas*. For in his preface to the life of *Théséus*, after having emphatically declared that he is about to transcend the boundary both of the known and the knowable, but that the temptation of comparing the founder of Athens with the founder of Rome is irresistible, he concludes with the following remarkable words: "I pray that this fabulous matter may be so far obedient to my endeavours as to receive, when purified by reason, the aspect of history: in those cases where it haughtily scorns plausibility and will admit no alliance with what is probable, I shall beg for indulgent hearers, willing to receive antique narrative in a mild spirit<sup>2</sup>." We see here that Plutarch sat down, not to recount the old fables as he found them, but to purify them by reason and to impart to them the aspect of history. We have to thank him for having retained, after this purification, so much of what is romantic and marvellous; but we may be sure that the sources from which he borrowed were more romantic and marvellous still. It was the tendency of the enlight-

<sup>1</sup> Diodorus also, from his disposition to assimilate *Théséus* to *Héraklès*, has given us his chivalrous as well as his political attributes (iv. 61).

ened men of Athens, from the days of Solon downwards, to refine and politicise the character of Theseus<sup>1</sup>: even Peisistratus expunged from one of the Hesiodic poems the line which described the violent passion of the hero for the fair *Æglê*<sup>2</sup>: and the tragic poets found it more congenial to the feelings of their audience to exhibit him as a dignified and liberal sovereign, rather than as an adventurous single-handed fighter. But the logographers and the Alexandrine poets remained more faithful to the old fables. The story of Hekalê, the hospitable old woman who received and blessed Theseus when he went against the Marathônian bull, and whom he found dead when he came back to recount the news of his success, was treated by Kallimachos<sup>3</sup>: and Virgil must have had his mind full of the unrefined legends when he numbered this Attic Hēraklê among the unhappy sufferers condemned to endless penance in the under-world<sup>4</sup>.

be dismissed without some special notice,—the war against the Amazons, and the expedition against Krète. The former strikingly illustrates the facility as well as the tenacity of Grecian legendary faith; the latter embraces the story of Dædalus and Minos, two of the most eminent among Grecian antehistorical personages.

Legend of  
the Ama-  
zons.

The Amazons, daughters of Arès and Harmonia<sup>1</sup>, are both early creations and frequent reproductions of the ancient epic—which was indeed, we may generally remark, largely occupied both with the exploits and sufferings of women, or heroines, the wives and daughters of the Grecian heroes—and which recognised in Pallas Athênê the finished type of an irresistible female warrior. A nation of courageous, hardy and indefatigable women, dwelling apart from men, permitting only a short temporary intercourse for the purpose of renovating their numbers, and burning out their right breast with a view of enabling themselves to draw the bow freely,—this was at once a general type stimulating to the fancy of the poet, and a theme eminently popular with his hearers. Nor was it at all repugnant to the faith of the latter—who had no recorded facts to guide them, and no other standard of credibility as to the past except such poetical narratives themselves—to conceive communities of Amazons as having actually existed in anterior time. Accordingly we find these warlike females constantly reappearing in the ancient poems, and universally accepted as past realities. In the *Iliad*, when Priam wishes to illustrate

emphatically the most numerous host in which he ever found himself included, he tells us that it was assembled in Phrygia, on the banks of the Sangarius, for the purpose of resisting the formidable Amazons. When Bellerophôn is to be employed on a deadly and perilous undertaking<sup>1</sup>, by those who indirectly wish to procure his death, he is despatched against the Amazons. In the *Æthiopis* of Arktinus, describing the post-Homeric war of Troy, Penthesileia, queen of the Amazons, appears as the most effective ally of the besieged city, and as the most formidable enemy of the Greeks, succumbing only to the invincible might of Achilles<sup>2</sup>. The Argonautic heroes find the Amazons on the river Thermôdôn, in their expedition along the southern coast of the Euxine. To the same spot Héraklès goes to attack them, in the performance of the ninth labour imposed upon him by Eurystheus, for the purpose of procuring the girdle of the Amazonian queen, Hippolyté<sup>3</sup>;

<sup>2</sup> See Proclus's Argument of the lost *Æthiopis* (*Fragn. Epicor. Græcor.* ed. Dindorf, p. 16). We are indebted to the first book of Quintus Smyrnaeus for some idea of the valour of Penthesileia; it is supposed to be copied more or less closely from the *Æthiopis*. See Tycheus's Dissertation prefixed to his edition of Quintus, sections 5 and 12. Compare Dio. Chrysostom. *Or.* xi. p. 350, Reisk. Philostestus (*Heroica*, c. 19, p. 751) gives a strange transformation of this old epic narrative into a descent of Antinous upon the island sacred to Achilles.

and we are told that they had not yet recovered from the losses sustained in this severe aggression when Théséus also assaulted and defeated them, carrying off their queen, Antiopé<sup>1</sup>. This injury they avenged by invading Attica,—an undertaking (as Plutarch justly observes) "neither trifling nor feminine," especially if, according to the statement of Hellanikus, they crossed the Cimmerian Bosphorus on the winter ice beginning their march from the Asiatic side of the Palus Mæotis<sup>2</sup>. They overcame all the resistances and difficulties of this prodigious march, and penetrated even into Athens itself, where the final battle, hard-fought and at one time doubtful, by which Théséus crushed them, was fought—in the very heart of the city.

of the old epic poem (perhaps the *Ἀμαζόνια*) there quoted mentions Telamón specially.

<sup>1</sup> The many diversities in the story respecting Théséus and the Amazon Antiopé are well set forth in Bachel de Méziriac (*Commentaires sur Ovide*, t. i. p. 317).

Welcker (*Der Epos des Cyclops*, p. 313) supposes that the ancient epic poem called by Scidas *Ἀμαζόνια*, related to the invasion of Attica by the Amazons, and that this poem is the same, under another title, as the *Ἀρκία* of Hegesinus cited by Pausanias: I cannot say that he establishes this conjecture satisfactorily, but the chapter is well worth consulting. The epic Thésis seems to have given a version of the Amazonian contest in many respects different from that which Plutarch has put together out of the logographers (see *Plut. Thés.* 28): it contained a narrative of many unconnected exploits belonging to Théséus, and Aristotle censures it on that account as ill-constructed (*Poetic. c.* 17).

The *Ἀμαζόνια* or *Ἀμαζόνια* of Quæna can hardly have been (as Heyne supposes, ad *Apollon.* ii. 5. 4) an epic poem: we may infer from the rationalising tendency of the citation from it (*Schol. ad Theophrast. iii. 46.* and *Schol. Apollon. Rhod. i. 1207*) that it was a work in prose. There was an *Ἀμαζόνια* by Posidonius of Magnesia (*Athenæa*, vii. p. 296).

<sup>2</sup> Plutarch, *Théséus*, 27. Pindar (*Olymp. viii. 84*) represents the Amazons as having come from the extreme north, when Bellerophon conquers them.

Attic antiquaries confidently pointed out the exact position of the two contending armies: the left wing of the Amazons rested upon the spot occupied by the commemorative monument called the Amazoncion; the right wing touched the Pnyx, the place in which the public assemblies of the Athenian democracy were afterwards held. The details and fluctuations of the combat, as well as the final triumph and consequent truce, were recounted by these authors with as complete faith and as much circumstantiality as those of the battle of Plataea by Herodotus. The sepulchral edifice called the Amazoncion, the tomb or pillar of Antiopê near the western gate of the city—the spot called the Flor-komasion near the temple of Thêseus—even the hill of Areiopagus itself, and the sacrifices which it was customary to offer to the Amazons at the periodical festival of the Thêseia—were all so many religious mementos of this victory<sup>1</sup>; which was moreover a favourite subject of art both with the sculptor and the painter, at Athens as well as in other parts of Greece.

No portion of the ante-historical epic appears to have been more deeply worked into the national mind of Greece than this invasion and defeat of the Amazons. It was not only a constant theme

<sup>1</sup> Plutarch, *Thêseus*, 27-28; Pausan. i. 2. 4; Pline, *Naturalis Hist.*, v. 2; Harpocration, v. *Ἀμαζονίων*; Anaxiphane, *Lystrat.*, 678, with the Scholia. Æschyl. (*Eumenid.* 655) says that the Amazons assaulted the citadel from the Areiopagus:—

of the logographers, but was also familiarly appealed to by the popular orators along with Marathôn and Salamis, among those antique exploits of which their fellow-citizens might justly be proud. It formed a part of the retrospective faith of Herodotus, Lysias, Plato and Isokratês<sup>1</sup>, and the exact date of the event was settled by the chronologists<sup>2</sup>. Nor did the Athenians stand alone in such a belief. Throughout many other regions of Greece, both European and Asiatic, traditions and memorials of the Amazons were found. At Megara, at Troezen, in Laconia near Cape Tenarus, at Charoneia in Bœotia, and in more than one part of Thessaly, sepulchres or monuments of the Amazons were preserved. The warlike women (it was said), on their way to Attica, had not traversed those

<sup>1</sup> Herodotus ix. 27. Lysias (Epitaph. c. 3) represents the Amazons as ἀποκτείνουσαν τὴν οὐρανὸν Ἰθώαν: the whole race, according to him, was nearly extinguished in their unsuccessful and calamitous invasion of Attica. Isokratês (Panegyric. t. i. p. 206, Auger) says the same; also Panathenæus. t. iii. p. 560, Auger; Demosth. Epitaph. p. 1391. Reisk. Pausanias quotes Pindar's notice of the invasion, and with the fullest belief of its historical reality (vii. 2, 4). Plato mentions the invasion of Attica by the Amazons in the Menæxenus (c. 9), but the passage in the treatise De Legg. c. ii. p. 804, — ἀκούειν γὰρ δὲ μύθων παλαιῶν πλείονον, &c. — is even a stronger evidence of his own belief. And Xenophon in the Anabasis, when he compares the quiver and the hatchet of his barbarous enemies to "those which the Amazons carry," evidently believed himself to be speaking of real persons, though he could have seen only the costumes and armature of those painted by Mikhon and others (Anab. iv. 4, 10; compare Æschyl. Supplic. 293, and Aristophan. Lysistr. 678; Lucian. Amazones. c. 34. v. iii. p. 318).

How copiously the tale was enlarged upon by the authors of the Attiodes, we see in Plutarch, Tibullus, 27-28.

Hekateus (ap. Steph. Byz. Ἀποκαταίν; also Fragm. 350, 353, 352, Didot) and Xanthus (ap. Hieronymus, v. βαλέρφω) both treated of the Amazons: the latter passage ought to be added to the collection of the Fragments of Xanthus by Didot.

countries without leaving some evidences of their passage<sup>1</sup>.

Amongst the Asiatic Greeks the supposed traces of the Amazons were yet more numerous. Their proper territory was asserted to be the town and plain of Themiskyra, near the Grecian colony of Amisus, on the river Thermôdôn, a region called after their name by Roman historians and geographers<sup>2</sup>. But they were believed to have conquered and occupied in early times a much wider range of territory, extending even to the coast of Ionia and Æolis. Ephesus, Smyrna, Kymê, Myrina, Paphos and Sinopê were affirmed to have been founded and denominated by them<sup>3</sup>. Some authors placed them in Libya or Ethiopia; and when the Pontic Greeks on the north-western shore of the Euxine had become acquainted with the hardy and

The derivation of the name Sinopê from an Amazon was given by Hekataeus (*Fragm.* 352). Themiskyra also had one of the Amazons for its eponymus (Appian. *Bell. Mithridat.* 75).

Some of the most venerated religious legends at Sinopê were attached to the expedition of Héraklês against the Amazons: Aureolykus, the snake-giving hero, worshipped with great solemnity even at the time when the town was besieged by Lucullus, was the companion of Héraklês (Appian. *ib.* c. 83). Even a small mountain village in the territory of Ephesus, called *Lacœria*, derived its name from one of the Amazons (Athene. i. p. 31).

during character of the Sarmatian maidens,—who were obliged to have slain each an enemy in battle as the condition of obtaining a husband, and who artificially prevented the growth of the right breast during childhood,—they could imagine no more satisfactory mode of accounting for such attributes than by deducing the Sarmatians from a colony of vagrant Amazons, expelled by the Grecian heroes from their territory on the Thermôdon<sup>1</sup>. Pindar ascribed the first establishment of the memorable temple of Artemis at Ephesus to the Amazons. And Pausanias explains in part the pre-eminence which this temple enjoyed over every other in Greece by the widely diffused renown of its female founders<sup>2</sup>, respecting whom he observes (with perfect truth, if we admit the historical character of the old epic), that women possess an unparalleled force of resolution in resisting adverse events, since the Amazons, after having been first roughly handled by Hēraklēs and then completely defeated by Thēseus, could yet find courage to play so conspicuous a part in the defence of Troy against the Grecian besiegers<sup>3</sup>.

The testimony of Hippocratus certifies the practice of the Sarmatian women to check the growth of the right breast: *Ἡ δὲ φύσις δι' αὐτὰς οὐκ ἔχουσιν. Πᾶσθαι γὰρ τοῖσι τῶν ἑσπέρων αἱ ἀρσένες χυδαῖαν ἐρεχθύνουσι τῇ ἀδελφῇ τῶν τοῦ σώματος ἀντιστάσει, πρὸς τοῦ σώματος εὐθείας τοῦ σώματος καὶ ἰσχυρίας, ἀλλὰ τῶν ἀρσένων ἐκείνων, ἵνα δὲ τῶν δὲ φύσις αὐτῶν καὶ βραχυτέρη αἰὼν τοῦ ἄρσενος καὶ τὸ αὐτὸς ἐκείνων.*

Kléios also compares a warlike Sarmian woman to the Amazons (Fragm. Perse. ii. pp. 221, 415, Bahr).

<sup>3</sup> Pausan. i. 16, 2.

It is thus that in what is called early Grecian history, as the Greeks themselves looked back upon it; the Amazons were among the most prominent and undisputed personages. Nor will the circumstance appear wonderful if we reflect, that the belief in them was first established at a time when the Grecian mind was fed with nothing else but religious legend and epic poetry, and that the incidents of the supposed past, as received from these sources, were addressed to their faith and feelings, without being required to adapt themselves to any canons of credibility drawn from present experience. But the time came when the historians of Alexander the Great audaciously abused this ancient credence. Amongst other tales calculated to exalt the dignity of that monarch, they affirmed that after his conquest and subjugation of the Persian empire, he had been visited in Hyrcania by Thalestria, queen of the Amazons, who admiring his warlike prowess, was anxious to be enabled to return into her own country in a condition to produce offspring of a breed so invincible<sup>1</sup>. But the Greeks had now been accustomed for a century and a half to historical and philosophical criticism—and that uninquiring faith, which was readily accorded to the wonders of the past, could no longer be invoked for them when tendered as present reality. For the fable of the Amazons was here reproduced in its naked simplicity, without being

rationalised or painted over with historical colours.

Some literary men indeed, among whom were Dêmétrius of Skepsis, and the Mitylenæan Theophrastês, the companion of Pompey in his expeditions, still continued their belief both in Amazons present and Amazons past; and when it became notorious that at least there were none such on the banks of the Thermodôn, these authors supposed them to have migrated from their original locality, and to have settled in the unvisited regions north of Mount Caucasus<sup>1</sup>. Strabo, on the contrary, feeling that the grounds of disbelief applied with equal force to the ancient stories and to the modern, rejected both the one and the other. But he remarks at the same time, not without some surprise, that it was usual with most persons to adopt a middle course,—to retain the Amazons as historical phenomena of the remote past, but to disallow them as realities of the present, and to maintain that the breed had died out<sup>2</sup>. The accom-

Plutarch still retains the old description of Amazons from the mountains near the Thermodôn: Appian keeps clear of this geographical error, probably copying more exactly the language of Theophrastês, who must have been well-aware that when Lucullus besieged Themiskyra, he did not find it defended by the Amazons (see Appian, *Bell. Mithridat.* c. 78). Ptolemy (v. 9) places the Amazons in the imperfectly known regions of Asiatic Sarmatia, north of the Caspian and near the river Itha (Volga). "This fabulous community of women (observes Fœbiger, *Handbuch der alten Geographie*, ii. 77, p. 457) was a phenomenon much too interesting for the geographers easily to relinquish."

Περὶ δὲ τῶν Ἀμαζόνων τὰ αὐτὰ λόγια καὶ πῶς καὶ παλαιοὶ, τερματίζοντες ὅτι οὐκ ἔστιν, καὶ πιστεύουσιν ἐν ἑαυτοῖς. Τινὲς γὰρ οὐ πιστεύουσιν, οὐ καὶ νεώτεροι νεώτεροι, ἢ παλαιοί, ἢ ὅτι οὐκ ἔστιν, οὐ καὶ πᾶσι μὴ πιστεύουσιν, ἀλλὰ καὶ ἐν ἑαυτοῖς πιστεύουσιν, καὶ οὐ μόνον πιστεύουσιν, ἀλλὰ καὶ ἐν ἑαυτοῖς πιστεύουσιν, καὶ οὐ μόνον πιστεύουσιν, ἀλλὰ καὶ ἐν ἑαυτοῖς πιστεύουσιν, καὶ οὐ μόνον πιστεύουσιν, ἀλλὰ καὶ ἐν ἑαυτοῖς πιστεύουσιν. There are however other passages in which he speaks of the Amazons as realities.

Justin (ii. 4) recognises the great power and extensive conquests of the Amazons in very early times, but says that they gradually declined down to the reign of Alexander, in whose time there were just a few remaining; the queen with these few visited Alexander, but shortly afterwards the whole breed became extinct. This hypothesis has the merit of convenience, perhaps of ingenuity.

<sup>1</sup> Strabonius, *Jul. Caesar*, c. 22. "In Syria quædam regnum Scythiarum (Julius Caesar said this), nunguamque Asia partem Amazonum transire quædam."

In the splendid triumph of the emperor Augustus at Rome after the defeat of Zenobia, a few Gothic women who had been taken in arms were exhibited among the prisoners; the official placard carried along with them announced them as *Amazonæ* (*Vopiscus Amm.* in *Hist. August. Script.* p. 260, ed. Paris).

down to that time, nor have they been noticed either by any one before Alexander, or by Xenophôn, though he mentions both the Phasians and the Kolchians, and the other barbarous nations which the Greeks saw both before and after their arrival at Trapezus, in which marches they must have met with the Amazons, if the latter had been still in existence. Yet *it is incredible to me* that this race of women, celebrated as they have been by authors so many and so commanding, *should never have existed at all*. The story tells of Hêraklês; that he set out from Greece and brought back with him the girdle of their queen Hippolytê; also of Thêseus and the Athenians, that they were the first who defeated in battle and repelled these women in their invasion of Europe; and the combat of the Athenians with the Amazons has been painted by Mikôn, not less than that between the Athenians and the Persians. Moreover Herodotus has spoken in many places of these women, and those Athenian orators who have pronounced panegyrics on the citizens slain in battle, have dwelt upon the victory over the Amazons as among the most memorable of Athenian exploits. If the satrap of Media sent any equestrian women at all to Alexander, I think that they must have come from some of the neighbouring barbarous tribes, practised in riding and equipped in the costume generally called Amazonian\*."

the Greeks, than these remarks of a judicious historian upon the fable of the Amazons. Probably if any plausible mode of rationalising it, and of transforming it into a quasi-political event, had been offered to Arrian, he would have been better pleased to adopt such a middle term, and would have rested comfortably in the supposition that he believed the legend in its true meaning, while his less-inquiring countrymen were imposed upon by the exaggerations of poets. But as the story was presented to him plain and unvarnished, either for acceptance or rejection, his feelings as a patriot and a religious man prevented him from applying to the past such tests of credibility as his untrammelled reason acknowledged to be paramount in regard to the present. When we see moreover how much his belief was strengthened, and all tendency to scepticism shut out, by the familiarity of his eye and memory with sculptured or painted Amazons<sup>1</sup>—we may calculate the irresistible force of this sensible demonstration on the convictions of the unlettered public, at once more deeply retentive of passive impressions, and unaccustomed to the countervailing habit of rational investigation into evidence. Had the march of an army of warlike women, from the Thermôdon or the Tannis into the heart of Attica, been recounted to Arrian as an incident belonging to the time of Alexander the Great, he would have rejected it no less emphatically than Strabô; but cast

back as it was into an undefined past, it took rank among the hallowed traditions of divine or heroic antiquity,—gratifying to extol by rhetoric, but repulsive to scrutinise in argument<sup>1</sup>.

<sup>1</sup> Heyne observes (*Apothéôse*, ii. §. 3) with respect to the fable of the Amazons, "In his incantation scilicet sui vestigia non quoniverit." Admitting the wisdom of this counsel (and I think it indisputable), why are we required to persist, in the absence of all proof, in historical facts for each of those other narratives, such as the Kalydonian boar-hunt, the Argonautic expedition, or the siege of Troy, which go to make up, along with the story of the Amazons, the aggregate matter of Grecian legendary faith? If the tale of the Amazons could gain currency without any such support, why not other portions of the ancient epic?

An author of easy belief, Dr. F. Nagel, vindicates the historical reality of the Amazons (*Geschichte der Amazonen*, Stuttgart, 1838). I subjoin here a different explanation of the Amazonian tale, proceeding from another author who rejects the historical basis, and sustains it in a work of learning and value (*Guhl, Ephemeris*, Berlin, 1843, p. 132).—

"Id tantum monumentum videtur, Amazonas nequaquam historico accipendum esse, sed e contrario totum ad mythologiam pertinere. Earum enim fabulas quum ex frequentium hieroglypharum gregibus in cultibus et sacris Asiaticis ortas esse ingeniose ostenderit Tolkén, jam inter omnes mythologia peritos constat, Amazonibus nihil fore nisi peregrini expulsum cultus notionem expressum esse, ejusque cum Græcorum religione certamen frequentibus istis pugnis designatum esse, quas cum Amazonibus tot Græcorum heroes habuisse credebantur, Hæcules, Belerophon, Theseus, Achilles, et vel ipse, quem Ephesi cultum sacro scripta ostendimus, Dionysus. Quæ Amazonum notio primaria, quum population Eumæristica (ut ita dicam) ratione ita transformaretur, ut Amazones pro vero feminarum populo haberentur, necesse quoque erat, ut inculcus sup locis, ubi ejusmodi religionum certamina locum habuerunt, Asiaticæ habitasse, vel eo usque processisse, crederentur. Quod cum nusquam manifestius fuerit, quam in Asia minore, et potissimum in ea parte quæ Græciam verius vergit, haud mirandum est omnes fere ejus ævæ urbes ab Amazonibus conditas putari."

I do not know the evidence upon which this conjectural interpretation rests, but the statement of it, though it demands no many supporters among mythological critics, carries no appearance of probability to my mind. Primæ sights against the Amazons as well as the Grecian heroes.

## CHAPTER XII.

## KRETAN LEGENDS.—MINOS AND HIS FAMILY.

To understand the adventures of Théséus in Krête, it will be necessary to touch briefly upon Minôs and the Krêtan heroic genealogy.

Minôs and Rhadamanthus, according to Homer, are sons of Zeus, by Europê<sup>1</sup>, daughter of the widely-celebrated Phœnix, born in Krête. Minôs is the father of Deukaliôn, whose son Idomeneus, in conjunction with Mërionês, conducts the Krêtan troops to the host of Agamemnôn before Troy. Minôs is ruler of Knossus, and familiar companion of the great Zeus. He is spoken of as holding guardianship in Krête—not necessarily meaning the whole of the island: he is farther decorated with a golden sceptre, and constituted judge over the dead in the under-world to settle their disputes, in which function Odysseus finds him—this however by a passage of comparatively late interpolation into the *Odyssey*. He also had a daughter named Ariadnê, for whom the artist Dædalus fabricated in the town of Knossus the representation of a complicated dance, and who was ultimately car-

of Zeus.

<sup>1</sup> Europê was worshiped with very peculiar solemnity in the island of Krête (see *Dietyx Cretensis*, De Hells Trojani, i. c. 2).

The venerable plane-tree, under which Zeus and Europê had reposed, was still shown, hard by a fountain at Gortyn in Krête, in the time of Theophrastus: it was said to be the only plane-tree in the neighbourhood which never cast its leaves (*Theophrast. Hist. Plant.* i. 9).

ried off by Thêseus : she died in the island of Dia, deserted by Thêseus and betrayed by Dionysos to the fatal wrath of Artemis. Rhadamanthus seems to approach to Minôs both in judicial functions and posthumous dignity. He is conveyed expressly to Eubœa, by the semi-divine sea-carriers the Phœacians, to inspect the gigantic corpse of the earth-born Tityus—the longest voyage they ever undertook. He is moreover after death promoted to an abode of undisturbed bliss in the Elysian plain at the extremity of the earth<sup>1</sup>.

Europê,

According to poets later than Homer, Europê is brought over by Zeus from Phœnicia to Krête, where she bears to him three sons, Minôs, Rhadamanthus and Sarpêdôn. The latter leaves Krête and settles in Lykia, the population of which, as well as that of many other portions of Asia Minor, is connected by various mythical genealogies with Krête, though the Sarpêdôn of the *Iliad* has no connection with Krête, and is not the son of Europê. Sarpêdôn, having become king of Lykia, was favoured by his father, Zeus, with permission to live for three generations<sup>2</sup>. At the same time

The Minœic Minôs in the under-world is not a judge of the previous lives of the dead, so as to determine whether they deserve reward or punishment for their conduct on earth : such functions are not assigned to him earlier than the time of Plato. He administers justice among the dead, who are conceived as a sort of society, requiring some presiding judge : ἀγαστρίωντος νομίμην, with regard to Minôs, is said very much like (*Odys.* xi. 484) νόμῳ ἅμ' αὖτ' ἀγῶνι ἀγαστρίωντος νομίμην with regard to Achilleus. See this matter partially illustrated in Heyne's *Excursus* xi. to the sixth book of the *Æneid* of Virgil.

<sup>2</sup> *Apollodorus*, iii. 1, 2. Καὶ αὐτῷ δέδωκεν Ζεὺς τὴν γῆνιν ἔξω. This circumstance is evidently imagined by the *hærographers* to account for

the youthful Milétus, a favourite of Sarpêdôn, quitted Krête, and established the city which bore his name on the coast of Asia Minor. Rhadamanthus became sovereign of and lawgiver among the islands in the Ægean: he subsequently went to Bixôtiâ, where he married the widowed Alkimênê, mother of Hêrâklês.

Europê finds in Krête a king Asterius, who marries her and adopts her children by Zeus: this Astêrius is the son of Krês, the eponym of the island, or (according to another genealogy by which it was attempted to be made out that Minôs was of Dôrian race) he was a son of the daughter of Krês by Tektamîs, the son of Dôrus, who had migrated into the island from Greece.

Minôs married Pasiphaë, daughter of the god Hêlios and Perseïs, by whom he had Katreus, Deukaliôn, Glaukus, Androgeos,—names marked in the legendary narrative,—together with several daughters, among whom were Ariadnê and Phædra. He offended Poseidôn by neglecting to fulfil a solemnly-made vow, and the displeased god afflicted his wife Pasiphaë with a monstrous passion for a bull. The great artist Dædalus, son of Eupalamus, a fugitive from Athens, became the confidant of this amour, from which sprang the Minôtaur, a creature half-man and half-bull. This Minôtaur was imprisoned by Minôs in the labyrinth, an inextricable

Minôs is the eponym of the island of Minos (opposite the port of Nîxos), where it was affirmed that the fleet of Minôs was stationed (Pausan. i. 44, 5).

Scylla and  
Minôs.

Minôs acquired great nautical power, and expelled the Karian inhabitants from many of the islands of the *Ægean*, which he placed under the government of his sons on the footing of tributaries. He undertook several expeditions against various places on the coast — one against Nisus, the son of Pandion, king of Megara, who had amongst the hair of his head one peculiar lock of a purple colour: an oracle had pronounced that his life and reign would never be in danger so long as he preserved this precious lock. The city would have remained inexpugnable, if Scylla, the daughter of Nisus, had not conceived a violent passion for Minôs. While her father was asleep, she cut off the lock on which his safety hung, so that the Krætan king soon became victorious. Instead of performing his promise to carry Scylla away with him to Krète, he cast her from the stern of his vessel into the sea<sup>1</sup>: both Scylla and Nisus were changed into birds.

Androgeos, son of Minôs, having displayed such rare qualities as to vanquish all his competitors at the Panathenæic festival in Athens, was sent by *Ægeus* the Athenian king to contend against the bull of Marathôn,—an enterprise in which he perished, and Minôs made war upon Athens to avenge his death. He was for a long time unable to take the city: at length he prayed to his father *Zens* to aid him in obtaining redress from the Athenians,

and Zeus sent upon them pestilence and famine. In vain did they endeavour to avert these calamities by offering up as propitiatory sacrifices the four daughters of Hyakinthus. Their sufferings still continued, and the oracle directed them to submit to any terms which Minos might exact. He required that they should send to Krète a tribute of seven youths and seven maidens, periodically, to be devoured by the Minotaur<sup>1</sup>,—offered to him in a labyrinth constructed by Dædalus, including countless different passages, out of which no person could escape.

Every ninth year this offering was to be despatched. The more common story was, that the youths and maidens thus destined to destruction were selected by lot—but the logographer Hellanikus said that Minos came to Athens and chose them himself<sup>2</sup>. The third period for despatching the victims had arrived, and Athens was plunged in the deepest affliction, when Theseus determined to devote himself as one of them, and either to terminate the sanguinary tribute or to perish. He prayed to Poseidôn for help, while the Delphian god assured him that Aphrodité would sustain and extricate him. On arriving at Knossos he was fortunate enough to captivate the affections of Ariadne, the daughter of Minos, who supplied him with a sword and a clue of thread. With the former he contrived to kill the Minotaur, the latter served

to guide his footsteps in escaping from the labyrinth. Having accomplished this triumph, he left Krète with his ship and companions unbort, carrying off Ariadnè, whom however he soon abandoned on the island of Naxos. On his way home to Athens, he stopped at Dèlos, where he offered a grateful sacrifice to Apollo for his escape, and danced, along with the young men and maidens whom he had rescued from the Minôtaur, a dance called the Geranos, imitated from the twists and convolutions of the Krétan labyrinth. It had been concerted with his father Ægeus, that if he succeeded in his enterprise against the Minôtaur, he should on his return hoist white sails in his ship in place of the black canvas which she habitually carried when employed on this mournful embassy. But Théseus forgot to make the change of sails; so that Ægeus, seeing the ship return with her equipment of mourning unaltered, was impressed with the sorrowful conviction that his son had perished, and cast himself into the sea. The ship which made this voyage was preserved by the Athenians with careful solicitude, being constantly repaired with new timbers, down to the time of the Phalerian Dêmétrius: every year she was sent from Athens to Dèlos with a solemn sacrifice and specially-nominated envoys. The priest of Apollo decked her stern with garlands before she quitted the port, and during the time which elapsed until her return, the city was understood to abstain from all acts carrying with them public impurity, so that it was unlawful to put to death any person even under formal sentence by the dikastery. This

accidental circumstance becomes especially memorable, from its having postponed for thirty days the death of the lamented Socrátēs<sup>1</sup>.

The legend respecting Théséus, and his heroic rescue of the seven noble youths and maidens from the jaws of the Minotaur, was thus both commemorated and certified to the Athenian public, by the annual holy ceremony and by the unquestioned identity of the vessel employed in it. There were indeed many varieties in the mode of narrating the incident; and some of the Attic logographers tried to rationalise the fable by transforming the Minotaur into a general or a powerful athlete, named Taurus, whom Théséus vanquished in Krète<sup>2</sup>. But

<sup>1</sup> Plato, *Phædon*, c. 2, 3; Xenoph. *Memor.* iv. 3, 2. Plato especially noticed *rois* *des* *Sept* *Jeunes*, the seven youths and seven maidens whom Théséus conveyed to Krète and brought back safely; this number seems an old and constant feature in the legend, maintained by Sappho and Bacchylides, as well as by Euripides (*Herc.* *Fur.* 1318). See Servius ad Virgil. *Æneid.* vi. 21.

<sup>2</sup> For the general narrative and its discrepancies, see Plutarch. *Thés.* c. 15-19; Diodor. iv. 60-62; Pausan. i. 17, 3; Ovid. *Epist. Arista.* Thés. 104. In that other portion of the work of Theodorus which relates more especially to Krète, and is borrowed from Kretan logographers and historians (v. 64-80), he mentions nothing at all respecting the war of Minos with Athens.

In the drama of Euripides called *Théséus*, the genuine story of the youths and maidens about to be offered as food to the Minotaur was introduced (Schol. ad *Arctoph.* *Vesp.* 342).

Arístoté figures in the *Odyssey* along with Théséus; she is the daughter of Minos, carried off by Théséus from Krète, and killed by Artemis in the way home: there is no allusion to Minotaur, or tribute, or self-devotion of Théséus (*Odys.* xi. 324). This is probably the oldest and simplest form of the legend—one of the many amorous conquests Theognis (1232) ascribes to Théséus: the rest is added by post-Homeric poets.

The respect of Aristotle for Minos induces him to adopt the hypothesis that the Athenian youths and maidens were not put to death in Krète, but grew old in servitude. (Aristot. *Fragmenta. Posteriora Metaphisic.* p. 106. ed. Neumann, of the *Fragmenta* of the treatise *Περὶ Πολιτικῆς*, Plutarch, *Quæst. Græc.* p. 298.)

this altered version never overbore the old fanciful character of the tale as maintained by the poets. A great number of other religious ceremonies and customs, as well as several chapels or sacred enclosures in honour of different heroes, were connected with different acts and special ordinances of Theseus. To every Athenian who took part in the festivals of the Oschophoria, the Pyanepsia, or the Kybernêsia, the name of this great hero was familiar, and the motives for offering to him solemn worship at his own special festival of the Thêseia, became evident and impressive.

The same Athenian legends which ennobled and decorated the character of Theseus, painted in repulsive colours the attributes of Minôs; and the traits of the old Homeric comrade of Zeus were buried under those of the conqueror and oppressor of Athens. His history, like that of the other legendary personages of Greece, consists almost entirely of a string of family romances and tragedies. His son Katreus, father of Aëropê, wife of Atreus, was apprised by an oracle that he would perish by the hand of one of his own children: he accordingly sent them out of the island, and Althemenês, his son, established himself in Rhodes. Katreus having become old, and fancying that he had outlived the warning of the oracle, went over to Rhodes to see Althamenês. In an accidental dispute which arose between his attendants and the islanders, Althamenês inadvertently took part and slew his father without knowing him. Glaukus, the youngest son of Minôs, pursuing a mouse, fell into a reservoir of honey and was drowned. No one knew what had become of

him, and his father was inconsolable; at length the Argeian Polyeidus, a prophet wonderfully endowed by the gods, both discovered the boy and restored him to life, to the exceeding joy of Minos<sup>1</sup>.

The latter at last found his death in an eager attempt to overtake and punish Dædalus. This great artist, the eponymous hero of the Attic gens or *dème* called the Dædalidæ, and the descendant of Erechtheus through Métion, had been tried at the tribunal of Areiopagus and banished for killing his nephew Talos, whose rapidly improving skill excited his envy<sup>2</sup>. He took refuge in Krète, where he acquired the confidence of Minos, and was employed (as has been already mentioned) in constructing the labyrinth; subsequently however he fell under the displeasure of Minos, and was confined as a close prisoner in the inextricable windings of his own edifice. His unrivalled skill and resource however did not forsake him. He manufactured wings both for himself and for his son Ikarus, with which they flew over the sea. The father arrived safely in Sicily at Kamikus, the residence of the Sikanian king Kokalos; but the son, disdaining paternal example and admonition, flew so high that his wings were melted by the sun and he fell into the sea, which from him was called the Ikarian sea<sup>3</sup>.

Minos goes

him, but is  
killed.

Dædalus remained for some time in Sicily, leaving in various parts of the island many prodigious evidences of mechanical and architectural skill<sup>1</sup>. At length Minos, bent upon regaining possession of his person, undertook an expedition against Kokalus with a numerous fleet and army. Kokalus, affecting readiness to deliver up the fugitive, and receiving Minos with apparent friendship, ordered a bath to be prepared for him by his three daughters, who, eager to protect Dædalus at any price, drowned the Krétan king in the bath with hot water<sup>2</sup>. Many of the Krétans who had accompanied him remained in Sicily and founded the town of Minoa, which they denominated after him. But not long afterwards Zeus instigated all the inhabitants of Krète (except the towns of Polichna and Præsus) to undertake with one accord an expedition against Kamikus for the purpose of avenging the death of Minos. They besieged Kamikus in vain for five years, until at last famine compelled them to return. On their way along the coast of Italy, in the Gulf of Tarentum, a terrible storm destroyed their fleet and obliged them to settle permanently in the country: they founded Hyria with other cities, and became Messapian Iapygians. Other settlers, for the most part Greeks, immi-

grated into Krète to the spots which this movement had left vacant. In the second generation after Minòs, occurred the Trojan war. The departed Minòs was exceedingly offended with the Krétans for co-operating in avenging the injury to Menelaus, since the Greeks generally had lent no aid to the Krétans in their expedition against the town of Kamikus. He sent upon Krète, after the return of Idomeneus from Troy, such terrible visitations of famine and pestilence, that the population again died out or expatriated, and was again renovated by fresh immigrations. The intolerable suffering<sup>1</sup> thus brought upon the Krétans by the anger of Minòs, for having co-operated in the general Grecian aid to Menelaus, was urged by them to the Greeks as the reason why they could take no part in resisting the invasion of Xerxès; and it is even pretended that they were advised and encouraged to adopt this ground of excuse by the Delphian oracle<sup>2</sup>.

Sufferings of the Krétans afterwards from the wrath of Minòs.

Such is the Minòs of the poets and logographers, with his legendary and romantic attributes: the familiar comrade of the great Zeus,—the judge

Portrait of Minòs—how varied.

<sup>1</sup> This curious and very characteristic narrative is given by Herodot. vii. 169–171.

<sup>2</sup> Herodot. vii. 169. The answer ascribed to the Delphian oracle, on the question being put by the Krétan envoys whether it would be better for them to aid the Greeks against Xerxès or not, is highly emphatic and poetical: *Ὁ νόμος, ἀνταρμύσειδ' ἔστιν ὅτις ἐκ τῆς Μινωῆος τιμωρημένης Μίνωα ἀνταρμύσει μνηστὴρ ἀνταρμύσει, ὅτις αἱ αἰεὶ αἱ ἐνὶ ἐκπύρεσσι αὐτῶν εἰς ἑκάστην ἑκάστην γένεσται, ὅτις δὲ αἰεὶ αἰεὶ ἐκ Δελφῶν ἀνταρμύσει αὐτῶν ἀνταρμύσει γένεσται.*

If such an answer was ever returned at all, I cannot but think that it must have been from some oracle in Krète itself, not from Delphi. The Delphian oracle could never have so far forgotten its obligations to the general cause of Greece, at that critical moment, which involved moreover the safety of all its own treasures, as to deter the Krétans from giving assistance.

among the dead in Hades,—the husband of Pasiphaë, daughter of the god Hélios,—the father of the goddess Ariadnè, as well as of Androgeos, who perishes and is worshiped at Athens<sup>1</sup>, and of the boy Glaukus, who is miraculously restored to life by a prophet,—the person beloved by Scylla, and the amorous pursuer of the nymph or goddess Britomartis<sup>2</sup>,—the proprietor of the Labyrinth and of the Minotaur, and the exactor of a periodical tribute of youths and maidens from Athens as food for this monster,—lastly, the follower of the fugitive artist Dedalus to Kamikus, and the victim of the three ill-disposed daughters of Kokalus in a bath. With this strongly-marked portrait, the Minos of Thucydidès and Aristotle has scarcely anything in common except the name. He is the first to acquire *Thalassokraty*, or command of the Ægean sea: he expels the Karian inhabitants from the Cyclades islands, and sends thither fresh colonists under his own sons; he puts down piracy, in order that he may receive his tribute regularly; lastly, he attempts to conquer Sicily, but fails in the enterprise and perishes<sup>3</sup>. Here we have conjectures,

<sup>1</sup> Hesiod, *Theogon.* 549; Pausan. l. i., 4.

<sup>2</sup> Kallimach. *Hymn. ad Dian.* 189. Strabo (c. p. 476) dwells also upon the strange contradiction of the legends concerning Minos: I agree with Hecckh (*Kreta*, ii. p. 23) that *Δωριόλητος* in this passage refers to the tribute exacted from Athens for the Minotaur.

<sup>3</sup> Thucyd. l. 4. Μῖνος γὰρ, πωλοῦντος ὡς ἄλλοι ἴππους, κραιναὶ ἐπέστατο, καὶ τῆς ἐν Ἑλλάδι βασιλείας ἐπὶ πλείστον ἐκράτηεν, καὶ τὴν Κνωσίδα νῆσον ἤρξεν ἐν αὐτῇ καὶ οὐκ ἐπὶ τῇ τῶν πλοίων ἐξέστη, Κάρια ἐξελθὼν καὶ τοὺς ἐκείνῳ παῖδας ἡγεμονίας ἐνεσταυρήσας· τὸ τε Λητινὸν, ὡς εἶδα, καθήκει ἐν τῇ βασιλείᾳ, ἀπὸ ἧται δόξαν, καὶ τὰς πρὸς οὐλοῦντας πόλεις ἵκται αὐτῷ. derived from the analogy of the Athenian maritime empire in the historical times, substituted in place of the fabulous incidents, and attached to the name of Minos.

In the fable, a tribute of seven youths and seven maidens is paid to him periodically by the Athenians; in the historicised narrative this character of a tribute-collector is preserved, but the tribute is money collected from dependent islands<sup>1</sup>; and Aristotle points out to us how conveniently Krète is situated to exercise empire over the Ægean. The expedition against Kamikus, instead of being directed to the recovery of the fugitive Dædalus, is an attempt on the part of the great thalassokrat to conquer Sicily. Herodotus gives us generally the same view of the character of Minos as a great maritime king, but his notice of the expedition against Kamikus includes the mention of Dædalus as the intended object of it<sup>2</sup>. Ephorus, while he described Minos as a commanding and comprehensive lawgiver imposing his commands under the sanction of Zeus, represented him as the imitator

*ἐπιβίβας δὲ Μῖνος, καὶ τὰς ἡμέρας τὰς αὖς ἐξαίρετα, αὐτὸς δὲ φέρειν τὰς  
ἑξ ἑκάστης τῆς δωδεκῆς τὰς θύας ἐκδιδόντας αὐτῷ ἐπὶ Κρήτι.*

Ephorus (ap. Skylax, Ch. 542) repeated the same statement: he mentioned also the autochthonous king Krös.

<sup>1</sup> It is curious that Herodotus expressly denies this, and in language which shows that he had made special inquiries about it: he says that the Karians or Lelopes in the islands (who were, according to Thucydides, expelled by Minos) paid no tribute to Minos, but manned his navy, i. e. they stood to Minos much in the same relation as Clitos and Lokios stood to Athens (Herodot. i. 171). One may trace here the influence of those discussions which must have been prevalent at that time respecting the maritime empire of Athens.

<sup>2</sup> Herodot. vii. 170. *ἀέπειρα γὰρ Μῖνος ἀπὸς ἑσπερίων ἀνδράδων ἀνέστη  
πρὸς τὴν δωδεκῆν, τὰς αὖς δωδεκῆς ἐκδιδόντας, ἀνέβησαν Ἀθηναίους

of an earlier lawgiver named Rhadamanthus, and also as an immigrant into Krète from the Æolic Mount Ida, along with the priests or sacred companions of Zeus called the Idæi Dactyli. Aristotle too points him out as the author of the Syssitia, or public meals common in Krète as well as at Sparta,—other divergences in a new direction from the spirit of the old fables<sup>1</sup>.

The contradictory attributes ascribed to Minôs, together with the perplexities experienced by those who wished to introduce a regular chronological arrangement into these legendary events, has led both in ancient and in modern times to the supposition of two kings named Minôs, one the grandson of the other,—Minôs I., the son of Zeus, lawgiver and judge,—Minôs II., the thalassokrat,—a gratuitous conjecture, which, without solving the problem required, only adds one to the numerous artifices employed for imparting the semblance of history to the disparate matter of legend. The Krétans were at all times, from Homer downward, expert and practised seamen. But that they were ever united under one government, or ever exercised maritime dominion in the Ægean is a fact which we are neither able to affirm nor to deny. The *Odyssey*, in so far as it justifies any inference at all, points against such a supposition, since it recognises a great diversity both of inhabitants and

<sup>1</sup> Aristot. *Polit.* li. 7. 1. 1 *καὶ* 2. Ephorus, *Fragment.* 63, 64, 65. He set aside altogether the Homeric genealogy of Minôs, which makes him brother of Rhadamanthus and born in Krète.

Strabo, in pointing out the many contradictions respecting Minôs, remarks, "Επει δὲ καὶ ἄλλας λόγους οὐχ ἀμυλογνήτους, τῶν μὲν εἶναι τῇ ἡστέῃ τῶν Μίνω λεγόντων, τῶν δὲ ἀντιφασίων." By the former he doubtless means Ephorus, though he has not here specified him (a. p. 477).

of languages in the island, and designates Minos as king specially of Knossos: it refutes still more positively the idea that Minos put down piracy, which the Homeric Krétans as well as others continue to practise without scruple.

Herodotus, though he in some places speaks of Minos as a person historically cognisable, yet in one passage severs him pointedly from the generation of man. The Samian despot "Polykratēs (he tells us) was the first person who aspired to nautical dominion, excepting Minos of Knossos, and others before him (if any such there ever were) who may have ruled the sea; but Polykratēs is the first of that which is called *the generation of man* who aspired with much chance of success to govern Ionia and the islands of the *Ægean*¹." Here we find it manifestly intimated that Minos did not belong to the generation of man, and the tale given by the historian respecting the tremendous calamities which the wrath of the departed Minos inflicted on Krète confirms the impression. The king of Knossos is a god or a hero, but not a man; he belongs to legend, not to history. He is the son as well as the familiar companion of Zeus; he marries the daughter of Hélios, and Ariadne is numbered among his offspring. To this superhuman person are ascribed the oldest and most revered institutions

¹ Herodot. iii. 123. Πολυκράτης γὰρ ἐστὶ πρῶτος τῶν ἀντὶ θύρας Ἑλλάδος, ὃς θαλάσσης ἀντιέβη, παρὶς Μίνω τοῦ Κνωσίου, καὶ εἰ δὲ τοὶ ἄλλοι πρῶτοι τοῦτον ἔβη τῇ θαλάσσῃ τῇ δὲ ἀδελφῇ Πηγήνῃ ἀγορεύει γενέσθαι Πολυκράτης ἐντὶ πρῶτος Ἰωνίας καὶ ἄλλης ἔχει ἰσχυρὰ τε καὶ νόμιμα ἄρχειν.

The expression exactly corresponds to that of Pausanias, ix. 5, 1, ἐν τῇ θαλάσσῃ Ἡρώου, for the age preceding the ἀδελφὴν γενέσθαι also xiii. 2, 1, εἰς τὸ δευτέρου τοῦ ἀδελφοῦ γένος.

of the island, religious and political, together with a period of supposed ante-historical dominion. That there is much of Krétan religious ideas and practice embodied in the fables concerning Minôs can hardly be doubted; nor is it improbable that the tale of the youths and maidens sent from Athens may be based in some expiatory offerings rendered to a Krétan divinity. The orgiastic worship of Zeus, solemnized by the armed priests with impassioned motions and violent excitement, was of ancient date in that island, as well as the connection with the worship of Apollo both at Delphi and at Dêlos. To analyse the fables and to elicit from them any trustworthy particular facts, appears to me a fruitless attempt. The religious recollections, the romantic invention, and the items of matter of fact, if any such there be, must for ever remain indissolubly amalgamated as the poet originally blended them, for the amusement or edification of his auditors. Hoeckh, in his instructive and learned collection of facts respecting ancient Krête, constructs the mythical genealogy of Minôs to denote a combination of the orgiastic worship of Zeus, indigenous among the Eteokrêtes, with the worship of the moon imported from Phœnicia, and signified by the names *Europê*, *Pasiphaë* and *Ariadnê*<sup>1</sup>. This is specious as a conjecture, but I do not venture to speak of it in terms of greater confidence.

From the connection of religious worship and legendary tales between Krête and various parts of

<sup>1</sup> Hoeckh, *Kreta*, vol. ii. pp. 56-57. K. O. Müller also (*Doctes*. ii. 2, 141) puts a religious interpretation upon these Kretan-Attic legends, but he explains them in a manner totally different from Hoeckh.

Antiquity be-  
tween Krète  
and Asia  
Minor.

Asia Minor,—the Troad, the coast of Miletus and Lykia, especially between Mount Ida in Krète and Mount Ida in Æolis,—it seems reasonable to infer an ethnographical kindred or relationship between the inhabitants anterior to the period of Hellenic occupation. The tales of Krétan settlement at Minoæ and Engyion on the south-western coast of Sicily, and in Iapygia on the Gulf of Tarentum, conduct us to a similar presumption, though the want of evidence forbids our tracing it farther. In the time of Herodotus, the Eteokrètes, or aboriginal inhabitants of the island, were confined to Polichna and Præsus; but in earlier times, prior to the encroachments of the Hellènes, they had occupied the larger portion, if not the whole of the island. Minos was originally their hero, subsequently adopted by the immigrant Hellènes,—at least Herodotus considers him as barbarian, not Hellenic<sup>1</sup>.

## CHAPTER XIII.

## ARGONAUTIC EXPEDITION.

Ship Argô  
in the  
Odyssey.

THE ship Argô was the theme of many songs during the oldest periods of the Grecian epic, even earlier than the Odyssey. The king Ætês, from whom she is departing, the hero Jasôn, who commands her, and the goddess Hêrê, who watches over him, enabling the Argô to traverse distances and to escape dangers which no ship had ever before encountered, are all circumstances briefly glanced at by Odysseus in his narrative to Alcinous. Moreover, Eunêus, the son of Jasôn and Hypsipylê, governs Lemnos during the siege of Troy by Agamemnôn, and carries on a friendly traffic with the Grecian camp, purchasing from them their Trojan prisoners<sup>1</sup>.

The legend of Halus in Achaia Phthiôtis, respecting the religious solemnities connected with the family of Athamas and Phryxus (related in a previous chapter), is also interwoven with the voyage of the Argonauts; and both the legend and the solemnities seem evidently of great antiquity.

We know further, that the adventures of the Argô were narrated not only by Hesiod and in the Hesiodic poems, but also by Eumêlus and the author of the Naupactian verses—by the latter seemingly at considerable length<sup>1</sup>. But these poems are unfortunately lost, nor have we any means of determining what the original story was; for the narrative, as we have it, borrowed from later sources, is enlarged by local tales from the subsequent Greek colonies—Kyzikus, Herakléia, Sinopê, and others.

*Antimachus*, in his poem *Lyde*, touched upon the Argonautic expedition, and has been partially copied by Apollônios Rhod. (Schol. Ap. Rh. i. 1128; ii. 296; iii. 410; iv. 1153).

The logographers Pherekydês and Hekataios seem to have related the expedition at considerable length.

The *Bibliothek der alten Literatur und Kunst* (Göttingen, 1786, 2<sup>te</sup> Stück, p. 61) contains an instructive Dissertation by Geyssler, *Ueber die Argonautika*, a summary of the various authorities respecting this expedition.

Théséus, Telamón and Péleus, Kastór and Pollux, Idas and Lynkeus—Zétés and Kalás, the winged sons of Boreas—Meleager, Amphiaraus, Kêpheus, Laertés, Autolykus, Menœtius, Aktor, Ergion, Euphémus, Ankaus, Pécas, Periktymenus, Augéas, Eurytus, Admêtus, Akastus, Kræneus, Euryalus, Péneleôs and Lætus, Askalaphus and Ialmenus, were among them. Argus the son of Phryxus, directed by the promptings of Athênâ, built the ship, inserting in the prow a piece of timber from the celebrated oak of Dodona, which was endued with the faculty of speech<sup>1</sup>: Tiphys was the steersman, Idmôn the son of Apollo and Mopsus accompanied them as prophets, while Orpheus came to amuse their weariness and reconcile their quarrels with his harp<sup>2</sup>.

<sup>2</sup> Apollônios Rhodios, Apollodôros, Valerius Flaccus, the Orphic Argonautica, and Hyginus, have all given Catalogues of the Argonautic heroes; there was one also in the lost tragedy called *Aijonai* of Sophoklês, see Wefeler, *Gœ. Trag.* i. 327; the discrepancies among them are numerous and irreconcilable. Büchmann, in the *Catalogus Argonautarum*, prefixed to his edition of Valerius Flaccus, has discussed them copiously. I transcribe one or two of the remarks of this commentator and laborious critic, not of course of a similar tenor, on the impracticability of a fabulous chronology. Immediately before the first article, *Arastus*—“*Neque enim in statibus Argonautarum idem rationem temporum consisti, neque in stirpe et stemmate deducendâ ordinem ipsius nature congruere videbam. First they touched at the island of Lemnos, in which at that time there were no men; for the women, infuriated by jealousy and ill-treatment, had put to death their fathers, husbands and brothers. The Argonauts, after some difficulty, were received with friendship, and even admitted into the greatest intimacy. They staid some months, and the subsequent population of the island was the fruit of their visit. Hypsipylê, the queen of the island, bore to Jason two sons<sup>1</sup>. Lemnos.

They then proceeded onward along the coast of Thrace, up the Hellespont, to the southern coast of the Propontis, inhabited by the Doliones and their king Kyzikus. Here they were kindly entertained, but after their departure were driven back to the same spot by a storm; and as they landed in the

We may stand excused for keeping close of a chronology which is fertile only in difficulties, and ends in nothing but illusions.

dark, the inhabitants did not know them. A battle took place, in which the chief, Kyzikos, was killed by Jason; whereby much grief was occasioned as soon as the real facts became known. After Kyzikos had been interred with every demonstration of mourning and solemnity, the Argonauts proceeded along the coast of Mysia<sup>1</sup>. In this part of the voyage they left Hēraklēs behind. For Hylas, his favourite youthful companion, had been stolen away by the nymphs of a fountain, and Hēraklēs, wandering about in search of him, neglected to return. At last he sorrowfully retired, exacting hostages from the inhabitants of the neighbouring town of Kios that they would persist in the search<sup>2</sup>.

They next stopped in the country of the Bebry-

<sup>1</sup> Apollon. Rhod. 940-1020; Apollonid. i. 9, 18.

<sup>2</sup> Apollonid. i. 9, 19. This was the religious legend, explanatory of a ceremony performed for many centuries by the people of Prusa: they can vividly see the lake Atkambis shouting and clamouring for Hylas—"ut litus Hyla, Hyla omne sonaret." There is endless discrepancy as to the concern of Hēraklēs with the Argonautic expedition. A story is alluded to in Aristotle (*Politie*. iii. 9) that the ship *Argo* herself refused to take him on board, because he was so much superior in stature and power to all the other heroes—*ὁ γὰρ ἰσθμὸς αἴτιον ἦεν τῆς Ἀργεῖς παρὰ τοῦ ἑαλεῖν, ὅτι ὑπερβέλλοντα πλεῖν τοῦ ἀνθρώπου*. This was the story of Pherekydēs (*Fr.* 67, Diels) as well as of Antimachus (Schol. Apoll. Rhod. i. 1209): it is probably a very ancient portion of the legend, inasmuch as it ascribes to the ship sentient powers, in consonance with her other miraculous properties. The etymology of *Aplurta* in Thessaly was connected with the tale of Hēraklēs having there been put on shore from the *Argo* (Herodot. vii. 193): Ephorus said that he staid away voluntarily from *funeribus* for *Omphakē* (Prag. 9, Diels). The old epic poet Kinasethēs said that Hēraklēs had placed the Kios hostages at Trachin, and that the Kians ever afterwards maintained a respectful correspondence with that place (Schol. Ap. Rh. i. 1357). This is the explanatory legend connected with some existing custom, which we are unable further to unravel.

kians, where the boxing contest took place between the king Amykus and the Argonaut Pollux<sup>1</sup>: they then proceeded onward to Bithynia, the residence of the blind prophet Phineus. His blindness had been inflicted by Poseidôn as a punishment for having communicated to Phryxus the way to Kolchis. The choice had been allowed to him between death and blindness, and he had preferred the latter<sup>2</sup>. He was also tormented by the harpies, winged monsters who came down from the clouds whenever his table was set, snatched the food from his lips and imparted to it a foul and unapproachable odour. In the midst of this misery, he hailed the Argonauts as his deliverers—his prophetic powers having enabled him to foresee their coming. The meal being prepared for him, the harpies approached as usual, but Zêtês and Kalais, the winged sons of Boreas, drove them away and pursued them. They put forth all their speed, and prayed to Zeus to be enabled to overtake the monsters; when Hermês appeared and directed them to desist, the harpies being forbidden further to molest Phineus<sup>3</sup>, and retiring again to their native cavern in Krête<sup>4</sup>.

<sup>1</sup> See above, chap. xii. p. 231.

<sup>2</sup> Such was the old narrative of the Hesiodic Catalogue and Pindar. See Schol. Apollôn. Rhod. ii. 191-206.

<sup>3</sup> This again was the old Hesiodic story (Schol. Apoll. Rhod. ii. 206).

<sup>4</sup> *Ἐρεβ' αὖτ' ἐν γροθὶ Αἰγυπιοῦ σπηλαίου.*

Apollodorus (i. 9, 21), Apollonius (178-200), and Valerius Flacc. (iv. 628-536) agree in most of the circumstances.

<sup>5</sup> Such was the fate of the harpies as given in the old Naxosian Version. (See Frazer, *Ep. Græc. Hunter, Naxosk.* iv. 2, p. 61.)

The adventure of the Argonauts with Phineus is given by Pindar as a manner totally different (Diad. iv. 44) (he seems to follow Dionysius of Mitylène (see Schol. Apollôn. Rhod. ii. 207)).

Danger of  
the Sym-  
plégades.

Phineus, grateful for the relief afforded to him by the Argonauts, forewarned them of the dangers of their voyage and of the precautions necessary for their safety; and through his suggestions they were enabled to pass through the terrific rocks called Symplégades. These were two rocks which alternately opened and shut, with a swift and violent collision, so that it was difficult even for a bird to fly through during the short interval. When the *Argô* arrived at the dangerous spot, Euphémus let loose a dove, which flew through and just escaped with the loss of a few feathers of her tail. This was a signal to the Argonauts, according to the prediction of Phineus, that they might attempt the passage with confidence. Accordingly they rowed with all their might, and passed safely through: the closing rocks, held for a moment asunder by the powerful arms of Athênê, just crushed the ornaments at the stern of their vessel. It had been decreed by the gods, that so soon as any ship once got through, the passage should for ever afterwards be safe and easy to all. The rocks became fixed in their separate places, and never again closed<sup>1</sup>.

After again halting on the coast of the Maryandinians, where their steersman Tiphys died, as well as in the country of the Amazons, and after picking up the sons of Phryxus, who had been cast away by Poseidôn in their attempt to return from Kolchis to Greece, they arrived in safety at the river Phasis and the residence of Ætêa. In passing by Mount Caucasus, they saw the eagle which

gnawed the liver of Prométhéus nailed to the rock, and heard the groans of the sufferer himself. The sons of Phryxus were cordially welcomed by their mother Chalkiôpê<sup>1</sup>. Application was made to Æëtês, that he would grant to the Argonauts, heroes of divine parentage and sent forth by the mandate of the gods, possession of the golden fleece: their aid in return was proffered to him against any or all of his enemies. But the king was wrath, and peremptorily refused, except upon conditions which seemed impracticable<sup>2</sup>. Hôphæstos had given him two ferocious and untameable bulls, with brazen feet, which breathed fire from their nostrils: Jasôn was invited, as a proof both of his illustrious descent and of the sanction of the gods to his voyage, to harness these animals to the yoke, so as to plough a large field and sow it with dragon's teeth<sup>3</sup>. Perilous as the condition was, each one of the heroes volunteered to make the attempt. Idmôn especially encouraged Jasôn to undertake it<sup>4</sup>, and the goddesses Hêrê and Aphroditê made straight the way for him<sup>5</sup>. Médea, the daughter of Æëtês and Endyia, having seen the youthful hero in his interview with her father, had conceived towards him a passion which disposed her to employ every means for his salvation and success. She had received from Hekâtê pre-eminent magical powers, and she

prepared for Jâsôn the powerful Prometheian unguent, extracted from a herb which had grown where the blood of Promêthens dropped. The body of Jâsôn having been thus pre-medicated, became invulnerable<sup>1</sup> either by fire or by warlike weapons. He undertook the enterprise, yoked the bulls without suffering injury, and ploughed the field: when he had sown the dragon's teeth, armed men sprung out of the furrows. But he had been forewarned by Mèdeia to cast a vast rock into the midst of them, upon which they began to fight with each other, so that he was easily enabled to subdue them all<sup>2</sup>.

He designed to murder them during the night after a festal banquet; but *Aphroditê*, watchful for the safety of Jâsôn<sup>3</sup>, inspired the Kolchian king at the critical moment with an irresistible inclination for his nuptial bed. While he slept, the wise *Idmôn* counselled the Argonauts to make their escape, and Mèdeia agreed to accompany them<sup>4</sup>. desired prize on board the vessel, and accompanied Jason with his companions in their flight, carrying along with her the young Apsyrtus, her brother<sup>1</sup>.

Ætës, profoundly exasperated at the flight of the Argonauts with his daughter, assembled his forces forthwith, and put to sea in pursuit of them. So energetic were his efforts that he shortly overlooked the retreating vessel, when the Argonauts again owed their safety to the stratagem of Mædea. She killed her brother Apsyrtus, cut his body in pieces and strewed the limbs round about in the sea. Ætës on reaching the spot found these sorrowful traces of his murdered son; but while he tarried to collect the scattered fragments, and bestow upon the body an honourable interment, the Argonauts escaped<sup>2</sup>. The spot on which the unfortunate Apsyrtus was cut up received the name of Tomi<sup>3</sup>.

Pherekydës said that Jason killed the dragon (Fr. 74, Did.).

<sup>2</sup> This is the story of Apollodôr (l. 9, 24), who seems to follow Pherekydës (Fr. 73, Didot). Apollônios (iv. 236–430) and Valerius Flaccus (viii. 262 seq.) give totally different circumstances respecting the death of Apsyrtus; but the narrative of Pherekydës seems the oldest: so retorting a story as that of the cutting up of the little boy cannot have been imagined in later times.

Sophoklês composed two tragedies on the adventures of Jason and Mædea, both lost—the *Kolchides* and the *Lekôn*. In the former he represented the murder of the child Apsyrtus as having taken place in the house of Ætës: in the latter he introduced the mitigating circumstance, that Apsyrtus was the son of Ætës by a different mother from Mædea (Schol. Apollôn. Rhod. iv. 223).

There was however a place called *Apsyrtus*, on the southern coast of the Euxine, west of Tomarus, where the tomb of Apsyrtus was shown, and where it was affirmed that he had been put to death. He was the

This fratricide of Mædea, however, so deeply provoked the indignation of Zeus, that he condemned the Argô and her crew to a trying voyage, full of hardship and privation, before she was permitted to reach home. The returning heroes traversed an immeasurable length both of sea and of river: first up the river Phasis into the ocean which flows round the earth—then following the course of that circumfluous stream until its junction with the Nile<sup>1</sup>, they came down the Nile into Egypt, from whence they carried the Argô on their shoulders by a fatiguing land-journey to the lake Tritônis in Libya. Here they were rescued from the extremity of want and exhaustion by the kindness of the local god Tritôn, who treated them hospitably, and even presented to Euphêmus a clod of earth, as a symbolical promise that his descendants should one day found a city on the Libyan shore. The promise was amply redeemed by the flourishing and powerful city of

eponymous of the town, which was said to have been once called Apyrtus, and only corrupted by a barbarian pronunciation. (Arrian, *Periplus*, Euxin. p. 6; *Geogr. Min.* v. 1.) Compare *Procop.* *Bell. Goth.* iv. 2.

Strabo connects the death of Apyrtus with the Apyrtides, islands off the coast of Libya, in the Adriatic (vi. p. 315).

<sup>1</sup> The original narrative was, that the Argô returned by navigating the circumfluous ocean. This would be almost certain, even without positive testimony, from the early ideas entertained by the Greeks respecting geography; but we know further that it was the representation of the Hesiodic poem, as well as of Mimnermus, Hecataeus and Pindar, and even of Antiochus. Schol. *Parishm. Ap. Rhod.* iv. 254. *Εκείνη δὲ ἡ Μιθράνη δὴ καὶ ὁμοῖον ἀρκαδίον ποταμὸν αἰετὸν εἶναι λέγουσι δὴ καὶ τοὺς Ἰωνεὺς ἀρκαδίαν εἶναι τὴν κατὰ τὴν Ἰσθμὸν. Kyréné<sup>1</sup>, whose princes the Battiaæ boasted themselves as lineal descendants of Euphémus.

Refreshed by the hospitality of Trítôn, the Argonauts found themselves again on the waters of the Mediterranean in their way homeward. But before they arrived at Iôlkos they visited Cîrcé, at the island of Ææn, where Mædea was purified for the murder of Apsyrtos: they also stopped at Korkyra, then called Drepanô, where Alkinous received and protected them. The cave in that island where the marriage of Mædea with Jasn was consummated, was still shown in the time of the historian Timæus, as well as the altars to Apollo which she had erected, and the rites and sacrifices which she had first instituted<sup>2</sup>. After leaving Korkyra, the Argô was overtaken by a perilous storm near the island of Théra. The heroes were saved from imminent peril by the supernatural aid of Apollo, who, shooting from his golden bow an arrow which pierced the waves like a track of light, caused a new island suddenly to spring up in their track and present to them a port of refuge. The island was called Anaphê; and the grateful Argonauts established upon it an altar and

sacrifices in honour of Apollo Æglètēs, which were ever afterwards continued, and traced back by the inhabitants to this originating adventure<sup>1</sup>.

On approaching the coast of Krète, the Argonauts were prevented from landing by Talôs, a man of brass, fabricated by Hêphæstos, and presented by him to Minôs for the protection of the island<sup>2</sup>. This vigilant sentinel hurled against the approaching vessel fragments of rock, and menaced the heroes with destruction. But Mêdea deceived him by a stratagem and killed him; detecting and assailing the one vulnerable point in his body. The Argonauts were thus enabled to land and refresh themselves. They next proceeded onward to Ægina, where however they again experienced resistance before they could obtain water—then along the coast of Eubœa and Lokris back to Iôlkos in the gulf of Pagasæ, the place from whence they had started. The proceedings of Pelias during their absence, and the signal revenge taken upon him by Mêdea after their return, have already been narrated in a preceding section<sup>3</sup>. The ship Argô herself, in which the chosen heroes of Greece had performed so long a voyage and braved so many dangers, was consecrated by Jasôn to Poseidôn at the isthmus of Corinth. According to another account, she was translated to the stars by Athênê, and became a constellation<sup>4</sup>.

found not only in the regions which lay between Iolkos and Kolchis, but also in the western portion of the Grecian world—distributed more or less over all the spots visited by Grecian mariners or settled by Grecian colonists, and scarcely less numerous than the wanderings of the dispersed Greeks and Trojans after the capture of Troy. The number of Jasonia, or temples for the heroic worship of Jason, was very great, from Abdêra in Thrace<sup>1</sup>, eastward along the coast of the Euxine, to Armenia and Media. The Argonauts had left their anchoring-stone on the coast of Bebrykia, near Kyzikus, and there it was preserved during the historical ages in the temple of the Jasonian Athênê<sup>2</sup>. They had founded the great temple of the Idean mother on the mountain Dindymon, near Kyzikus, and the Hieron of Zeus Urios on the Asiatic point at the mouth of the Euxine, near which was also the harbour of Phryxus<sup>3</sup>. Idmôn, the prophet of the expedition, who was believed to have died of a wound by a wild boar on the Maryandinian coast, was worshiped by the inhabitants of the Pontic Hêrakleia with great solemnity, as their Heros Poliuchus, and that too by

There was in Kyzikus a temple of Apollo under different *εραλόμενοι*; some called it the temple of the Jasonian Apollo.

Another anchor however was preserved in the temple of Rhon on the banks of the Phleas, which was assigned to be the anchor of the ship Argô. Arrian saw it there, but seems to have doubted its authenticity (Periplus, Euxin. Pont. p. 9. Geogr. Min. v. 1).

the special direction of the Delphian god. Autolykos, another companion of Jasôn, was worshiped as *Ækist* by the inhabitants of Sinopé. Moreover, the historians of Hérakleia pointed out a temple of Hekaté in the neighbouring country of Paphlagonia, first erected by Mèdeia<sup>1</sup>; and the important town of Pantikapæon, on the European side of the Cimmerian Bosphorus, ascribed its first settlement to a son of *Æétès*<sup>2</sup>. When the returning ten thousand Greeks sailed along the coast, called the Jasonian shore, from Sinopé to Hérakleia, they were told that the grandson of *Æétès* was reigning king of the territory at the mouth of the Phasis, and the anchoring-places where the *Argô* had stopped were specially pointed out to them<sup>3</sup>. In the lofty regions of the Moschi, near Kolchis, stood the temple of Leukothea, founded by Phryxus, which remained both rich and respected down to the times of the kings of Pontus, and where it was an inviolable rule not to offer up a ram<sup>4</sup>. The town of Dioskuriás, north of the river Phasis, was believed to have been hallowed by the presence of Kastôr and Pollux in the *Argô*, and to have received from them its appellation<sup>5</sup>. Even the interior of Media and Armenia was full of memorials of Jasôn and Mèdeia, and their son Médus, or of Armenus the son of Jasôn, from whom the Greeks deduced not only the name and

The Thessalian comparisons of Alexander the Great, placed by his victories in possession of rich acquisitions in these regions, pleased themselves by vivifying and multiplying all these old fables, proving an ancient kindred between the Medes and Thessalians. Argonautic  
legend  
generally.

Such is a brief outline of the Argonautic expedition, one of the most celebrated and widely-diffused among the ancient tales of Greece. Since so many able men have treated it as an undisputed reality, and even made it the pivot of systematic chronological calculations, I may here repeat the opinion long ago expressed by Heyne, and even indicated by Burmann, that the process of dissecting the story in search of a basis of fact, is one altogether fruitless<sup>2</sup>. Not only are we unable to

The Persian antiquarians whom Herodotus cites at the beginning of his history (i. 2-4)—it is much to be regretted that Herodotus did not inform us who they were, and whether they were the same as those who said that Persus was an Assyrian by birth, and had become a Greek, vi. 54), joined together the abductions of Iô and of Europa, of Miden and of Helen, as pairs of connected proceedings, the second injury being a retaliation for the first,—they draw up a debtor and creditor account of abductions between Asia and Europe. The Kitchian king (they said) had sent a herald to Greece to ask for his satisfaction for the wrong done to him by Jason and to re-demand his daughter Miden; but he was told in reply that the Greeks had received no satisfaction for the previous rape of Iô.

There was some ingenuity in thus binding together the old fables, so as to represent the invasions of Greece by Darius and Xerxes as retaliation for the unavenged destruction wrought by Agamemnon.

assign the date, or identify the crew, or decipher the log-book, of the *Argô*, but we have no means of settling even the preliminary question, whether the voyage be matter of fact badly reported, or legend from the beginning. The widely-distant spots in which the monuments of the voyage were shown, no less than the incidents of the voyage itself, suggest no other parentage than epical fancy. The supernatural and the romantic not only constitute an inseparable portion of the narrative, but even embrace all the prominent and characteristic features; if they do not comprise the whole, and if there be intermingled along with them any sprinkling of historical or geographical fact,—a question to us indeterminable,—there is at least no solvent by which it can be disengaged, and no test by which it can be recognised. Wherever the Grecian mariner sailed, he carried his religious and patriotic mythes along with him. His fancy and his faith were alike full of the long wanderings of *Jasôn*, *Odysseus*, *Perseus*, *Héraklès*, *Dionysus*, *Triptolemus* or *Ió*; it was pleasing to him in success, and consoling to him in difficulty, to believe that their journeys had brought them over the ground which he was himself traversing. There was no tale amidst the wide range of the Grecian epic more calculated to be popular with the seaman, than the history of the primeval ship *Argô* and her distinguished crew, comprising heroes from all parts of Greece, and especially the *Tyndarids Kastôr* and *Pollux*, the heavenly protectors invoked during storm and peril. He localised the legend anew wherever he went, often with some fresh circum-

stances suggested either by his own adventures or by the scene before him. He took a sort of religious possession of the spot, connecting it by a bond of faith with his native land, and erecting in it a temple or an altar with appropriate commemorative solemnities. The Jasonium thus established, and indeed every visible object called after the name of the hero, not only served to keep alive the legend of the Argô in the minds of future comers or inhabitants, but was accepted as an obvious and satisfactory proof that this marvellous vessel had actually touched there in her voyage.

The epic poets, building both on the general love of fabulous incident and on the easy faith of the people, dealt with distant and unknown space in the same manner as with past and unrecorded time. They created a mythical geography for the former, and a mythical history for the latter. But there was this material difference between the two: that while the unrecorded time was beyond the reach of verification, the unknown space gradually became trodden and examined. In proportion as authentic local knowledge was enlarged, it became necessary to modify the geography, or shift the scene of action, of the old mythes; and this perplexing problem was undertaken by some of the ablest historians and geographers of antiquity,—for it was painful to them to abandon any portion of the old epic, as if it were destitute of an ascertainable basis of truth.

Many of these fabulous localities are to be found in Homer and Hesiod, and the other Greek poets and logographers,—Erytheia, the garden of the

These are places which (to use the expression of Pindar respecting the Hyperboreans) you cannot approach either by sea or by land<sup>4</sup>: the wings of the poet alone can carry you thither. They were not introduced into the Greek mind by incorrect geographical reports, but, on the contrary, had their origin in the legend, and passed from thence into the realities of geography<sup>5</sup>.

Hesiod, and the old epic poem called the *Ephigmen*, both mentioned the Hyperboreans (*Hesiod.* iv. 32-34).

<sup>5</sup> This idea is well stated and sustained by Vaucler (*Mythologie* *Geographie der Griechen* and *Romer*, *cap.* i. p. 11), and by Niebuhr in his *Comments on the Odyssey*—*Introduct.* *Remarks* to b. ix. p. xii.—xxiii. The twelfth and thirteenth chapters of the *History of Orchomenus*, by O. Müller, are also full of good remarks on the geography of the Argonautic voyage (pp. 274-299).

The most striking evidence of this disposition of the Greeks is to be found in the legendary discoveries of Alexander and his companions, when they marched over the untravellered regions in the east of the Persian empire (see *Arian*, *Hist.* iii. c. 31; compare *Lucian*, *Dialog.* *Martius*, c. xv. *ed.* i. p. 312, Trüb.), because these places were then untraced at a time when geographical science was sufficiently advanced to conceive and embrace them. The early settlers in Italy, Sicily, and the

which they contributed much to pervert and confuse. For the navigator or emigrant, starting with an unsuspicious faith in their real existence, looked out for them in his distant voyages, and constantly fancied that he had seen or heard of them, so as to be able to identify their exact situation. The most contradictory accounts indeed, as might be expected, were often given respecting the latitude and longitude of such fanciful spots, but this did not put an end to the general belief in their real existence.

In the present advanced state of geographical knowledge, the story of that man who after reading Gulliver's Travels went to look in his map for Lilliput, appears an absurdity. But those who fixed the exact locality of the floating island of *Æolus* or the rocks of the Sirens did much the same<sup>1</sup>; and, with their ignorance of geography and imperfect appreciation of historical evidence, the error was hardly to be avoided. The ancient belief which fixed the Sirens on the islands of *Sirenusæ* off the coast of Naples—the *Kyklopæ*, *Erytheia*, and the *Læstrygonæ* in Sicily—the *Lotophagi* on the island of *Mêninx*<sup>2</sup> near the Lesser Syrtis—the *Phæakians* at *Korkyra*—and the goddess *Circê* at the promontory of *Circeium*—took its rise at a time when

Europe indulged their fanciful vision without the fear of any such monitor; there was no such thing as a map before the days of Anaximander, the disciple of Thales.

these regions were first Hellenised and comparatively little visited. Once embodied in the local legends, and attested by visible monuments and ceremonies, it continued for a long time unassailed; and Thucydides seems to adopt it, in reference to Korkyra and Sicily before the Hellenic colonization, as matter of fact generally unquestionable<sup>1</sup>, though little avouched as to details. But when geographical knowledge became extended, and the criticism upon the ancient epic was more or less systematised by the literary men of Alexandria and Pergamus, it appeared to many of them impossible that Odysseus could have seen so many wonders, or undergone such monstrous dangers, within limits so narrow, and in the familiar track between the Nile and the Tiber. The scene of his weather-driven course was then shifted further westward. Many convincing evidences were discovered, especially by Asklepiadēs of Myrlea, of his having visited various places in Iberia<sup>2</sup>: several critics

These local legends appear in the eyes of Strabo convincing evidence (i. p. 23-26).—the tomb of the dead Parthenopé at Naples, the stories of Cumæ and Diomedes about the entrance of Averna, and the existence of places named after Bains and Minerva, the companions of Odysseus, &c.

Οὐ γὰρ μόνον αὐτὰ κατὰ τὴν Ἰταλίαν καὶ Σικελίαν τόποι καὶ ἄλλα τινὲς τῶν παλαιῶν σημείων περιγράφονται, ἀλλὰ καὶ ἐν τῇ Ἰβηρίᾳ Ὀδυσσεὺς πολλὰ δείκνυσθαι, καὶ Ἀθηναίᾳ ἱερὰν, καὶ ἄλλα μύθῳ ἔχον τῆς ἐκείνου πλάνης, καὶ ἄλλων τῶν ἐκ τοῦ Τρωϊκοῦ πολέμου περιγεγραμμένων (I adopt Giesebrecht's correction of the text from *γεγραμμένων* to *περιγεγραμμένων*, in the note to his German translation of Strabo).

Asklepiadēs (of Myrlea in Bithynia, about 170 B.C.) visited some time in Tarragona, the south-western region of Spain along the Guadaluquivir, as a teacher of Greek literature (*καταδίδασκεν τὸ γρηγομαστικόν*), and composed a periegesis of the Iberian tribes, which unfortunately has not been preserved. He made various discoveries in archaeology.

imagined that he had wandered about in the Atlantic Ocean outside of the Strait of Gibraltar<sup>1</sup>, and they recognised a section of Lotophagi on the coast of Mauritania, over and above those who dwelt on the island of Mêninx<sup>2</sup>. On the other hand, Eratosthenés and Apollodôrus treated the places visited by Odysseus as altogether unreal,

and successfully connecting his old legends with several portions of the territory before him. His discoveries were.—1. In the temple of Athênê, at this Iberian town of Odyssêia, there were shields and benches of ships affixed to the walls, monuments of the visit of Odysseus himself. 2. Among the Kallêhi, in the northern part of Portugal, several of the companions of Teukros had settled and left descendants: there were in that region two Grecian cities, one called Hellenê, the other called Amphilochei; for Amphilocheus also, the son of Amphimerus, had died in Iberia, and many of his soldiers had taken up their permanent residence in the interior. 3. Many new inhabitants had come into Iberia with the expedition of Hêraklês; some also after the conquest of Messênê by the Lacedæmonians. 4. In Cantabria, on the north coast of Spain, there was a town and region of Lacedæmoniæ colonists. 5. In the same portion of the country there was the town of Opikella, founded by Opikellus, one of the companions of Antenor in his emigration from Troy (Strabo, iii. p. 157).

This is a specimen of the manner in which the seeds of Grecian myths came to be distributed over so large a surface. To an ordinary Greek reader, these legendary discoveries of Asklepiadês would probably be more interesting than the positive facts which he communicated respecting the Iberian tribes; and his Turditanian visitors would be delighted to hear—while he was reciting and explaining to them the animated passage of the Iliad, in which Agamemnôn extols the inestimable value of the bow of Teukros (viii. 281)—that the heroic archer and his companions had actually set foot in the Iberian peninsula.

<sup>1</sup> This was the opinion of Kratês of Mallus, one of the most distinguished of the critics on Homer: it was the subject of an animated controversy between him and Aristarchus (Aulus Gellius, N. A. xiv. 6; Strabo, iii. p. 157). See the instructive treatise of Lehrs, De Aristarchi Studiis, c. v. § 4. p. 251. Much controversy also took place among the critics respecting the ground which Menelaus went over in his wanderings (Odys. iv.). Kratês affirmed that he had circumnavigated the southern extremity of Africa and gone to India: the critic Aristonikûs, Strabo's contemporary, enumerated all the different opinions (Strabo, i. p. 38).

for which scepticism they incurred much reproach<sup>1</sup>.

The fabulous island of Erytheia,—the residence of the three-headed Geryôn with his magnificent herd of oxen, under the custody of the two-headed dog Orthrus, described by Hesiod, like the garden of the Hesperides, an extra-terrestrial, on the farther side of the circumfluous ocean,—this island was supposed, by the interpreters of Stesichorus the poet, to be named by him off the south-western region of Spain called Tartêssus; and in the immediate vicinity of Gadês. But the historian Hekataeus, in his anxiety to historicise the old fable, took upon himself to remove Erytheia from Spain nearer home to Epirus. He thought it incredible that Hēraklēs should have traversed Europe from east to west, for the purpose of bringing the cattle of Geryôn to Eurystheus at Mykênæ, and he pronounced Geryôn to have been a king of Epirus, near the Gulf of Ambrakia. The oxen reared in that neighbourhood were proverbially magnificent, and to get them even from thence and bring them to Mykênæ (he contended) was no inconsiderable task. Arrian, who cites this passage from Hekataeus, concurs in the same view,—an illustration of the licence with which ancient authors fitted on their fabulous geographical names to the real earth, and brought down the ethereal matter of legend to the lower atmosphere of history<sup>2</sup>.

Both the track and the terminus of the Argonautic voyage appear in the most ancient epic as little within the conditions of reality, as the speaking timbers or the semi-divine crew of the vessel. In the *Odyssey*, *Ætês* and *Circê* (Hesiod names *Mêdea* also) are brother and sister, offspring of *Hêlios*. The *Æcan* island, adjoining the circumfluous ocean, "where the house and dancing-ground of *Eôs* are situated, and where *Hêlios* rises," is both the residence of *Circê* and of *Ætês*, inasmuch as *Odysseus*, in returning from the former, follows the same course as the *Argô* had previously taken in returning from the latter<sup>1</sup>. Even in the conception of *Minnermus*, about 600 B.C., *Æa* still retained its fabulous attributes in conjunction with the ocean and *Hêlios*, without having been yet identified with any known portion of the solid earth<sup>2</sup>; and it was

*Eustathius* there erred. He seems to have adhered to the old fable, placing *Erythra* on the opposite side of the ocean-stream, for *Hêraklês* crosses the ocean to get to it.

justly remarked by Dēmétrius of Skēpsis in antiquity<sup>1</sup> (though Strabo vainly tries to refute him), that neither Homer nor Mimnermus designates Kolchis either as the residence of Ætēs, or as the terminus of the Argonautic voyage. Hesiod carried the returning Argonauts through the river Phasis into the ocean. But some of the poems ascribed to Eumēlus were the first which mentioned Ætēs and Kolchis, and interwove both of them into the Corinthian mythical genealogy<sup>2</sup>. These poems seem to have been composed subsequent to the foundation of Sinopē, and to the commencement of Grecian settlement on the Borysthenēs, between the years 600 and 500 a.c. The Greek mariners who explored and colonised the southern coast of the Euxine, found at the extremity of their voyage the river Phasis and its barbarous inhabitants: it was the easternmost point which Grecian navigation (previous to the time of Alexander the Great) ever attained, and it was within sight of the impassable

barrier of Caucasus<sup>1</sup>. They believed, not unnaturally, that they had here found "the house of Eôs (the morning) and the rising-place of the sun," and that the river Phasis, if they could follow it to its unknown beginning, would conduct them to the circumfluous ocean. They gave to the spot the name of *Æa*, and the fabulous and real title gradually became associated together into one compound appellation,—the Kolchian *Æa*, or *Æa* of Kolchis<sup>2</sup>. While Kolchis was thus entered on the map as a fit representative for the Homeric "house of the morning," the narrow strait of the Thracian Bosphorus attracted to itself the poetical fancy of the Symplégades, or colliding rocks, through which the heaven-protected *Argo* had been the first to pass. The powerful Greek cities of Kyzikus, Hérakleia and Sinopé, each fertile in local legends, still farther contributed to give this direction to the voyage; so that in the time of Hekataeus it had become the established belief that the *Argo* had started from Iolkos and gone to Kolchis.

In this way the Ææan island—the residence of Circe, and the extreme point of the wanderings of Odysseus, from whence he passes only to the ocean and into Hadēs—came to be placed in the far west, while the Æa of Ætēs was in the far east—not unlike our East and West Indies. The Homeric brother and sister were separated and sent to opposite extremities of the Grecian terrestrial horizon<sup>1</sup>.

The track from Iolkos to Kolchis, however, though plausible as far as it went, did not realise all the conditions of the genuine fabulous voyage: it did not explain the evidences of the visit of these

and Hesiod, but he tries to prove—unsuccessfully, in my judgment—that Homer places Ætēs in the east, while Circe is in the west, and that Homer refers the Argonautic voyage to the Euxine Sea.

<sup>1</sup> Strabo (or Polybius, whom he has just been citing) contends that Homer knew the existence of Ætēs in Kolchis, and of Circe at Circeum, as historical persons, as well as the voyage of Jason to Æa as an historical fact. Upon this he (Homer) built a superstructure of fiction (*εὐνομήνηται*): he invented the leatherhead between them, and he placed both the one and the other in the exterior ocean (*πρυγαστρὴν τὴν ἑλάναν τῆς αἰῶνος ἀπηνειώμενης*, vol. *ἑξωνήσμιου* διόπτου, l. p. 29); perhaps also Jason might have wandered as far as Italy, as evidences (*σημεία τεύχεα*) are shown that he did (ib.).

But the idea that Homer considered Ætēs in the extreme east and Circe in the extreme west, is not reconcilable with the Odyssey. The supposition of Strabo is alike violent and unsatisfactory.

Circe was worshipped as a goddess at Circeii (Cicero, Nat. Deor. iii. 19). Hesiod, in the Theogony, represents the two sons of Circe by Odysseus as reigning over all the warlike Tyrrhenians (Theog. 1012), an undoubted western sovereignty. The great Mætilian gens of Tusculum traced their descent to Odysseus and Circe (Pliny, Hist. n. 45).

maritime heroes which were to be found in Libya, in Krète, in Anaphè, in Korkyra, in the Adriatic Gulf, in Italy and in Æthalia. It became necessary to devise another route for them in their return, and the Hesiodic narrative was (as I have before observed), that they came back by the circumfluous ocean; first going up the river Phasis into the circumfluous ocean; then following that deep and gentle stream until they entered the Nile, and came down its course to the coast of Libya. This seems also to have been the belief of Hekataeus<sup>1</sup>. But presently several Greeks (and Herodotus among them) began to discard the idea of a circumfluous ocean-stream, which had pervaded their old geographical and astronomical fables, and which explained the supposed easy communication between one extremity of the earth and another. Another idea was then started for the returning voyage of the Argonauts. It was supposed that the river Ister, or Danube, flowing from the Rhipæan mountains in the north-west of Europe, divided itself

<sup>1</sup> See above, p. 326. There is an opinion cited from Hekataeus in Schol. Apoll. Rhod. iv. 284, contrary to this, which is given by the same scholiast on iv. 259. But, in spite of the remarks of Klamen (ad Fragment. Hekataei, 187. p. 98), I think that the Schol. ad iv. 284 has made a mistake in citing Hekataeus; the more so, as the scholiast, as printed from the Codex Parisinus, gives the same opinion without mentioning Hekataeus. According to the old Homeric idea, the ocean-stream flowed all round the earth, and was the source of all the principal rivers which flowed into the great internal sea, or Mediterranean (see Hekataeus, Fr. 349; Klamen, ap. Arrian. ii. 16, where he speaks of the Mediterranean as the *μεγάλη θάλασσα*). Retaining this old idea of the ocean-stream, Hekataeus would naturally believe that the Phasis joined it: nor can I agree with Klamen (ad Fr. 187) that this implies a degree of ignorance too gross to impute to him.

into two branches, one of which fell into the Euxine Sea, and the other into the Adriatic.

The Argonauts, fleeing from the pursuit of *Ætès*, had been obliged to abandon their regular course homeward, and had gone from the Euxine Sea up the Ister; then passing down the other branch of that river, they had entered into the Adriatic; the Kolchian pursuers following them. Such is the story given by *Apollonius Rhodius* from *Timagetus*, and accepted even by so able a geographer as *Eratosthenes*—who preceded him by one generation, and who, though sceptical in regard to the localities visited by *Odysseus*, seems to have been a firm believer in the reality of the Argonautic voyage<sup>1</sup>. Other historians again, among whom was *Timæus*, though they considered the ocean as an outer sea, and no longer admitted the existence of the old Homeric ocean-stream, yet imagined a story for the return-voyage of the Argonauts somewhat resembling the old tale of *Hesiod* and *Hekataeus*. They alleged that the *Argô*, after entering into the *Palus Mæotis*, had followed the upward course of the river *Tanais*; that she had then been carried overland and launched in a river which had its mouth in the

*Aristotle* believed in the forked course of the Ister, with one embouchure in the Euxine and another in the Adriatic: he notices certain fishes called *επιχρυσ*, who entered the river (like the Argonauts) from the Euxine, went up it as far as the point of bifurcation and descended into the Adriatic (*Histor. Animal.* viii. 15). *Compère Ulert, Géographie der Griechen*, and *Rümen*, vol. iii. p. 145-147, about the supposed course of the Ister.

ocean or great outer sea. When in the ocean, she had coasted along the north and west of Europe until she reached Gades and the Strait of Gibraltar, where she entered into the Mediterranean, and there visited the many places specified in the fable. Of this long voyage, in the outer sea to the north and west of Europe, many traces were affirmed to exist along the coast of the ocean<sup>1</sup>. There was again a third version, according to which the Argonauts came back as they went, through the Thracian Bosphorus and the Hellespont. In this way geographical plausibility was indeed maintained, but a large portion of the fabulous matter was thrown overboard<sup>2</sup>.

Such were the various attempts made to reconcile the Argonautic legend with enlarged geographical knowledge and improved historical criticism. The problem remained unsolved, but the faith in the legend did not the less continue. It was a faith originally generated at a time when the unassisted narrative of the inspired poet sufficed for the conviction of his hearers; it consecrated one among the capital exploits of that heroic and super-human race, whom the Greek was accustomed at once to

<sup>2</sup> *Diodor.* iv. 49. This was the tale both of *Sophoklès* and of *Kallimachus* (*Schol. Apoll. Rhod.* iv. 244).

See the *Dissertation* of *Ukert*, *Beilage* iv. vol. i. part 2. p. 320 of his *Geographie der Griechen und Römer*, which treats of the Argonautic voyage at some length; also *J. H. look back upon as his ancestors and to worship conjointly with his gods: it lay too deep in his mind either to require historical evidence for its support, or to be overthrown by geographical difficulties as they were then appreciated. Supposed traces of the past event, either preserved in the names of places, or embodied in standing religious customs with their explanatory comments, served as sufficient authentication in the eyes of the curious inquirer. And even men trained in a more severe school of criticism contented themselves with eliminating the palpable contradictions and softening down the supernatural and romantic events, so as to produce an Argonautic expedition of their own invention as the true and accredited history. Strabo, though he can neither overlook nor explain the geographical impossibilities of the narrative, supposes himself to have discovered the basis of actual fact, which the original poets had embellished or exaggerated. The golden fleece was typical of the great wealth of Kolchis, arising from gold-dust washed down by the rivers; and the voyage of Jason was in reality an expedition at the head of a considerable army, with which he plundered this wealthy country and made extensive conquests in the interior<sup>4</sup>. Strabo

Continued faith in the voyage—basis of truth determined by Strabo.

<sup>4</sup> Strabo, i. p. 45. He speaks here of the voyage of Phryxus, as well as that of Jason, as having been a military undertaking (*στρατία*): as again, iii. p. 149, he speaks of the military expedition of Olympeus—*τῷ Ὀλυμπίῳ στρατίᾳ*, and *ἡ Ἡρακλέους στρατία* (ib.). Again, xi. p. 498. *Ὁ μύθος, ἀναττόμενος τῇ Ἰάσονος στρατίᾳ προελθόντος μέχρι τοῦ Μηλίου ὅτι δι' ἀνάγκην τῆς Θυμῶος*. Compare also Justin, xli. 2-3; Tacit. Annal. vi. 34.

Strabo cannot speak of the old fables with literal fidelity: he unconsciously transforms them into quasi-historical incidents of his own ima-

has nowhere laid down what he supposes to have been the exact measure and direction of Jasôn's march, but he must have regarded it as very long, since he classes Jasôn with Dionysus and Hêraklês, and emphatically characterises all the three as having traversed wider spaces of ground than any moderns could equal<sup>1</sup>. Such was the compromise which a mind like that of Strabo made with the ancient legends. He shaped or cut them down to the level of his own credence, and in this waste of historical criticism, without any positive evidence, he took to himself the credit of greater penetration than the literal believers, while he escaped the necessity of breaking formally with the bygone heroic world.

giantism. Diodorus gives a narrative of the same kind, with decent substitutes for the fabulous elements (fr. 40-47-56).

<sup>1</sup> Strabo, i. p. 48. The far-extending expeditions undertaken in the eastern regions by Dionysus and Hêraklês were constantly present to the mind of Alexander the Great as subjects of comparison with himself: he imposed upon his followers perilous and trying marches, from anxiety to equal or surpass the alleged exploits of Semiramis, Cyrus, Perseus, and Hêraklês. (Arrian, v. 2, 3; vi. 24, 3; vii. 10, 12. Strabo, iii. p. 171; xv. p. 686; xvii. p. 81.)

## CHAPTER XIV.

## LEGENDS OF THEBES.

THE Bœotians generally, throughout the historical age, though well endowed with bodily strength and courage<sup>1</sup>, are represented as proverbially deficient in intelligence, taste and fancy. But the legendary population of Thêbes; the Kadmeians, are rich in mythical antiquities, divine as well as heroic. Both Dionysus and Hêraklès recognise Thêbes as their natal city. Moreover, the two sieges of Thêbes by Adrastus, even taken apart from Kadmus, Antiopè, Amphiôn and Zethus, &c., are the most prominent and most characteristic exploits, next to the siege of Troy, of that pre-existing race of heroes who lived in the imagination of the historical Hellènes.

Abundant  
legends of  
Thêbes.

It is not Kadmus, but the brothers Amphiôn and Zethus, who are given to us in the *Odyssey* as the first founders of Thêbes and the first builders of its celebrated walls. They are the sons of Zeus by

<sup>1</sup> The eponym Bœotus is son of Poseidôn and Arnê (Euphorion ap. Eustath. ad *Iliad.* ii. 307). It was from Arnê in Thessaly that the Bœotians were said to have come, when they invaded and occupied Bœotia. Euripidès made him son of Poseidôn and Melanippè. Another legend recited Hædus and Heliôn as sons of Poseidôn and Antiopè (Hygin. l. 187-186).

The Talmegran poetess Korinna (the rival of Pindar, whose compositions in the Bœotian dialect are unfortunately lost) appears to have dwelt upon this native Bœotian genealogy: she derived the Ogygian gates of Thêbes from Ogygus, son of Bœotus (Schol. Apollôn. Rhod. iii. 1178), also the fragments of Korinna in Schneider's edition, fr. 2. p. 432.

Antiopê, daughter of Asôpus. The scholiasts who desire to reconcile this tale with the more current account of the foundation of Thêbes by Kadmus, tell us that after the death of Amphion and Zethus, Eurymachus, the warlike king of the Phlegyæ, invaded and ruined the newly-settled town, so that Kadmus on arriving was obliged to re-found it. But Apollodôrus, and seemingly the older logographers before him, placed Kadmus at the top, and inserted the two brothers at a lower point in the series. According to them, Bêlus and Agenôr were the sons of Epaphus (son of the Argeian Iô) by Libya. Agenôr went to Phœnicia and there became king: he had for his offspring Kadmus, Phoenix, Kilix, and a daughter Eurôpa; though in the *Iliad* Eurôpa is called daughter of Phoenix<sup>1</sup>. Zeus fell in love with Eurôpa, and assuming the shape of a bull, carried her across the sea upon his back from Egypt to Krête, where she bore to him Minôs, Rhadamanthus and Sarpêdôn. Two out of the three sons sent out by Agenôr in search of their lost sister, wearied out by a long-protracted as well as fruitless voyage, abandoned the idea of returning home: Kilix settled in Kilikia, and Kadmus in Thrace<sup>2</sup>. Thasus, the brother or nephew of Kad-

<sup>3</sup> Apollodôr, ii. 1, §1 iii. 1, 6. In the Hesiodic poems (cp. Schol. Apoll. *Rhod.* ii. 178), Phoenix was recognised as son of Agenôr. Pherekydês also described both Phoenix and Kadmus as sons of Agenôr (Pherekyd. *Fragm.* 49, Dindorf). Compare Servius *ad Virgil. Aeneid.* i. 338. Pherekydês expressly mentioned Kilix (Apollod. *ib.*). Besides the *Alpharicus* of Strachlorus (see Strachlor, *Fragm.* xv. p. 71, ed. Klein),

mus, who had accompanied them in the voyage, settled and gave name to the island of Thasos.

Both Herodotus and Euripidēs represent Kadmus as an emigrant from Phœnicia, conducting a body of followers in quest of Eurōpa. The account of Apollodōrus describes him as having come originally from Lābya or Egypt to Phœnicia: we may presume that this was also the statement of the earlier logographers Pherekydēs and Hellanikus. Conōn, who historicises and politicises the whole legend, seems to have found two different accounts; one connecting Kadmus with Egypt, another bringing him from Phœnicia. He tries to melt down the two into one, by representing that the Phœnicians, who sent out Kadmus, had acquired great power in Egypt—that the seat of their kingdom was the Egyptian Thēbes—that Kadmus was despatched, under pretence indeed of finding his lost sister, but really on a project of conquest—and that the name Thēbes, which he gave to his new establishment in Bœōtia, was borrowed from Thēbes in Egypt, his ancestral seat<sup>1</sup>.

Kadmus went from Thrace to Delphi to procure information respecting his sister Eurōpa, but the god directed him to take no further trouble about her; he was to follow the guidance of a cow, and to found a city on the spot where the animal should

<sup>1</sup> There were several other ancient poems on the adventures of Eurōpa; one in particular by Euripidēs (Schol. ad *Iliad.* vi. 128), which however can hardly be the same as the *εὐρώπης ἱστορία* alluded to by Pausanias (*loc. cit.* 4). See Wüllerstorff's *Cybele Epica*, p. 57 (Münster 1825).

<sup>2</sup> Conon, *Narrat.* 37. Perhaps the most remarkable thing of all is the tone of unbounded self-confidence with which Conon winds up this mass of unverified suppositions—*οὐκ ἔστιν ἔτι καὶ οὐδὲν ἀπομένει ἀλλὰ τὸ ἀποδοῦναι τὴν ἀλήθειαν*—*οὐδὲν ἔτι καὶ οὐδὲν ἀπομένει ἀλλὰ τὸ ἀποδοῦναι τὴν ἀλήθειαν*.

lie down. The condition was realised on the site of Thêbes. The neighbouring fountain Areia was guarded by a fierce dragon, the offspring of Arès, who destroyed all the persons sent to fetch water. Kadmus killed the dragon, and at the suggestion of Athênê sowed his teeth in the earth<sup>1</sup>: there sprang up at once the armed men called the Sparti, among whom he flung stones, and they immediately began to assault each other until all were slain except five. Arès, indignant at this slaughter, was about to kill Kadmus; but Zeus appeased him, condemning Kadmus to an expiatory servitude of eight years, after which he married Harmonia, the daughter of Arès and Aphroditê—presenting to her the splendid necklace fabricated by the hand of Hêphæstos, which had been given by Zeus to Eurôpa<sup>2</sup>. All the gods came to the Kadmeia, the citadel of Thêbes; to present congratulations and gifts at these nuptials, which seem to have been hardly less celebrated in the mythical world than those of Pêleus and Thetis. The issue of the marriage was one son,

<sup>1</sup> Stesichor. (Fragm. 16; Kleine) ap. Schol. Eurip. *Phœnix*, 680. The place where the heifer had lain down was still shown in the time of Pausanias (ix. 12, 1).

Lysimachus, a lost author who wrote *Thebais*, mentioned Eurôpa as having come with Kadmus to Thêbes; and told the story in many other respects very differently (Schol. Apoll. Rhod. iii. 1179).

<sup>2</sup> Apollodôr. iii. 4, 1-3. Pherekydês gave the account of the necklace, which seems to imply that Kadmus must have found his sister Eurôpa. The narrative here given is from Hellanikûs; that of Pherekydês differed from it in some respects; compare Hellanik. Fragm. 8 and 9, and Pherekyd. Frag. 44. The resemblance of this story with that of Jason and Mêtêr (see above, chap. xiii. p. 321) will strike every one. It is curious to observe how the old logographer Pherekydês explained this analogy in his narrative; he said that Athênê had given half the dragon's teeth to Kadmus and half to Mêtêr (see Schol. Pausan. i. 13).

Polydôrus, and four daughters, Autonôê, Inô, Semelê and Agavê<sup>1</sup>.

From the five who alone survived of the warriors sprung from the dragon's teeth, arose five great families or gentes in Thêbes; the oldest and noblest of its inhabitants, coeval with the foundation of the town. They were called Sparti, and their name seems to have given rise, not only to the fable of the sowing of the teeth, but also to other etymological narratives<sup>2</sup>.

All the four daughters of Kadmus are illustrious in fabulous history. Inô, wife of Athamas, the son of Æolus, has already been included among the legends of the Æolids. Semelê became the mistress of Zeus, and inspired Hêrê with jealousy. Misguided by the malicious suggestions of that goddess, she solicited Zeus to visit her with all the solemnity and terrors which surrounded him when he approached Hêrê herself. The god unwillingly consented, and came in his chariot in the midst of thunder and lightning, under which awful accompaniments the mortal frame of Semelê perished. Zeus, taking from her the child of which she was pregnant, sewed it into his own thigh: after the proper interval the child was brought out and born, and became the great god Dionysus or Bacebus. Hermês took him to Inô and Athamas to receive

their protection. Afterwards, however, Zeus having transformed him into a kid to conceal him from the persecution of Hêrê, the nymphs of the mountain Nysa became his nurses<sup>1</sup>.

2. Autonoe  
and her son  
Aktæon.

Autonoe, the third daughter of Kadmos, married the pastoral hero or god Aristæus, and was mother of Aktæon, a devoted hunter and a favourite companion of the goddess Artemis. She however became displeased with him—either because he looked into a fountain while she was bathing and saw her naked—or according to the legend set forth by the poet Stesichorus, because he loved and courted Semelê—or according to Euripidês, because he presumptuously vaunted himself as her superior in the chase. She transformed him into a stag, so that his own dogs set upon and devoured him. The rock upon which Aktæon used to sleep when fatigued with the chase, and the spring whose transparent waters had too clearly revealed the form of the goddess, were shown to Pausanias near Platæa, on the road to Megara<sup>2</sup>.

<sup>1</sup> Apollodôr. iii. 4, 2-4; Diodôr. iv. 2.

<sup>2</sup> See Apollodôr. iii. 4, 3; Stesichor. Fragm. xv. Kleine; Pausan. ix. 2, 3; Eurip. Bucch. 337; Diodôr. iv. 81. The old logographer Akmalas copied Stesichorus.

Upon this well-known story it is unnecessary to multiply references. I shall however briefly notice the remarks made upon it by Diodorus and by Pausanias, as an illustration of the manner in which the literary Greeks of a later day dealt with their old national legends.

Both of them appear implicitly to believe the fact, that Aktæon was devoured by his own dogs, but they differ materially in the explanation of it.

Diodorus accepts and vindicates the miraculous interposition of the displeased goddess to punish Aktæon, who, according to one story, had boasted of his superiority in the chase to Artemis,—according to another story, had presumed to seduce the goddess in marriage, emboldened by the great numbers of the fest of animals slain in the chase which he

Agavê, the remaining daughter of Kadmus, married Echiôn, one of the Sparti. The issue of these nuptials was Pentheus, who, when Kadmus became old, succeeded him as king of Thêbes. In his reign Dionysus appeared as a god, the author or discoverer of the vine with all its blessings. He had wandered over Asia, India and Thrace, at the head of an excited troop of female enthusiasts—communicating and inculcating everywhere the Bacchic ceremonies, and rousing in the minds of women that impassioned religious emotion which led them to ramble in solitary mountains at particular seasons, there to give vent to violent fanatical excitement, apart from the men, clothed in fawn-skins and armed with the thyrsus. The obtrusion of a male spectator upon these solemnities was esteemed

4. Agavê and her son Pentheus.

had hung up as offerings in her temple. "It is not improbable (observes Diodorus) that the goddess was angry on both these accounts. For whether Aktæôn showed these hunting presents so far as to make them the means of gratifying his own desires towards one unapproachable in wedlock, or whether he presumed to cull himself an able hunter than her with whom the gods themselves will not compete in this department,—in either case the wrath of the goddess against him was just and legitimate (*ἀποδοξαμένη καὶ θεῶν ὄργη λατρεῖται ἀπὸ πάντων τῶν θεῶν*). With perfect propriety therefore (*καθὼς δὲ ἐκόμισε*) was he transformed into an animal such as those he had hunted, and torn to pieces by the very dogs who had killed them." (Diod. iv. 66.)

Pausanias, a man of exemplary piety, and generally less inclined to scepticism than Diodorus, thinks the occasion unsuitable for a miracle or special interference. Having alluded to the two causes assigned for the displeasure of Artemis (they are the two first-mentioned in my text, and distinct from the two induced by Diodorus), he proceeds to say, "But I believe that the dogs of Aktæôn went mad, without the interference of the goddess: in this state of madness they would have torn in pieces without distinction any one whom they met (*Παύς δὲ 2. 2. εἶπε δὲ οὐδὲν εὖναι καὶ τῶν κύνων μανίας ἄνευ τοῦ θεοῦ καὶ τῆς Ἀρτέμιδος τοῦτο εἶπεν*)."

He retains the truth of the final catastrophe, but rationalises it, excluding the special intervention of Artemis.

sacrilegious. Though the rites had been rapidly disseminated and fervently welcomed in many parts of Thrace, yet there were some places in which they had been obstinately resisted and their votaries treated with rudeness; especially by Lykurgus, king of the Edonian Thracians, upon whom a sharp and exemplary punishment was inflicted by Dionysus.

He resists  
the god  
Dionysus—  
his subse-  
quent end.

Thèbes was the first city of Greece to which Dionysus came, at the head of his Asiatic troop of females, to obtain divine honours, and to establish his peculiar rites in his native city. The venerable Kadmus, together with his daughters and the prophet Teiresias, at once acknowledged the divinity of the new god, and began to offer their worship and praise to him along with the solemnities which he enjoined. But Pentheus vehemently opposed the new ceremonies, reproving and maltreating the god who introduced them: nor was his unbelief at all softened by the miracles which Dionysus wrought for his own protection and for that of his followers. His mother Agavè, with her sisters and a large body of other women from Thèbes, had gone out from Thèbes to Mount Kithærôn to celebrate their solemnities under the influence of the Bacchic frenzy. Thither Pentheus followed to watch them, and there the punishment due to his impiety overtook him. The avenging touch of the god having robbed him of his senses, he climbed a tall pine for the purpose of overlooking the feminine multitude, who detected him in this position, pulled down the tree, and tore him in pieces. Agavè, mad and bereft of consciousness, made herself the

foremost in this assault, and carried back in triumph to Thêbes the head of her slaughtered son. The aged Kadmus, with his wife Harmonia, retired among the Illyrians, and at the end of their lives were changed into serpents, Zeus permitting them to be transferred to the Elysian fields<sup>1</sup>.

Polydôrus and Labdakus successively became kings of Thêbes: the latter at his death left an infant son, Laius, who was deprived of his throne by Lykus. And here we approach the legend of An-

and Zê-  
than.

<sup>1</sup> Apollod. iii. 5, 5-4; Theocrit. Idyll. xxi. Eurip. Bacch. præterea. Such is the tragical plot of this memorable drama. It is a striking proof of the deep-seated reverence of the people of Athens for the sanctity of the Bacchic ceremonies, that they could have borne the spectacle of Agavê on the stage with her dead son's head, and the expressions of triumphant sympathy in her action on the part of the Chorus (1128), *Μῆνιν! Ἀγῶν!* This drama, written near the close of the life of Euripides, and exhibited by his son after his death (Schol. Aristoph. Ban. 67), contains passages strongly inculcating the necessity of implicit deference to sacerdotal authority in matters of religion, and favourably contrasting the unquenching faith of the vulgar with the dissolving and impulsive tendencies of superior minds: see v. 136; compare iv. 889 and 422.—

Οὐδὲν παρὴν ἔσθ' ἡμῖν δαίμων.

Such reproofs "humana sapientia" certainly do not fall in with the plot of the drama itself, in which Pentheus appears as a Conservative, resisting the introduction of the new religious rite. Taken in conjunction with the emphatic and unhesitating piety which reigns through the drama, they countenance the supposition of Tyrwhitt, that Euripides was anxious to repel the imputations, so often made against him, of connivance with the philosophers and participation in sundry heretical opinions.

Pausanias in his Pentheus seems to have closely copied Euripides; see Servius ad Virg. Æneid. iv. 469.

The old Theopis had composed a tragedy on the subject of Pentheus: Suidas, *Θέοπις*; also *Πενθίου*; compare his *Eumenidæ*. 25.

According to Apollodorus (iii. 5, 5), Labdakus also perished in a similar way to Pentheus, and from the like emptiness,—*ἐκείνῳ φησὶν παραδέχοντι*.

tiopè, Zéthus and Amphion, whom the fabulists insert at this point of the Thèban series. Antiopè is here the daughter of Nykteus, the brother of Lykus. She is deflowered by Zeus, and then, while pregnant, flies to Epòpeus king of Sikyòn : Nykteus dying entreats his brother to avenge the injury, and Lykus accordingly invades Sikyòn, defeats and kills Epòpeus, and brings back Antiopè prisoner to Thèbes. In her way thither, in a cave near Eleutheræ, which was shown to Pausanias<sup>1</sup>, she is delivered of the twin sons of Zeus—Amphion and Zéthus—who, exposed to perish, are taken up and nourished by a shepherd, and pass their youth amidst herdsmen, ignorant of their lofty descent.

Antiopè is conveyed to Thèbes, where, after undergoing a long persecution from Lykus and his cruel wife Dirké, she at length escapes, and takes refuge in the pastoral dwelling of her sons, now grown to manhood. Dirké pursues and requires her to be delivered up : but the sons recognise and protect their mother, taking an ample revenge upon her persecutors. Lykus is slain, and Dirké is dragged to death, tied to the horns of a bull<sup>2</sup>. Amphion and Zéthus, having banished Laius, be-

<sup>2</sup> For the adventures of Antiopè and her sons, see Apollodot. iii. 5; Pausan. li. 6, 2; ix. 5, 2.

The narrative given respecting Epòpeus in the ancient Cyprian verses seems to have been very different from this, so far as we can judge from the brief notice in Proclus's Argument,—*ὡς Ἐρωτική φησὶν τῆς Ἀντιόπης (Ἀέου) γυναικὸς ἐξοσφάδης* : it approaches more nearly to the story given in the seventh fable of Hyginus, and followed by Propertius (iii. 15); the eighth fable of Hyginus contains the tale of Antiopè as given by Rutilius and Rutilius. The story of Pausanias differs from both.

The Scholiast ad Apollon. Rhod. i. 735, says that there were two

come kings of Thèbes. The former, taught by Hermès, and possessing exquisite skill on the lyre, employs it in fortifying the city, the stones of the walls arranging themselves spontaneously in obedience to the rhythm of his song<sup>1</sup>.

Zèthus marries Aëdôn, who, in the dark and under a fatal mistake, kills her son Itylus: she is transformed into a nightingale, while Zèthus dies of grief<sup>2</sup>. Amphion becomes the husband of Niobè, daughter of Tantalus, and the father of a numerous offspring, the complete extinction of which by the hands of Apollo and Artemis has already been recounted in these pages.

persons named Antiope: one, daughter of Aëdôn, the other, daughter of Nykteus. Pausanias is content with supposing one only, really the daughter of Nykteus, but there was a *deux* that she was daughter of Aëdôn (ii. 6, 2). Asius made Antiope daughter of Aëdôn, and mother (both by Zeus and by Epäurus: such a junction of divine and human paternity is of common occurrence in the Greek legends) of Zethus and Amphion (*op. Pass.* l. c.).

The contradictory versions of the story are brought together, though not very perfectly, in Stark's Essay, *De Libanidarum Historiâ*, p. 38-47 (Leyden, 1827).

<sup>1</sup> This story about the lyre of Amphion is not noticed in Homer, but it was narrated in the ancient *ἔπος ἐς ἑσπέρην* which Pausanias had read: the wild beasts as well as the stones were obedient to his strains (*Pass.* ix. 3, 4). Pherekydès also recounted it (*Pherekyd. Fragn.* 102, Diels.). The tablet of inscription (*Ἀντιόπη*) at Sikyon recognised Amphion as the first composer of poetry and harp-music (*Plutarch. de Musica.* c. 3. p. 1132).

<sup>2</sup> The tale of the wife and son of Zèthus is as old as the *Odyssey* (xix. 526). Pausanias adds the statement that Zèthus died of grief (ix. 5, 5; *Pherekydès*, *Fragn.* 102, Diels.). Pausanias, however, as well as Apollodorus, tells us that Zèthus married Thèbé, from whom the name Thèbes was given to the city. To reconcile the conflicting pretensions of Zèthus and Amphion with those of Kadmos, as founder of Thèbes, Pausanias supposes that the latter was the original settler of the hill of the Kadmeia, while the son Hermes extended the settlement to the lower city (ix. 3, 1-3).

Here ends the legend of the beautiful Antiopé and her twin sons—the rude and unpolished, but energetic, Zéthus—and the refined and amiable, but dreamy, Amphion. For so Euripidés, in the drama of Antiopé unfortunately lost, presented the two brothers, in affectionate union as well as in striking contrast\*. It is evident that the whole story stood originally quite apart from the Kadmeian family, and so the rudiments of it yet stand in the *Odyssey*; but the logographers, by their ordinary connecting artifices, have opened a vacant place for it in the descending series of Thébain mythes. And they have here proceeded in a manner not usual with them. For whereas they are generally fond of multiplying entities, and supposing different historical personages of the same name, in order to introduce an apparent smoothness in the chronology—they have here blended into one person Amphion the son of Antiopé and Amphion the father of Chlôris, who seem clearly distinguished from each other in the *Odyssey*. They have further assigned to the same person all the circumstances of the legend of Niobé, which seems to have been originally framed quite apart from the sons of Antiopé.

Amphion and Zéthus being removed, Laius became king of Thêbes. With him commences the

ever-celebrated series of adventures of Œdipus and his family. Laius, forewarned by the oracle that any son whom he might beget would kill him, caused Œdipus as soon as he was born to be exposed on Mount Kitharrôn. Here the herdsmen of Polybus king of Corinth accidentally found him and conveyed him to their master, who brought him up as his own child. In spite of the kindest treatment, however, Œdipus when he grew up found himself exposed to taunts on the score of his unknown parentage, and went to Delphi to inquire of the god the name of his real father. He received for answer an admonition not to go back to his country; if he did so, it was his destiny to kill his father and become the husband of his mother. Knowing no other country but Corinth, he accordingly determined to keep away from that city, and quitted Delphi by the road towards Boeôtia and Phôkis. At the exact spot where the roads leading to these two countries forked, he met Laius in a chariot drawn by mules, when the insolence of one of the attendants brought on an angry quarrel, in which Œdipus killed Laius, not knowing him to be his father. The exact place where this event happened, called the Divided Way<sup>1</sup>, was memorable in the eyes of all literary Greeks, and is specially adverted to by Pausanias in his *periegesis*.

On the death of Laius, Kreôn, the brother of Jokasta, succeeded to the kingdom of Thêbes. At

this time the country was under the displeasure of the gods, and was vexed by a terrible monster, with the face of a woman, the wings of a bird, and the tail of a lion, called the Sphinx<sup>1</sup>—sent by the wrath of Hérê, and occupying the neighbouring mountain of Phikium. The Sphinx had learned from the Muses a riddle, which she proposed to the Thébans to resolve: on every occasion of failure she took away one of the citizens and ate him up. Still no person could solve the riddle; and so great was the suffering occasioned, that Kreón was obliged to offer both the crown and the nuptials of his sister Jokasta to any one who could achieve the salvation of the city. At this juncture Œdipus arrived and solved the riddle: upon which the Sphinx immediately threw herself from the acropolis and disappeared. As a recompense for this service, Œdipus was made king of Thêbes and married Jokasta, not aware that she was his mother.

These main tragical circumstances—that Œdipus had ignorantly killed his father and married his mother—belong to the oldest form of the legend as it stands in the *Odyssey*. The gods (it is added in that poem) quickly made the facts known to mankind. Epikasta (so Jokasta is here called) in an agony of sorrow hanged herself: Œdipus remained king of the Kadmeians, but underwent many and great miseries, such as the Erinyes, who avenge

an injured mother, inflict<sup>1</sup>. A passage in the *Iliad* implies that he died at Thêbes, since it mentions the funeral games which were celebrated there in honour of him. His misfortunes were recounted by Nestôr, in the old Cyprian verses, among the stories of aforetime<sup>2</sup>. A fatal curse hung both upon himself and upon his children, Eteoklês, Poly-nikês, Antigônê and Ismênê. According to that narrative which the Attic tragedians have rendered universally current, they were his children by Jo-kasta, the disclosure of her true relationship to him having been very long deferred. But the ancient epic called *Œdipodia*, treading more closely in the footsteps of Homer, represented him as having after her death married a second wife, Euryganeia, by whom the four children were born to him: and the painter Onatas adopted this story in preference to that of Sophoklês<sup>3</sup>.

throne of their father gave occasion not only to a series of tragical family incidents, but also to one of the great quasi-historical events of legendary Greece—the two sieges of Thêbes by Adrastus, king of Argos. The two ancient epic poems called the Thêbais and the Epigoni (if indeed both were not parts of one very comprehensive poem) detailed those events at great length, and as it appears, with distinguished poetical merit; for Pausanias pronounces the Cyclic Thêbais (so it was called by the subsequent critics to distinguish it from the more modern Thêbais of Antimachus) inferior only to the Iliad and Odyssey; and the ancient elegiac poet Kallinus treated it as an Homeric composition'. Of this once-valued poem we unfortunately possess nothing but a few scanty fragments. The leading points of the le-

mented as blind (Leutsch, *Thêbais Cyclicæ Reliquiæ*, Götting, 1830, p. 42).

Pherekydês (ap. Schol. Eurip. *Phœnix*, 52) tells us that Odysseus had three children by Jokasta, who were all killed by Euryganeia and the Minys (this must refer to incidents in the old poems which we cannot now recover); then the four celebrated children by Euryganeia; lastly, that he married a third wife, Antymedusa. Apollodorus follows the narrative of the tragedians, but alludes to the different version about Euryganeia,—*οὐδ' ὁ φασί, &c.* (iii. 5, 8).

Hallanikus (ap. Schol. Eur. *Phœnix*, 59) mentioned the self-inflicted blindness of Odysseus; but it seems doubtful whether this circumstance was included in the narrative of Pherekydês.

The name in the text of Pausanias stands Κάλλινος, an unknown person: most of the critics recognize the propriety of substituting Κάλλινος, and Leutsch and Welcker have given very sufficient reasons for doing so.

gend are briefly glanced at in the *Iliad*; but our knowledge of the details is chiefly derived from the Attic tragedians, who transformed the narratives of their predecessors at pleasure, and whose popularity constantly eclipsed and obliterated the ancient version. Antimachus of Kolophôn, contemporary with Euripidês, in his long epic, probably took no less liberties with the old narrative. His *Thêbaid* never became generally popular, but it exhibited marks of study and elaboration which recommended it to the esteem of the Alexandrine critics, and probably contributed to discredit in their eyes the old cyclic poem.

The logographers, who gave a continuous history of this siege of Thêbes, had at least three pre-existing epic poems—the *Thêbais*, the *Œdipodia*, and the *Alkmaônis*,—from which they could borrow. The subject was also handled in some of the Hesiodic poems, but we do not know to what extent<sup>1</sup>. The *Thêbais* was composed more in honour of Argos than of Thêbes, as the first line of it, one of the few fragments still preserved, betokens<sup>2</sup>.

## SIEGES OF THEBES.

The legend, about to recount fraternal dissension of the most implacable kind, comprehending in its results not only the immediate relations of the infuriated brothers, but many chosen companions of the heroic race along with them, takes its start from the paternal curse of *Œdipus*, which overhangs and determines all the gloomy sequel.

Curse pronounced by the devoted *Œdipus* upon his sons.

(*Œdipus*, though king of *Thêbes* and father of four children by *Euryganeia* (according to the *Œdipodia*), has become the devoted victim of the *Erinnyes*, in consequence of the self-inflicted death of his mother, which he had unconsciously caused, as well as of his unintentional parricide. Though he had long forsworn the use of all the ornaments and luxuries which his father had inherited from his kingly progenitors, yet when through age he had come to be dependent upon his two sons, *Polynikês* one day broke through this interdict, and set before him the silver table and the splendid wine-cup of *Kadmus*, which *Laius* had always been accustomed to employ. The old king had no sooner seen these precious appendages of the regal life of his father, than his mind was overrun by a calamitous phrenzy, and he imprecated terrible curses on his sons, predicting that there would be bitter and endless warfare between them. The goddess *Erinnys* heard and heeded him; and he repeated the curse again on another occasion, when his sons, who had always been accustomed to send to him the shoulder of the victims sacrificed on the altar, caused the but-

tock to be served to him in place of it'. He resented this as an insult, and prayed the gods that they might perish each by the hand of the other. Throughout the tragedians as well as in the old epic, the paternal curse, springing immediately from the misguided Œdipus himself, but remotely from the parricide and incest with which he has tainted his breed, is seen to domineer over the course of events—the Erinyes who executes that curse being the irresistible, though concealed, agent. *Æschylus* not only preserves the fatal efficiency of the paternal curse, but even briefly glances at the causes assigned for it in the *Thébais*, without superadding any new motives. In the judgement of *Sophoklēs*, or of his audience, the conception of a

father cursing his sons upon such apparently trifling grounds was odious; and that great poet introduced many aggravating circumstances, describing the old blind father as having been barbarously turned out of doors by his sons to wander abroad in exile and poverty. Though by this change he rendered his poem more coherent and self-justifying, yet he departed from the spirit of the old legend, according to which Œdipus has contracted by his unconscious misdeeds an incurable taint destined to pass onward to his progeny. His mind is alienated, and he curses them, not because he has suffered seriously by their guilt, but because he is made the blind instrument of an avenging Erinny for the ruin of the house of Laius<sup>1</sup>.

After the death of Œdipus and the celebration of his funeral games, at which, amongst others, Argeia, daughter of Adrastus (afterwards the wife of Polynikês), was present<sup>2</sup>, his two sons soon quarrelled respecting the succession. The circumstances are differently related, but it appears that, accord-

<sup>1</sup> The curses of Œdipus are very frequently and emphatically dwelt upon both by Æschylus and Sophoklês (Sept. ad Theb. 70-826, 665-697, &c.; Œdip. Colm. 1293-1378). The former maintains the same point of view as the Thêbais, when he mentions—

..... Τὸν ἀποκρίπτων

Κακίαν θρασυφάρμακον Οἰδάρου (727);

αὐτὸν, ἄρπυιαι δ' ἄρπυιαι ἀπὸ γυναικὸς Ἐκέρει (Soph. Antig. 534).

The Scholiast on Sophoklês (Ed. Col. 1378) treats the cause assigned by the ancient Thêbais for the curse vented by Œdipus as trivial and ludicrous.

The Ægeids at Sparta, who traced their descent to Kadmos, suffered from terrible maladies which destroyed the lives of their children; an oracle directed them to appease the Erinnyes of Laius and Œdipus by erecting a temple, upon which the maladies speedily ceased (Herodot. iv. 1).

ing to the original narrative the wrong and injustice was on the side of Polynikēs, who, however, was obliged to leave Thēbes and to seek shelter with Adrastus, king of Argos. Here he met Tydeus, a fugitive, at the same time, from Ætōlia: it was dark when they arrived, and a broil ensued between the two exiles, but Adrastus came out and parted them. He had been enjoined by an oracle to give his two daughters in marriage to a lion and a boar, and he thought that this occasion had now arrived, inasmuch as one of the combatants carried on his shield a lion, the other a boar. He accordingly gave Deipylē in marriage to Tydeus, and Argeia to Polynikēs: moreover he resolved to restore by armed resistance both his sons-in-law to their respective countries<sup>1</sup>.

On proposing the expedition to the Argæian chiefs around him, he found most of them willing auxiliaries; but Amphiaraus—formerly his bitter opponent, though now reconciled to him and husband of his sister Eriphylē—strongly opposed him<sup>2</sup>. He denounced the enterprise as unjust and contrary to the will of the gods. Again, being of a prophetic stock, descended from Melampus, he foretold the certain death both of himself and of the principal

<sup>1</sup> Apollodōr, iii. 5, 9; Hygin. f. 69; Æschyl. Sept. ad Theb. 673. Hyginus says that Polynikēs came clothed in the skin of a lion, and Tydeus in that of a boar; perhaps after Antimachus, who said that Tydeus had been brought up by swineherds (Antimach. Fragm. 27, ed. Dindorf; ap. Schol. *Iliad.* iv. 400). Very probably, however, the old Thēbais compared Tydeus and Polynikēs to a lion and a boar, on account of their courage and fierceness; a simile quite in the Homeric character. Musæus gives the words of the oracle (ap. Schol. Eurip. *Phœnix*. 411).

leaders, should they involve themselves as accomplices in the mad violence of Tydeus or the criminal ambition of Polynikēs. Amphiarāus, already distinguished both in the Kalydōnian boar-hunt and in the funeral games of Pelias, was in the Thēban war the most conspicuous of all the heroes, and absolutely indispensable to its success. But his reluctance to engage in it was invincible, nor was it possible to prevail upon him except through the influence of his wife Eriphylē. Polynikēs, having brought with him from Thēbes the splendid robe and necklace given by the gods to Harmonia on her marriage with Kadmos, offered it as a bribe to Eriphylē, on condition that she would influence the determination of Amphiarāus. The sordid wife, seduced by so matchless a present, betrayed the lurking-place of her husband, and involved him in the fatal expedition<sup>1</sup>. Amphiarāus, reluctantly dragged forth, and foreknowing the disastrous issue of the expedition both to himself and to his associates, addressed his last injunctions, at the moment of mounting his chariot, to his sons Alkmaēon and Amphilocheus, commanding Alkmaēon to avenge his approaching death by killing the venal Eriphylē, and by undertaking a second expedition against Thēbes.

The Attic dramatists describe this expedition as having been conducted by seven chiefs, one to each of the seven celebrated gates of Thēbes. But the Cyclic Thēbais gave to it a much more com-

They were well received at Mykênæ; but the warning signals given by the gods were so terrible that no Mykenæan could venture to accompany them<sup>2</sup>. The seven principal chiefs however were Adrastus, Amphiarâus, Kapaneus, Hippomedôn, Partheno-pæus, Tydeus and Polynikês<sup>3</sup>. When the army had advanced as far as the river Asôpus, a halt was made for sacrifice and banquet; while Tydeus was sent to Thêbes as envoy to demand the restoration of Polynikês to his rights. His demand was refused; but finding the chief Kadmeians assembled at the banquet in the house of Eteoklês, he challenged them all to contend with him in boxing or wrestling. So efficacious was the aid of the goddess Athênâ that he overcame them all; and the Kadmeians were so indignant at their defeat, that they placed an ambuscade of fifty men to intercept him in his way back to the army. All of them perished by the hand of this warrior, small in stature and of few words, but desperate and irresistible in the

Menœceus.

The Kadmeians, assisted by their allies the Phœkians and the Phlegyæ, marched out to resist the invaders, and fought a battle near the Ismênian hill, in which they were defeated and forced to retire within the walls. The prophet Teiresias acquainted them that if Menœceus, son of Kreôn, would offer himself as a victim to Arês, victory would be assured to Thêbes. The generous youth, as soon as he learnt that his life was to be the price of safety to his country, went and slew himself before the gates. The heroes along with Adrastus now commenced a vigorous attack upon the town, each of the seven selecting one of the gates to assault. The contest was long and strenuously maintained; but the devotion of Menœceus had procured for the Thêbans the protection of the gods. Parthenopæus was killed with a stone by Periklymenus; and when the furious Kapanews, having planted a scaling-ladder, had mounted the walls, he was smitten by a thunderbolt from Zeus and cast down dead upon the earth. This event struck terror into the Argæans, and Adrastus called back his troops from the attack. The Thêbans now sallied forth to pursue them, when Eteoklês, arresting the battle, proposed to decide the controversy by single combat with his brother. The challenge, eagerly accepted

by Polynikēs, was agreed to by Adrastus: a single combat ensued between the two brothers, in which both were exasperated to fury and both ultimately slain by each other's hand. This equal termination left the result of the general contest still undetermined, and the bulk of the two armies renewed the fight. In the sanguinary struggle which ensued, the sons of Astakus on the Thēban side displayed the most conspicuous and successful valour. One of them<sup>1</sup>, Melanippus, mortally wounded Tydeus—while two others, Leades and Amphidikus, killed Eteoklus and Hippomedon. Amphiarāus avenged Tydeus by killing Melanippus; but unable to arrest the rout of the army, he fled with the rest, closely pursued by Periklymenus. single combat of Eteoklus and Polynikēs, in which both perished.

Reposse and destruction of the Argivean chiefs—all except Adrastus. Amphiarāus is swallowed up in the earth.

<sup>1</sup> The story recounted that the head of Melanippus was brought to Tydeus as he was about to expire of his wound, and that he gnawed it with his teeth, a story touched upon by Sophoklēs (apud Herodotum, in Rhetor. Græc. i. viii. p. 601, Wala.).

The lyric poet Bacchylidēs (sup. Schol. Aristoph. Aves, 1535) seems to have handled the story even earlier than Sophoklēs.

We find the same allegation embodied in charges against real historical men: the invective of Montanus against Aquilius Regulus, at the beginning of the reign of Vespasian, affirmed, "istam interfecit Pisonis perniciem a Regulo, appetitumque morem Pionis cepit" (Tacit. Hist. iv. 42).

<sup>2</sup> Apollodorus iii. 6, 8. Pindar, Olymp. vi. 11; Sem. ix. 13-27. Pausan. ix. 8, 2; 13, 2-4.

Euripidēs, in the Phormion (1122 *ægg.*), describes the battle generally; see also Koch, S. Th. 392. It appears by Pausanias that the Thēbans had poems or legends of their own, relative to this war: they dissented in various points from the Cycle Thēbais (ix. 15, 4). The

memorable incident happened was indicated by a sepulchral building, and shown by the Thébans down to the days of Pausanias—its sanctity being attested by the fact, that no animal would consent to touch the herbage which grew within the sacred inclosure. Amphiaræus, rendered immortal by Zeus, was worshipped as a god at Argos, at Thêbes and at Orôpus—and for many centuries gave answers at his oracle to the questions of the pious applicant<sup>1</sup>.

Adrastus, thus deprived of the prophet and warrior whom he regarded as "the eye of his army," and having seen the other chiefs killed in the disastrous fight, was forced to take flight singly, and was preserved by the matchless swiftness of his horse Arêidôn, the offspring of Pôseidôn. He reached

Thêbes and that Periklymènes had killed Parthenopœus; the Thébans assigned this exploit to Asphodikus, a warrior not commemorated by any of the poets known to us.

The village of Harma, between Tanagra and Mykâlêssus, was affirmed by some to have been the spot where Amphiaræus closed his life (Strabo, ix. p. 404); Sophoklês placed the scene at the Amphiaræum near Orôpus (cp. Strabo, ix. p. 399).

<sup>1</sup> Pindar, *Olymp.* vi. 16. *Ἐστὶ δ' ἱερὰ τοιαῦτα μέγιστον ἐλευσέμεναι Τυδαιεύδῃ· εἴεν δὲ δύστηνοι πάντες αἱ ἱμέρ' ἱεδῆς, στρατὸς ἀσφιδίκοιο ἱμῆρ' ἀμφότερον, μέγιστον δ' ἀσφιδίη καὶ Δωρὶ μέγιστον.*

The scholar affirms that these last expressions are borrowed by Pindar from the Cyclic Thûlêis.

The temple of Amphiaræus (Pausan. ii. 23, 2), his oracle, seems to have been inferior in estimation only to that of Delphi (Herodot. i. 52; Pausan. i. 34; Cicero, *Dein.* i. 46). Cæres sent a rich present to Amphiaræus, *στέφανον αἰνῶν τῆς τε ἁγίας καὶ τῆς πύθης* (Herod. i. 6); a striking proof how these interesting legends were venerated and believed as genuine historical facts. Other adventures of Amphiaræus in the expedition against Thêbes were commemorated in the sayings on the Throne at Amyklæ (Pausan. iii. 12, 4).

Æschylus (Sept. Thêb. 611) seems to enter into the Thûlian view, doubtless highly respectful towards Amphiaræus, when he places in the mouth of the Kadmeian king Eteoklês such high encomiums on Amphiaræus, and so marked a contrast with the other chiefs from Argos.

Argos on his return, bringing with him nothing except "his garments of woe and his black-maned steed<sup>1</sup>."

Kreôn, father of the heroic youth Menœkeus, succeeding to the administration of Thêbes after the death of the two hostile brothers and the repulse of Adrastus, caused Eteoklês to be buried with distinguished honour, but cast out ignominiously the body of Polynikês as a traitor to his country, forbidding every one on pain of death to consign it to the tomb. He likewise refused permission to Adrastus to inter the bodies of his fallen comrades. This proceeding, so offensive to Grecian feeling, gave rise to two further tales; one of them at least of the highest pathos and interest. Antigônê, the sister of Polynikês, heard with indignation the revolting edict consigning her brother's body to the dogs and vultures, and depriving it of those rites which were considered essential to the repose of the dead. Unmoved by the dissuading counsel of an affectionate but timid sister, and unable to procure assistance, she determined to brave the hazard and to bury the body with her own hands. She was detected in the act; and Kreôn, though forewarned

Kreôn, King of Thêbes, forbids the burial of Polynikês and the other fallen Argivian chiefs.

<sup>1</sup> Pausan., viii. 25; b. from the Cyclic Thûbais, *ἑπάρη Ἀργεῖα φέρων* *οὐκ Ἀργεῖα συνομαίη*; also Apollodôr. iii. 6, 8.

The celebrity of the hero Arcêus was extolled in the *Iliad* (xxii. 346), in the Cyclic Thûbais, and also in the Thûbais of Antimachus (Pausan. l. c.); by the Arcadians of Tholpœna he was said to be the offspring of Dêmêtêr by Poseidôn,—he, and a daughter whose name Pausanias will not communicate to the minutest (*ἡ τὸ ὄνομα ἐς ἀνδραγαθὸν ἀγένη ὡς κοῖνοισι*, l. c.). A different story is in the *Schol. Iliad.* xxii. 346; and in Antimachus, who affirmed that "Gaea herself had produced him, as a reward to mortal men" (see Antimach. *Fræg.* 10. p. 102; *Epœ. Græc.* *Fræg.* ed. Dœntzel).

by Teiresias of the consequences, gave orders that she should be buried alive, as having deliberately set at naught the solemn edict of the city. His son Hæmôn, to whom she was engaged to be married, in vain interceded for her life. In an agony of despair he slew himself in the sepulchre to which the living Antigone had been consigned; and his mother Eurydikè, the wife of Kreôn, inconsolable for his death, perished by her own hand. And thus the new light which seemed to be springing up over the last remaining scion of the devoted family of Œdipus, is extinguished amidst gloom and horrors—which overshadowed also the house and dynasty of Kreôn<sup>1</sup>.

The Athenians inter-  
fere to pro-  
cure the in-  
terment of  
the fallen  
chiefs.

The other tale stands more apart from the original legend, and seems to have had its origin in the patriotic pride of the Athenians. Adrastus, unable to obtain permission from the Thébans to inter the fallen chieftains, presented himself in suppliant guise, accompanied by their disconsolate mothers, to Thèseus at Eleusis. He implored the Athenian warrior to extort from the perverse Thébans that last melancholy privilege which no decent or pious Greeks ever thought of withholding, and thus to stand forth as the champion of Grecian public morality in one of its most essential points,

<sup>1</sup> Sophokl. *Antigon.* 581. Νῦν γὰρ ἐρχόμενος ὑπὲρ 'Ρήϊας ἐτίμας φίλος ἐπὶ Οὐδύμῳ ἄνακτι, &c.

The pathetic tale here briefly recounted forms the subject of this beautiful tragedy of Sophoklès, the argument of which is supposed by Boeckh to have been borrowed in its primary elements from the Cyclic *Thûlais* or the *Œlîpudîa* (Boeckh, *Dissertation* appended to his translation of the *Antigonè*, c. x. p. 146); see *Apollodôr.* iii. 7, 1.

*Æschylus* also touches upon the heroism of Antigone (*Sep. Théb.* 984).

not less than of the rights of the subterranean gods. The Thébans obstinately persisting in their refusal, Théseus undertook an expedition against their city, vanquished them in the field, and compelled them by force of arms to permit the sepulture of their fallen enemies. This chivalrous interposition, celebrated in one of the preserved dramas of Euripidès, formed a subject of glorious recollection to the Athenians throughout the historical age: their orators dwelt upon it in terms of animated panegyric; and it seems to have been accepted as a real fact of the past time, with not less implicit conviction than the battle of Marathôn<sup>1</sup>. But the Thébans, though equally persuaded of the truth of the main story, dissented from the Athenian version of it, maintaining that they had given up the bodies for sepulture voluntarily and of their own accord. The tomb of the chieftains was shown near Eleusis even in the days of Pausanias<sup>2</sup>.

A large proportion both of the interesting persons and of the exalted acts of legendary Greece belongs to the female sex. Nor can we on this occasion pass over the name of Evadne, the devoted widow of Kapaneus, who cast herself on the funeral pile of her husband and perished<sup>3</sup>.

The defeat of the seven chiefs before Thèbes was amply avenged by their sons, again under the guidance of Adrastus:—Ægialeus son of Adrastus, Thersander son of Polynikès, Alkmaëon and Am-

philochus, sons of Amphiarāus, Diomâdès son of Tydeus, Sthenelus son of Kapanens, Promachus son of Parthenopæus, and Euryalus son of Mekistheus, joined in this expedition. Though all these youthful warriors, called the Epigoni, took part in the expedition, the grand and prominent place appears to have been occupied by Alkmæôn, son of Amphiarāus. Assistance was given to them from Corinth and Megara, as well as from Messênê and Arcadia; while Zeus manifested his favourable dispositions by signals not to be mistaken<sup>1</sup>. At the river Glisas the Epigoni were met by the Thébans in arms, and a battle took place in which the latter were completely defeated. Laodamas, son of Eteoklès, killed Egialeus, son of Adrastus; but he and his army were routed and driven within the walls by the valour and energy of Alkmæôn. The defeated Kadmeians consulted the prophet Teiresias, who informed them that the gods had declared for their enemies, and that there was no longer any hope of successful resistance. By his advice they sent a herald to the assailants offering to surrender the town, while they themselves conveyed away their wives and children, and fled under the command of Laodamas to the Illyrians<sup>2</sup>, upon which

the Epigoni entered Thêbes, and established Thersander, son of Polynikês, on the throne.

Victory of

Adrastus, who in the former expedition had been the single survivor amongst so many fallen companions, now found himself the only exception to the general triumph and joy of the conquerors: he had lost his son Ægialeus, and the violent sorrow arising from the event prematurely cut short his life. His soft voice and persuasive eloquence were proverbial in the ancient epic<sup>1</sup>. He was worshiped as a hero both at Argos and at Sikyôn, but with especial solemnity in the last-mentioned place, where his Herôum stood in the public agora, and where his exploits as well as his sufferings were celebrated periodically in lyric tragedies. Melanippus, son of Astakus, the brave defender of Thêbes, who had slain both Tydêus and Mekistheus, was worshiped with no less solemnity by the Thêbans<sup>2</sup>. The enmity of these two heroes rendered it impossible for both of them to be worshiped close upon the same spot. Accordingly it came to pass during the historical period, shortly after the time of the Solonian legislation at Athens, that Kleisthenês, despot of Sikyôn, wishing to banish the hero Adrastus and abolish the religious solemnities celebrated in honour of the latter by the Sikyonians, first applied to the Delphian oracle for permission to carry this banishment into effect directly and forcibly. That permission being refused, he next sent to Thêbes

an intimation that he was anxious to introduce their hero Melanippus into Sikyôn. The Thébans willingly consented, and he assigned to the new hero a consecrated spot in the strongest and most commanding portion of the Sikyonian prytaneium. He did this (says the historian) "knowing that Adrastus, would forthwith go away of his own accord; since Melanippus was of all persons the most odious to him, as having slain both his son-in-law and his brother." Kleisthenês moreover diverted the festivals and sacrifices which had been offered to Adrastus, to the newly established hero Melanippus; and the lyric tragedies from the worship of Adrastus to that of Dionysus. But his dynasty did not long continue after his decease, and the Sikyonians then re-established their ancient solemnities<sup>1</sup>.

Near the Proetid gate of Thêbes were seen the tombs of two combatants who had hated each other during life even more than Adrastus and Melanippus—the two brothers Eteoklês and Polynikês. Even as heroes and objects of worship, they still continued

<sup>1</sup> This very curious and illustrative story is contained in Herodot. τ. 67. 'Ἐπεὶ δὲ ὁ θεὸς τοῦτο αὐτὸ παρείδωκεν, ἀπελθὼν ὁπίσω (Kleisthenês returning from Delphi) ἐφρήνισε μηχανὴν τῇ αὐτῷ ὁ Ἀδρήστεος μεταλλάξεται. 'Ὅτε δὲ αὐτὸ ἐξευρήσθαι ἴδωκε, πύμφας ἐς ἡμέρας τὰς Βουστίας, ἔφη θέλει καταγαίρειν Μελανίππου τὸν Ἀστυγῶν· αὐτὸς δὲ ἐγβῶτα ἐθέσται. 'Ἐπαγγέλλεται δὲ τὸν Μελανίππου ὁ Κλεισθένης, καὶ γὰρ τοῦτο δεῖ καταγαίρειν, ὡς ἔχουσιν ὅσα Ἀδρήστου· δὲ εὖ τι ἀλλοίωσε Μεγαρτῶν ἀπειρήσει, καὶ τὸν γαμβρὸν Τυδίδα.

The Sikyonians (Herodotus says) τὸ τε δὲ ἄλλα ἐτίμων τὸν Ἀδρήστου, καὶ πρὸς τὸ πᾶν αὐτοῦ τραγῳδίαι χεῖρασι γέγραμμεν τὸν μὲν Διόνυσον αὐτὸν τιμῶσιν, τὸν δὲ Ἀδρήστου.

Adrastus was worshipped as a hero at Megara as well as at Sikyôn: the Megarians affirmed that he had died there on his way back from Thêbes (Pausan. i. 43, 1; Dielschides, ap. Sebel. ad Pindar. Nem. ix. 31). His house at Argos was still shown when Pausanias visited the town (ii. 23, 2).

to manifest their inextinguishable hostility: those who offered sacrifices to them observed that the flame and the smoke from the two adjoining altars abhorred all communion, and flew off in directions exactly opposite. The Thēban exegetes assured Pausanias of this fact. And though he did not himself witness it, yet having seen with his own eyes a miracle not very dissimilar at Pionia in Mysia, he had no difficulty in crediting their assertion<sup>1</sup>.

Amphiarāus when forced into the first attack of Thēbes—against his own foreknowledge and against the warnings of the gods—had enjoined his sons Alkmæon and Amphiloehus not only to avenge his death upon the Thēbans, but also to punish the treachery of their mother, "Eriphylē, the destroyer of her husband?" In obedience to this command, and having obtained the sanction of the Delphian oracle, Alkmæon slew his mother<sup>2</sup>; but the awful Erinnyes, the avenger of matricide, inflicted on him

"Ex nova fructum veniet concordia summi,

The tale was copied by Ovid from Kallimachos (*Trist.* v. 5, 38).

<sup>2</sup> Ἀλκιδάμαρ Ἐριφύλλης (Pindar, *Nem.* ix. 16). A poem *Eriphylē* was included among the mythical compositions of Stesichorus: he mentioned in it that Asklepius had restored Kapaneus to life, and that he was the first reason struck dead by thunder from Zeus (Stesichor. *Fragm.* Kleine, 18, p. 74). Two tragedies of Sophoklēs once existed, *Epigoni* and *Alkmaia* (Welcker, *Urschloech. Tragod.* i. p. 259); a few fragments also remain of the Latin *Epigoni* and *Alphesibon* of Attius: Ennius and Attius both composed or translated from the Greek a Latin *Alkmaia* (Port. *Scen.* Latin. ed. Bach, pp. 33, 164, 198).

<sup>3</sup> Hyginus gives the fable briefly (l. 73; see also Asklepioidēs, *op. Schol. Odys.* xi. 326). In like manner, to the case of the matricide of Orestis, Apollo not only sanctions, but enjoins the deed; but his protection against the avenging Erinnyes is very tardy, not taking effect

a long and terrible punishment, depriving him of his reason, and chasing him about from place to place without the possibility of repose or peace of mind. He craved protection and cure from the god at Delphi, who required him to dedicate at the temple, as an offering, the precious necklace of Kadmus, that irresistible bribe which had originally corrupted Eriphylë<sup>1</sup>. He further intimated to the unhappy sufferer, that though the whole earth was tainted with his crime, and had become uninhabitable for him, yet there was a spot of ground which was not under the eye of the sun at the time when the matricide was committed, and where therefore Alkmæon yet might find a tranquil shelter. The promise was realised at the mouth of the river Achelôus, whose turbid stream was perpetually depositing new earth and forming additional islands. Upon one of these, near Cœniadæ, Alkmæon settled, permanently and in peace: he became the primitive hero of Akarnania, to which his son Akarnan gave name<sup>2</sup>. The necklace was found among the treasures of Delphi, together with that which had

until after Orestes has been long persecuted and tormented by them (see *Æschyl. Kumen.* 76, 197, 462).

In the *Alkmæon* of the later tragic writer Thodoktês, a distinction was drawn: the gods had decreed that Eriphylë should die, but not that Alkmæon should kill her (*Aristot. Rhetoric.* ii. 24). Aëtylidas altered the story still more in his tragedy, and introduced Alkmæon as killing his mother ignorantly and without being aware who she was (*Aristot. Poetic.* c. 27). The murder of Eriphylë by her son was one of the *ἀνυπόσταντοι μύθοι* which could not be departed from; but interpretations and qualifications were resorted to, in order to prevent it from shocking the softened feelings of the spectators: see the criticism of Aristotle on the *Alkmæon* of Euripides [*Æthic. Nicom.* iii. 3, 8].

been given by Aphroditê to Helen, by the Phôkian plunderers who stripped the temple in the time of Philip of Macedôn. The Phôkian women quarrelled about these valuable ornaments: and we are told that the necklace of Eriphylê was allotted to a woman of gloomy and malignant disposition, who ended by putting her husband to death; that of Helen to a beautiful but volatile wife, who abandoned her husband from preference for a young Epirot<sup>1</sup>.

There were several other legends respecting the distracted Aikmæôn, either appropriated or invented by the Attic tragedians. He went to Phêgeus, king of Psôphis in Arcadia, whose daughter Arsinôê he married, giving as a nuptial present the necklace of Eriphylê. Being however unable to remain there, in consequence of the unremitting persecutions of the maternal Eriunys, he sought shelter at the residence of king Achelôus, whose daughter Kallirhoê he made his wife, and on whose soil he obtained repose<sup>2</sup>. But Kallirhoê would not

<sup>1</sup> *Athene*. l. c.

<sup>2</sup> *Apollodot.* iii. 7, 5-6; *Pausan.* viii. 24, 4. These two authors have preserved the story of the Akermanians and the old form of the legend, representing Aikmæôn as having found shelter at the abode of the person or king Achelôus, and married his daughter: *Thucydides* notes the personality of Achelôus, and merely announces the wanderer as having settled on certain new islands deposited by the river.

I may remark that this is a singularly happy adaptation of a legend to an existing topographical fact. Generally speaking, before any such adaptation can be considered plausible, the legend is of necessity much transformed; here it is taken exactly as it stands, and still fits on with great precision.

*Ephorus* recounted the whole sequence of events as so much political history, divesting it altogether of the legendary character. *Alcæon* and *Diomedes*, after having taken *Thôbes* with the other *Epigoni*, jointly undertook an expedition into *Boôtia* and *Akermania*: they first punished the enemies of the old *Eleus*, grandfather of *Diomedes*, and established

Fatal neck-  
lace of Eri-  
phylê.

be satisfied without the possession of the necklace of Eriphylê, and Alkmæôn went back to Psôphis to fetch it, where Phêgeus and his sons slew him. He had left twin sons, infants, with Kallirhoê, who prayed fervently to Zeus that they might be preternaturally invested with immediate manhood, in order to revenge the murder of their father. Her prayer was granted, and her sons Amphoterus and Akarnan, having instantaneously sprung up to manhood, proceeded into Arcadia, slew the murderers of their father, and brought away the necklace of Eriphylê, which they carried to Delphi<sup>1</sup>.

Euripidês deviated still more widely from the ancient epic, by making Alkmæôn the husband of Mantô, daughter of Teiresias, and the father of Amphiloehus. According to the Cyclic Thêbais, Mantô was consigned by the victorious Epigoni as a special offering to the Delphian god; and Amphiloehus was son of Amphiarâus, not son of Alkmæôn<sup>2</sup>. He was the eponymous hero of the town

the latter as king in Kalydôn; next they conquered Akarnania for Alkmæôn. Alkmæôn, though invited by Agamemnôn to join in the Trojan war, would not consent to do so (Ephor. ap. Strabo. vii. p. 325; x. p. 422).

<sup>1</sup> Apollodôr. iii. 7. 7; Pausan. viii. 24, 3-4. His remarks upon the mischievous longing of Kallirhoê for the necklace are curious: he upbraideth them in by saying, that "many men, and still more women, are given to fall into absurd desires," &c. He recounts it with all the *bonne foi* which belongs to the most assured matter of fact.

A short allusion is in Ovid's Metamorphoses (ix. 412).

<sup>2</sup> Thêbais, Cy. Reliquiæ, p. 70, Lentsch; Schol. Apollôn. Rhod. i. 408. The following lines cited in Athenæus (vii. p. 317) are supposed by Boeckh, with probable reason, to be taken from the Cyclic Thêbais; a portion of the advice of Amphitarâus to his sons at the time of setting out on his last expedition,—

Πολλέποδός μιν, τίειντο, ἔχον τῶν, Ἀμφιλαχ' ἔχοντο.

Τοῖσιν ἐφ' αὐτοῖσιν, τῶν δὲ κατὰ δῖον ἔχοντο.

There were two tragedies composed by Euripidês, under the title of

called the Amphiloehian Argos, in Akarnania, on the shore of the Gulf of Ambrakia. Thucydides tells us that he went thither on his return from the Trojan war, being dissatisfied with the state of affairs which he found at the Peloponnesian Argos<sup>1</sup>. The Akarnanians were remarkable for the numerous prophets which they supplied to the rest of Greece: their heroes were naturally drawn from the great prophetic race of the Melampodids.

Thus ends the legend of the two sieges of Thêbes; the greatest event, except the siege of Troy, in the ancient epic; the greatest enterprise of war, between Greeks and Greeks, during the time of those who are called the Heroes.

## CHAPTER XV.

## LEGEND OF TROY.

We now arrive at the capital and culminating point of the Grecian epic,—the two sieges and capture of Troy, with the destinies of the dispersed heroes, Trojan as well as Grecian, after the second and most celebrated capture and destruction of the city.

Great extent and variety of the tale of Troy.

It would require a large volume to convey any tolerable idea of the vast extent and expansion of this interesting fable, first handled by so many poets, epic, lyric and tragic, with their endless additions, transformations and contradictions,—then purged and recast by historical inquirers, who, under colour of setting aside the exaggerations of the poets, introduced a new vein of prosaic invention.—lastly, moralised and allegorised by philosophers. In the present brief outline of the general field of Grecian legend, or of that which the Greeks believed to be their antiquities, the Trojan war can be regarded as only one among a large number of incidents upon which Hekataeus and Herodotus looked back as constituting their fore-time. Taken as a special legendary event, it is indeed of wider and larger interest than any other, but it is a mistake to single it out from the rest as if it rested upon a different and more trustworthy basis. I must therefore confine myself to an abridged nar-

rative of the current and leading facts; and amidst the numerous contradictory statements which are to be found respecting every one of them, I know no better ground of preference than comparative antiquity, though even the oldest tales which we possess—those contained in the *Iliad*—evidently presuppose others of prior date.

The primitive ancestor of the Trojan line of kings is Dardanus, son of Zeus, founder and eponymus of Dardania<sup>1</sup>: in the account of later authors, Dardanus was called the son of Zeus by Elektra, daughter of Atlas, and was further said to have come from Samothrace, or from Arcadia, or from Italy<sup>2</sup>; but of this Homer mentions nothing. The first Dardanian town founded by him was in a lofty position on the descent of Mount Ida; for he was not yet strong enough to establish himself on the plain. But his son Erichthonius, by the favour of Zeus, became the wealthiest of mankind. His flocks and herds having multiplied, he had in his pastures three thousand mares, the offspring of some of whom, by Boreas, produced horses of preternatural swiftness. Trös, the son of Erichthonius, and the eponym of the Trojans, had three sons—Ilus, Assaracus, and the beautiful Ganymédès, whom Zeus stole away to become his cup-bearer in Olympus, giving to his father Trös, as the price of the youth, a team of immortal horses<sup>3</sup>.

nian lines diverge; the former passing from Ilius to Laomedôn, Priam and Hectôr; the latter from Assaracus to Capys, Anchisês and Æneas. Ilius founded in the plain of Troy the holy city of Ilium; Assaracus and his descendants remained sovereigns of Dardania<sup>1</sup>.

Walls of  
Ilium built  
by Posei-  
dôn.

It was under the proud Laomedôn, son of Ilius, that Poseidôn and Apollo underwent, by command of Zeus, a temporary servitude; the former building the walls of the town, the latter tending the flocks and herds. When their task was completed and the penal period had expired, they claimed the stipulated reward; but Laomedôn angrily repudiated their demand, and even threatened to cut off their ears, to tie them hand and foot, and to sell them in some distant island as slaves<sup>2</sup>. He was punished for this treachery by a sea-monster, whom Poseidôn sent to ravage his fields and to destroy his subjects. Laomedôn publicly offered the immortal horses given by Zeus to his father Trôs, as a reward to any one who would destroy the monster. But an oracle declared that a virgin of noble blood must be surrendered to him, and the lot fell upon Hesiônê, daughter of Laomedôn himself. Hêraklês arriving at this critical moment, killed the monster by the aid of a fort built for him by Athênê and the Trojans<sup>3</sup>, so as to rescue both the exposed maiden and the people; but Laomedôn, by a second act of perfidy, gave him mortal horses in place of the matchless animals which had been promised. Thus

defrauded of his due, Hēraklēs equipped six ships, attacked and captured Troy and killed Laomedōn<sup>1</sup>, giving Hesione to his friend and auxiliary Telamōn, to whom she bore the celebrated archer Teukros<sup>2</sup>. A painful sense of this expedition was preserved among the inhabitants of the historical town of Ilium, who offered no worship to Hēraklēs<sup>3</sup>.

Capture of Ilium by Hēraklēs.

Among all the sons of Laomedōn, Priam<sup>4</sup> was the only one who had remonstrated against the refusal of the well-earned guerdon of Hēraklēs; for which the hero recompensed him by placing him on the throne. Many and distinguished were his sons and daughters, as well by his wife Hekabē, daughter of Kissens, as by other women<sup>5</sup>. Among the sons were Hæctōr<sup>6</sup>, Paris, Dēiphobus, Helenus,

Priam and his offspring.

<sup>1</sup> *Iliad*, i. 640. Meneklēs (ap. Schol. Venet. ad hoc.) affirmed that this expedition of Hēraklēs was a fiction; but Thukydides gave, besides other exploits of the hero in the same neighbourhood, at Trōiē Hypoplakidē (Schol. *Iliad*, vi. 396).

<sup>4</sup> As Dardanius, Trōs and Ilus are respectively eponyms of Dardania, Troy and Ilium, so Priam is eponym of the metropolis *Prigmenia*. *Ἰλίου* is in the *Ἰλλίῃ* dialect *Ἰλίου* (*Ilion*); upon which Ahrens remarks, "Ceterum ex hac *Ἰλλίῃ* nominis forma apparet, Priamum non minus arctis *Ἰλλίου* eponymum esse, quam Ilum urbes, Trōem populi: *Ἰλλίου* enim + *Ἰλλίου* nomen est, + *lx* γ. mutato." <sup>6</sup> Heitor was affirmed, both by Strachorn and Hykin, to be the son of Apollo (Strachorn, ap. Schol. Ven. ad *Iliad*, xxv. 249; Hykin *Prigmen*, xv. ed. Schomdegen): both *Ἰλλίου* (Fr. 125, Meneklēs) and Alexander Etolus follow the same idea. Strachorn further stated, that after the virgin Apollo had carried Hekabē away into Lykia to rescue her from captivity (Pausanias, i. 27, 1): according to Euripides, Apollo had promised that she should die in Troy (Trach. 427).

By Sappho, Hector was given as a succumb of Zeus, son of Perse

Paris—his  
judgment  
on the three  
goddesses.

The birth of Paris was preceded by formidable presages; for Hekabê dreamt that she was delivered of a firebrand, and Priam, on consulting the soothsayers, was informed that the son about to be born would prove fatal to him. Accordingly he directed the child to be exposed on Mount Ida; but the inauspicious kindness of the gods preserved him, and he grew up amidst the flocks and herds, active and beautiful, fair of hair and symmetrical in person, and the special favourite of Aphrodîtê<sup>1</sup>.

It was to this youth, in his solitary shepherd's walk on Mount Ida, that the three goddesses Hêrê, Athênâ, and Aphrodîtê were conducted, in order that he might determine the dispute respecting their comparative beauty, which had arisen at the nuptials of Pêleus and Thetis,—a dispute brought about in pursuance of the arrangement, and in accomplishment of the deep-laid designs, of Zeus. For Zeus, remarking with pain the immoderate numbers of the then existing heroic race, pitied the earth for the overwhelming burden which she was compelled to bear, and determined to lighten it by exciting a destructive and long-continued war<sup>2</sup>. Paris awarded the palm of beauty to Aphro-

(Hesychius, *v. Πάριος*); a prince belonging to the royal family of Chios, anterior to the Ionic settlement, as mentioned by the Chian poet Ion (Pausan. viii. 3, 3), who so called.

<sup>1</sup> *Iliad*, iii. 45-55; *Scholi. Iliad*, iii. 525; *Hygin.* fab. 91; *Apollodôr.* iii. 12, 5.

<sup>2</sup> This was the motive assigned to Zeus by the old *epic* poem, the Cyprian Version (Frag. 1. Dindorf. p. 12; ap. *Scholi. ad Iliad.* i. 4):—

ditô, who promised him in recompense the possession of Helena, wife of the Spartan Menelaus,—the daughter of Zeus and the fairest of living women. At the instance of Aphroditê, ships were built for him, and he embarked on the enterprise so fraught with eventual disaster to his native city, in spite of the menacing prophecies of his brother Helenos, and the always neglected warnings of Kassandra<sup>1</sup>.

Paris, on arriving at Sparta, was hospitably entertained by Menelaus as well as by Kastôr and Pollux, and was enabled to present the rich gifts which he had brought to Helen<sup>2</sup>. Menelaus then departed to Krête, leaving Helen to entertain his

The same motive is touched upon by Eurip. *Orest.* 1635; Helen. 35; and seriously maintained, as it seems, by Chrysippus, ap. Pictageli. *Strom. Rep.* p. 1649; but the poets do not commonly go back further than the passion of Paris for Helen (*Tricognus*, 1252; *Simulac. Aeneid.* Prugin 6, 118).

The judgement of Paris was one of the scenes represented on the ancient chest of Kypselus at Olympia (*Pausan.* i. 19, 1).

<sup>1</sup> Argument of the *Ἦναι Κίρρῳ* (ap. Diemer, p. 10). These narrations of Kassandra form the subject of the obscure and alluded poem of *Lygdamides*.

<sup>2</sup> According to the Cyprian Version, Helena was daughter of Zeus by Nemesis, who had in vain tried to evade the commitment (*Athenae.* xiii. 334). Homos (Schol. Pindar. *Sonn.* x. 150) represented her as daughter of Okeanus and Telphus, an account which supplies (*Frug.* 17; *Schneider* in; *Pausanias* i. 1. 33, 7; *Apollodorus* iii. 10, 7; and *Isokrates* (*Harmon.* Helen. v. 2, p. 366, *Auger*) reconciles the pretensions of Ido and Siquon to a sort of joint ancestry with Herakleides, De *Carmichael* Cyprian, p. 45-46).

Trojan guest—a favourable moment which was employed by Aphroditè to bring about the intrigue and the elopement. Paris carried away with him both Helen and a large sum of money belonging to Menelaus—made a prosperous voyage to Troy—and arrived there safely with his prize on the third day<sup>1</sup>.

Menelaus, informed by Iris in Krète of the perfidious return made by Paris for his hospitality, hastened home in grief and indignation to consult with his brother Agamemnôn, as well as with the venerable Nestôr, on the means of avenging the outrage. They made known the event to the Greek chiefs around them, among whom they found universal sympathy: Nestôr, Palamêdês and others went round to solicit aid in a contemplated attack of Troy, under the command of Agamemnôn, to whom each chief promised both obedience and unwearied exertion until Helen should be recovered<sup>2</sup>. Ten

<sup>1</sup> Herodot. ii. 117. He gives distinctly the assertion of the Cyprian Verses which contradicts the argument of the poem as it appears in Proclus (Fragm. l. 1.), according to which latter, Paris is driven out of his course by a storm and captures the city of Salôn. Homer (Iliad. vi. 223) seems however to countenance the statement in the argument.

That Paris was guilty of robbery, as well as of the abduction of Helen, is several times mentioned in the Iliad (ii. 144; vii. 360-361), also in the argument of the Cyprian Verses (see Pœschel, Agam. 534).

<sup>2</sup> The ancient epim (Schol. ad Il. ii. 286-330) does not recognise the story of the numerous suitors of Helen, and the oath by which Tyndarons bound them all before he made the selection among them, that each should swear not only to acquiesce, but even to aid in maintaining undisturbed possession to the husband whom she should choose. This story seems to have been first told by Stœsichorus (see Fragm. 23) ed. Kœhne; Apollod. iii. 10, 8). Yet it was evidently one of the prominent features of the current legend in the time of Theophrastus (i. 9; Euphrat. Iphig. Auf. 81-80; Soph. Ajax. 1100).

The exact spot in which Tyndarons exacted this oath from the suitors, near Sparta, was pointed out even in the time of Pausanias (iii. 20, 1).

years were spent in equipping the expedition. The goddesses Hérè and Athénè, incensed at the preference given by Paris to Aphroditè, and animated by steady attachment to Argos, Sparta and Mykênæ, took an active part in the cause; and the horses of Hérè were fatigued with her repeated visits to the different parts of Greece<sup>1</sup>.

Expedition of the Hæccks to recover her.

By such efforts a force was at length assembled at Aulis<sup>2</sup> in Bœœtia, consisting of 1186 ships and more than 100,000 men,—a force outnumbering by more than ten to one anything that the Trojans themselves could oppose, and superior to the defenders of Troy even with all her allies included<sup>3</sup>. It comprised heroes with their followers from the extreme points of Greece—from the north-western portions of Thessaly under Mount Olympus, as well as the western islands of Dulichium and Ithaca, and the eastern islands of Krète and Rhodes. Agamemnôn himself contributed 100 ships manned with the subjects of his kingdom of Mykênæ, besides furnishing 60 ships to the Arcadians, who possessed none of their own. Menelaus brought

Heroes from all parts of Greece combined under Agamemnôn.

<sup>1</sup> *Iliad*, iv. 27-35; xxy. 745. Argument, *Carm. Cypri*. The point is emphatically touched upon by Dio Chrysostom (*Orat.* xi. p. 335-336) in his assault upon the old legend. 'Two years' preparation'—in *Dionys. Grec.* i. 16.

<sup>2</sup> The Spartan king Agesilaus, when about to start from Greece on his expedition into Asia Minor (396 B.C.), went to Aulis personally, in order that he too might sacrifice on the spot where Agamemnôn had sacrificed when he sailed for Troy (*Xenoph. Hellen.* iii. 4, 4).

Skyllax (c. 40) notices the *temple* at Aulis, and nothing else; it seems to have been like the adjoining Delium, a temple with a small village grown up around it.

Aulis is recognized as the port from which the expedition started in the *Homeric Works and Days* (v. 624).

with him 60 ships, Nestor from Pylos 90, Idomeneus from Krète and Diomedes from Argos 60 each. Forty ships were manned by the Eleians, under four different chiefs; the like number under Meges from Dulichium and the Echinades, and under Thoas from Kalydon and the other Ætolian towns. Odysseus from Ithaca, and Ajax from Salamis, brought 12 ships each. The Abantes from Eubœa, under Elephenor, filled 40 vessels; the Boeotians, under Peneleos and Lætus, 30; the inhabitants of Orchomenus and Aspledon, 30; the light-armed Locrians, under Ajax son of Oileus<sup>1</sup>, 40; the Phœkiens as many. The Athenians, under Menestheus, a chief distinguished for his skill in marshalling an army, mustered 50 ships; the Myrmidons from Phthia and Hellas, under Achilles, assembled in 50 ships; Protesilaus from Phylakê and Pyrasus, and Eurypylus from Ormenium, each came with 40 ships; Machaon and Podaleirius, from Triikka, with 30; Admêtus, from Phœræ and the lake Boebœis, with 11; and Philoktêtês from Melibœa with 7; the Lapithæ, under Polypcetês, son of Peirithous, filled 40 vessels; the Ævianes and Perrhæbians, under Guneus<sup>2</sup>, 22; and the Magnêtês, under Prothous, 40; these last two were from the northernmost parts of Thessaly, near the mountains Pélion and Olympus. From Rhodes, under Tlepolemus, son of Hêraklês, appeared 9 ships; from Symê, under the comely but effeminate Nireus, 3; from

Kôs, Krapathus and the neighbouring islands, 36, under the orders of Pheidippus and Antiphus, sons of Thessalus and grandsons of Hēraklēs<sup>1</sup>.

Among this band of heroes were included the distinguished warriors Ajax and Diomēdēs, and the sagacious Nestōr; while Agamemnon himself, scarcely inferior to either of them in prowess, brought with him a high reputation for prudence in command. But the most marked and conspicuous of all were Achilles and Odysseus; the former a beautiful youth born of a divine mother, swift in the race, of fierce temper and irresistible might; the latter not less efficient as an ally from his eloquence, his unfiring endurance, his inexhaustible resources under difficulty, and the mixture of daring courage with deep-laid cunning which never deserted him<sup>2</sup>; the blood of the arch-deceiver Slayphus, through an illicit connexion with his mother Antiklēia, was said to flow in his veins<sup>3</sup>, and he was especially patronised and protected by the goddess Athēnē. <sup>1</sup> See the Catalogue in the second book of the *Iliad*. There must probably have been a Catalogue of the Greeks also in the *Cyprian Version*; for a Catalogue of the allies of Troy is specially noticed in the Argument of Proclus (p. 12, Dindorf).

Euripides (*Iphig. Aul.* 165-366) devotes one of the songs of the Chorus to a partial Catalogue of the chief heroes.

According to Dictys Cretensis, all the principal heroes engaged in the expedition were kinsmen, all Pelopids (i. 14); they take an oath not to lay down their arms until Helen shall have been recovered, and they receive from Agamemnon a large sum of gold.

pedition, had even simulated insanity; but Palamedæus, sent to Ithaca to invite him, tested the reality of his madness by placing in the furrow where Odysseus was ploughing, his infant son Telemachus. Thus detected, Odysseus could not refuse to join the Achaean host, but the prophet Halitherses predicted to him that twenty years would elapse before he revisited his native land<sup>1</sup>. To Achilles the gods had promised the full effulgence of heroic glory before the walls of Troy; nor could the place be taken without both his co-operation and that of his son after him. But they had forewarned him that this brilliant career would be rapidly brought to a close; and that if he desired a long life, he must remain tranquil and inglorious in his native land. In spite of the reluctance of his mother Thetis, he preferred few years with bright renown, and joined the Achæan host<sup>2</sup>. When Nestor and Odysseus came to Phthia to invite him, both he and his intimate friend Patroclus eagerly obeyed the call<sup>3</sup>.

Agamemnon and his powerful host set sail from Aulis; but being ignorant of the locality and the direction, they landed by mistake in Teuthrania, a part of Mysia near the river Kalkus, and began to

Other Greek chiefs were not less reluctant than Odysseus to take part in the expedition; see the tale of Permandrus, forming a part of the temple-legend of the Achilleion at Tanagra in Boeotia (Plutarch, *Quæstion. Græc.* p. 299).

ravage the country under the persuasion that it was the neighbourhood of Troy. Telephus, the king of the country<sup>1</sup>, opposed and repelled them, but was ultimately defeated and severely wounded by Achilles. The Greeks now, discovering their mistake, retired; but their fleet was dispersed by a storm and driven back to Greece. Achilles attacked and took Skyrus, and there married Deidamia, the daughter of Lycomèdès<sup>2</sup>. Telephus, suffering from his wounds, was directed by the oracle to come to Greece and present himself to Achilles to be healed, by applying the scrapings of the spear with which the wound had been given: thus restored, he became the guide of the Greeks when they were prepared to renew their expedition<sup>3</sup>.

The Grecians best mistakes Teuthrania for Troy—Telephus.

<sup>1</sup> Telephus was the son of Angè, daughter of king Aleus of Tegea in Arcadia, by Héraklès: respecting her romantic adventures, see the previous chapter on Arcadian legends—Strabo's faith in the story (xii. p. 572).

The spot called the Harbour of the Achæans, near Gythium, was stated to be the place where Agamemnon and the chiefs took counsel whether they should attack Telephus or not (Skylax, c. 37; compare Strabo, xiv. p. 622).

Euripidès had treated the adventure of Telephus in this lost tragedy: he gave the miraculous cure with the dust of the spear, *σπέρμα λευκῆς δόρυς περικρατὸς*. *Diktya* softens down the prodigy: "Achilles cum Machaone et Podalirio allibentes curam rubens," &c. Pliny (xxxiv. 15) gives to the rust of brass or iron a place in the list of genuine remedies.

"Longe omnino a Tiberi ad Cileam: quo in loco etiam Agamemnonem erosset, nisi ibidem Telephum invenisset" (Cicero, *Pro L. Flacco*, c. 29). The portions of the Trojan legend treated in the lost epics and the tragedies, seem to have been just as familiar to Cicero as those noticed in the *Iliad*.

Strabo pays comparatively little attention to any portion of the Trojan war except what appears in Homer. He even goes so far as to give a

The armament was again assembled at Aulis, but the goddess Artemis, displeased with the boastful language of Agamemnon, prolonged the duration of adverse winds, and the offending chief was compelled to appease her by the well-known sacrifice of his daughter Iphigeneia<sup>1</sup>. They then proceeded to Tenedos, from whence Odysseus and Menelaus were despatched as envoys to Troy, to redemand Helen and the stolen property. In spite of the prudent counsels of Antenor, who received the two Grecian chiefs with friendly hospitality, the Trojans rejected the demand, and the attack was resolved upon. It was foredoomed by the gods that the Greek who first landed should perish: Protesilaus was generous enough to put himself upon this forlorn hope, and accordingly fell by the hand of Hector.

reason why the Ammonians did not come to the aid of Priam: they were at enmity with him, because Priam had aided the Phrygians against them (Hesl. l. c. 138); in Strabo, τοῦ Ἰδίου must be a mistake for τοῦ Φαίητος. Strabo can hardly have read, and never alludes to, Arktunus; in whose name the brave and beautiful Penthesilea, at the head of her Amazon, forms a marked epoch and incident of the war (Strabo, l. c. 552).

<sup>1</sup> Nothing occurs in Homer respecting the sacrifice of Iphigeneia (see Schol. Ven. ad Il. ii. 145).

<sup>2</sup> No portion of the Homeric Catalogue gave more trouble to Dindorfius of Skópus and the other expositors than these Alizônians (Strabo, iii. p. 549; xiv. p. 663): a Strabonian place called Alizonium, in the region of Ida, was put up to meet the difficulty (τὴν ἁλιζώνων, τοῦ Ἰδίου πικρὰ λαογράφου ἀπὸ τοῦ τοῦ ἁλιζώνων ἐκδοθέντος, &c., Strabo, l. c.).

Phrygians, Thracians and Pæonians<sup>1</sup>. But vain was the attempt to oppose the landing of the Greeks: the Trojans were routed, and even the invulnerable Kyknus<sup>2</sup>, son of Poseidôn, one of the great bulwarks of the defence, was slain by Achilles. Having driven the Trojans within their walls, Achilles attacked and stormed Lyrnæssus, Pédasus, Lesbos and other places in the neighbourhood, twelve towns on the sea-coast and eleven in the interior: he drove off the oxen of Æneas and pursued the hero himself, who narrowly escaped with his life: he surprised and killed the youthful Tróilus, son of Priam, and captured several of the other sons, whom he sold as prisoners into the islands of the Ægean<sup>3</sup>. He acquired as his captive the fair Briseïs, while Chryseïs was awarded to Agamemnon: he was moreover eager to see the divine Helen, the prize and stimulus of this memorable

<sup>1</sup> See the Catalogue of the Trojans (Iliad, ii. 815-877).

<sup>2</sup> Kyknus was said by later writers to be king of Kolônai in the Troad (Strabo, xiii. p. 589-593; Arrian, *Rhetoric*, ii. 29). Æschylus introduced upon the Attic stage both Kyknus and Memnon in heroic equipments (Aristophanes, *Ban.* 957. *Ὀὐδ' ἀνέλεσθ' ἄνδρα Κύνον ὄντα τὸν Μήνορα καὶ Μενέστροφον ἄνδρα*). Compare Welcker, *Æschyl.* Trilogie, p. 463.

<sup>3</sup> Iliad, xxiv. 752; Argument of the Cypria, pp. 11, 12, Dantzer. These desultory exploits of Achilles furnished much interesting romance to the later Greek poets (see Parthenius, *Narrat.* 21). See the neat summary of the principal events of the war in Quintus Smyrna, xiv. 125-140; Dio Chrysost. Or. xi. p. 338-342.

Tróilus is only once named in the Iliad (xxiv. 250); he was mentioned also in the Cypria; but his youth, beauty, and untimely end made him an object of great interest with the subsequent poets. Sophocles had a tragedy called *Tróilus* (Welcker, *Griechisch. Tragik*, i. p. 124); the *δραματὶς δεινότης* descended, out of the fragment. Even earlier than Sophocles, the beauty was celebrated by the tragedian Phrynicus (Athenæ, xii. p. 264; Virgil, *Æneid*, i. 674, Lycophron, 357).

struggle : and Aphrodité and Thetis contrived to bring about an interview between them<sup>1</sup>.

At this period of the war the Grecian army was deprived of Palamédès, one of its ablest chiefs. Odysseus had not forgiven the artifice by which Palamédès had detected his simulated insanity, nor was he without jealousy of a rival clever and cunning in a degree equal, if not superior, to himself ; one who had enriched the Greeks with the invention of letters, of dice for amusement, of night-watches, as well as with other useful suggestions. According to the old Cyprian epic, Palamédès was drowned while fishing, by the hands of Odysseus and Diomédès<sup>2</sup>. Neither in the *Iliad* nor the *Odyssey* does the name of Palamédès occur : the lofty position which Odysseus occupies in both those poems—noticed with some degree of displeasure even by Pindar, who described Palamédès as the wiser man of the two—is sufficient to explain the omission<sup>3</sup>. But in the more advanced period of the Greek mind, when intellectual superiority came to acquire a higher place in the public esteem as compared with military prowess, the character of Palamédès, combined with his unhappy fate, ren-

dered him one of the most interesting personages in the Trojan legend. *Æschylus*, *Sophoklés* and *Euripidés* each consecrated to him a special tragedy; but the mode of his death as described in the old epic was not suitable to Athenian ideas, and accordingly he was represented as having been falsely accused of treason by *Odysseus*, who caused gold to be buried in his tent, and persuaded *Agamemnôn* and the Grecian chiefs that *Palamédès* had received it from the Trojans<sup>1</sup>. He thus forfeited his life, a victim to the calumny of *Odysseus* and to the delusion of the leading Greeks. In the last speech made by the philosopher *Sokratés* to his Athenian judges, he alludes with solemnity and fellow-feeling to the unjust condemnation of *Palamédès*, as analogous to that which he himself was about to suffer; and his companions seem to have dwelt with satisfaction on the comparison. *Palamédès* passed for an instance of the slanderous enmity and misfortune which so often wait upon superior genius<sup>2</sup>.

*Welcker* (*Griechisch. Tragöd.* v. 4. p. 180, vol. II. p. 500) has evolved with ingenuity the remaining fragments of the lost tragedian.

According to *Diktya*, *Odysseus* and *Diomedés* threw him upon *Palamédès* to be let down into a deep well, and then cast stones upon him (*ib.* 15).

*Xenophon* (*De Venatione.* c. 1) evidently recognises the story in the *Cyria*, that *Odysseus* and *Diomedés* caused the death of *Palamédès*; but he cannot believe that two such exemplary men were really guilty of so iniquitous an act—*οὐκ ἔστι τῶν ἀνδρῶν τὸ δόσαν*.

One of the eminences near *Napoli* still bears the name of *Palamédès*.

In these expeditions the Grecian army consumed nine years, during which the subdued Trojans dared not give battle without their walls for fear of Achilles. Ten years was the fixed epical duration of the siege of Troy, just as five years was the duration of the siege of Kamikus by the Krétan armament which came to avenge the death of Minôs<sup>1</sup>: ten years of preparation, ten years of siege, and ten years of wandering for Odysseus, were periods suited to the rough chronological dashes of the ancient epic, and suggesting no doubts nor difficulties with the original hearers. But it was otherwise when the same events came to be contemplated by the historicising Greeks, who could not be satisfied without either finding or inventing satisfactory bonds of coherence between the separate events. Thucydides tells us that the Greeks were less numerous than the poets have represented, and that being moreover very poor, they were unable to procure adequate and constant provisions: hence they were compelled to disperse their army, and to employ a part of it in cultivating the Chersonese, — a part in marauding expeditions over the neighbourhood. Could the whole army have been employed against Troy at once (he says), the siege would have been much more speedily and easily concluded<sup>2</sup>. If the great historian could permit himself thus to amend the legend in so many points, we might have imagined that the simpler course

<sup>1</sup> Herodot. iii. 170. Ten years is a proper mythical period for a great war to last: the war between the Olympian gods and the Titan gods lasts ten years (Hesiod, *Theogon.* 616). Compare *δωδεκάετηρος* (Homer, *Odys.* xvi. 17).

<sup>2</sup> Thucyd. i. 11

would have been to include the duration of the siege among the list of poetical exaggerations, and to affirm that the real siege had lasted only one year instead of ten. But it seems that the ten years' duration was so capital a feature in the ancient tale, that no critic ventured to meddle with it.

A period of comparative intermission however was now at hand for the Trojans. The gods brought about the memorable fit of anger of Achilles, under the influence of which he refused to put on his armour, and kept his Myrmidons in camp. According to the Cypria, this was the behest of Zeus, who had compassion on the Trojans: according to the *Iliad*, Apollo was the originating cause<sup>1</sup>, from anxiety to avenge the injury which his priest Chrysæus had endured from Agamemnon. For a considerable time, the combats of the Greeks against Troy were conducted without their best warrior, and severe indeed was the humiliation which they underwent in consequence. How the remaining Grecian chiefs vainly strove to make amends for his absence—how Hector and the Trojans defeated and drove them to their ships—how the actual blaze of the destroying flame, applied by Hector to the ship of Protesilaus, roused up the anxious and sympathising Patroklos, and extorted a reluctant consent from Achilles, to allow his friend and his followers to go forth and avert the last extremity of ruin—how Achilles, when Patroklos had been killed by Hector, forgetting his anger in grief for the death of his friend, re-entered the fight, drove

the Trojans within their walls with immense slaughter, and satiated his revenge both upon the living and the dead Hectôr—all these events have been chronicled, together with those divine dispensations on which most of them are made to depend, in the immortal verse of the *Iliad*.

Homer breaks off with the burial of Hectôr, whose body has just been ransomed by the disconsolate Priam; while the lost poem of Arktinus, entitled the *Æthiopis*, so far as we can judge from the argument still remaining of it, handled only the subsequent events of the siege. The poem of Quintus Smyrnaeus, composed about the fourth century of the Christian æra, seems in its first books to coincide with the *Æthiopis*, in the subsequent books partly with the *Ilias Minor* of Leschês<sup>1</sup>.

The Trojans, dismayed by the death of Hectôr, were again animated with hope by the appearance of the warlike and beautiful queen of the Amazons, Penthesileia, daughter of Arès, hitherto invincible in the field, who came to their assistance from Thrace at the head of a band of her countrywomen. She again led the besieged without the walls to encounter the Greeks in the open field; and under her auspices the latter were at first driven back, until she too was slain by the invincible arm of Achilles. The victor, on taking off the helmet of his fair enemy as she lay on the ground, was profoundly affected and captivated by her charms, for which he was scornfully taunted by Thersitès: ex-

asperated by this rash insult, he killed Thersitês on the spot with a blow of his fist. A violent dispute among the Grecian chiefs was the result, for Diomêdês, the kinsman of Thersitês, warmly resented the proceeding; and Achilles was obliged to go to Lesbos, where he was purified from the act of homicide by Odysseus<sup>1</sup>.

Next arrived Memnôn, son of Tithôus and Eôs, the most stately of living men, with a powerful band of black Æthiopians, to the assistance of Troy. Sallying forth against the Greeks, he made great havoc among them: the brave and popular Antilochus perished by his hand, a victim to filial devotion in defence of Nestôr<sup>2</sup>. Achilles at length attacked him, and for a long time the combat was doubtful between them: the prowess of Achilles and the supplication of Thetis with Zeus finally prevailed; whilst Eôs obtained for her vanquished son the consoling gift of immortality. His tomb, however<sup>3</sup>, was shown near the Propontis, within a

In the Philoktetês of Sophoklês, Thersitês survives Achilles (Soph. Phil. 358-445).

<sup>2</sup> Odys. xi. 522. *Κείνῳ δὲ καὶ Ἀχιλλεύς ἔδωκε, μὲν Μῆνωνα δῖος*: see also Odys. iv. 157; Pindar, Pyth. vi. 31. Æschylus (ap. Strabo, xv. p. 728) connects Memnôn as a Persian starting from Susa.

Ktâinos gives in his history full details respecting the expedition of Memnôn, sent by the king of Assyria to the relief of his dependent, Priam of Troy; all this was said to be recorded in the royal archives. The Egyptians affirmed that Memnôn had come from Egypt (Diodor. ii. 22; compare iv. 771) the two stories are blended together in Pausanias, x. 31, 2. The Phrygians pointed out the road along which he had marched.

<sup>3</sup> Argum. Æth. ut sup.; Quint. Smyrn. ii. 396-500, Pausan. x. 31, 1. Pindar, in praising Achilles, dwells much on his triumphs over Hector, Telephus, Memnôn, and Kyklops, but never notices Penthesileia (Olymp. ii. 90, Nem. iii. 63; vi. 52. Isthm. x. 43).

Æschylus, in the *Phrygians*, introduced Thetis and Eôs each in

few miles of the mouth of the river *Æsêpus*, and was visited annually by the birds called *Memnonides*, who swept it and bedewed it with water from the stream. So the traveller *Pausanias* was told, even in the second century after the Christian æra, by the *Hellespontine* Greeks.

Death of  
Achilles.

But the fate of *Achilles* himself was now at hand. After routing the *Trojans* and chasing them into the town, he was slain near the *Skæan* gate by an arrow from the quiver of *Paris*, directed under the unerring auspices of *Apollo*<sup>1</sup>. The greatest efforts were made by the *Trojans* to possess themselves of the body, which was however rescued and borne off to the *Grecian* camp by the valour of *Ajax* and *Odysseus*. Bitter was the grief of *Thetis* for the loss of her son: she came into the camp with the *Muses* and the *Nêreids* to mourn over him; and when a magnificent funeral-pile had been prepared by the *Greeks* to burn him with every mark of honour, she stole away the body and conveyed it to a renewed and immortal life in the island of *Leukê* in the *Euxine* Sea. According to some accounts he was there blest with the nuptials and company of *Helen*<sup>2</sup>.

*Thetis* celebrated splendid funeral games in honour of her son, and *Zeus* weighing in his golden scales the souls of *Achilles* and *Memnon* (*Schol. Odysseus and Ajax became rivals for the distinction, when Athēnē, together with some Trojan prisoners, who were asked from which of the two their country had sustained greatest injury, decided in favour of the former. The gallant Ajax lost his senses with grief and humiliation: in a fit of phrenzy he slew some sheep, mistaking them for the men who had wronged him, and then fell upon his own sword<sup>1</sup>.

The heroic or divine empire of Achilles in Scythia was recognised by Alkæus the poet (Alkæi Fragm. Schneidew. Fr. 46), Ἀχαιῶν, ἡ γῆς Ζεὶ δῖος πόλις. Eustathius (ad Dionys. Perieget. 307) gives the story of his having followed Iphigenia thither: compare Antonin. Liberal. 27.

Ibykus represented Achilles as having espoused Mēden in the Elysian Field (Ibyk. Fragm. 15, Schneidew.). Simoniades followed this story (ap. Scholl. Apoll. Rhod. iv. 815).

<sup>1</sup> Argument of *Ethiopsis* and *Iliad Minor*, and Fragm. 2 of the latter, pp. 17, 18, Düntz.; Quint. Smyrn. v. 120–122; Hom. Odys. xi. 550; Pindar, Nem. vii. 26. The Ajax of Sophokles, and the contending speeches between Ajax and Ulysses in the beginning of the thirteenth book of Ovid's *Metamorphoses*, are too well known to need special reference.

The suicide of Ajax seems to have been described in detail in the *Ethiopsis*; compare Pindar, Isthm. iii. 51, and the Scholia ad loc., which show the attention paid by Pindar to the minute circumstances of the old epic. See Fragm. 2 of the *Ἰλιάς Μικρά* of Arctinus, in Düntz. p. 22, which would seem more properly to belong to the *Ethiopsis*. Diktya relates the suicide of Ajax, as a consequence of his unsuccessful competition with Odysseus, not about the arms of Achilles, but about the Palladium, after the taking of the city (v. 14).

There were, however, many different accounts of the manner in which Ajax had died, some of which are enumerated in the argument to the drama of Sophokles. Ajax is never wounded in the *Iliad*. Aeschylus made him invulnerable except under the armpits (see Schol. ad Sophokl. Ajax. 855); the Trojans pelted him with mud—*ἄνθρωποι πέλοντες ἐν αὐτῷ πέτραις*. (Schol. *Iliad*. xiv. 404.)

Odysseus now learnt from Helenus son of Priam, whom he had captured in an ambuscade<sup>1</sup>, that Troy could not be taken unless both Philoktêtês and Neoptolemus, son of Achîlles, could be prevailed upon to join the besiegers. The former, having been stung in the foot by a serpent, and becoming insupportable to the Greeks from the stench of his wound, had been left at Lemnus in the commencement of the expedition, and had spent ten years<sup>2</sup> in misery on that desolate island; but he still possessed the peerless bow and arrows of Hêraklês, which were said to be essential to the capture of Troy. Diomêdês fetched Philoktêtês from Lemnus to the Grecian camp, where he was healed by the skill of Machaôn<sup>3</sup>, and took an active part against the Trojans—engaging in single combat with Paris, and killing him with one of the Hêrakleian arrows. The Trojans were allowed to carry away for burial the body of this prince, the fatal cause of all their sufferings; but not until it had been mangled by the hand of Menelaus<sup>4</sup>. Odysseus went to the island

<sup>3</sup> According to Sophoklês, Hêraklês sends Asklepiôs to Troy to heal Philoktêtês (Soph. Philokt. 1415).

The subject of Philoktêtês formed the subject of a tragedy both by Æschylus and by Euripides (both lost) as well as by Sophoklês.

Smyrn. x. 240; he differs here in many respects from the arguments of the old poems as given by Pausanias, both as to the incidents and as to their order in time (Diktya, iv. 26). The wounded Paris flies to Eubœa, when he had deserted in order to follow Helen, and entreats her to cure him by her

of Skyrus to invite Neoptolemus to the army. The untried but impetuous youth gladly obeyed the call, and received from Odysseus his father's armour, while on the other hand, Eurypylus, son of Téléphus, came from Mysia as auxiliary to the Trojans and rendered to them valuable service—turning the tide of fortune for a time against the Greeks, and killing some of their bravest chiefs, amongst whom was numbered Peneleôs, and the unrivaled leech Machaôn<sup>1</sup>. The exploits of Neoptolemus were numerous, worthy of the glory of his race and the renown of his father. He encountered and slew Eurypylus, together with numbers of the Mysian warriors: he routed the Trojans and drove them within their walls, from whence they never again emerged to give battle: nor was he less distinguished for his good sense and persuasive diction, than for forward energy in the field<sup>2</sup>.

skill in temples: she refuses, and permits him to die; she afterwards stings with remorse, and hangs herself (Quint. Smyrn. x. 285-331; Apollodôr. iii. 12, 6; Conon, Narrat. 23; see *Recherches de Mémorial, Comment. sur les Épîtres d'Osyle*, t. i. p. 156). The story of Eriphô is as old as Hellanikus and Kephallôn of Gergis (see *Hellân. Fragm.* 126, Didot).

<sup>1</sup> To mark the way in which these legendary events perished and became embodied in the local worship, I may mention the received practice in the great temple of Asklepius (father of Machaôn) at Pergamum, even in the time of Pausanias. Téléphus, father of Eurypylus, was the local hero and mythical king of Teuthrania, in which Pergamum was situated. In the hymns there sung, the *proemi* and the invocation were addressed to Téléphus; but nothing was said in them about Eurypylus, nor was it permitted even to mention his name in the temple,—“they knew him to be the slayer of Machaôn”: ἀρχοντι μὲν ἀπὸ Τηλέφω τοῦ ἱεροῦ, προσφώνουσι δὲ οὐδὲν ἐκ τοῦ Εὐρύπλου, οὐδὲ ἀρχὴν ἐκ τοῦ αὐτοῦ θεῶντος ἀναφέρεται αὐτῷ, οἷα ἐστὶν ἱερὸν, φησὶν ἔστι Μαχάωνος (Pausan. iii. 26, 7).

The combination of these qualities in other Homeric chiefs is suited in a subsequent chapter of this work, *ib. ex. vol. ii. p. 102*.

Capture of  
the Palladium.—  
The wooden  
horse

Troy however was still impregnable so long as the Palladium, a statue given by Zeus himself to Dardannus, remained in the citadel; and great care had been taken by the Trojans not only to conceal this valuable present, but to construct other statues so like it as to mislead any intruding robber. Nevertheless the enterprising Odysseus, having disguised his person with miserable clothing and self-inflicted injuries, found means to penetrate into the city and to convey the Palladium by stealth away: Helen alone recognised him; but she was now anxious to return to Greece, and even assisted Odysseus in concerting means for the capture of the town<sup>1</sup>.

To accomplish this object, one final stratagem was resorted to. By the hands of Epeius of Panopeus, and at the suggestion of Athênê, a capacious hollow wooden horse was constructed, capable of containing one hundred men: the *élite* of the Grecian heroes, Neoptolemus, Odysseus, Menelaus and others, concealed themselves in the inside of it, and the entire Grecian army sailed away to Tenedos, burning their tents and pretending to have abandoned the siege. The Trojans, overjoyed to find themselves free, issued from the city and contemplated with astonishment the fabric which their enemies had left behind: they long doubted what should be done with it; and the anxious heroes from within heard the surrounding consultations,

as well as the voice of Helen when she pronounced their names and counterfeited the accents of their wives<sup>1</sup>. Many of the Trojans were anxious to dedicate it to the gods in the city as a token of gratitude for their deliverance; but the more cautious spirits inculcated distrust of an enemy's legacy; and Laocoön, the priest of Poseidón, manifested his aversion by striking the side of the horse with his spear. The sound revealed that the horse was hollow, but the Trojans heeded not this warning of possible fraud; and the unfortunate Laocoön, a victim to his own sagacity and patriotism, miserably perished before the eyes of his countrymen, together with one of his sons, two serpents being sent expressly by the gods out of the sea to destroy him. By this terrific spectacle, together with the perfidious counsels of Sinon, a traitor whom the Greeks had left behind for the special purpose of giving false information, the Trojans were induced to make a breach in their own walls, and to drag the fatal fabric with triumph and exultation into their city<sup>2</sup>.

<sup>1</sup> *Odyss.* iv. 275; *Virgil. Æneid.* ii. 14; *Heyne, Excurs.* 3. ad *Æneid.* ii. Stasichorus, in his *Idios Hiperis*, gave the number of horses in the wooden horse as one hundred (*Stasichor. Fragm.* 26, ed. *Klein*; compare *Athene.* xiii. p. 610).

Both *Sinon* and *Laocoön* came originally from the old epic poem of *Arctinus*, though *Virgil* may perhaps have immediately borrowed both them, and other matters in his second book, from a poem passing under the name of *Pimander* (see *Macrobi. Satur.* v. 2; *Heyne, Excurs.* 1. ad *Æn.* ii.; *Welcher. Der Hesper. Kyklus*, p. 27). We cannot give credit either to *Arctinus* or *Pimander* for the masterly specimen of oratory which is put into the mouth of *Sinon* in the *Æneid*.

In *Quintus Smyrnaeus* (v. 455) the Trojans torture and mutilate *Sinon*.

Destruc-  
tion of  
Troy.

The destruction of Troy, according to the decree of the gods, was now irrevocably sealed. While the Trojans indulged in a night of riotous festivity, Sinon kindled the fire-signal to the Greeks at Tenedos, loosening the bolts of the wooden horse, from out of which the enclosed heroes descended. The city, assailed both from within and from without, was thoroughly sacked and destroyed, with the slaughter or captivity of the larger portion of its heroes as well as its people. The venerable Priam perished by the hand of Neoptolemus, having in vain sought shelter at the domestic altar of Zeus Herkeios; but his son Deiphobus, who since the death of Paris had become the husband of Helen, defended his house desperately against Odysseus and Menelaus and sold his life dearly. After he was slain, his body was fearfully mutilated by the latter<sup>1</sup>.

to extort from him the truth: his endurance, sustained by the inspiration of Herē, is proof against the extremity of suffering, and he adheres to his false tale. This is probably an incident of the old epic, though the delicate taste of Virgil, and his sympathy with the Trojans, has induced him to omit it. Euphorion ascribed the proceedings of Sinon to Olyssæus; he also gave a different cause for the death of Laocœon (Fr. 35-36, p. 55, ed. Dindorf, in the *Fragmenta of Epic Poets after Alexander the Great*). Sinon is *τρώων ὀδύρων* in Pausan. x. 27, 1.

The night-battle in the interior of Troy was described with all its fearful details both by *Leschiæ* and *Arktinos*: the *Dion Hysios* of the latter seems to have been a separate poem, that of the former constituted a portion of the *Iliad Minor* (see *Weleker, Der Epische Kyklus*, p. 215); the *Dion Hysios* by the lyric poets *Soklides* and *Simonides* probably added many new incidents. *Polygnotus* had painted a succession of the various calamitous scenes, drawn from the poem of

Thus was Troy utterly destroyed—the city, the altars and temples<sup>1</sup>, and the population. Æneas and Antenor were permitted to escape, with their families, having been always more favourably regarded by the Greeks than the remaining Trojans. According to one version of the story, they had betrayed the city to the Greeks: a panther's skin had been hung over the door of Antenor's house as a signal for the victorious besiegers to spare it in the general plunder<sup>2</sup>. In the distribution of the principal captives, Astyanax, the infant son of Hector, was cast from the top of the wall and killed, by Odysseus or Neoptolemus: Polyxena, the daughter of Priam, was immolated on the tomb of Achilles, in compliance with a requisition made by the shade of the deceased hero to his countrymen<sup>3</sup>; while her sister Cassandra was presented as a prize to Agamemnon. She had sought sanctuary at the altar of Athênê, where Ajax, the son of Oileus, making a guilty attempt to seize her, had drawn both upon himself and upon the army the serious wrath of the goddess, insomuch that the Greeks could hardly be restrained from stoning him to death<sup>4</sup>. Helen gladly resumed her union with Menelaus : she accompanied him back to Sparta, and lived with him there many years in comfort and dignity<sup>2</sup>, passing afterwards to a happy immortality in the Elysian fields. She was worshiped as a goddess with her brothers the Dioskuri and her husband, having her temple, statue and altar at Therapne and elsewhere, and various examples of her miraculous intervention were cited among the Greeks<sup>3</sup>. The lyric poet Stesichorus had ventured to denounce her, conjointly with her sister Klytemnêstra, in a tone of rude and plain-spoken severity, resembling that of

He had probably contrasted her with other females carried away by force.

Stesichorus also affirmed that Iphigenia was the daughter of Helen by Theonous, born at Argos before her marriage with Menelaus and made over to Klytemnestra: this tale was perpetuated by the temple of Eileuthys at Argos, which the Argonauts affirmed to have been erected by Helen (Pausan. ii. 22, 7). The ages ascribed by Hellanikus and other logographers (Hellen. Fr. 74) to Theonous and Helen—he fifty years of age and she a child of seven—when he carried her off to Apollinias, can never have been the original form of any poetical legend. These ages were probably imagined in order to make the mythical chronology run smoothly, for Theonous belongs to the generation before the Trojan war. But we ought always to recollect that Helen never grows old (ἤν η γὰρ φέρεται ἰμῶν δ' ὄψιν—Quint. Smyrn. x. 312), and that her chronology consists only with an immortal being. Servius observes (ad *Æneid.* ii. 601)—“*Helena immortalis fuisse indicat tempus. Nam constat fratres ejus cum Argonautis fuisse. Argonautarum alium Theonem (Theonem Eteochi et Polyneia bello) dimicavisse. Item Illium illi contra Trojam bella geruisse. Ergo, si immortalis Helena non fuisset, tot sine dubio secula durare non posset.*” So Xenophon, after enumerating many heroes of different ages, all pupils of Chiron, says that the life of Chiron suffices for all, he being brother of Zeus (*De Venatione.* c. 1).

The daughters of Tyndareus are Klytemnestra, Helen, and Timandra, all open to the charge advanced by Stesichorus: not about Timandra, wife of the Tegeate Echinos, the new fragment of the *Harbula Catalogus*, recently noticed by Grel (Hindling, *Prof. H. vol.* p. iv).

It is curious to read, in Rask's *scholia Hellenica*, his critical discussion of the adventures ascribed to her—as if they were genuine matter of history, more or less correctly reported.

special poem formally retracting the calumny, was permitted to recover his sight. In his poem of recantation (the famous palinode now unfortunately lost) he pointedly contradicted the Homeric narrative, affirming that Helen had never been to Troy at all, and that the Trojans had carried thither nothing but her image or *eidōlon*<sup>1</sup>. It is, probably, to the excited religious feelings of Stesichorus that we owe the first idea of this glaring deviation from the old legend, which could never have been recommended by any considerations of poetical interest.

Other versions were afterwards started, forming a sort of compromise between Homer and Stesichorus, admitting that Helen had never really been at Troy, without altogether denying her elopement. Such is the story of her having been detained in Egypt during the whole term of the siege. Paris, on his departure from Sparta, had been driven thither by storms, and the Egyptian king Prôtœus, hearing of the grievous wrong which he had committed towards Menelaus, had sent him away from the country with severe menaces.

detaining Helen until her lawful husband should come to seek her. When the Greeks reclaimed Helen from Troy, the Trojans assured them solemnly, that she neither was, nor ever had been, in the town; but the Greeks, treating this allegation as fraudulent, prosecuted the siege until their ultimate success confirmed the correctness of the statement, nor did Menelaus recover Helen until, on his return from Troy, he visited Egypt<sup>1</sup>. Such was the story told by the Egyptian priests to Herodotus, and it appeared satisfactory to his historicising mind. "For if Helen had really been at Troy (he argues) she would certainly have been given up, even had she been mistress of Priam himself instead of Paris: the Trojan king, with all his family and all his subjects, would never knowingly have incurred utter and irretrievable destruction for the purpose of retaining her: their misfortune was, that while they

The passage is too long to cite, but is highly curious: not the least remarkable part is the religious colouring which he gives to the new version of the story which he is adopting.—"the Trojans, though they had not got Helen, yet could not persuade the Greeks that this was the fact; for it was the divine will that they should be destroyed root and branch, in order to make it plain to mankind that upon great crimes the gods inflict great punishments."

The Chryseïdæ (Od. xi. p. 551) reasons in the same way as Herodotus against the credibility of the received narrative. On the other hand, Isocrates, in extolling Helen, dwells on the calamities of the Trojan war as a test of the peerless value of the prize (*Evocata*. Hel. p. 360, Aug.): in the view of Pindar (*Olymp. xiii.* 56), as well as in that of Hesiod (*Opp. Di.* 165), Helen is the one prize contended for.

Æschylus, in his tragedy of Helen, recognises the detention of Helen in Egypt and the presence of her children at Troy, but he follows Sæculæus in denying her elopement altogether.—Hecuba had carried her to Egypt in a cloud (Helen. 35—45, 706): compare Von Haff. *De Mythis Helenæ*. did not possess, and therefore could not restore her, they yet found it impossible to convince the Greeks that such was the fact." Assuming the historical character of the war of Troy, the remark of Herodotus admits of no reply; nor can we greatly wonder that he acquiesced in the tale of Helen's Egyptian detention, as a substitute for the "incredible insanity" which the genuine legend imputes to Priam and the Trojans. Pausanias, upon the same ground and by the same mode of reasoning, pronounced that the Trojan horse must have been in point of fact a battering-engine, because to admit the literal narrative would be to impute utter childishness to the defenders of the city. And Mr. Payne Knight rejects Helen altogether as the real cause of the Trojan war, though she may have been the pretext of it, for he thinks that neither the Greeks nor the Trojans could have been so mad and silly as to endure calamities of such magnitude "for one little woman". Mr. Knight suggests various political causes as substitutes; these might deserve consideration, either if any evidence could be produced to countenance them, or if the subject on which they are brought to bear could be shown to belong to the domain of history.

Return of  
the Greeks  
from Troy.

The return of the Grecian chiefs from Troy furnished matter to the ancient epic hardly less copious than the siege itself, and the more susceptible of indefinite diversity, inasmuch as those who had

before acted in concert were now dispersed and isolated. Moreover the stormy voyages and compulsory wanderings of the heroes exactly fell in with the common aspirations after an heroic founder, and enabled even the most remote Hellenic settlers to connect the origin of their town with this prominent event of their ante-historical and semi-divine world. And an absence of ten years afforded room for the supposition of many domestic changes in their native abode, and many family misfortunes and misdeeds during the interval. One of these heroic "Returns," that of Odysseus, has been immortalised by the verse of Homer. The hero, after a series of long-protracted suffering and expatriation, inflicted on him by the anger of Poseidôn, at last reaches his native island, but finds his wife beset, his youthful son insulted, and his substance plundered, by a troop of insolent suitors; he is forced to appear as a wretched beggar, and to endure in his own person their scornful treatment; but finally, by the interference of Athênê coming in aid of his own courage and stratagem, he is enabled to overwhelm his enemies, to resume his family position, and to recover his property. The return of several other Grecian chiefs was the subject of an epic poem by Hagias, which is now lost, but of which a brief abstract or argument still remains; there were in antiquity various other poems of similar title and analogous matter<sup>1</sup>.

As usual with the ancient epic, the multiplied sufferings of this back-voyage are traced to divine

wrath, justly provoked by the sins of the Greeks; who, in the fierce exultation of a victory purchased by so many hardships, had neither respected nor even spared the altars of the gods in Troy; and Athênê, who had been their most zealous ally during the siege, was so incensed by their final recklessness, more especially by the outrage of Ajax, son of Oileus, that she actively harassed and embittered their return, in spite of every effort to appease her. The chiefs began to quarrel among themselves; their formal assembly became a scene of drunkenness; even Agamemnôn and Menelaus lost their fraternal harmony, and each man acted on his own separate resolution<sup>1</sup>. Nevertheless, according to the *Odyssey*, Nestôr, Diomêdês, Neoptolemus, Idomeneus and Philoktêtês, reached home speedily and safely: Agamemnôn also arrived in Peloponnêsus, to perish by the hand of a treacherous wife; but Menelaus was condemned to long wanderings and to the severest privations in Egypt, Cyprus and elsewhere, before he could set foot in his native land. The Lokrian Ajax perished on the Gyrean rock<sup>2</sup>. Though exposed to a terrible storm, he had already reached this place of safety, when he indulged in the rash boast of having escaped in defiance of the gods: no sooner did Poseidôn hear this language, than he struck with his

In respect however to these and other Grecian heroes, tales were told different from those in the *Odyssey*, assigning to them a long expatriation and a distant home. Nestôr went to Italy, where he founded Metapontum, Pisa and Hêrakleia<sup>3</sup>: Philoktêtès<sup>4</sup> also went to Italy, founded Petûlia and Krimisa, and sent settlers to Egesta in Sicily. Neoptolemus, under the advice of Thetis, marched by land across Thrace, met with Odysseus, who had come by sea, at Maroneia, and then pursued his journey to Epirus, where he became king of the Molossians<sup>5</sup>. Idomeneus came to Italy, and founded Uria in the Salentine peninsula: Diomêdês, after wandering

The inhabitants of the Grecian town of Skionè, in the Thracian peninsula called Pallênè or Pellênè, accounted themselves the offspring of the Pellênians from Achæa in Peloponnesus, who had served under Agamemnôn before Troy, and who on their return from the siege had been driven on the spot by a storm and there settled<sup>3</sup>. The Pamphylians, on the southern coast of Asia Minor, deduced their origin from the wanderings of Amphilochus and Kalchas after the siege of Troy: the inhabitants of the Amphilochian Argos on the Gulf of Ambrakia revered the same Amphilochus as their founder<sup>4</sup>. Merion's with his Krêtan followers settled at Engyion in Sicily, along with the preceding Krêtans who had remained there after the invasion of Minôs. The Elymians in Sicily also were composed of Trojans and Greeks separately driven to the spot, who, forgetting their previous differences, united in the joint settlements of Eryx and Eggesta<sup>2</sup>. We hear of Podaleirius both in Italy and on the coast of Karia<sup>3</sup>; of Akamas, son of Thêseus, at Amphipolis in Thrace, at Soli in Cyprus, and at Synnada in Phrygia<sup>4</sup>; of Guneus, Prothous and Eurypylus, in Krête as well as in Libya<sup>5</sup>. The obscure poem of Lycophrôn enumerates many of these dispersed and expatriated heroes, whose conquest of Troy was indeed 'a Kadmeian victory (according to the proverbial phrase of the Greeks), wherein the sufferings of the victor were little inferior to those of the vanquished<sup>6</sup>. It was particularly among the Italian Greeks, where they were worshiped with very special solemnity, that their presence as wanderers from Troy was reported and believed<sup>7</sup>.

culated among the ancients, illustrating the ubiquity of the Grecian and Trojan heroes as well as that of the Argonauts,—one of the most striking features in the Hellenic legendary world'. Amongst them all, the most interesting, individually, is Odysseus, whose romantic adventures in fabulous places and among fabulous persons have been made familiarly known by Homer. The goddesses Kalypso and Circe; the semi-divine mariners of Phæacia, whose ships are endowed with consciousness and obey without a steersman; the one-eyed Cyclopes, the gigantic Læstrygones, and the wind-ruler Æolus; the Sirens who ensnare by their song, as the Loto-phagi fascinate by their food—all these pictures formed integral and interesting portions of the old epic. Homer leaves Odysseus re-established in his house and family; but so marked a personage could never be permitted to remain in the tameness of domestic life: the epic poem called the Telegonia ascribed to him a subsequent series of adventures. After the suitors had been buried by their relatives, he offered sacrifice to the Nymphs, and then went to Elis to inspect his herds of cattle there pasturing: the Eleian Polyxenus welcomed him hospitably,

' Strabo, l. p. 42. After dwelling emphatically on the long voyages of Diogenes, Hæcylus, Jason, Odysseus, and Menelaus, he says, *Μένειος δὲ καὶ Ἀντήνορα καὶ Ἑσπερίαν, καὶ ἀπὸ τῶν ἐς τὸ Τρωϊκοῦ πολέμου πλυσθέντας εἰς τῆσαν τὴν αἰσχυρίαν, ὅβριον μὲν τῶν πολέμων ἀνδράσων οὐκ ἔστιν· Σουθεῖ γὰρ δὴ τὸν τότε Ἰλλυρίαν, ὁμοίαν καὶ τὰς βαρβάρους, διὰ τὴν τῆς στυγρίας χρόνον, ἀποβολαίαν τοῖς ἐν αὐτῇ καὶ τῇ στυγρίᾳ παραμένον· ὥστε μετὰ τῇ τῇ Ὀδυσσέϊ ἀποπροφῆν τὸν τοῦ ἐπιπλοῦτος καὶ λυγροῦς τρωϊστὴν διὰ τὴν ἀσπίδα, οὐ πολλὰ πολλὰ τὸν ἡπτεσθῆναι καὶ παρασκευάσαι ἐκ τοῦ πολέμου. and made him a present of a bowl : Odysseus then returned to Ithaka, and fulfilled the rites and sacrifices prescribed to him by Teiresias in his visit to the under-world. This obligation discharged, he went to the country of the Thesprotians, and there married the queen Kallidikê : he headed the Thesprotians in a war against the Brygians, the latter being conducted by Arês himself, who fiercely assailed Odysseus; but the goddess Athênê stood by him, and he was enabled to make head against Arês until Apollo came and parted them. Odysseus then returned to Ithaka, leaving the Thesprotian kingdom to Polypartês, his son by Kallidikê. Telegonus, his son by Cîrê, coming to Ithaka in search of his father, ravaged the island and killed Odysseus without knowing who he was. Bitter repentance overtook the son for his undesigned parricide : at his prayer and by the intervention of his mother Cîrê, both Penelopê and Télémachus were made immortal : Telegonus married Penelopê, and Télémachus married Cîrê<sup>1</sup>.

We see by this poem that Odysseus was repre-

<sup>1</sup> The Telegonia, composed by Eugamôn of Kyrênê, is lost, but the Argument of it has been preserved by Proclus (p. 25, Dindorf : Dîktya, vi. 15).

Pausanias quotes a statement from the poem called *Thesprotis*, respecting a son of Odysseus and Penelopê, called Poliparthus, born after his return from Troy (vi. 12, 3). Nitzsch (Hist. Homer. p. 97) as well as Lobeck seem to imagine that this is the same poem as the *Telegonia*, under another title.

Aristotle notices an oracle of Odysseus among the Eurytæa, a branch of the Ætolian nation : there were also places in Epirus which boasted of Odysseus as their founder (Schol. ad Lycophrôn. 800) ; Stephan. Byz. s. *Diortia* ; Etymolog. Mag. *Apollonia* ; Plutarch, *Quæst. Gr.* c. 14).

sented as the mythical ancestor of the Thesprotian kings, just as Neoptolemus was of the Molossian.

It has already been mentioned that Antenor and Æneas stand distinguished from the other Trojans by a dissatisfaction with Priam and a sympathy with the Greeks, which is by Sophoklès and others construed as treacherous collusion<sup>1</sup>,—a suspicion indirectly glanced at, though emphatically repelled, by the Æneas of Virgil<sup>2</sup>. In the old epic of Arktinus, next in age to the Iliad and Odyssey, Æneas abandons Troy and retires to Mount Ida, in terror at the miraculous death of Laocoön, before the entry of the Greeks into the town and the last night-battle: yet Leschès, in another of the ancient epic poems, represented him as having been carried away captive by Neoptolemus<sup>3</sup>. In a remarkable passage of the Iliad, Poseidön describes the family of Priam as having incurred the hatred of Zeus, and predicts that Æneas and his descendants shall reign over the Trojans: the race of Dardanus, beloved by Zeus more than all his other sons, would thus be preserved, since Æneas belonged to it.

<sup>3</sup> Argument of *Dionysii*; Fragment 7. of Leschès, in Düntzer's Collection, p. 19-21.

Hellankus seems to have adopted this retirement of Æneas to the strongest parts of Mount Ida, but to have reconciled it with the stories of the migration of Æneas, by saying that he only remained in Ida a little time, and then quitted the country altogether by virtue of a convention concluded with the Greeks (Dionys. Hal. i. 47-48). Among the infinite variety of stories respecting this hero, one was, that after having effected his settlement in Italy, he had returned to Troy and resumed the empire, bequeathing it at his death to Askanios (Dionys. Hal. i. 33); this was a comprehensive scheme for apparently reconciling all the legends.

Accordingly, when Æneas is in imminent peril from the hands of Achilles, Poseidōn specially interferes to rescue him, and even the implacable miso-Trojan goddess Hērē assents to the proceeding<sup>1</sup>. These passages have been construed by various able critics to refer to a family of philo-Hellenic or semi-Hellenic Æneadae, known even in the time of the early singers of the Iliad as masters of some territory in or near the Troad, and professing to be descended from, as well as worshiping, Æneas. In the town of Sképsis, situated in the mountainous range of Ida, about thirty miles eastward of Ilium, there existed two noble and priestly families who professed to be descended, the one from Hectōr, the other from Æneas. The Sképsian critic Dēmétrius (in whose time both these families were still to be found) informs us that Skamandrius son of Hectōr, and Ascanius son of Æneas, were the archegets or heroic founders of his native city, which had been originally situated on one of the highest ranges of Ida, and was subsequently transferred by them to the less lofty spot on which it stood in his time<sup>2</sup>. heroic ancestor, was, that after the capture of Troy he continued in the country as king of the remaining Trojans, on friendly terms with the Greeks. But there were other tales respecting him, alike numerous and irreconcilable: the hand of destiny marked him as a wanderer (*fato profugus*), and his ubiquity is not exceeded even by that of Odysseus. We hear of him at Enus in Thrace, in Pallênê, at Æneia in the Thermmic Gulf, in Delus, at Orchomenus and Mantinea in Arcadia, in the islands of Kythêra and Zakynthus, in Lenkas and Ambrosia, at Butthrotum in Epirus, on the Salentine peninsula and various other places in the southern region of Italy: at Drepana and Segesta in Sicily, at Carthage, at Cape Palinurus, Cumæ, Misenum, Caieta, and finally in Latium, where he lays the first humble foundation of the mighty Rome and her empire<sup>1</sup>. And the reason why his wanderings were not continued still further was, that the oracles and the pronounced will of the gods directed him to settle in Latium<sup>2</sup>. In each of these numerous places his visit was commemorated and certified by local monuments or special legends, particularly

The inhabitants of Æneia in the Thermmic Gulf venerated him with great solemnity as their heroic founder (*Pausan.* ii. 22, 4; *viii.* 12, 4). by temples and permanent ceremonies in honour of his mother Aphroditè, whose worship accompanied him everywhere: there were also many temples and many different tombs of Æneas himself<sup>1</sup>. The vast ascendancy acquired by Rome, the ardour with which all the literary Romans espoused the idea of a Trojan origin, and the fact that the Julian family recognised Æneas as their gentile primary ancestor,—all contributed to give to the Roman version of his legend the preponderance over every other. The various other places in which monuments of Æneas were found came thus to be represented as places where he had halted for a time on his way from Troy to Latium. But though the legendary pretensions of these places were thus eclipsed in the eyes of those who constituted the literary public, the local belief was not extinguished: they claimed the hero as their permanent property, and his tomb was to them a proof that he had lived and died among them.

Antenor, who shares with Æneas the favourable sympathy of the Greeks, is said by Pindar to have gone from Troy along with Menelaus and Helen into the region of Kyrênê in Libya<sup>2</sup>. But according to the more current narrative, he placed himself at the head of a body of Eneti or Veneti from Paphlagonia, who had come as allies of Troy, and

went by sea into the inner part of the Adriatic Gulf, where he conquered the neighbouring barbarians and founded the town of Patavium (the modern Padua); the Veneti in this region were said to owe their origin to his immigration<sup>1</sup>. We learn further from Strabo, that Opsikellas, one of the companions of Antenor, had continued his wanderings even into Ibëria, and that he had there established a settlement bearing his name<sup>2</sup>.

Thus endeth the Trojan war, together with its sequel, the dispersion of the heroes, victors as well as vanquished. The account here given of it has been unavoidably brief and imperfect; for in a work intended to follow consecutively the real history of the Greeks, no greater space can be allotted even to the most splendid gem of their legendary period. Indeed, although it would be easy to fill a large volume with the separate incidents which have been introduced into the "Trojan cycle," the misfortune is that they are for the most part so contradictory as to exclude all possibility of weaving them into one connected narrative. We are compelled to select one out of the number, generally without any solid ground of preference, and then to note the variations of the rest. No one who has not studied the original documents can imagine the extent to which this discrepancy proceeds: it covers almost every portion and fragment of the tale<sup>3</sup>.

But though much may have been thus omitted of what the reader might expect to find in an account of the Trojan war, its genuine character has been studiously preserved, without either exaggeration or abatement. The real Trojan war is that which was recounted by Homer and the old epic poets, and continued by all the lyric and tragic composers. For the latter, though they took great liberties with the particular incidents, and introduced to some extent a new moral tone, yet worked more or less faithfully on the Homeric scale; and even Euripidès, who departed the most widely from the feelings of the old legend, never lowered down his matter to the analogy of contemporary life. They preserved its well-defined object, at once righteous and romantic, the recovery of the daughter of Zeus and sister of the Dioskuri—its mixed agencies, divine, heroic and human—the colossal force and deeds of its chief actors—its vast magnitude and long duration, as well as the toils which the conquerors underwent, and the Nemesis which followed upon their success. And these were the circumstances which, set forth in the full blaze of epic and tragic poetry, bestowed upon the legend its powerful and imperishable influence over the Hellenic mind. The enterprise was one comprehending all the members of the Hellenic body, of which each individually might be proud, and in which, nevertheless, those feelings of jealous and narrow patriotism, so lamentably prevalent in many

of the towns, were as much as possible excluded. It supplied them with a grand and inexhaustible object of common sympathy, common faith, and common admiration; and when occasions arose for bringing together a Pan-Hellenic force against the barbarians, the precedent of the Homeric expedition was one upon which the elevated minds of Greece could dwell with the certainty of rousing an unanimous impulse, if not always of counterworking sinister by-motives, among their audience. And the incidents comprised in the Trojan cycle were familiarised, not only to the public mind but also to the public eye, by innumerable representations both of the sculptor and the painter,—those which were romantic and chivalrous being better adapted for this purpose, and therefore more constantly employed, than any other.

Basis of his-  
tory for is

and nothing

Of such events the genuine Trojan war of the old epic was for the most part composed. Though literally believed, reverentially cherished, and numbered among the gigantic phenomena of the past, by the Grecian public, it is in the eyes of modern inquiry essentially a legend and nothing more. If we are asked whether it be not a legend embodying portions of historical matter, and raised upon a basis of truth,—whether there may not really have occurred at the foot of the hill of Ilium a war purely human and political, without gods, without heroes, without Helen, without Amazons, without Ethiopians under the beautiful son of Eös, without the wooden horse, without the characteristic and expressive features of the old epical war,—like the mutilated trunk of Desphobus in the under-world;

if we are asked whether there was not really some such historical Trojan war as this, our answer must be, that as the possibility of it cannot be denied, so neither can the reality of it be affirmed. We possess nothing but the ancient epic itself without any independent evidence; had it been an age of records indeed, the Homeric epic in its exquisite and unsuspecting simplicity would probably never have come into existence. Whoever therefore ventures to dissect Homer, Arktinus, and Leschès, and to pick out certain portions as matters of fact, while he sets aside the rest as fiction, must do so in full reliance on his own powers of historical divination, without any means either of proving or verifying his conclusions. Among many attempts, ancient as well as modern, to identify real objects in this historical darkness, that of Dio Chrysostom deserves attention for its extraordinary boldness. In his oration addressed to the inhabitants of Ilium, and intended to demonstrate that the Trojans were not only blameless as to the origin of the war, but victorious in its issue—he overthrows all the leading points of the Homeric narrative, and re-writes nearly the whole from beginning to end: Paris is the lawful husband of Helen, Achilles is slain by Hectôr, and the Greeks retire without taking Troy, disgraced as well as baffled. Having shown without difficulty, that the *Iliad*, if it be looked at as a history, is full of gaps, incongruities and absurdities, he proceeds to compose a more plausible narrative of his own, which he tenders as so much authentic matter of fact. The most important point, however, which his Oration brings to view is, the literal and

confiding belief with which the Homeric narrative was regarded, as if it were actual history, not only by the inhabitants of Ilium, but also by the general Grecian public<sup>1</sup>.

Historical  
Ilium.

The small town of Ilium, inhabited by Æolic Greeks<sup>2</sup>, and raised into importance only by the legendary reverence attached to it, stood upon an elevated ridge forming a spur from Mount Ida, rather more than three miles from the town and promontory of Sigcium, and about twelve stadia, or less than two miles, from the sea at its nearest point. From Sigcium and the neighbouring town of Achilleium (with its monument and temple of Achilles), to the town of Rhœteium on a hill higher up the Hellespont (with its monument and chapel of Ajax called the Aianteium<sup>3</sup>), was a distance of sixty stadia, or about seven English miles in the straight course by sea: in the intermediate space was a bay and an adjoining plain, comprehending the embouchure of the Scamander, and extending to the base of the ridge on which Ilium stood. This plain was the celebrated plain of Troy, in which the great Homeric battles were believed to

<sup>3</sup> See Pausanias, i. 35. 3, for the legends current at Ilium respecting the vast size of the bones of Ajax in his tomb. have taken place; the portion of the bay near to Sigeium went by the name of the Naustathmon of the Achæans (i. e. the spot where they dragged their ships ashore), and was accounted to have been the camp of Agamemnôn and his vast army<sup>1</sup>.

Historical Illum was founded, according to the questionable statement of Strabo, during the last dynasty of the Lydian kings<sup>2</sup>, that is, at some period later than 720 B.C. Until after the days of Alexander the Great—indeed until the period of Roman preponderance—it always remained a place of inconsiderable power and importance, as we learn not only from the assertion of the geographer, but also from the fact that Achilleium, Sigeium and Rhesteium were all independent of it<sup>3</sup>. But inconsiderable as it might be, it was the only place which ever bore the venerable name immortalized by Homer. Like the Homeric Ilum, it had its temple of Athênê<sup>4</sup>, wherein she was worshiped as the presiding goddess of the town: the inhabitants affirmed that Agam-

Their acropolis was called Pergamum, and in it was shown the house of Priam and the altar of Zeus Herkeius where that unhappy old man had been slain: moreover there were exhibited, in the temples, panoplies which had been worn by the Homeric heroes<sup>2</sup>, and doubtless many other relics appreciated by admirers of the Iliad.

These were testimonies which few persons in those ages were inclined to question, when combined with

The situation of Ilum (or as it is commonly, but erroneously, termed, *New Ilum*) appears to be pretty well ascertained, about two miles from the sea (Reynell, *On the Topography of Troy*, p. 41-71; Dr. Clarke's *Travels*, vol. ii. p. 162).

the identity of name and general locality; nor does it seem that any one did question them until the time of Dêmétrius of Skêpsis. Hellanîkus expressly described this Ilium as being the Ilium of Homer, for which assertion Strabo (or probably Dêmétrius, from whom the narrative seems to be copied) imputes to him very gratuitously an undue partiality towards the inhabitants of the town<sup>1</sup>. Herodotus relates, that Xerxès in his march into Greece visited the place, went up to the Pergamum of Priam, inquired with much interest into the details of the Homeric siege, made libations to the fallen heroes, and offered to the Athênê of Ilium his magnificent sacrifice of a thousand oxen: he probably represented and believed himself to be attacking Greece as the avenger of the Priamid family. The Lacedæmonian admiral Mindarus, while his fleet lay at Abydos, went personally to Ilium to offer sacrifice to Athênê, and saw from that elevated spot the battle fought between the squadron of Dorieus and the Athenians, on the shore near Rhœteium<sup>2</sup>. During the interval between the Peloponnesian war and the Macedonian invasion of Persia, Ilium was always garrisoned as a strong position; but its domain was still narrow, and did not extend even to the sea which was so near to it<sup>3</sup>. Alexander, on crossing the Hellespont, sent his army from Sestus

to Abydus, under Parmenio, and sailed personally from Elæus in the Chersonese, after having solemnly sacrificed at the Eleuntian shrine of Prôte-silaus, to the Harbour of the Achæans between Sigæum and Rhorteium. He then ascended to Ilium, sacrificed to the Iliean Athênê, and consecrated in her temple his own panoply, in exchange for which he took some of the sacred arms there suspended, which were said to have been preserved from the time of the Trojan war. These arms were carried before him when he went to battle by his armour-bearers. It is a fact still more curious, and illustrative of the strong working of the old legend on an impressible and eminently religious mind, that he also sacrificed to Priam himself, on the very altar of Zeus Herkeius from which the old king was believed to have been torn by Neoptolemus. As that fierce warrior was his heroic ancestor by the maternal side, he desired to avert from himself the anger of Priam against the Achilleid race<sup>1</sup>.

<sup>1</sup> Arrian, l. c. Dikæarchus composed a separate work respecting this sacrifice of Alexander, *επὶ τῇ ἐν Ἰλίου θυσίᾳ* (Athenæ. xiv. p. 603; Dikæarch. Fragm. p. 114, ed. Fulcr.).

Theophrastus, in noticing old and venerable trees, mentions the *φρύγι* (*Quercus œcular*) on the tomb of Ilius at Ilium, without any doubt of the authenticity of the place (De Plant. iv. 14); and his contemporary, the harper Stratonikon, intimates the same feeling, in his jest on the visit of a lead sophist to Ilium during the festival of the Ilieia (Athenæ. viii. p. 351). The same may be said respecting the author of the tenth epistle ascribed to the orator Isokrates (p. 737), in which his visit of curiosity to Ilium is described—no well as about Apollônios of Tyanus, or the writer who describes his life and his visit to the Troia; it is evident that he did not distrust the *ἀρχαιολογία* of the Ilieia, who af-

Alexander made to the inhabitants of Ilium many munificent promises, which he probably would have executed, had he not been prevented by untimely death : for the Trojan war was amongst all the Grecian legends the most thoroughly Pan-Hellenic, and the young king of Macedon, besides his own sincere legendary faith, was anxious to merge the local patriotism of the separate Greek towns in one general Hellenic sentiment under himself as chief. One of his successors, Antigonus<sup>1</sup>, founded the city of Alexandria in the Trôad, between Sigæum and the more southerly promontory of Lektum ; compressing into it the inhabitants of many of the neighbouring Æolic towns in the region of Ida,—Skêpsis, Kebrôn, Hamaxitus, Kolônæ, and Neandria, though the inhabitants of Skêpsis were subsequently permitted by Lysimachus to resume their own city and autonomous government. Ilium however remained without any special mark of favour until the arrival of the Romans in Asia and their triumph over Antiochus (about 190 B.C.). Though it retained its walls and its defensible position, Dêmêtrius of Skêpsis, who visited it shortly before that event, described it as being then in a state of neglect and poverty, many of the houses not even having tiled roofs<sup>2</sup>.

named their town to be the real Troy (Philostrat. Vit. Apollôn. Tyan. iv. 11).

The goddess Athênâ of Ilium was reported to have rendered valuable assistance to the inhabitants of Kynikus, when they were besieged by Mithridatês, commemorated by inscriptions set up in Ilium (Plinearch, Lucull. 10).

In this dilapidated condition, however, it was still mythically recognised both by Antiochus and by the Roman consul Livius, who went up thither to sacrifice to the Illean Athênê. The Romans, proud of their origin from Troy and Æneas, treated Ilium with signal munificence; not only granting to it immunity from tribute, but also adding to its domain the neighbouring territories of Gergis, Rhoteium and Sigcium—and making the Illeans masters of

This is a very clear and precise statement, attested by an eye-witness. But it is thoroughly inconsistent with the statement made by Strabo in the previous chapter, a dozen lines before, as the text now stands, for he there informs us that Lysimachus, after the death of Alexander, paid great attention to Ilium, surrounded it with a wall of sixty stadia in circumference, erected a temple, and aggregated to Ilium the ancient cities around, which were in a state of decay. We know from Livy that the aggregation of Gergis and Rhoteium to Ilium was effected, not by Lysimachus, but by the Romans (Livy, xxxviii. 37.) so that the first statement of Strabo is not only inconsistent with his second, but is contradicted by an independent authority.

I cannot but think that this contradiction arises from a confusion of the text in Strabo's first passage, and that in that passage Strabo really meant to speak only of the improvements brought about by Lysimachus in *Alexandria Tricla*; that he never meant to ascribe to Lysimachus any improvements in Ilium, but, on the contrary, to assign the remarkable attention paid by Lysimachus to *Alexandria Tricla*, as the reason why he had neglected to fulfil the promises held out by Alexander to Ilium. The series of facts runs thus:—1. Ilium is nothing better than a *συμμη* at the landing of Alexander; 2. Alexander promises great additions, but never returns from Peria to accomplish them; 3. Lysimachus is absorbed in *Alexandria Tricla*, into which he aggregates several of the adjoining old towns, and which flourishes under his hands;

the whole coast<sup>1</sup> from the Peræa (or continental possessions) of Tenedos (southward of Sigæum) to the boundaries of Dardanus, which had its own title to legendary reverence as the special sovereignty of Æneas. The inhabitants of Sigæum could not peaceably acquiesce in this loss of their autonomy, and their city was destroyed by the Illeans.

The dignity and power of Ilium being thus prodigiously enhanced, we cannot doubt that the inhabitants assumed to themselves exaggerated importance as the recognised parents of all-conquering Rome. Partly, we may naturally suppose, from the jealousies thus aroused on the part of their neighbours at Sképsis and Alexandreia Trôas—partly from the pronounced tendency of the age (in which Kratês at Pergamus and Aristarchus at Alexandria divided between them the palm of literary

4. Hence Ilium remained a *city* when the Romans entered Asia, as it had been when Alexander entered.

This alteration in the text of Strabo might be effected by the simple transposition of the words as they now stand, and by omitting *ὅτι αὐτὸ, ἔδη ἐπεμλήθη*, without introducing a single new or conjectural word, so that the passage would read thus: *Μετὰ δὲ τῆς αἰῶνος (Alexander's) τελευτῆς ἀναίμακτος μιλίαντα τῇ Ἀλεξανδρείᾳ ἐπεμλήθη, συναρμύνηται μὲν ἔδη ἐν Ἀντιγύῳ, καὶ προσεγγυμένης Ἀντιγύου, μεταβαλλόμεναι δὲ τοῦτομα' (Ἰδοὺ γὰρ εἰσὶν οὗτοι Ἀλεξανδρείᾳ διαδεχόμενοι ἐστίν· οὗ πρότερον πλὴν ἐνομήματα πῶλεν, οἷον ταῦτα) καὶ νέῃς κατασκευαῖς καὶ τοῖς ἀντιβαλόμενοι ὅσοι αὐτὸν ὀνόμασι δὲ ἐν αὐτῇ τὰς πόλιν πῶλεν ἀρχαίαι, ἔδη κατασκευασμένη. Καὶ δὲ καὶ συναρμύνηται.... αὐτῶν.* If this reading be adopted, the words beginning that which stands in Tachnœus's edition as sect. 27, and which immediately follow the last word *πῶλεν*, will read quite suitably and coherently.—*Καὶ τὸ Ἰλίον δ', ὅτι ἐν ἑστὶ, ἀναρμύνηται τὰς ἡρ., ὅτι πρῶτος Παμῖνος τῆς Ἀσίας ἐπὶ βασιλεὺς, &c.,* whereas with the present reading of the passage they show a contradiction, and the whole passage is entirely confused.

celebrity) towards criticism and illustration of the old poets—a blow was now aimed at the mythical legitimacy of Ilium. Dēmētrius of Skēpsis, one of the most laborious of the Homeric critics, had composed thirty books of comment upon the Catalogue in the Iliad: Hestiera, an authoress of Alexandria Trōas, had written on the same subject: both of them, well-acquainted with the locality, remarked that the vast battles described in the Iliad could not be packed into the narrow space between Ilium and the Naustathmon of the Greeks; the more so, as that space, too small even as it then stood, had been considerably enlarged since the date of the Iliad by deposits at the mouth of the Skamander<sup>1</sup>. They found no difficulty in pointing out topographical incongruities and impossibilities as to the incidents in the Iliad, which they professed to remove by the startling theory that the Homeric Ilium had not occupied the site of the city so called. There was a village, called the village of the Ilieans, situated rather less than four miles from the city in the direction of Mount Ida, and further removed from the sea; here, they affirmed, the "holy Troy" had stood.

<sup>1</sup> Strabo, xiii. 610. Παρατίθενται δὲ ὁ Διμήτριος καὶ τὴν Ἀλεξανδρινὴν Ἡστίαν μάλιστα, τῶν συγγράμματων περὶ τῆς Ὀμήρου Ἰλίου, πειθόμενοι, εἰ περὶ τὴν εἰν πύλιν ὁ πόλεμος συνέστη, καὶ τὸ Τρωϊκὸν πῆδον πρὸς ὅσους, ὁ μάλιστα τῆς πόλεως ἐπὶ τῆς θαλάσσης ὁ περικτὴς φράζει· τὸ μὲν γὰρ πρὸς τῇ εἰν πόλει ὄρημα, πρόχουσι εἶναι τῶν ποταμῶν, ὡς πορὶ γινώσκον.

The words *πρὸς ὅσους* are introduced conjecturally by Grieskurd, the excellent German translator of Strabo, but they seem to me necessary to make the sense complete.

Hestiera is cited more than once in the Homeric Scholia (Schol. Venet. ad Iliad. iii. 64; Eustath. ad Iliad. ii. 535).

No positive proof was produced to sustain the conclusion, for Strabo expressly states that not a vestige of the ancient city remained at the Village of the Ilieans<sup>1</sup>: but the fundamental supposition was backed by a second accessory supposition, to explain how it happened that all such vestiges had disappeared. Nevertheless Strabo adopts the unsupported hypothesis of Dêmêtrius as if it were an authenticated fact—distinguishing pointedly between Old and New Ilium, and even censuring Hellanikus for having maintained the received local faith. But I cannot find that Dêmêtrius and Hestienus have been followed in this respect by any other writer of ancient times excepting Strabo. Ilium still continued to be talked of and treated by every one as the genuine Homeric Troy: the cruel jests of the Roman rebel Fimbria, when he sacked the town and massacred the inhabitants—the compensation made by Sylla, and the pronounced favour of Julius Cæsar and Augustus,—all prove this continued recognition of identity<sup>2</sup>. Arrian, though a native of Nicomedia, holding a high appointment in Asia Minor, and remarkable for the exactness of his topographical notices, describes the visit of Alex-

ander to Ilium, without any suspicion that the place with all its relics was a mere counterfeit: Aristidēs, Dio Chrysostom, Pausanias, Appian, and Plutarch hold the same language<sup>1</sup>. But modern writers seem for the most part to have taken up the supposition from Strabo as implicitly as he took it from Dēmētrius. They call Ilium by the disrespectful appellation of *New Ilium*—while the traveller in the *Trôad* looks for *Old Ilium* as if it were the unquestionable spot where Priam had lived and moved; the name is even formally enrolled on the best maps recently prepared of the ancient *Trôad*<sup>2</sup>.

Strabo alone believes in Old Ilium as the real Troy—others continue in the old faith—the moderns follow Strabo.

<sup>2</sup> The controversy, now half a century old, respecting Troy and the Trojan war—between Bryant and his various opponents, Morritt, Gilbert Wakefield, the British Critic, &c., seems now nearly forgotten, and I cannot think that the pamphlets on either side would be considered as displaying much ability, if published at the present day. The discussion was first raised by the publication of Le Chevalier's account of the plain of Troy, in which the author professed to have discovered the true site of Old Ilium (the supposed Homeric Troy) about twelve miles from the sea near Boumachehli. Upon this account Bryant published some animadversions followed up by a second treatise, in which he denied the historical reality of the Trojan war, and advanced the hypothesis that the tale was of Egyptian origin (*Dissertation on the War of Troy, and the Expedition of the Grecians as described by Homer, showing that no such expedition was ever undertaken, and that no such city of Phrygia existed*, by Jacob Bryant; November 1797, though there is no date in the title-page). Morritt's reply was published in 1798. A reply from Mr. Bryant and a rejoinder from Mr. Morritt, as well as a pamphlet from G. Wakefield, appeared in 1799 and 1800, besides an *Exposition* by the former addressed to the British Critic.

Bryant, having doubt both on the truthfulness and the inconsistency of the Trojan war, as it is recounted in Grecian legend generally, nevertheless admitted that Homer had a groundwork for his story, and

Strabo has here converted into geographical matter of fact an hypothesis purely gratuitous, with a view of saving the accuracy of the Homeric topography; though in all probability the locality of the pretended Old Ilium would have been found open to difficulties not less serious than those which

maintained that that groundwork was Egyptian. Homer (he thinks) was an Iliacæus, descended from a family originally emigrant from Egypt: the war of Troy was originally an Egyptian war, which explains how Menelaüs the Ethiopian came to take part in it: "upon this history, which was originally Egyptian, Homer founded the scheme of his two principal poems, adapting things to Greece and Phrygia by an ingenious transposition;" he derived information from pilots of Menæpolis or Thôbes (Bryant, pp. 102, 108, 125). The *Hæte Agyptiorum*, mentioned in the second book of the *Odyssey* (15), is the Egyptian hero, who affords, in his view, an evidence that the population of that island was in part derived from Egypt. No one since Mr. Bryant, I apprehend, has ever construed the passage in the same sense.

Bryant's Egyptian hypothesis is of no value; but the negative portion of his argument, summing up the particulars of the Trojan legend, and contending against its historical credibility, is not so easily put aside. Few persons will share in the zealous conviction by which Morritt tries to make it appear that the 1100 ships, the ten years of war, the large confederacy of princes from all parts of Greece, &c., have nothing but what is consonant with historical probability: difficulties being occasionally eliminated by the plea of our ignorance of the time and of the subject (Morritt, p. 7-21). Gilbert Wakefield, who maintains the historical reality of the siege with the utmost intensity, and even compares Bryant to Tom Paine (W. p. 17), is still more displeased with those who propound doubts, and tells us that "grave disputation in the midst of such darkness and uncertainty is a conflict with chimaera" (W. p. 14).

The most plausible line of argument taken by Morritt and Wakefield is, when they enforce the positions taken by Strabo and so many other authors, ancient as well as modern, that a superstructure of fiction is to be distinguished from a basis of truth, and that the latter is to be maintained while the former is rejected (Morritt, p. 5; Wake, p. 7-8). To this Bryant replies, that "if we leave out every absurdity, we can make anything plausible; that a fable may be made consistent, and we have many romances that are very regular in the assortment of characters and circumstances, this may be seen in plays, romances, and novels. But this regularity and correspondence alone will not ascertain the truth" (*Expostulation*, pp. 5, 12, 13). "That there are a great many other

it was introduced to obviate<sup>1</sup>. It may be true that Dëmêtrius and he were justified in their negative argument, so as to show that the battles described in the *Iliad* could not possibly have taken place if the city of Priam had stood on the hill inhabited by the Illeans. But the legendary faith subsisted before, and continued without abatement afterwards, notwithstanding such topographical impos-

sibilities because that of Troy, regular and consistent among themselves, believed and chronological by the Greeks, and even looked up to by them in a religious view (p. 13), which yet no one now thinks of admitting as history."

Morritt, having urged the universal belief of antiquity as evidence that the Trojan war was historically real, is met by Bryant, who reminds him that the same persons believed in centaurs, satyrs, nymphs, augury, astrology, Homer's statement that horses could speak, &c. To which Morritt replies, "What has religious belief to do with historical facts? Is not the evidence on which our faith rests in matters of religion totally different in all its parts from that on which we ground our belief in history?" (*Aldrich's Remarks*, p. 47.)

The separation between the grounds of religious and historical belief is by no means so complete as Mr. Morritt supposes, even in regard to modern times; and when we apply his position to the ancient Greeks, it will be found completely the reverse of the truth. The contemporaries of Herodotus and Thucydides conceived their early history in the most intimate conjunction with their religion.

<sup>1</sup> For example, adopting his own line of argument (not to mention those battles in which the pursuit and the flight reaches from the city to the ships and back again), it might have been urged to him, that by supposing the Homeric Troy to be four miles farther off from the sea, he aggravated the difficulty of rolling the Trojan horse into the town; it was already sufficiently hard to propel this vast wooden animal full of heroes from the Greek *Nauvathion* to the town of Ilion.

The Trojan horse, with its accompaniments Sinon and Imoëdon, is one of the capital and indispensable events in the epic. Homer, Arcturus, Leschus, Virgil, and Quintus Smyrnaeus, all dwell upon it emphatically as the proximate cause of the capture.

The difficulties and inconsistencies of the movements ascribed to Greeks and Trojans in the *Iliad*, when applied to real topography, are well set forth in Spohn, *De Agre Trojana*, Leipzig, 1811; and Mr. Mac-laren has shown (*Dissertation on the Topography of the Trojan War*, Edinburgh, 1822) that these difficulties are nowise obviated by removing Ilion a few miles further from the sea.

sibilities. Hellenikus, Herodotus, Mindarus, the guides of Xerxês, and Alexander, had not been shocked by them : the case of the latter is the strongest of all, because he had received the best education of his time under Aristotle—he was a passionate admirer and constant reader of the *Iliad*—he was moreover personally familiar with the movements of armies, and lived at a time when maps, which began with Anaximander, the disciple of Thales, were at least known to all who sought instruction. Now if, notwithstanding such advantages, Alexander fully believed in the identity of Ilium, unconsciously of these many and glaring topographical difficulties, much less would Homer himself, or the Homeric auditors, be likely to pay attention to them, at a period, five centuries earlier, of comparative rudeness and ignorance, when prose records as well as geographical maps were totally unknown<sup>1</sup>.

<sup>1</sup> Major Rennell argues differently from the view of Alexander, employing it to confute the hypothesis of Chaveller, who had placed the Homeric Troy at Bounarbashi, the site supposed to have been indicated by Diodotus and Strabo:—

"Alexander is said to have been a passionate admirer of the *Iliad*, and he had an opportunity of deciding on the spot how far the topography was consistent with the narrative. Had he been shown the site of Bounarbashi for that of Troy, he would probably have questioned the fidelity either of the historical part of the poem or his guides. It is not within credibility, that a person of so correct a judgment as Alexander could have admired a poem, which contained a long history of military details, and other transactions that could not physically have had an existence. What pleasure could he receive, in contemplating as subjects of history, events which could not have happened? Yet he did admire the poem, and therefore *must have found the topography consistent*: that is, Bounarbashi, surely, was not shown to him for Troy." (Rennell, *Observations on the Plain of Troy*, p. 128.)

Major Rennell here supposes in Alexander a spirit of topographical criticism quite foreign to his real character. We have no reason to think that the site of Bounarbashi was shown to Alexander as the

The inspired poet might describe, and his hearers would listen with delight to the tale, how Hector, pursued by Achilles, ran thrice round the city of Troy, while the trembling Trojans were all huddled into the city, not one daring to come out even at this last extremity of their beloved prince—and while the Grecian army looked on, restraining unwillingly their uplifted spears at the nod of Achilles, in order that Hector might perish by no other hand than his; nor were they, while absorbed by this impressive recital, disposed to measure distances or calculate topographical possibilities with reference to the site of the real Ilium<sup>1</sup>. The mistake consists in applying to Homer and to the Homeric siege of Troy, criticisms which would be perfectly just if brought to bear on the Athenian siege of Syracuse, as described by Thucydides<sup>2</sup>, in the Peloponnesian war<sup>3</sup>—but which are not more applicable to the epic narrative than they would be to the exploits of Amadis or Orlando.

Homeric Troy, or that any site was shown to him except Ilium, or what Strabo calls New Ilium. Still less reason have we to believe that any scepticism crossed his mind, or that his deep-seated faith required to be confirmed by measurement of distances.

<sup>1</sup> Strabo, iii. p. 492. Οἷός ἐστι τοῦ Πριάμου ἐκ τῆς πόλεως ἢ περὶ τῆς πόλεως ἔχει τὴν εὐχάριστον καὶ γὰρ τοῦ Πριάμου ἐκ τῆς πόλεως ἢ περὶ τῆς πόλεως ἔχει τὴν εὐχάριστον.

<sup>2</sup> Mannert (*Geographie der Griechen und Römer*, th. 6. heft 2. b. 8. cap. 8) is confused in his account of Old and New Ilium: he represents that Alexander raised up a new spot to the dignity of having been the Homeric Ilium, which is not the fact: Alexander adhered to the received local belief. Indeed, as far as our evidence goes, no one but Demetrius, Herodas, and Strabo appears ever to have departed from it.

<sup>3</sup> There can hardly be a more singular example of this same confusion, than to find elaborate military criticisms from the Emperor Napoleon, upon the description of the taking of Troy in the second book of the *Iliad*. He shows that gross faults are committed in it, when

There is every reason for presuming that the Ilium visited by Xerxes and Alexander was really the "holy Ilium" present to the mind of Homer; and if so, it must have been inhabited, either by Greeks or by some anterior population, at a period earlier than that which Strabo assigns. History recognises neither Troy the city, nor Trojans, as actually existing; but the extensive region called Trôas, or the Trôad (more properly Trôias), is known both to Herodotus and to Thucydides: it seems to include the territory westward of an imaginary line drawn from the north-east corner of the Adramyttian gulf to the Propontis at Parium, since both Antandrus, Kolônæ, and the district immediately round Ilium, are regarded as belonging to the Trôad<sup>1</sup>. Herodotus further notices the Teukrians of Gergis<sup>2</sup> (a township conterminous with Ilium, and lying to the eastward of the road from Ilium to Abydos), considering them as the remnant of a larger Teukrian population which once resided in the country, and which had in very early times undertaken a vast migration from Asia into Eu-

looked at from the point of view of a general (see an interesting article by Mr. G. C. Lewis, in the *Classical Museum*, vol. i. p. 295, "Napoleon on the Capture of Troy").

Having cited this criticism from the highest authority on the art of war, we may find a suitable parallel in the works of distinguished publicists. The attack of Odysseus on the Kikoniæns (described in Homer, *Odys.* ix. 39-61) is cited both by Grotius (*De Jure Bell. et Pac.* iii. 3, 19) and by Vattel (*Droit des Gens*, iii. 202) as a case in point in international law. Odysseus is considered to have sinned against the rules of international law by attacking them as allies of the Trojans, without a formal declaration of war.

rope<sup>1</sup>. To that Teukrian population he thinks that the Homeric Trojans belonged<sup>2</sup>: and by later writers, especially by Virgil and the other Romans, the names Teukrians and Trojans are employed as equivalents. As the name *Trojans* is not mentioned in any contemporary historical monument, so the name *Teukrians* never once occurs in the old epic. It appears to have been first noticed by the elegiac poet Kallinus, about 650 B.C., who connected it with an alleged immigration of Teukrians from Krête into the region round about Ida. Others again denied this, asserting that the primitive ancestor, Teukrus, had come into the country from Attica<sup>3</sup>, or that he was of indigenous origin, born from Skamander and the nymph Idæa—all various manifestations of that eager thirst after an eponymous hero which never deserted the Greeks. Gergithians occur in more than one spot in Æolis, even so far southward as the neighbourhood of Kymê<sup>4</sup>: the name has no place in Homer, but he mentions Gorgythion and Kebriones as illegitimate sons of Priam, thus giving a sort of epical recognition both to Gergis and Kebrên. As Herodotus calls the old epical Trojans by the name Teukrians, so the Attic tragedians call them Phrygians;

<sup>1</sup> Herodotus, v. 122. εἰς μὲν Αἰολίαν πάντα, ὅπου τῇ Ἰδαίᾳ γῆς ἐμμεναι, εἰς δὲ Πύργωτος, πρὸς ἀνατολὴν τῶν ἀρχαίων Τρώων.

though the Homeric hymn to Aphroditê represents Phrygians and Trojans as completely distinct, specially noting the diversity of language<sup>1</sup>; and in the *Iliad* the Phrygians are simply numbered among the allies of Troy from the far Ascania, without indication of any more intimate relationship<sup>2</sup>. Nor do the tales which connect Dardanus with Samothrace and Arcadia find countenance in the Homeric poems, wherein Dardanus is the son of Zeus, having no root anywhere except in Dardania<sup>3</sup>. The mysterious solemnities of Samothrace, afterwards so highly venerated throughout the Grecian world, date from a period much later than Homer; and the religious affinities of that island as well as of Krête with the territories of Phrygia and Æolis, were certain, according to the established tendency of the Grecian mind, to beget stories of a common geneaology.

To pass from this legendary world,—an aggregate of streams distinct and heterogeneous, which do not willingly come into confluence, and cannot be forced to intermix,—into the clearer vision afforded by Herodotus, we learn from him that in the year 500 B.C. the whole coast-region from Dardanus southward to the promontory of Lektum (including the town of Ilium), and from Lektum eastward to Adramyttium, had been Æolised, or was occupied by Æolic Greeks—likewise the inland towns of

Skêpsis<sup>1</sup> and Kebrên. So that if we draw a line northward from Adramyttium to Kyzikus on the Propontis, throughout the whole territory westward from that line, to the Hellespont and the Ægean Sea, all the considerable towns would be Hellenic, with the exception of Gergis and the Teukrian population around it,—all the towns worthy of note were either Ionic or Æolic. A century earlier, the Teukrian population would have embraced a wider range—perhaps Skêpsis and Kebrên, the latter of which places was colonised by Greeks from Kyine<sup>2</sup>: a century afterwards, during the satrapy of Pharnabazus, it appears that Gergis had become Hellenised as well as the rest. The four towns, Ilium, Gergis, Kebrên and Skêpsis, all in lofty and strong positions, were distinguished each by a solemn worship and temple of Athênê, and by the recognition of that goddess as their special patroness<sup>3</sup>.

The author of the *Iliad* conceived the whole of

<sup>1</sup> Skêpsis received some colonists from the Ionic Miletos (Anaximenes apud Strabo, xiv. p. 636); but the ruins of the place prove that its dialect was Æolic. See Klausen, *Kreta und die Pentateuch*, tom. i. note 180.

Arisbê also, near Abydos, seems to have been settled from Mitylênê (Euseb. ad *Iliad*, xii. 57).

The extraordinary fertility and rich black mould of the plain around Ilium is noticed by modern travellers (see Franklin, *Remarks and Observations on the Plain of Troy*, London, 1800, p. 44): it is also easily worked: "a couple of buffaloes or oxen were sufficient to draw the plough, whereas near Constantinople it takes twelve or fourteen."

One of the great motives of Iliad in setting aside the Homeric narrative of the Trojan war, is to vindicate Athênê from the charge of having unjustly destroyed her own city of Ilium (Orat. xi. p. 310): *μὴδ' ὅτι τὴν ἑαυτῆς πόλιν Ἰλίον ἠδ' αὖτε ἀμφὲρ αὐτῆς τῆς ἰωνίας ἐκάλεσεν*.

this region as occupied by people not Greek;—Trojans, Dardanians, Lykians, Lelegians, Pelasgians, and Kilikians. He recognises a temple and worship of Athênê in Ilium, though the goddess is bitterly hostile to the Trojans: and Arktinus described the Palladium as the capital protection of the city. But perhaps the most remarkable feature of identity between the Homeric and the historical Æolis, is, the solemn and diffused worship of the Sminthian Apollo. Chrysê, Killa and Tenedos, and more than one place called Sminthium, maintain the surname and invoke the protection of that god during later times, just as they are emphatically described to do by Homer<sup>1</sup>.

(Old date, and long prevalence of the worship of Apollo Sminthius.)

When it is said that the Post-Homeric Greeks gradually Hellenised this entire region, we are not to understand that the whole previous population either retired or was destroyed. The Greeks settled in the leading and considerable towns, which enabled them both to protect one another and to

Ptolemy was a native of Ilium, and had written a periegesis of the place (about 200 A.D., therefore earlier than Dionysius of Halicarnas); he may have witnessed the improvement in its position effected by the Romans. He noticed the identical stone upon which Palamedes had taught the Greeks to play at dice.

The Sminthium Apollo appears inscribed on the coins of Alexandria Tris; and the temple of the god was memorable even down to the time of the emperor Julian (*Ammian. Marcellin.* xiii. 8). Compare Menander (the Rhetor) *apud* *Embellin.* iv. 14; *apud* Walz, *Collect. Rhetor.* i. ix. p. 304; also *apud* *Embellin.* iv. 17.

*Spalioi*, both in the Kréta and the Eubo dialect, meant a *field-mouse*; the region seems to have been greatly plagued by these little animals.

gratify their predominant tastes. Partly by force—but greatly also by that superior activity, and power of assimilating foreign ways of thought to their own, which distinguished them from the beginning—they invested all the public features and management of the town with an Hellenic air, distributed all about it their gods, their heroes and their legends, and rendered their language the medium of public administration, religious songs and addresses to the gods, and generally for communications wherein any number of persons were concerned. But two remarks are here to be made: first, in doing this they could not avoid taking to themselves more or less of that which belonged to the parties with whom they fraternised, so that the result was not pure Hellenism; next, that even this was done only in the towns, without being fully extended to the territorial domain around, or to those smaller townships which stood to the town in a dependent relation. The Æolic and Ionic Greeks borrowed, from the Asiatics whom they had Hellenised, musical instruments and new laws of rhythm and melody, which they knew how to turn to account: they further adopted more or less of those violent and maddening religious rites, manifested occasionally in self-inflicted suffering and mutilation, which were indigenous in Asia Minor in the worship of the Great Mother. The religion of the Greeks in the region of Ida as well as at Kyzikus was more orgiastic than the native worship of Greece Proper, just as that of Lampsakus, Priapus and Parium was more licentious. From the Teukrian region of Gergis, and from the Gergithes near Kymê, sprang

The date of the Gergithian Sibyll, or rather of the circulation of her supposed prophecies, is placed during the reign of Cræsus, a period when Gergis was thoroughly Teukrian. Her prophecies, though embodied in Greek verses, had their root in a Teukrian soil and feelings; and the promises of future empire which they so liberally make to the fugitive hero escaping from the flames of Troy into Italy, become interesting from the remarkable way in which they were realised by Rome<sup>2</sup>.

The date of this Gergithian Sibyll, or of the prophecies passing under her name, is stated by Hæroklidēs of Pontus, and there seems no reason for calling it in question.

Klatten (*Æneas and the Penates*, book ii. p. 206) has worked out copiously the circulation and legendary import of the Sibylline prophecies.

during the reign of Peisistratus, having wrested it from them and trying to maintain their possession, vindicate the proceeding by saying that they had as much right to it as the Mitylenæans, "for the latter had no more claim to it than any of the other Greeks who had aided Menelaus in avenging the abduction of Helen". This is a very remarkable incident, as attesting the celebrity of the legend of Troy, and the value of a mythical title in international disputes—yet seemingly implying that the establishment of the Mitylenæans on that spot must have been sufficiently recent. The country near the junction of the Hellespont and the Propontis is represented as originally held by Bebrykian Thracians, while Abydus was first occupied by Milesian colonists in the reign and by the permission of the Lydian king Gygès—to whom the whole Trôad and the neighbouring territory belonged, and

In the days of Peisistratus, it seems Athens was not bold enough or powerful enough to advance this vast pretension.

upon whom therefore the Teukrians of Ida must have been dependent. This must have been about 700 B.C., a period considerably earlier than the Mitylenæan occupation of Sigeum. Lampsacus and Pæsus, on the neighbouring shores of the Propontis, were also Milesian colonies, though we do not know their date: Parium was jointly settled from Milétus, Erythræ and Parus.

## CHAPTER XVI.

GRECIAN MYTHES, AS UNDERSTOOD, FELT AND INTERPRETED BY THE GREEKS THEMSELVES.

THE preceding sections have been intended to exhibit a sketch of that narrative matter, so abundant, so characteristic, and so interesting, out of which early Grecian history and chronology have been extracted. Raised originally by hands unseen and from data unassignable, it existed first in the shape of floating talk among the people, from whence a large portion of it passed into the song of the poets, who multiplied, transformed and adorned it in a thousand various ways.

The mythos formed the entire mental stock of the early Greeks.

These mythos or current stories, the spontaneous and earliest growth of the Grecian mind, constituted at the same time the entire intellectual stock of the age to which they belonged. They are the common root of all those different ramifications into which the mental activity of the Greeks subsequently diverged; containing, as it were, the preface and germ of the positive history and philosophy, the dogmatic theology and the professed romance, which we shall hereafter trace each in its separate development. They furnished aliment to the curiosity, and solution to the vague doubts and aspirations, of the age; they explained the origin of those customs and standing peculiarities with which men were familiar; they impressed moral

lessons, awakened patriotic sympathies, and exhibited in detail the shadowy, but anxious presentiments of the vulgar as to the agency of the gods: moreover they satisfied that craving for adventure and appetite for the marvellous, which has in modern times become the province of fiction proper.

It is difficult, we may say impossible, for a man of mature age to carry back his mind to his conceptions such as they stood when he was a child, growing naturally out of his imagination and feelings, working upon a scanty stock of materials, and borrowing from authorities whom he blindly followed, but imperfectly apprehended. A similar difficulty occurs when we attempt to place ourselves in the historical and quasi-philosophical point of view which the ancient mythes present to us. We can follow perfectly the imagination and feeling which dictated these tales, and we can admire and sympathise with them as animated, sublime, and affecting poetry; but we are too much accustomed to matter of fact and philosophy of a positive kind, to be able to conceive a time when these beautiful fancies were construed literally and accepted as serious reality.

Nevertheless it is obvious that Grecian mythes cannot be either understood or appreciated except with reference to the system of conceptions and belief of the ages in which they arose. We must suppose a public not reading and writing, but seeing, hearing and telling—destitute of all records, and careless as well as ignorant of positive history with its indispensable tests, yet at the same time curious and full of eagerness for new or impressive

State of

incidents—strangers even to the rudiments of positive philosophy and to the idea of invariable sequences of nature either in the physical or moral world, yet requiring some connecting theory to interpret and regularise the phenomena before them. Such a theory was supplied by the spontaneous inspirations of an early fancy, which supposed the habitual agency of beings intelligent and voluntary like themselves, but superior in extent of power, and different in peculiarity of attributes. In the geographical ideas of the Homeric period, the earth was flat and round, with the deep and gentle ocean-stream flowing around and returning into itself: chronology, or means of measuring past time, there existed none; but both unobserved regions might be described, the forgotten past unfolded, and the unknown future predicted—through particular men specially inspired by the gods, or endowed by them with that peculiar vision which detected and interpreted passing signs and omens.

If even the rudiments of scientific geography and physics, now so universally diffused and so invaluable as a security against error and delusion, were wanting in this early stage of society, their place was abundantly supplied by vivacity of imagination and by personifying sympathy. The unbounded tendency of the Homeric Greeks to multiply fictitious persons, and to construe the phenomena which interested them into manifestations of design, is above all things here to be noticed, because the form of personal narrative, universal in their mythes, is one of its many manifestations. Their polytheism (comprising some elements of an original fetichism,

in which particular objects had themselves been supposed to be endued with life, volition, and design) recognised agencies of unseen beings identified and confounded with the different localities and departments of the physical world. Of such beings there were numerous varieties, and many gradations both in power and attributes; there were differences of age, sex, and local residence, relations both conjugal and filial between them, and tendencies sympathetic as well as repugnant. The gods formed a sort of political community of their own, which had its hierarchy, its distribution of ranks and duties, its contentions for power and occasional revolutions, its public meetings in the agora of Olympus, and its multitudinous banquets or festivals<sup>1</sup>. The great Olympic gods were in fact only the most exalted amongst an aggregate of quasi-human or ultra-human personages,—demons, heroes, nymphs, eponymous (or name-giving) genii, identified with each river, mountain<sup>2</sup>, cape, town, village, or known

<sup>1</sup> *Homer, Iliad*, i. 603; *xx. 7*. *Hesiod, Theogony*, 802.

<sup>2</sup> We read in the *Iliad* that Asteropæus was grandson of the beautiful river Axius, and Achilles, after having slain him, admits the dignity of this parentage, but boasts that his own descent from Zeus was much greater, since even the great river Achelôus, and Oceanus himself, are inferior to Zeus (*xxi.* 167-191). Alexander fights with Achilles, calling his brother Simois to his aid (213-308). Tyro, the daughter of Salmonëus, falls in love with Eupæus, the most beautiful of rivers (*Odyss.* *xi.* 237). Achelôus appears as a suitor of Demeter (*Sophocl. Trach.* 9).

There cannot be a better illustration of this feeling than what is told of the New Zealanders at the present time. The chief Heu-Heu appeals to his ancestor, the great mountain Tonga Riro: "I am the Heu-Heu, and rule over you all, just as my ancestor Tonga Riro, the mountain of snow, stands above all this land." (E. J. Wakefield, *Adventures in New Zealand*, vol. i. ch. 17, p. 465.) Heu-Heu refused permission to any one to ascend the mountain, on the ground that it was his

circumscription of territory,—besides horses, bulls, and dogs, of immortal breed and peculiar attri-

*tions* or *ancestors*: "he constantly identified himself with the mountain and called it his sacred ancestor" (*vol. ii. c. 3, p. 113*). The mountains in New Zealand are accounted by the natives masculine and fortunate: Tonga Kiro, and Tarunaki, two male mountains, quarrelled about the affections of a small volcanic female mountain in the neighbourhood (*ibid. ii. c. 4, p. 97*).

The religious imagination of the Hindoos also (as described by Colonel Sleeman in his excellent work, *Rambles and Recollections of an Indian Official*), affords a remarkable parallel to that of the early Greeks. Colonel Sleeman says,—

"I asked some of the Hindoos about us why they called the river Mother Nerbudda, if she was really never married. Her majesty (said they with great respect) would really never consent to be married after the indignity she suffered from her affianced bridegroom the Sohm: and we call her mother because she blesses us all, and we are anxious to accord her by the name which we consider to be the most respectful and endearing.

"Any Englishman can easily conceive a poet in his highest calenture of the brain, addressing the Ocean as a steed that knows his rider, and putting the crested billow as his flowing mane. But he must come to India to understand how every individual of a whole community of many millions can address a *fine river* as a *living being*—a *sovereign potentate*, who hears and understands all they say, and exercises a kind of local superintendence over their affairs, without a single temple in which her image is worshipped, or a single priest to profit by the delusion. As in the case of the Ganges, it is the river itself to whom they address themselves, and not to any deity residing in it, or presiding over it—the stream itself is the deity which fills their imaginations, and receives their homage." (*Rambles and Recollections of an Indian Official*, ch. iii. p. 20.) Compare also the remarks in the same work on the sanctity of *Mother Nerbudda* (chapter xxvii. p. 261); also of the holy personality of the earth.—"The land is considered as the *womb* of the prince or chief who holds it, the great parent from whom he derives all that maintains him, his family, and his establishments. If well-treated, she yields this in abundance to his son; but if he presumes to look upon her with the eye of *desire*, she ceases to be fruitful; or the Deity sends down hail or blight to destroy all that she yields. The manuring the surface of the fields, and the frequently inspecting the crops by the chief himself or his immediate agents, were considered by the people in this light—either it should not be done at all, or the duty should be delegated to inferior agents, whose close inspection of the great parent could not be so displeasing to the Deity." (*Ch. xxvii. p. 248.*)

See also about the Gods who are believed to reside in trees—the

lutes, and monsters of strange lineaments and combinations, "Gorgons and Harpies and Chimeras dire." As there were in every *gens* or family special gentile deities and foregone ancestors who watched over its members, forming in each the characteristic symbol and recognised guarantee of their union, so there seem to have been in each guild or trade peculiar beings whose vocation it was to co-operate or to impede in various stages of the business<sup>1</sup>.

Multitude and variety of quasi-human personages.

The extensive and multiform personifications, here faintly sketched, pervaded in every direction the mental system of the Greeks, and were identified intimately both with their conception and with their description of phenomena, present as well as past. That which to us is interesting as the mere creation of an exuberant fancy, was to the Greek genuine and venerated reality. The earth and

<sup>1</sup> See the song to the potters, in the *Homerica Epigrams* (14):—

Εὖ μὲν ἔσπερε μέσθου, δάισα, ὦ κερμαῖες  
 Δέξ' ἂν 'Αθηναίη, καὶ ἐπαύξει χεῖρα κερμίνων.  
 Εὖ δὲ μελεθῆναι κένετον, καὶ πάντα κινεσσυρί

A certain kindred between men and serpents (*συνγενεὶα τοῦ ἀνθρώπου τοῦ ὄφιο*) was recognised in the peculiar *gens* of the *Ἐριχονίδαι* near Patm, who possessed the gift of healing by their touches the bite of the serpent: the original hero of this *gens* was said to have been transformed from a serpent into a man (*Strabo, xiii. p. 689*).

the solid heaven (Gæa and Uranos) were both conceived and spoken of by him as endowed with appetite, feeling, sex, and most of the various attributes of humanity. Instead of a sun such as we now see, subject to astronomical laws, and forming the centre of a system the changes of which we can ascertain and foreknow, he saw the great god Hélios, mounting his chariot in the morning in the east, reaching at midday the height of the solid heaven, and arriving in the evening at the western horizon, with horses fatigued and desirous of repose. Hélios, having favourite spots wherein his beautiful cattle grazed, took pleasure in contemplating them during the course of his journey, and was sorely displeased if any man slew or injured them: he had moreover sons and daughters on earth, and as his all-seeing eye penetrated everywhere, he was sometimes in a situation to reveal secrets even to the gods themselves—while on other occasions he was constrained to turn aside in order to avoid contemplating scenes of abomination<sup>1</sup>. To us these now appear puerile,

<sup>1</sup> *Odyss.* ii. 388; viii. 270; *Æl.* i. 122, 416; xiii. 362. *Iliad.* xiv. 344. The Homeric Hymn to Dionysus expresses it neatly (63).—

‘Hélios δ’ ἰστέον, θεῶν σείσται ὅδ’ αἰεὶ ἀνδράων.

Also the remarkable story of Ennius of Apollonia, his neglect of the sacred cattle of Hélios, and the awful consequences of it (*Herodot.* ix. 93: compare *Thucyd.* *Idyll.* xiv. 150).

I know no passage in which this conception of the heavenly bodies as Persons is more strikingly set forth than in the words of the German chief *Doctulus*, pleading the cause of himself and his tribe the *Ausiani* before the Roman legate *Avitus*. This tribe, expelled by other tribes from its native possessions, had set down upon some of that wide extent of lands on the Lower Rhine which the Roman government reserved for the use of its soldiers, but which remained desert, because the soldiers had neither the means nor the inclination to occupy them. The old chief, pleading his cause before *Avitus*, who had issued an order

though pleasing fancies, but to an Homeric Greek they seemed perfectly natural and plausible. In his view, the description of the sun, as given in a modern astronomical treatise, would have appeared not merely absurd, but repulsive and impious. Even in later times, when the positive spirit of inquiry had made considerable progress, Anaxagoras and other astronomers incurred the charge of blasphemy for disparaging Hælios, and trying to assign in-

What we read as poetical fancies, were to the Greeks serious matters.

to him to evacuate the lands, first dwelt upon his fidelity of fifty years to the Roman cause, and next touched upon the enormity of retaining so large an area in a state of waste (Tacit. Ann. xlii. 55): "*Quantum partem campis præter, in quam pecora et armenta milium aliquando transmittuntur? Servarent aut receptas gregibus, inter hominum famam: modo ut vastitatem et solitudinem malint, quam amicos populos. Chamaeorum quondam ea arva, mox Tubantum, et post Ubi-purum fuisse. Sicuti cælum Diis, ita terras genus mortalium datus: quique vacuum, eam publicis esse. Solus deinde respiciens, et cætera sidera secum, quasi totum interrogabat—*presentes contineri ignis solus? potius mare superfunderet interitus terrarum receptura.* Commotus his Avitus," &c. The legate refused the request, but privately offered to Boiocala lands for himself apart from the tribe, which that chief indignantly spurned. He tried to maintain himself in the lands, but was expelled by the Roman arms, and forced to seek a home among the other German tribes, all of whom refused it. After much wandering and privation, the whole tribe of the Ansithari was annihilated: its warriors were all slain, its women and children sold as slaves.*

I notice this afflictive sequel, in order to show that the brave old chief was pleading before Avitus a matter of life and death both to himself and his tribe, and that the occasion was one least of all suited for a mere rhetorical periphrasis. His appeal is one sincere and heartfelt to the personal feelings and sympathies of Hælios.

Tacitus, in reporting the speech, accompanies it with the gloss "*quasi coram,*" to mark that the speaker here passes into a different order of ideas from that to which himself or his readers were accustomed. If Boiocala could have heard, and reported to his tribe, an astronomical lecture, he would have introduced some explanation, in order to facilitate to his tribe the comprehension of Hælios under a point of view so new to them. While Tacitus finds it necessary to illustrate by a comment the personification of the sun, Boiocala would have had some trouble to make his tribe comprehend the *reification* of the god Hælios.

variable laws to the solar phenomena<sup>1</sup>. Personifying fiction was in this way blended by the Homeric Greeks with their conception of the physical phenomena before them, not simply in the way of poetical ornament, but as a genuine portion of their every-day belief.

It was in this early state of the Grecian mind, stimulating so forcibly the imagination and the feelings, and acting through them upon the belief, that the great body of the mythes grew up and obtained circulation. They were, from first to last, personal narratives and adventures; and the persons who predominated as subjects of them were the gods, the heroes, the nymphs, &c., whose names

<sup>1</sup> Physical astronomy was both new and unaccounted impious in the time of the Peloponnesian war: see Plutarch, in his reference to that eclipse which proved so fatal to the Athenian army at Syracuse, in consequence of the religious feelings of Nicias: οὐ γὰρ ἡνέχοντο τοῖς φασίας καὶ μετεωρολόχαις τὸς πολιορκίους, οὐ εἰς νύκτας ἀλόγησεν καὶ δυνάμει ἀπροσφύτου καὶ καταρρακισμῶν πάθος διατρέχοντα τὸ θεῖον (Plutarch, Nicias, c. 23, and Pericles, c. 32; Thucyd., vii. 35; Diodor. Sic. 12. 8, 1). Phalar. ap. Diogen. Laert. ii. 9, 1).

"You strange man, Melitus," said Sokrates, on his trial, to his accuser, "are you seriously affirming that I do not think Helios and Selene to be gods, as the rest of mankind think?" "Certainly not, gentlemen of the Ekklesia; (this is the reply of Melitus,) Sokrates says that the sun is a stone, and the moon earth." "Why, my dear Melitus, you think you are preferring an accusation against Anaxagoras! You account those Ekklasts as contemptibly ignorant, as not to know that the books of Anaxagoras are full of such doctrines! Is it from me that the youth acquire such teaching, when they may buy the books for a drachma in the theatre, and may thus laugh me to scorn if I pretended to announce such views on my own—and to mention their extreme absurdity?" (ἄλλως τοι καὶ οὐρανὸν ἄνθρωποι λέγουσι, Plato, Apolog. Sokrat. c. 14. p. 26.)

The dreams of Helios and Selene is emphatically set forth by Plato, Legg. x. p. 886-889. He permits physical astronomy only under great restrictions and to a limited extent. Compare Xenoph. Memor. iv. 7, 7; Diogen. Laert. ii. 8; Plutarch, De Stoicor. Repugnantiis, c. 40. p. 1053; and Schaubach ad Anaxagor. Fragmenta, p. 6.

were known and revered, and in whom every one felt interested. To every god and every hero it was consistent with Grecian ideas to ascribe great diversity of human motive and attribute; each indeed has his own peculiar type of character, more or less strictly defined; but in all there was a wide foundation for animated narrative and for romantic incident. The gods and heroes of the land and the tribe belonged, in the conception of a Greek, alike to the present and to the past: he worshipped in their groves and at their festivals; he invoked their protection, and believed in their superintending guardianship, even in his own day: but their more special, intimate, and sympathising, agency was cast back into the unrecorded past<sup>1</sup>. To give suitable utterance to this general sentiment—to furnish body and movement and detail to these divine and heroic pre-existences, which were conceived only in shadowy outline,—to lighten up the dreams of

The gods and heroes—their chief agency cast back into the past and embodied in the myths.

<sup>1</sup> Hesiod, *Catalog. Pragm.* 76, p. 48, ed. Dindorf:—

Ζεὺς γὰρ τοῖς ἀνθρώποις ἑστὶν ἑστὶν ἑστὶν ἑστὶν ἑστὶν.

Ἀδμήτῳ τε Διὶ καὶ ἑστὶν ἑστὶν ἑστὶν ἑστὶν ἑστὶν.

Both the *Theogonia* and the *Works and Days* bear testimony to the same general feeling. Even the heroes of Homer suppose a preceding age, the inmates of which were in nearer contact with the gods than they themselves (*Odys.* vii. 22; *Iliad.* v. 204; xii. 382). Compare Catullus, *Carmin.* 64; *Epithalam. Peleus et Thetidis*, v. 382-408.

Menander the Rhetor (following generally the steps of Demys. Hal. Art. Rhetor. cap. 1-8) suggests to his fellow-citizens at Alexandria Trôas, proper and complimentary forms to invite a great man to visit their festival of the *Smynthia*:—*Ἐπειὶ γὰρ Ἀλεξάνδρῳ πολλοὶ καὶ ἰσχυροὶ ἔτι πάντες τοῖς Σμυνθίοις, ὅτι καὶ ἐστὶν θεοῦ ἀντιφάσις ἐκείνου τοῖς ἀνθρώποις, οὐκ οὐκ ἔστι πάντες οὐκ ἀντιφάσις (τοῖς Ἑσθίοις) &c.* v. 14. ap. Walz. *Coll. Rhetor.* 1. 62, p. 301. Menander seems to have been a native of Alexandria Trôas, though Suidas calls him a *Λαοδαιεύς* (see Walz. *Præf.* ad 1. ix. p. xv-xvi.) and even *Σμυνθίου*, *art. ix. c. 17*. The festival of the *Smynthia* lasted down to his time, embracing the whole duration of paganism from Homer downwards.

what the past must have been<sup>1</sup>, in the minds of those who knew not what it really had been—such was the spontaneous aim and inspiration of productive genius in the community, and such were the purposes which the Grecian myths pre-eminently accomplished.

The love of antiquities, which Tacitus notices as so prevalent among the Greeks of his day<sup>2</sup>, was one of the earliest, the most durable, and the most widely diffused of the national propensities. But the antiquities of every state were divine and heroic, reproducing the lineaments, but disregarding the measure and limits, of ordinary humanity. The gods formed the starting-point, beyond which no man thought of looking, though some gods were more ancient than others: their progeny, the heroes, many of them sprung from human mothers, constitute an intermediate link between god and man. The ancient epic usually recognises the presence of a multitude of nameless men, but they are introduced chiefly for the purpose of filling the scene, and of executing the orders, celebrating the valour, and bringing out the personality, of a few divine or heroic characters<sup>3</sup>. It was the glory of

<sup>1</sup> P. A. Müller observes justly, in his *Sagen-Bibliothek*, in reference to the Icelandic myths, "In dem Mythischen wird das Leben der Völker dargestellt, wie es wirklich dem kindlichen Verstande, der jugendlichen Einbildungskraft, und dem vollen Helden, erscheint."

(Lange's *Untersuchungen über die Nordische und Deutsche Heldensage*, translated from P. A. Müller, introd. p. 1.)

<sup>2</sup> Titus visited the temple of the Paphian Venus in Cyprus, "speculatâ opulentâ donisque rebus, quoque aliis Iulius antiquitatibus Græcorum genus inter se refectari adfingit, de navigatione primus consuluit." (Tacit. Hist. ii. 4-5.)

<sup>3</sup> Aristotle. *Problems* xii. 42. Οἱ δὲ ἑλληνες τὰν ἀρχαίαν μὲν ἑστῶσαν ἐποὶν καὶ δὲ λαοὶ ἀρχαίαν. Icterus followed this opinion also; but the

bards and storytellers to be able to satisfy those religious and patriotic predispositions of the public, which caused the primary demand for their tales, and which were of a nature eminently inviting and expansive. For Grecian religion was many-sided and many-coloured; it comprised a great multiplicity of persons, together with much diversity in the types of character; it divinised every vein and attribute of humanity, the lofty as well as the mean—the tender as well as the warlike—the self-devoting and adventurous as well as the laughter-loving and sensual. We shall hereafter reach a time when philosophers protested against such identification of the gods with the more vulgar appetites and enjoyments, believing that nothing except the spiritual attributes of man could properly be transferred to superhuman beings, and drawing their predicates respecting the gods exclusively from what was awful, majestic, and terror-striking, in human affairs. Such restrictions on the religious fancy were continually on the increase, and the mystic and didactic stamp which marked the last century of paganism in the days of Julian and Libanius, contrasts forcibly with the concrete and vivacious forms, full of vigorous impulse and alive to all the capricious gusts of the human temperament, which people the Homeric Olympus<sup>1</sup>. At present, however, we

more common view seems to have considered all who combated at Troy as heroes (see Schol. *Iliad* ii. 110; xv. 211), and so Hesiod treats them (*Opp. Di.* 158).

In reference to the Trojan war, Aristotle says—*αἰσίνης ἐκ τοῦ ἡρώεως καὶ τοῦ ἡρώεως περὶ τὴν πόλιν* (*Éthic. Nicom.* i. 2; compare vii. 1.)

<sup>1</sup> Generation by a god is treated in the old poems as an act entirely human and physical (*γένεσις*—*καταγένεσις*); and this was the common opinion in the days of Plato (*Plat. Apolog. Socrat.* c. 13. p. 15); the hero At-

have only to consider the early, or Homeric and Hesiodic paganism, and its operation in the genesis

trabakris is father of the Lacedæmonian king Demaratus (Herod. vi. 66). [Herodotus does not believe the story told him at Babylon respecting Belus (i. 189).] Euripides sometimes expresses disapprobation of the idea (Ion, 359), but Plato passed among a large portion of his admirers for the actual son of Apollo, and his reported father Ariston on marrying was admonished in a dream to respect the person of his wife Periktionis, then pregnant by Apollo, until after the birth of the child Plato (Plutarch, Quæst. Sympos. p. 717. tom. 1; Diogen. Laert. iii. 2; Origen, cont. Celz. i. p. 29). Plutarch (in Life of Numa, c. 4; compare Life of Theseus, 2) discusses the subject, and is inclined to disallow everything beyond mental sympathy and tenderness in a god: Pausanias deals timidly with it, and is not always consistent with himself; while the later rhetors spurnish it altogether. Menander, περί 'Ισουλαικῶν, (towards the end of the third century B.C.) prescribes rules for gaining up a king: you are to praise him for the gods to which he belongs (perhaps you may be able to make out that he really is the son of some god; for many who seem to be from men, are really sent down by God and are emanations from the Supreme Deity—καλλὰ τὸ μὲρ δοῦν ἐξ ἀνθρώπων θεῶ, τῇ δ' ἀληθείᾳ παρὰ τοῦ θεοῦ καταπέμψονται οὐδ' ὅτι ἀσέβηται ὄντας τοὺς ἐπίτῃ—c. and γὰρ 'Ημιόλης ἐπαίσει μὲν Ἀρφικριανόν, τῷ δὲ ἀληθεῖ ἔτι δαΐ. Οὗτω καὶ βασιλεῖς ὁ ἑστέροις ἐν μὲν δοκίᾳ ἐξ ἀνθρώπων, τῇ δὲ ἀληθείᾳ τὴν αὐτοβόλῃν ἀνθρώπων ἔχει, &c. (Menander ap. Walz. Collect. Rhetor. t. ix. c. i. p. 218.) Again—περὶ Ἑμιθιαίων—δοῖτε γένεσιν παιδὸς δημιουργοῖς ἐνείησιν—Ἀπάλῳ τῇ Ἀσοληπίου γένεσι ἐδῆμιον-γγορ, p. 323-327; compare Herimonia, about the story of Apollo and Daphnê, Progymania. c. 4; and Julian. Orat. vii. p. 250.

The contrast of the pagan mythology of this age (Menander had himself composed a hymn of invocation to Apollo—περὶ Ἑκαμῆων, c. 3. t. ix. p. 136, Walz.) with that of Homer is very worthy of notice. In the Homeric Catalogue of Women much was said respecting the marriages and amours of the gods, so as to furnish many suggestions, like the love-songs of Sappho, to the composers of Epulianistic Odes (Menand. id. op. iv. c. 6, p. 278).

Menander gives a specimen of a pæan hymn fit to be addressed to the Sauntium Apollo (p. 320); the spiritual character of which hymn forms the most pointed contrast with the Homeric hymn to the same god.

We may remark an analogous case in which the Homeric hymn to Apollo is modified by Plutarch. To provide for the establishment of his temple at Delphi, Apollo was described as having himself, in the shape of a dolphin, swum before a Karian vessel and guided it to Krissa, where he directed the terrified crew to open the Delphian temple. But Plutarch says that this old statement was not correct

of the mythical narratives. We cannot doubt that it supplied the most powerful stimulus, and the only one which the times admitted, to the creative faculty of the people; as well from the sociability, the gradations, and the mutual action and reaction of its gods and heroes, as from the amplitude, the variety, and the purely human cast, of its fundamental types.

Stimulus  
which they  
afforded to  
the mythopœic  
faculty.

Though we may thus explain the mythopœic fertility of the Greeks, I am far from pretending that we can render any sufficient account of the supreme beauty of their chief epic and artistical productions. There is something in the first-rate productions of individual genius which lies beyond the compass of philosophical theory: the special breath of the Muse (to speak the language of ancient Greece) must be present in order to give them being. Even among her votaries, many are called, but few are chosen; and the peculiarities of those few remain as yet her own secret.

the god had not himself appeared in the shape of a dolphin—he had sent a dolphin expressly to guide the vessel (Plutarch, de Solertia Animal. p. 183). See also a contrast between the Homeric Zeus, and the genuine Zeus, (ἀληθινός) brought out in Plutarch, Delect. Oracul. c. 30. p. 426.

Illicit animus seem in these later times to be ascribed to the *daímōnes*; see the singular controversy started among the fictitious pleadings of the ancient rhetors—*Νόμος ἄνθρωπος, παρθένος καὶ καθῆρας εἰμὸς τὰς ἡμέρας, ἡ πόλις τῆς εὐπείθης ἀνδρῶν φίλινος, καὶ ἀνδρῶν..... Ἄλλ' ἔγωγε, φασί, δὸν τὰς τῶν δαίμωνων ἐπιφορὰς καὶ ἐπιβολὰς περιτρέχοντες καὶ πᾶσι νόμοις ἀντιπῶν ἐναντὶ τῶν τοιούτων; Ἰδοὺ γὰρ ἅπας τὸ μὴ ἀφαιρηθῆναι τῶν παρθενίου φερεῖν τι ἀνερπιδεύον, τὸ μὴ ἐπὶ τὸ γενεῖν (Anonymi Scholæ ad Hermogen. *Στάσιον*, ap. Wala. Coll. Rh. l. vii. p. 162).*

Aparas of Gaiarus, a sophist of the time of Diocletian, pretended to be a son of Pan (see Suidas, v. Ἀψίρις). The anecdote respecting the rivers Skamander and Meander in the tenth epistle ascribed to the erastæ *Εὐθύμου* (p. 737) is curious, but we do not know the date of that epistle.

We shall not however forget that Grecian language was also an indispensable requisite to the growth and beauty of Grecian mythes—its richness, its flexibility and capacity of new combinations, its vocalic abundance and metrical pronunciation: and many even among its proper names, by their analogy to words really significant, gave direct occasion to explanatory or illustrative stories. Etymological mythes are found in sensible proportion among the whole number.

To understand properly then the Grecian mythes, we must try to identify ourselves with the state of mind of the original mythopoeic age; a process not very easy, since it requires us to adopt a string of poetical fancies not simply as realities, but as the governing realities of the mental system<sup>1</sup>; yet a

<sup>1</sup> The mental analogy between the early stages of human civilisation and the childhood of the individual is forcibly and frequently set forth in the works of Vico. That eminently original thinker dwells upon the poetical and religious encryptions as the first to develop themselves in the human mind, and as furnishing not merely connecting threads for the explanation of sensible phenomena, but also stimuli for the hopes and fears, and means of socialising influence to men of genius, at a time when reason was yet asleep. He points out the personifying instinct ("istinto d'animazione") as the spontaneous philosophy of man, "to make himself the ruler of the universe," and to suppose everywhere a quasi-human agency as the determining cause. He remarks that in an age of fancy and feeling, the conceptions and language of poetry coincide with those of reality and common life, instead of standing apart as a separate vein. These views are repeated frequently (and with some variations of opinion as he grew older) in his Latin work *De Uno Universi Juris Principio*, as well as in the two successive editions of his great Italian work, *Scienza Nuova* (it must be added that Vico as an expositor is prolix, and does not do justice to his own powers of original thought): I select the following from the second edition of the latter treatise, published by himself in 1744, *Della Scienza Poetica* (see vol. v. p. 189 of Ferrari's edition of his Works, Milan, 1835): "Adunque la sapienza poetica, che fu la prima sapienza della Gentilità, dovette incominciare

process which would only reproduce something analogous to our own childhood. The age was one destitute both of recorded history and of positive science, but full of imagination and sentiment and religious impressibility; from these sources sprung that multitude of supposed persons around whom

da una Metakalea, non ragionata ed astratta, qual è questa or degli addottrinati, ma sentita ed immaginata, quale dov'è esser di tai primi uomini, eccome quelli ch' erano di altra razza, e tutti volentieri animi e vigorosissime fantasie, come è stato nella dignità (the *Asiatics*) stabilito. Questa fu la loro propria poesia, la qual in essi fu una facoltà loro innaturale, perchè erano di tali sensi e di sì fatte fantasie naturalmente forniti, nata da ignoranza di ragioni — la qual fu loro madre di meraviglia di tutte le cose, che quelli ignoranti di tutte le cose fortemente ammiravano. Tal poesia incominciò in essi divina: perchè nello stesso tempo ch' essi immaginavano le ragioni delle cose, che attribivano ed ammiravano, essere Dei, come ora il confermiamo con gli Americani, i quali tutte le cose che superano la loro piccolo capacità, dicono esser Dei.....nello stesso tempo, diciamo, alle cose ammirate davano l' essere di sostanza dalla propria lor idea: ch' è appunto la natura dei fanciulli, che cominciano prendere tra mani cose inanimate, e trattarle e favellarle, come fossero quelle persone vive. In total guisa i primi uomini delle nazioni gentili, come fanciulli del nascente gener umano, dalla lor idea creavano mai le cose.....per la loro volente ignoranza, il facevano in forza d' una corporeità alcuna fantasma, e perchè era corporeità, il facevano con una meravigliosa similitudine, tal e tanta, che perturbava all' occhio essi inclusi, che fingendo le si creavano..... Di questa natura di cose umane restò eterna proprietà spiegata con nobel espressione da Tacito, che vanamente gli uomini spaventati *fingunt simul et terrantque*."

After describing the condition of rude men, terrified with thunder and other vast atmospheric phenomena, Vico proceeds (*ib.* p. 172)—"In tal caso la natura della mente umana porta ch' ella attribuisca all' effetto la sua natura: e la natura loro era in tale stato l' uomini tutti volente furro di corpo, che urlando, brontolando, spiegavano le loro violentissime passioni, si flusero il cielo esser un gran corpo animato, che per tal aspetto chiamavano Giove, che col flacon dei fulmini e col fragore dei toni volea lor dir qualche cosa.....E al fanno di tutta la natura un vasto corpo animato, che senza passioni ed affetti."

Now the contrast with modern habits of thought.—

"Ma nessuno ora per la natura delle nostre anime manca troppo ritratta dai sensi nel medesimo volgo—con le tante astrazioni, di quante sono pure le lingue—con tanti vocaboli astratti—e di troppo sentiti—

all combinations of sensible phenomena were grouped, and towards whom curiosity, sympathies and reverence were earnestly directed. The adventures of such persons were the only aliment suited at once both to the appetites and to the comprehension of an early Greek; and the mythes which de-

gliata con l'arte dello scrivere, e quasi spiritualizzata con la pratica del numeri—*ci è naturalmente negata di poter formare la vasta immagine di quel donna che diciamo Natura simpatetica, che mentre con la *lycée* dicono, non hanno nulla in lor mente, perocchè la lor mente è diletta il falso, che è nulla; nè sono mercuri della fantasia a poterne formare una falsa vastissima immagine.* Così ora ci è naturalmente negata di poter entrare nella vasta immaginazione di quei primi uomini, le menti dei quali di nulla erano svegliate, di nulla estratte, di nulla spiritualizzate,.....Quindi diciamus sopra chi ora appena intrader di più, affatto immaginar non si può, come pensavano i primi uomini che fondarono la nostra gentilezza.”

In this citation (scarcely almost too long for a note) I have omitted several sentences not essential to the general meaning. It places these early divine fables and theological poets (so Vico calls them) in their true point of view, and assigns to them their proper place in the ascending movement of human society: it refers the mythes to an early religious and poetical age, in which feeling and fancy composed the whole fund of the human mind, over and above the powers of sense: the great mental change which has since taken place has robbed us of the power, not merely of believing them as they were originally believed, but even of conceiving completely that which their first inventors intended to express.

The views here given from this distinguished Italian (the precursor of F. A. Wolf in regard to the Homeric poems, as well as of Niebuhr in regard to the Roman history) appear to me no less correct than profound; and the obvious inference from them is, that attempts to *explore* (as it is commonly called) the mythes (i. e. to translate them into some physical, moral or historical statements suitable to our order of thought) are, even as guesses, essentially unprofitable. Nevertheless Vico, inconsistently with his own general view, bestows great labour and ingenuity in attempting to discover internal meaning symbolized under many of the mythes; and even lays down the position, “*che i primi uomini della Gentilità essendo stati semplicissimi, quanto i favoli, i quali per natura son veritieri: le prime favole non poterono finge nulla di falso: per lo che drettori necessariamente sono vere avarrazioni.*” (See vol. v. p. 194: compare also p. 19, Axiom xxi.) If this position be meant simply to exclude the idea of designed imposture,

talled them, while powerfully interesting his emotions, furnished to him at the same time a quasi-history and quasi-philosophy: they filled up the vacuum of the unrecorded past, and explained many of the puzzling incognita of the present<sup>1</sup>.

it may for the most part be admitted; but Vico evidently intends something more. He thinks that there lies hid under the fables a basis of matter of fact—not literal, but symbolised—which he draws out and exhibits under the form of a vivid history of the divine and heroic times: a confusion of doctrine the same remarkable, since he distinctly tells us (in perfect conformity with the long passage above transcribed from him) that the special matter of those early myths is “impossibility accredited as truth.”—*che la di lei propria materia è l'impossibile credibile*” (p. 176, and still more fully in the first *reduction* of the *Scienza Nuova*, b. iii. c. 4; vol. iv. p. 187 of his Works).

When we read the *Commentes Mythologici* of Vico (De Constantini Philologiae, Pars Posterior, c. xxx.; vol. iii. p. 363), and his explanation of the legends of the Olympus gods, Hercules, Theseus, Cadmus, &c., we see clearly that the meaning which he professes to bring out is our previously put in by himself.

There are some just remarks to the same purpose in Karl Ritter's *Verhülle Europäischer Völker—Geschichte*, Alsdorf, ii. p. 150 seq. (Berlin, 1820). He too points out how much the faith of the old world (*der Glaube der Vorwelt*) has become foreign to our minds, since the recent advances of “Politik und Kritik,” and how impossible it is for us to elicit history from their conceptions by our analysis, in cases where they have not distinctly laid it out for us. The great length of this note prevents me from citing the passage: and he seems to me also (like Vico) to pursue his own particular investigations in forgetfulness of the principle laid down by himself.

<sup>1</sup> O. Müller, in his *Prolegomena zu einer wissenschaftlichen Mythologie* (sup. iv. p. 10\*), has pointed out the mistake of supposing that there existed originally some nucleus of pure reality as the starting-point of the myths, and that upon this nucleus fiction was superinduced afterwards: he maintains that the real and the ideal were blended together in the primitive conception of the myths. Regarding the general state of mind out of which the myths grew, see especially pages 78 and 110 of that work, which is everywhere full of instruction on the subject of the Grecian myths, and is eminently suggestive, even where the positions of the author are not completely made out.

The short *Heidelberger der Griechen* by Nitzsch (Kiel, 1842, &c.) contains more of just and original thought on the subject of the Grecian myths than any work with which I am acquainted. I endorse completely the subjective point of view in which he regards them; and

Easy faith  
in popular  
and plausible  
stories.

Nor need we wonder that the same plausibility, which captivated his imagination and his feelings, was sufficient to engender spontaneous belief; or rather, that no question, as to truth or falsehood of the narrative, suggested itself to his mind. His faith is ready, literal and uninquiring, apart from all thought of discriminating fact from fiction, or of detecting hidden and symbolised meaning; it is enough that what he hears be intrinsically plausible and seductive, and that there be no special cause to provoke doubt. And if indeed there were, the poet overrules such doubts by the holy and all-sufficient authority of the Muse, whose omniscience is the warrant for his recital, as her inspiration is the cause of his success.

The state of mind, and the relation of speaker to hearers, thus depicted, stand clearly marked in the terms and tenor of the ancient epic, if we only put a plain meaning upon what we read. The poet—

although I have profited much from reading his short tract, I may mention that before I ever saw it, I had enforced the same reasoning on the subject in an article in the *Westminster Review*, May 1843, on the *Herren-Geschichten* of Niebuhr.

Jacob Grimm, in the preface to his *Deutsche Mythologie* (p. 1, 1st edit. Göt. 1835), pointedly insists on the distinction between "Sage" and history, as well as upon the fact that the former has its chief root in religious belief. "Legend and history (he says) are powers each by itself, adjoining indeed on the confines, but having each its own separate and exclusive ground;" also p. xxvii. of the same introduction.

A view substantially similar is adopted by William Grimm, the other of the two distinguished brothers whose labours have so much elucidated Teutonic philology and antiquities. He examines the extent to which either historical matter or historical names can be traced in the *Deutsche Heldensage*; and he comes to the conclusion that the former is next to nothing, the latter not considerable. He draws particular attention to the fact that the audience for whom these poems were intended had not learned to distinguish history from poetry (W. Grimm, *Deutsche Heldensage*, pp. 8, 337, 342, 345, 359, Göt. 1829).

like the prophet, whom he so much resembles—sings under heavenly guidance, inspired by the goddess to whom he has prayed for her assisting impulse: she puts the word into his mouth and the incidents into his mind: he is a privileged man, chosen as her organ and speaking from her revelations<sup>1</sup>. As the Muse grants the gift of song to whom she will, so she sometimes in her anger snatches it away, and the most consummate human genius is then left silent and helpless<sup>2</sup>. It is true that these expressions, of the Muse inspiring and the poet singing a tale of past times, have passed from the ancient epic to compositions produced under very different circumstances, and have now degenerated into unmeaning forms of speech; but they gained currency originally in their genuine and literal acceptance. If poets had from the beginning written or recited, the predicate of singing would never have been ascribed to them; nor would it ever have become customary to employ

Poets—receive their matter from the divine inspiration of the Muse.

Kalchans the prophet receives his inspiration from Apollo, who confers upon him the same knowledge both of past and future as the Muses gave to Hesiod (*Iliad.* i. 69):—

Καλχῆος Θετοπόλην, ἀλυστολόω δ' ἄρ' ἔρποντο

the name of the Muse as a die to be stamped on licensed fiction, unless the practice had begun when her agency was invoked and hailed in perfect good faith. Belief, the fruit of deliberate inquiry and a rational scrutiny of evidence, is in such an age unknown. The simple faith of the time slides in unconsciously, when the imagination and feeling are exalted; and inspired authority is at once understood, easily admitted, and implicitly confided in.

Meaning of  
the word  
*mythe*—  
original—  
altered.

The word *mythe* (*μῦθος*, *fabula*, *story*), in its original meaning, signified simply a statement or current narrative, without any connotative implication either of truth or falsehood. Subsequently the meaning of the word (in Latin and English as well as in Greek) changed, and came to carry with it the idea of an old personal narrative, always uncertified, sometimes untrue or avowedly fictitious<sup>1</sup>. And this change was the result of a silent alteration in the mental state of the society,—of a transition on the part of the superior minds (and more or less on the

<sup>1</sup> In this later sense it stands pointedly opposed to *ιστορία*, *history*, which seems originally to have designated matter of fact, present and seen by the describer, or the result of his personal inquiries (see Herodot. i. 1; Varro Placc. ap. Ant. Gell. v. 18; Eusebius, Hist. Eccl. li. 12); and the observations of Dr. Jortin, Remarks on Ecclesiastical History, vol. i. p. 59).

The original use of the word *λόγος* was the same as that of *μῦθος*—a current tale true or false, as the case might be; and the term designating a person much conversant with the old legends (*λόγιος*) is derived from it (Herod. i. 1; a. 37). Hekataeus and Herodotus both use *λόγος* in this sense. Herodotus calls both *Ἰστορί* and *Ἡκταίου λόγον* (ii. 134-147).

Aristotle (*Metaphys.* i. p. 9, ed. Brandis) seems to use *μῦθος* in this sense, where he says—*ἀπὸ τοῦ φιλόμυθοις ὁ φιλόσοφος πάλιν ἵσται ὅτι μῦθοι ἐνερῆται ἐν διαμνησίᾳ, &c.* In the same treatise (ii. p. 259) he uses it to signify fabulous amplification and transformation of a doctrine true in the main.

part of all) to a stricter and more elevated canon of credibility, in consequence of familiarity with recorded history and its essential tests, affirmative as well as negative. Among the original bearers of the myths, all such tests were unknown: they had not yet learned the lesson of critical disbelief: the mythic passed unquestioned from the mere fact of its currency, and from its harmony with existing sentiments and preconceptions. The very circumstances which contributed to rob it of literal belief in after-time, strengthened its hold upon the mind of the Homeric man. He looked for wonders and unusual combinations in the past; he expected to hear of gods, heroes and men, moving and operating together upon earth; he pictured to himself the fore-time as a theatre in which the gods interfered directly, obviously, and frequently, for the protection of their favourites and the punishment of their foes. The rational conception, then only dawning in his mind, of a systematic course of nature was absorbed by this fervent and lively faith. And if he could have been supplied with as perfect and philosophical a history of his own real past time, as we are now enabled to furnish with regard to the last century of England or France, faithfully recording all the successive events, and accounting for them by known positive laws, but introducing no special interventions of Zeus and Apollo—such a history would have appeared to him not merely unholy and unimpressive, but destitute of all plausibility or title to credence. It would have provoked in him the same feeling of incredulous aversion as a description of the sun (to repeat the pre-

To us these mythes are interesting fictions; to the Homeric and Hesiodic audience they were "*rerum divinarum et humanarum scientia*,"—an aggregate of religious, physical, and historical revelations, rendered more captivating, but not less true and real, by the bright colouring and fantastic shapes in which they were presented. Throughout the whole of "mythe-bearing Hellas" they formed the staple of the uninstructed Greek mind, upon which history and philosophy were by so slow degrees superinduced; and they continued to be the aliment of ordinary thought and conversation, even after history and philosophy had partially

<sup>1</sup> M. Ampère, in his *Histoire Littéraire de la France* (ch. vii. t. i. p. 310), distinguishes the *Saga* (which corresponds as nearly as possible with the Greek *μῦθος, λόγος, εἰρηφύων λόγος*), as a special product of the intellect, not capable of being correctly designated either as history, or as fiction, or as philosophy:—

"Il est un pays, la Scandinavie, où la tradition racontée s'est développée plus complètement qu'ailleurs, où ses produits ont été plus soigneusement recueillis et mieux conservés; dans ce pays, ils ont reçu un nom particulier, dont l'équivalent exact ne se trouve pas hors des langues Germaniques: c'est le mot *Saga*, *Sage*, ce qu'on dit, ce qu'on raconte,—la tradition orale. Si l'on prend ce mot non dans une acception restreinte, mais dans le sens général où le prevoit Niebuhr quand il l'appliquait, par exemple, aux traditions populaires qui ont pu servir à Tite Live une portion de son histoire, la *Saga* doit être comptée parmi les produits spontanés de l'imagination humaine. La *Saga* a son existence propre comme le poëme, comme l'historien, comme le roman. Elle n'est pas le poëme, parcequ'elle n'est pas chantée, mais parlée; elle n'est pas l'historien, parcequ'elle est dénuée de critique; elle n'est pas le roman, parcequ'elle est sincère, parcequ'elle a fid à ce qu'elle raconte. Elle n'invente pas, mais répète; elle peut se tromper, mais elle ne ment jamais. Ce n'est un objet merveilleux, que parce qu'on ne fabrique soigneusement, et que tout le monde altère et falsifie sans le vouloir, qui se perpétue à la manière des chants primitifs et populaires,—ce récit, quand il se rapporte, non à un héros, mais à un saint, s'appelle une légende."

supplanted the mythical faith among the leading men, and disturbed it more or less in the ideas of all. The men, the women, and the children of the remote dèmes and villages of Greece, to whom Thucydidès, Hippokratès, Aristotle, or Hipparchus were unknown, still continued to dwell upon the local fables which formed their religious and patriotic antiquity. And Pausanias, even in his time, heard everywhere divine or heroic legends yet alive, precisely of the type of the old epic; he found the conceptions of religious and mythical faith, co-existent with those of positive science, and contending against them at more or less of odds, according to the temper of the individual. Now it is the remarkable characteristic of the Homeric age, that no such co-existence or contention had yet begun. The religious and mythical point of view covers, for the most part, all the phenomena of nature; while the conception of invariable sequence exists only in the background, itself personified under the name of the *Mœræ*, or Fates, and produced generally as an exception to the omnipotence of Zeus for all ordinary purposes. Voluntary agents, visible and invisible, impel and govern everything. Moreover this point of view is universal throughout the community,—adopted with equal fervour, and carried out with equal consistency, by the loftiest minds and by the lowest. The great man of that day is he who, penetrated like others with the general faith, and never once imagining any other system of nature than the agency of these voluntary Beings, can clothe them in suitable circumstances and details, and exhibit

in living body and action those types which his hearers dimly prefigure. Such men were the authors of the *Iliad* and the *Odyssey*; embodying in themselves the whole measure of intellectual excellence which their age was capable of feeling: to us, the first of poets—but to their own public, religious teachers, historians, and philosophers besides—inasmuch as all that then represented history and philosophy was derived from those epical effusions and from others homogeneous with them. Herodotus recognises Homer and Hesiod as the main authors of Grecian belief respecting the names and generations, the attributes and agency, the forms and the worship of the gods<sup>1</sup>.

History, philosophy, &c., properly so called and conforming to our ideas (of which the subsequent Greeks were the first creators), never belonged to more than a comparatively small number of thinking men, though their influence indirectly affected more or less the whole national mind. But when positive science and criticism, and the idea of an invariable sequence of events, came to supplant in the more vigorous intellects the old mythical creed of omnipresent personification, an inevitable scission was produced between the instructed few and the remaining community. The opposition between the scientific and the religious point of view was not slow in manifesting itself: in general language, indeed, both might seem to stand together, but in every particular case the admission of one involved the rejection of the other. According to the theory which then became predominant, the course of na-

ture was held to move invariably on, by powers and attributes of its own, unless the gods chose to interfere and reverse it; but they had the power of interfering as often and to as great an extent as they thought fit. Here the question was at once opened, respecting a great variety of particular phenomena, whether they were to be regarded as natural or miraculous. No constant or discernible test could be suggested to discriminate the two: every man was called upon to settle the doubt for himself, and each settled it according to the extent of his knowledge, the force of his logic, the state of his health, his hopes, his fears, and many other considerations affecting his separate conclusion. In a question thus perpetually arising, and full of practical consequences, instructed minds, like Periklēs, Thucydidēs, and Euripidēs, tended more and more to the scientific point of view<sup>1</sup>, in cases where

<sup>1</sup> See Plutarch, Perikl. cap. 5, 32, 38; Cicero, De Repub. l. 15-16, ed. Mai.

The phylogist Theophrastus, in his valuable collection of facts respecting vegetable organisation, is often under the necessity of opposing his scientific interpretation of curious incidents in the vegetable world to the religious interpretation of them which he found current. Anomalous phenomena in the growth or decay of trees were construed as signs from the gods, and submitted to a prophet for explanation (see Hist. Plantar. ii. 3; iv. 16; v. 3).

We may remark, however, that the old faith had still a certain hold over his mind. In commenting on the story of the willow-tree at Philippi, and the venerable old plane-tree at Antandros (more than sixty feet high, and requiring four men to grasp it round in the girth), having been blown down by a high wind, and afterwards spontaneously assuming their erect posture, he offers some explanations how such a phenomenon might have happened, but he admits, at the end, that there *may* be something extra-natural in the case, 'Αλλὰ καὶ αὐτὸ ἴσως θεοφύεται αἰτίᾳ ἰσχυρῇ, &c. (De Caus. Plant. v. 4): see a singular miracle in reference to the cedar-tree of Tyreman (Tacit. Hist. ii. 70).

Euripidēs, in his last tragedy called *Melampus Iovis*, placed in the

the general public were constantly gravitating towards the religious.

The age immediately prior to this unsettled con-

front of Melanippé a formal discussion and refutation of the whole doctrine of *signa*, or supernatural indications (Dionys. Halicarn. *Ant. Roman.* p. 300-356, Reisk.). Compare the Fables of Phœdrus, vi. 3; Plutarch, *Sept. Sap. Conv.* ch. 3, p. 149; and the curious philosophical explanation by which the learned men of Alexandria tranquillised the alarms of the vulgar, on occasion of the serpent said to have been seen entwined round the head of the crucified Klementis (Plutarch, *Klementis*, c. 39).

It is one part of the duty of an able physician, according to the Hippocratic treatise called *Prognosticon* (c. 1, t. 2, p. 112, ed. Lâtêr), when he visits his patient, to examine whether there is anything divine in the malady, *ἀπὸ θεοῦ καὶ ἐκ τοῦ θεοῦ ἴσμεν ἐκ τῶν νόσων*: this, however, does not agree with the memorable doctrine laid down in the treatise, *De Aër, Locis et Aquis* (c. 22, p. 78, ed. Lâtêr), and cited hereafter, in this chapter. Nor does Galen seem to have regarded it as harmonising with the general views of Hippokratēs. In the excellent Prolegomena of M. Lâtêr to his edition of Hippokratēs (t. i. p. 76) will be found an unedited scholium, wherein the opinion of Basælianus and other physicians is given, that the affections of the plague were to be looked upon as divine, inasmuch as the disease came from God; and also the opinion of Xenophôn, the friend of Praxagoras, that the "periods of days of crisis" in fever was divine; "For (said Xenophôn) just as the *Dioskuri*, being gods, appear to the mariner in the storm and bring him salvation, so also do the days of crisis, when they arrive, in fever." Galen, in commenting upon this doctrine of Xenophôn, says that the author "has expressed his own individual feeling, but has no way set forth the opinion of Hippokratēs;" *Ὁ δὲ τὰς κρίσεις γινώσκων εἰς τὴν εὐρίαν εἶπεν, ἵνα τοῖς τοῖς ἀνθρώποις αὐτῶν αὐτῶν τῶν κρίσεων γινώσκων εἶπεν* (Galen, *Opp.* t. v. p. 123, ed. Haub.).

The comparison of the *Dioskuri* appended to by Xenophôn is a precise reproduction of their function as described in the Homeric Hymn (*Hymn. xxviii.* 10); his personification of the "days of crisis" introduces the old religious agency to fill up a gap in his medical science.

I annex an illustration from the Hindoo vein of thought;—"It is a rule with the Hindoos to bury, and not to burn, the bodies of those who die of the small pox: for (say they) the small pox is not only caused by the goddess *Darey*, but is, in fact, *Darey herself*; and to burn the body of a person affected with this disease, is, in reality, neither more our loss than to burn the goddess." (Coleman, *Rambles and Recollections*, &c. vol. i. ch. xxi. p. 221.)

dition of thought is the really mythopœic age; in which the creative faculties of the society know no other employment, and the mass of the society no other mental demand. The perfect expression of such a period, in its full peculiarity and grandeur, is to be found in the *Iliad* and *Odyssey*,—poems of which we cannot determine the exact date, but which seem both to have existed prior to the first Olympiad, 776 *a.c.*, our earliest trustworthy mark of Grecian time. For some time after that event, the mythopœic tendencies continued in vigour (*Arktinus*, *Læschês*, *Eumêlus*, and seemingly most of the *Hesiodic* poems, fall within or shortly after the first century of recorded Olympiads); but from and after this first century, we may trace the operation of causes which gradually enfeebled and narrowed them, altering the point of view from which the mythes were looked at. What these causes were, it will be necessary briefly to intimate.

Mythopœic age—ante-rior to this dissent.

The foremost and most general of all is, the expansive force of Grecian intellect itself,—a quality in which this remarkable people stand distinguished from all their neighbours and contemporaries. Most, if not all nations have had mythes, but no nation except the Greeks have imparted to them immortal charm and universal interest; and the same mental capacities, which raised the great men of the poetic age to this exalted level, also pushed forward their successors to outgrow the early faith in which the mythes had been generated and accreted.

Expansive force of Grecian intellect.

One great mark, as well as means, of such intellectual expansion, was the habit of attending

to, recording, and combining, positive and present facts, both domestic and foreign. In the genuine Grecian epic, the theme was an unknown and aoristic past; but even as early as the *Works and Days* of Hesiod, the present begins to figure: the man who tills the earth appears in his own solitary nakedness, apart from gods and heroes—bound indeed by serious obligations to the gods, but contending against many difficulties which are not to be removed by simple reliance on their help. The poet denounces his age in the strongest terms as miserable, degraded and profligate, and looks back with reverential envy to the extinct heroic races who fought at Troy and Thèbes. Yet bad as the present time is, the Muse condescends to look at it along with him, and to prescribe rules for human life—with the assurance that if a man be industrious, frugal, provident, just and friendly in his dealings, the gods will recompense him with affluence and security. Nor does the Muse disdain, while holding out such promise, to cast herself into the most humble details of present existence and to give advice thoroughly practical and calculating. Men whose minds were full of the heroes of Homer, called Hesiod in contempt the poet of the Helots; and the contrast between the two is certainly a remarkable proof of the tendency of Greek poetry towards the present and the positive.

Other manifestations of the same tendency become visible in the age of Archilochus (B.C. 680-660). In an age when metrical composition and the living voice are the only means whereby the productive minds of a community make themselves

felt, the invention of a new metre, new forms of sung and recitation, or diversified accompaniments, constitute an epoch. The iambic, elegiac, choric, and lyric poetry, from Archilochus downwards, all indicate purposes in the poet, and impressibilities of the hearers, very different from those of the ancient epic. In all of them the personal feeling of the poet and the specialties of present time and place, are brought prominently forward, while in the Homeric hexameter the poet is a mere nameless organ of the historical Muse—the hearers are content to learn, believe, and feel, the incidents of a foregone world, and the tale is hardly less suitable to one time and place than to another. The iambic metre (we are told) was first suggested to Archilochus by the bitterness of his own private antipathies, and the mortal wounds inflicted by his lampoons, upon the individuals against whom they were directed, still remain attested, though the verses themselves have perished. It was the metre (according to the well-known judgement of Aristotle) most nearly approaching to common speech, and well-suited both to the coarse vein of sentiment, and to the smart and emphatic diction of its inventor<sup>1</sup>. Simonides of Amorgus, the younger contemporary of Archilochus, employed the same metre, with less bitterness, but with an anti-heroic

tendency not less decided. His remaining fragments present a mixture of teaching and sarcasm, having a distinct bearing upon actual life<sup>1</sup>, and carrying out the spirit which partially appears in the Hesiodic Works and Days. Of Alkæus and Sapphō, though unfortunately we are compelled to speak of them upon hearsay only, we know enough to satisfy us that their own personal sentiments and sufferings, their relations private or public with the contemporary world, constituted the soul of those short effusions which gave them so much celebrity<sup>2</sup>: and in the few remains of the elegiac poets preserved to us—Kallinus, Mimnermus, Tyrtaeus—the impulse of some present motive or circumstance is no less conspicuous. The same may also be said of Solōn, Theognis and Phokylidēs, who preach, encourage, censure, or complain, but do not recount—and in whom a profound ethical sensi-

There was a large dash of sarcasm and homely banter mixed at intervals and contemporaries in the poetry of Sapphō, apart from her impassioned love-songs—*ὦλοι σέβεται τὸν ἄρροιστον ἑρπῆρα καὶ τὸν θύραρον τὸν ἐν τῇ γῆραι, ἐπιδείκνυστα καὶ ἐν αἵματι ἄνθρωπον μάλλον ἢ ἐν πωρικῶν.* *Ἦεν σέτῃ μάλλον ἔστι τὰ ποιήματα ταῦτα διαλέγεσθαι ἢ ἄδον· οἷδ' ἂν ἄρροισι πρὸς τὰς χάρας ἢ πρὸς τὴν λήην, εἰ μὴ τοὺς χάρις διαλέγεσθαι.* (Dionys. bility, unknown to the Homeric poems, manifests itself: the form of poetry (to use the words of Solon himself) is made the substitute for the public speaking of the agora<sup>1</sup>.

Doubtless all these poets made abundant use of the ancient mythes, but it was by turning them to present account, in the way of illustration, or flattery, or contrast,—a tendency which we may usually detect even in the compositions of Pindar, in spite of the lofty and heroic strain which they breathe throughout. That narrative or legendary poetry still continued to be composed during the seventh and sixth centuries before the Christian era is not to be questioned; but it exhibited the old epical character without the old epical genius; both the inspiration of the composer and the sympathies of the audience had become more deeply enlisted in the world before them, and disposed to fasten on incidents of their own actual experience. From Solon and Theognis we pass to the abandonment of all metrical restrictions and to the introduction of prose writing,—a fact, the importance of which it is needless to dwell upon,—marking as well the increased familiarity with written records, as the commencement of a separate branch of literature for the intellect, apart from the imagination and emotions wherein the old legends had their exclusive root.

the opening  
of Egypt to  
Grecian  
commerce,  
B.C. 660.

Egypt was first unreservedly opened to the Greeks during the reign of Psammeticus, about B.C. 660; gradually it became much frequented by them for military or commercial purposes, or for simple curiosity, and enlarged the range of their thoughts and observations, while it also imparted to them that vein of mysticism, which overgrew the primitive simplicity of the Homeric religion, and of which I have spoken in a former chapter. They found in it a long-established civilization, colossal wonders of architecture, and a certain knowledge of astronomy and geometry, elementary indeed, but in advance of their own. Moreover it was a portion of their present world, and it contributed to form in them an interest for noting and describing the actual realities before them. A sensible progress is made in the Greek mind during the two centuries from B.C. 700 to B.C. 500, in the record and arrangement of historical facts: an *historical sense* arises in the superior intellects, and some idea of evidence as a discriminating test between fact and fiction. And this progressive tendency was further stimulated by increased communication and by more settled and peaceful social relations between the various members of the Hellenic world, to which may be added material improvements, purchased at the expense of a period of turbulence and revolution, in the internal administration of each separate state. The Olympic, Pythian, Nemean, and Isthmian games became frequented by visitors from the most distant parts of Greece: the great periodical festival in the island of Dêlos brought together the citizens of every Ionic community, with their wives and

children, and an ample display of wealth and ornaments<sup>1</sup>. Numerous and flourishing colonies were founded in Sicily, the south of Italy, the coasts of Epirus, and of the Euxine Sea: the Phœaciens explored the whole of the Adriatic, established Massalia, and penetrated even as far as the south of Ibéria, with which they carried on a lucrative commerce<sup>2</sup>. The geographical ideas of the Greeks were thus both expanded and rectified: the first preparation of a map, by Anaximander the disciple of Thalès, is an epoch in the history of science. We may note the ridicule bestowed by Herodotus both upon the supposed people called Hyperboreans and upon the idea of a circumfluous ocean-stream, as demonstrating the progress of the age in this department of inquiry<sup>3</sup>. And even earlier than Herodotus, Xanthus had noticed the occurrence of fossil marine productions in the interior of Asia Minor, which led him to reflections on the changes of the earth's surface with respect to land and water<sup>4</sup>.

half which elapsed between the commencement of the Olympic æra and the age of Herodotus and Thucydides, we shall discern a striking advance in the Greeks,—ethical, social and intellectual. Positive history and chronology has not only been created, but in the case of Thucydides, the qualities necessary to the historiographer, in their application to recent events, have been developed with a degree of perfection never since surpassed. Men's minds have assumed a gentler as well as a juster cast; and acts come to be criticised with reference to their bearing on the internal happiness of a well-regulated community, as well as upon the standing harmony of fraternal states. While Thucydides treats the habitual and licensed piracy, so coolly alluded to in the Homeric poems, as an obsolete enormity, many of the acts described in the old heroic and Theogonic legends were found not less repugnant to this improved tone of feeling. The battles of the gods with the Giants and Titans,—the castration of Uranus by his son Kronos,—the cruelty, deceit and licentiousness, often supposed both in the gods and heroes, provoked strong disapprobation. And the language of the philosopher Xenophanes, who composed both elegiac and iambic poems for the express purpose of denouncing such tales, is as vehement and unsparing as that of the Christian writers, who, eight centuries afterwards, attacked the whole scheme of paganism<sup>1</sup>. Nor was it alone as an ethical and social critic

that Xenophanes stood distinguished. He was one of a great and eminent triad—Thales and Pythagoras being the others—who, in the sixth century before the Christian era, first opened up those veins of speculative philosophy which occupied afterwards so large a portion of Grecian intellectual energy. Of the material differences between the three I do not here speak; I regard them only in reference to the Homeric and Hesiodic philosophy which preceded them, and from which all three deviated by a step, perhaps the most remarkable in all the history of philosophy. In the scheme of ideas common to Homer and to the Hesiodic Theogony (as has been already stated), we find nature distributed into a variety of personal agencies, administered according to the volition of different Beings more or less analogous to man—each of these Beings having his own character, attributes and powers, his own sources of pain and pleasure, and his own especial sympathies or antipathies with human individuals; each being determined to act or forbear, to grant favour or inflict injury in his own department of phenomena, according as men, or perhaps other Beings analogous to himself, might conciliate or offend him. The Gods, properly so called, (those who bore a proper name and received some public or family worship,) were the most commanding and capital members amidst this vast network of agents visible and invisible, spread over the universe<sup>1</sup>. The whole view of nature was purely religious and subjective, the spontaneous suggestion of the early mind. It

proceeded from the instinctive tendencies of the feelings and imagination to transport, to the world without, the familiar type of volition and conscious personal action: above all it took deep hold of the emotions, from the widely extended sympathy which it so perpetually called forth between man and nature<sup>1</sup>.

Impersonal  
nature con-  
ceived as an  
object of  
study.

The first attempt to disenthral the philosophic intellect from this all-personifying religious faith, and to constitute a method of interpreting nature distinct from the spontaneous inspirations of untaught minds, is to be found in Thalès, Xenophanès and Pythagoras, in the sixth century before the Christian era. It is in them that we first find the idea of Person tacitly set aside or limited, and an impersonal Nature conceived as the object of study. The divine husband and wife, Oceanus and Téthys, parents of many gods and of the Oceanic nymphs, together with the avenging goddess Styx, are translated into the material substance *water*, or, as we ought rather to say, the Fluid: and Thalès set himself to prove that water was the primitive element, out of which all the different natural substances had been formed<sup>2</sup>. He, as well as Xenophanès and Pythagoras, started the problem of physical philosophy, with its objective character and invariable laws, to be discoverable by a proper and methodical application of the human intellect. The Greek word *Φύσις*, denoting *nature*, and its derivatives *physics* and *physiology*, unknown in that large

sense to Homer or Hesiod, as well as the word *Kosmos* to denote the mundane system, first appears with these philosophers<sup>1</sup>. The elemental analysis of Thalès—the one unchangeable cosmic substance, varying only in appearance, but not in reality, as suggested by Xenophanès,—and the geometrical and arithmetical combinations of Pythagoras,—all these were different ways of approaching the explanation of physical phenomena, and each gave rise to a distinct school or succession of philosophers. But they all agreed in departing from the primitive method, and in recognising determinate properties, invariable sequences, and objective truth, in nature—either independent of willing or designing agents, or serving to these latter at once as an indispensable subject-matter and as a limiting condition. Xenophanès disclaimed openly all knowledge respecting the gods, and pronounced that no man could have any means of ascertaining when he was right and when he was wrong, in affirmations respecting them<sup>2</sup>: while Pythagoras represents in part the scientific tenden-

cies of his age, in part also the spirit of mysticism and of special fraternities for religious and ascetic observance, which became diffused throughout Greece in the sixth century before the Christian era. This was another point which placed him in antipathy with the simple, unconscious, and demonstrative faith of the old poets, as well as with the current legend.

If these distinguished men, when they ceased to follow the primitive instinct of tracing the phenomena of nature to personal and designing agents, passed over, not at once to induction and observation, but to a misemployment of abstract words, substituting metaphysical *eidola* in the place of polytheism, and to an exaggerated application of certain narrow physical theories—we must remember that nothing else could be expected from the scanty stock of facts then accessible, and that the most profound study of the human mind points out such transition as an inevitable law of intellectual progress<sup>1</sup>. At present we have to compare them only with that state of the Greek mind<sup>2</sup> which they partially superseded, and with which they were in decided opposition. The rudiments of physical science were conceived and developed

<sup>1</sup> See the treatise of M. Auguste Comte (*Cours de Philosophie Positive*), and his doctrine of the three successive stages of the human mind in reference to scientific study—the theological, the metaphysical and the positive;—a doctrine laid down generally in his first lecture (vol. i. p. 4-12), and largely applied and illustrated throughout his instructive work. It is also re-stated and elucidated by Mr. John Stuart Mill in his *System of Logic, Ratiocinative and Inductive*, vol. ii. p. 516.

among superior men; but the religious feeling of the mass was averse to them; and the aversion, though gradually mitigated, never wholly died away. Some of the philosophers were not backward in charging others with irreligion, while the multitude seems to have felt the same sentiment more or less towards all—or towards that postulate of constant sequences, with determinate conditions of occurrence, which scientific study implies, and which they could not reconcile with their belief in the agency of the gods, to whom they were constantly praying for special succour and blessings.

*Opposition between scientific method and the religious feeling of the multitude.*

The discrepancy between the scientific and the religious point of view was dealt with differently by different philosophers. Thus Sokratēs openly admitted it, and assigned to each a distinct and independent province. He distributed phenomena into two classes: one wherein the connection of antecedent and consequent was invariable and ascertainable by human study, and therefore future results accessible to a well-instructed foresight; the other, and those, too, the most comprehensive and important, which the gods had reserved for themselves and their own unconditional agency, wherein there was no invariable or ascertainable sequence, and where the result could only be fore-known by some omen, prophecy, or other special inspired communication from themselves. Each of these classes was essentially distinct, and required to be looked at and dealt with in a manner radically incompatible with the other. Sokratēs held it wrong to apply the scientific interpretation to the latter, or the theological interpretation to the

too that these affections, as well as all others, are divine: no one among them is either more divine or more human than another, but all are on the same footing, and all divine; nevertheless each of them has its own physical conditions, and not one occurs without such physical conditions<sup>1</sup>."

A third distinguished philosopher of the same day, Anaxagoras, allegorising Zeus and the other personal gods, proclaimed the doctrine of one common pervading Mind, as having first established order and system in the mundane aggregate, which had once been in a state of chaos—and as still manifesting its uninterrupted agency for wise and good purposes. This general doctrine obtained much admiration from Plato and Aristotle; but they at the same time remarked with surprise, that Anaxagoras never made any use at all of his own general doctrine for the explanation of the pheno-

Anaxagoras.

mena of nature,—that he looked for nothing but physical causes and connecting laws<sup>1</sup>,—so that in fact the spirit of his particular researches was not materially different from those of Demokritus or Leukippus, whatever might be the difference in their general theories. His investigations in meteorology and astronomy, treating the heavenly bodies as subjects for calculation, have been already noticed as offensive, not only to the general public of Greece, but even to Sokratēs himself among them: he was tried at Athens, and seems to have escaped condemnation only by voluntary exile<sup>2</sup>.

The Ionic philosophy, from which Anaxagoras receded more in language than in spirit, seems to have been the least popular of all the schools, though some of the commentators treat it as conformable to vulgar opinion, because it confined itself for the most part to phenomenal explanations, and did not recognise the existence of Plato, or the τὸ ἐν νομοῖς of Parmenides,—“quæ sita sunt Ionicorum, quæ tum dominabatur, ratio, vulgari opinione et communis sensu comprobata” (Kassiri, *Parmenides Fragment.* *De Parmenidis Philosophia*, p. 154). This is a mistake: the Ionic philosophers, who constantly searched for and insisted upon physical laws, came more directly into conflict with the sentiment of the multitude than the Eleatic school.

The larger atmospheric phenomena were annexed to the most popular

The three eminent men just named, all essentially different from each other, may be taken as illustrations of the philosophical mind of Greece during the last half of the fifth century *B.C.* Scientific pursuits had acquired a powerful hold, and adjusted themselves in various ways with the prevalent religious feelings of the age. Both Hippokratēs and Anaxagoras modified their ideas of the divine agency, so as to suit their thirst for scientific research. According to the former, the gods were the really efficient agents in the production of all phenomena,—the mean and indifferent not less than the terrific or tutelary. Being thus alike connected with all phenomena, they were specially associated with none—and the proper task of the inquirer was, to find out those rules and conditions by which (he assumed) their agency was always determined, and according to which it might be foretold. And this led naturally to the proceeding which Plato and Aristotle remark in Anaxagoras, —that the all-governing and Infinite Mind, having been announced in sublime language at the beginning of his treatise, was afterwards left out of sight, and never applied to the explanation of particular phenomena, being as much consistent with one modification of nature as with another. Now such a view of the divine agency could never be reconciled with the religious feelings of the ordinary Grecian

mate manner with Grecian religious feeling and unreason (see Democritus *ap.* Sect. Empiric. ix. sect. 19-24 p. 552-554, *Fabius*): the attempts of Anaxagoras and Democritus to explain things were more displeasing to the public than the Platonic speculations (Democritus *ap.* Aristot. *Meteorol.* ii. 7; *Stobæus, Eclog. Phæc.* p. 394; compare *Müllach, Democriti Fragmenta.* bk. i. p. 394).

believer, even as they stood in the time of Anaxagoras; still less could it have been reconciled with those of the Homeric man, more than three centuries earlier. By him Zeus and Athênê were conceived as definite Persons, objects of special reverence, hopes, and fears, and animated with peculiar feelings, sometimes of favour, sometimes of wrath, towards himself or his family or country. They were propitiated by his prayers, and prevailed upon to lend him succour in danger—but offended and disposed to bring evil upon him if he omitted to render thanks or sacrifice. This sense of individual communion with, and dependence upon them, was the essence of his faith; and with that faith, the all-pervading Mind proclaimed by Anaxagoras—which had no more concern with one man or one phenomenon than with another,—could never be brought into harmony. Nor could the believer, while he prayed with sincerity for special blessings or protection from the gods, acquiesce in the doctrine of Hippokratês, that their agency was governed by constant laws and physical conditions.

Treatment  
of Sokratês  
by the  
Athenians.

That radical discord between the mental impulses of science and religion, which manifests itself so decisively during the most cultivated ages of Greece, and which harassed more or less so many of the philosophers, produced its most afflicting result in the condemnation of Sokratês by the Athenians. According to the remarkable passage recently cited from Xenophôn, it will appear that Sokratês agreed with his countrymen in denouncing physical speculations as impious,—that he recognised the religious process of discovery as a peculiar branch, co-

ordinate with the scientific,—and that he laid down a theory, of which the basis was, the confessed divergence of these two processes from the beginning—thereby seemingly satisfying the exigences of religious hopes and fears on the one hand, and those of reason, in her ardour for ascertaining the invariable laws of phenomena, on the other. We may remark that the theory of this religious and extra-scientific process of discovery was at that time sufficiently complete; for Sokratēs could point out, that those anomalous phenomena which the gods had reserved for themselves, and into which science was forbidden to pry, were yet accessible to the seekings of the pious man, through oracles, omens, and other exceptional means of communication which divine benevolence vouchsafed to keep open. Considering thus to how great an extent Sokratēs was identified in feeling with the religious public of Athens, and considering moreover that his performance of open religious duties was assiduous—we might wonder, as Xenophōn does wonder<sup>1</sup>, how it could have happened that the Athenian dikasts mistook him at the end of his life for an irreligious man. But we see, by the defence which Xenophōn as well as Plato gives for him, that the Athenian public really considered him, in spite of his own disclaimer, as homogeneous with Anaxagoras and the other physical inquirers, because he had applied similar scientific reasonings to moral and social phenomena. They looked upon him with the same displeasure as he himself felt towards the physical philosophers, and we cannot but admit that in this

<sup>1</sup> *Xenophōn, Memorab.* i. 1

respect they were more unfortunately consistent than he was. It is true that the mode of defence adopted by Sokratès contributed much to the verdict found against him, and that he was further weighed down by private offence given to powerful individuals and professions; but all these separate antipathies found their best account in swelling the cry against him as an over-curious sceptic, and an impious innovator.

Scission  
between  
the super-  
rior men  
and the  
multitude  
—import-  
ant in re-  
ference to  
the mythos.

Now the scission thus produced between the superior minds and the multitude, in consequence of the development of science and the scientific point of view, is a fact of great moment in the history of Greek progress, and forms an important contrast between the age of Homer and Hesiod and that of Thucydides; though in point of fact, even the multitude, during this later age, were partially modified by those very scientific views which they regarded with disfavour. And we must keep in view the primitive religious faith, once universal and unobstructed, but subsequently disturbed by the intrusions of science; we must follow the great change, as well in respect to enlarged intelligence as to refinement of social and ethical feeling, among the Greeks, from the Hesiodic times downward, in order to render some account of the altered manner in which the ancient mythos came to be dealt with. These mythos, the spontaneous growth of a creative and personifying interpretation of nature, had struck root in Grecian associations at a time when the national faith required no support from what we call evidence. They were *now* submitted, not simply to a feeling, imagining, and believing public,

tivated men had imbibed in their childhood from the poets<sup>1</sup>, and by which they were to a certain degree unconsciously enslaved. Taken as a whole the mythes had acquired prescriptive and ineffaceable possession: to attack, call in question, or repudiate them, was a task painful even to undertake, and far beyond the power of any one to accomplish.

The mythes introduced to a new tone of feeling and judgement.

For these reasons, the anti-mythic vein of criticism was of no effect as a destroying force, but nevertheless its dissolving, decomposing and transforming influence was very considerable. To accommodate the ancient mythes to an improved tone of sentiment and a newly created canon of credibility, was a function which even the wisest Greeks did not disdain, and which occupied no small proportion of the whole intellectual activity of the nation. The mythes were looked at from a point of view completely foreign to the reverential curiosity and literal imaginative faith of the Homeric man; they were broken up and recast in order to force them into new moulds such as their authors had never conceived. We may distinguish four distinct classes of minds, in the literary age now under examination, as having taken them in hand—the poets, the logographers, the philosophers, and the historians.

With the poets and logographers, the mythical

<sup>1</sup> The third book of the Republic of Plato is particularly striking in reference to the use of the poets in education: see also his treatise *De Legg.* iii. p. 810-811. persons are real predecessors, and the mythical world an antecedent fact; but it is divine and heroic reality, not human; the present is only half-brother of the past (to borrow<sup>1</sup> an illustration from Pindar in his allusion to gods and men), remotely and generically, but not closely and specifically, analogous to it. As a general habit, the old feelings and the old unconscious faith, apart from all proof or evidence, still remain in their minds; but recent feelings have grown up, which compel them to omit, to alter, sometimes even to reject and condemn, particular narratives.

Pindar repudiates some stories and transforms others, because they are inconsistent with his conceptions of the gods. Thus he formally protests against the tale that Pelops had been killed and served up at table by his father, for the immortal gods to eat; he shrinks from the idea of imputing to them so horrid an appetite; he pronounces the tale to have been originally fabricated by a slanderous neighbour. Nor can he bring himself to recount the quarrels between different gods<sup>2</sup>. The amours of Zeus and Apollo are noway displeasing to him; but he occasionally suppresses some of the simple details of the old mythe, as deficient in dignity: thus, according to the Hesiodic narrative, Apollo was informed by a raven of the infidelity of the nymph Koronis: but the mention of the raven did not appear to Pindar consistent with the majesty of the god, and he therefore wraps up the mode

of detection in vague and mysterious language<sup>1</sup>. He feels considerable repugnance to the character of Odysseus, and intimates more than once that Homer has unduly exalted him, by force of poetical artifice. With the character of the Æakid Ajax, on the other hand, he has the deepest sympathy, as well as with his untimely and inglorious death, occasioned by the undeserved preference of a less worthy rival<sup>2</sup>. He appeals for his authority usually to the Muse; but sometimes to "ancient sayings of men," accompanied with a general allusion to story-tellers and bards,—admitting however that these stories present great discrepancy, and sometimes that they are false<sup>3</sup>. Yet the marvellous and the supernatural afford no ground whatever for rejecting a story: Pindar makes an express declaration to this effect in reference to the romantic adventures of Perseus and the Gorgon's head<sup>4</sup>. He treats even those mythical characters, which conflict the most palpably with positive experience, as connected by a real genealogical thread with the world before him. Not merely the heroes of Troy and Thêbes, and the demigod seamen of Jason in the ship Argô, but also the

It seems to be sympathy for Ajax, in odes addressed to noble Ægean victors, which induces him thus to depreciate Odysseus; for he eulogises Sisyphus, specially on account of his cunning and resources (*Olymp.* xiii. 50), in the ode addressed to Xenophon the Corinthian.

Centaur Cheirôn, the hundred-headed Typhôs, the giant Alkyoneus, Antæus, Bellerophôn and Pegasus, the Chimæra, the Amazons and the Hyperboreans—all appear painted on the same canvas, and touched with the same colours, as the men of the recent and recorded past, Phalaris and Kresus; only they are thrown back to a greater distance in the perspective<sup>1</sup>. The heroic ancestors of those great Ægiætan, Thessalian, Thëban, Argeian, &c. families, whose present members the poet celebrates for their agonistic victories, sympathise with the exploits and second the efforts of their descendants: the inestimable value of a privileged breed, and of the stamp of nature, is powerfully contrasted with the impotence of unassisted teaching and practice<sup>2</sup>. The power and skill of the Argeian Theans and his relatives as wrestlers, are ascribed partly to the fact that their ancestor Pamphaïs in aforetime had hospitably entertained the Tyndarids Kastôr and Polux<sup>3</sup>. Perhaps however the strongest proof of the sincerity of Pindar's mythical faith is afforded when he notices a guilty incident with shame and repugnance, but with an unwilling confession of its truth, as in the case of the fratricide committed on Phokus by his brothers Pêlëus and Telamôn<sup>4</sup>.

Æschylus and Sophoklês exhibit the same spontaneous and uninquiring faith as Pindar in the legendary antiquities of Greece, taken as a whole;

but they allow themselves greater license as to the details. It was indispensable to the success of their compositions that they should recast and group anew the legendary events, preserving the names and general understood relation of those characters whom they introduced. The demand for novelty of combination increased with the multiplication of tragic spectacles at Athens: moreover the feelings of the Athenians, ethical as well as political, had become too critical to tolerate the literal reproduction of many among the ancient stories.

*Æschylus  
and Sophocles.*

Both of them exalted rather than lowered the dignity of the mythical world, as something divine and heroic rather than human. The Prometheus of Æschylus is a far more exalted conception than his keen-witted namesake in Hesiod, and the more homely details of the ancient Thebais and Oedipodia were in like manner modified by Sophoklēs<sup>1</sup>. The religious agencies of the old epic are constantly kept prominent, and the paternal curse,—the wrath of deceased persons against those from whom they have sustained wrong,—the judgements of the Erinnys against guilty or foredoomed persons, sometimes inflicted directly, sometimes brought about through dementation of the sufferer himself (like the Homeric Atē),—are frequent in their tragedies<sup>2</sup>.

Æschylus in two of his remaining pieces brings forward the gods as the chief personages, and far

<sup>2</sup> The curse of Oedipus is the determining force in the Sept. ad Theb. 'Apō', ἡρώς καὶ ἡ γυναικὶς (v. 79): it reappears several times in the course of the drama, with particular solemnity in the mouth of

from sharing the objection of Pindar to dwell upon dissensions of the gods, he introduces Pro-

Eteoklés (695-709, 725, 785, &c.) : he yields to a near irresistible force, as carrying the family to ruin :—

Ἐπεὶ τὸ πρῶτον αἶψ' ἐπιστάμεθα θάνατον.

Ἦτοι καὶ πόρον, κῆρυξ Καστωὶ λαχόν.

Φαίβης ἀνιγνὲν πᾶν τὸ δαίμον γένος.

Φίλον γὰρ ἔχθρῳ μοι πατρὶς γένος ἦρα

ἔρπον ἀδελφίστατον ἔρπον ἀντιφύλον, &c.

So again at the opening of the *Agamemnon*, the *parados* μένος τετυγμένος (v. 155) and the sacrifice of Iphigenia are dwelt upon as leaving behind them an everlasting stain upon Agamemnon, though he took precautions for gagging her mouth during the sacrifice and thus preventing her from giving utterance to imprecations—*ἐθόγγον ἀποιοι αἰών, σὺν χαλκῷ τ' ἀναιδὲς μένος (καταχρῆν),* v. 246. The Erinyes await Agamemnon even as the monument of his victorious consummation at Troy (167 : compare 762-696, 1136-1433) : she is most to be dreaded after great good fortune : she enforces the curse which ancestral crimes have brought upon the house of Atreus—*ἐπέρταρχος ἄγρ—παλαιὰ ἀναγκὰ δόμων* (1186-1197, Choëph. 692) : the curse imposed by the outraged Thyestis (1601). In the *Choëphoræ*, Apollo menaces Orestes with the wrath of his deceased father, and all the direful visitations of the Erinyes, unless he undertakes to revenge the murder (271-296). Aias and *Ἐκτανὲς* bring on blood for blood (647). But the moment that Orestes, placed between these conflicting obligations (925), has relieved it, he becomes himself the victim of the Erinyes, who drive him mad even at the end of the *Choëphoræ* (*ὅτε δ' εἴ' ἐρφρον εἶμι,* 1020), and who make their appearances bodily, and pursue him throughout the third drama of this fearful trilogy. The *Widdow of Klytemnestra* impels them to vengeance (*Eumenid.* 96), and even spurs them on when they appear to relax. Apollo invites Orestes to Athens, whither the Erinyes pursue him, and prosecute him before the judgment-seat of the goddess Athênê, to whom they submit the sword ; Apollo appearing as his defender. The debate between "the daughters of Night" and the god, accusing and defending, is eminently curious (576-730) : the Erinyes are deeply mortified at the humiliation put upon them when Orestes is acquitted, but Athênê at length reconciles them, and a covenant is made whereby they become protectresses of Attica, accepting of a permanent abode and solemn worship (1186) : Orestes returns to Argos, and promises that even in his tomb he will watch that none of his descendants shall ever injure the land of Attica (770). The solemn trial and acquittal of Orestes formed the connecting legend of the Hill and Jurisdiction of Areopagus.

This is the only complete trilogy of Æschylus which we possess, and

mêtheus and Zeus in the one, Apollo and the Eumenidês in the other, in marked opposition. The dialogue, first superinduced by him upon the primitive Chorus, gradually became the most important portion of the drama, and is more elaborated in Sophoklês than in Æschylus. Even in Sophoklês, however, it still generally retains its ideal majesty as contrasted with the rhetorical and forensic tone which afterwards crept in; it grows out of the piece, and addresses itself to the emotions more than to the reason of the audience. Nevertheless, the effect of Athenian political discussion and democratical feeling is visible in both these dramatists. The idea of rights and legitimate privileges as opposed to usurping force, is applied by Æschylus even to the society of the gods: the Eumenidês accuse Apollo of having, with the insolence of youthful ambition, "ridden down" their old prerogatives<sup>1</sup>—while the Titan Promêtheus, the

the avenging Erinyes (416) are the powers throughout the whole—present in the first two dramas, visible and appalling to the mind. And the appearance of Cassandra under the actual prophetic form in the first, contributes still farther to impart to it a colouring different from common humanity.

The general view of the movement of the *Oresteia* given in Welcker (*Æschyl. Trilogie*, p. 445) appears to me more conformable to Hellenic ideas than that of Klausen (*Theologumena Æschyl.*, pp. 137-149), whose valuable collection and comparison of passages is too much affected, both here and elsewhere, by the desire to bring the legends of the Greek mythical world into harmony with what a religious mind of the present day would approve. Moreover he seeks the personality of Athens too much in the supreme authority of Zeus (p. 158-168).

<sup>1</sup> Eumenidês, 129.—

Τὸ καὶ δὴ, ἐπιδέσσει τέλει,

Νῦν δὲ γράμιν δάμναται οὐδένωκα, &c.

The same metaphor again, v. 781. Æschylus seems to delight in contrasting the young and the old gods: compare 70-162, 552.

The Erinyes tell Apollo that he assumes functions which do not

champion of suffering humanity against the unfriendly dispositions of Zeus, ventures to depict the latter as a recent usurper reigning only by his superior strength, exalted by one successful revolution, and destined at some future time to be overthrown by another,—a fate which cannot be averted except through warnings communicable only by Prometheus himself<sup>1</sup>.

It is commonly understood that Æschylus disapproved of the march of democracy at Athens during his later years, and that the *Eumenidæ* is intended as an indirect manifestation in favour of the senate of Areiopagus. Without inquiring at present whether such a special purpose can be distinctly made out, we may plainly see that the poet introduces, into the relations of the gods with each other, a feeling of political justice, arising out of the times in which he lived and the debates of which he was a witness. But though Æschylus incurred reproaches of impiety from Plato, and seemingly also from the Athenian public, for par-

belong to him, and will thus desecrate those which do belong to him (715-754).—

Ἄλλ' ἀμνηστὸν πρῶτον, ὃ λαχόν, σέβου,  
Μακρὰ δ' αὖτε ἔσ' ἀπὸ μακρόν τι μέναι.

The refusal of the king Pelagos, in the *Suppliants*, to undertake what he feels to be the sacred duty of protecting the suppliant Danaïdes, without first submitting the matter to his people and obtaining their expressed consent, and the fear which he expresses of their blame (*καὶ ἄρχαι γὰρ φθάνουσιν λέειν*), are more forcibly set forth than an old epic poet would probably have thought necessary (see *Suppliants*, 362, 397, 485, 519). The solemn wish to exclude both anarchy and despotism from Athens bears still more the mark of political feeling of the time—*μήτ' ἀναρχας μήτε δεσποταμίους* (*Eumenid.* 527-626).

<sup>1</sup> *Philo*, *Republ.* ii. 351-353; compare *Æschyl.* *Fragment*, 159, ed. *Dindorf*. He was charged also with having divulged in want of his plays' secret matters of the mysteries of *Déméter*, but is said to have excused himself by alleging ignorance: he was not aware that what he had said was comprised in the mysteries (*Aristot. Ethic. Nicom.* iii. 2; *Clement Alex. Strom.* ii. p. 387); the story is different again in *Ælian*, *V. H.* v. 19.

How little can be made out distinctly respecting this last accusation may be seen in *Lobeck, Aglaophant.* p. 81.

*Cicero* (*Tusc. Dis.* ii. 10) calls *Æschylus* "almost a Pythagorean;" upon what the epistola is founded we do not know.

There is no evidence to prove to us that the *Prométhée Vincet* was considered as impious by the public before whom it was represented; but its obvious meaning has been so regarded by modern critics, who resort to many different explanations of it, in order to prove that when properly construed it is not impious. But if we wish to ascertain what *Æschylus* really meant, we ought not to consult the religious ideas of modern times; we have no test except what we know of the poet's own time and that which had preceded him. The explanations given by the ablest critics seem generally to exhibit a predetermination to bring out *Zeus*, as a just, wise, merciful, and all-powerful Being; and all, in one way or another, distort the figures, alter the perspective, and give far-fetched interpretations of the meaning, of this striking drama, which conveys an impression directly contrary (see *Welcker, Trilogie Æsch.* p. 90-117, with the explanation of *Dissen* there given; *Klausen, Theogonum Æsch.* p. 149-154; *Schömann*, in his recent translation of the play, and the criticism on that translation in the *Wiener Jahrbücher*, vol. cix. 1845, p. 245, by *F. Ritter*). On the other hand, *Schütz* (*Excurs. ad Prom. Vincet.* p. 149) thinks that *Æschylus* wished by means of this drama to enforce upon his countrymen the hatred of a despot. Though I do not agree in this interpretation, it appears to me less aside of the truth than the forcible methods employed by others to bring the poet into harmony with their own religious ideas.

Without presuming to determine whether *Æschylus* proposed to himself any special purpose, if we look at the *Æschylean Prométhée* in reference only to ancient ideas, it will be found to borrow both its characters and all its main circumstances from the legend in the *Hesiodic Theogony*. *Zeus* acquires his supremacy only by overthrowing *Kronos* and the *Titans*; the *Titan* god *Prométhée* is the pronounced champion of helpless man, and negotiates with *Zeus* on their behalf; *Zeus* wishes

phoklēs—yet the ascendancy and interference of the gods is never out of sight, and the solemnity with which they are represented, set off by a bold, figu-

to withhold from them the most essential blessings, which Prometheus employs deceit and theft to procure for them, and ultimately with success; undergoing, however, severe punishment for so doing from the superior force of Zeus. These are the main features of the Æschylean Prometheus, and they are all derived from the legend as it stands in the *Theogony*. As for the human race, they are depicted as abject and helpless in an extreme degree, in Æschylus even more than in Hesiod: they appear as a race of aboriginal savages, having the god Prometheus for their protector.

Æschylus has worked up the old legend, humbly and unimpressive as we read it in Hesiod, into a sublime ideal. We are not to forget that Prometheus is not a man, but a god,—the equal of Zeus in race, though his inferior in power, and belonging to a family of gods who were once superior to Zeus: he has moreover deserted his own kindred, and lent all his aid and superior sagacity to Zeus, whereby chiefly the latter was able to acquire supremacy (this last circumstance is an addition by Æschylus himself to the Hesiodic legend). In spite of such essential service, Zeus had doomed him to cruel punishment, for no other reason than because he conferred upon helpless man the prime means of continuance and improvement, thus thwarting the intention of Zeus to extinguish the race.

Now Zeus, though superior to all the other gods and exercising general control, was never considered, either in Grecian legend or in Grecian religious belief, to be superior in so immeasurable a degree as to supersede all free action and sentiment on the part of gods less powerful. There were many old legends of dissension among the gods, and several of disobedience against Zeus: when a poet chose to dramatise one of these, he might so turn his composition as to sympathise either with Zeus or with the inferior god, without in either case shocking the general religious feeling of the country. And if there ever was an instance in which preference of the inferior god would be admissible, it is that of Prometheus, whose proceedings are such as to call forth the maxim of human sympathy,—superior intelligence pitted against superior force, and resolutely countering foreknown suffering, for the sole purpose of rendering inestimable and gratuitous service to mortals.

Of the Prometheus Solutus, which formed a sequel to the Prometheus Vincetus (the entire trilogy is not certainly known), the fragments preserved are very scanty, and the guesses of critics as to its plot have little base to proceed upon. They contend that in one way or other, the apparent objections which the Prometheus Vincetus presents against the justice of Zeus were in the Prometheus Solutus removed. Hermann, in

rative, and elliptical style of expression (often but imperfectly intelligible to modern readers), reaches its maximum in his tragedies. As he throws round the gods a kind of airy grandeur, so neither do his men or heroes appear like tenants of the common earth: the mythical world from which he borrows his characters is peopled only with "the immediate seed of the gods, in close contact with Zeus, in whom the divine blood has not yet had time to degenerate"<sup>1</sup>: his individuals are taken, not from the iron race whom Hesiod acknowledges with shame as his contemporaries, but from the extinct heroic race which had fought at Troy and Thêbes. It is to them that his conceptions aspire, and he is even

his *Dissertation de Alcibiadi Promethœi Soluto* (Opuscula, vol. iv. p. 256), calls this position in question: I transcribe from his Dissertation one passage, because it contains an important remark in reference to the manner in which the Greek poets handled their religious legends: "while they recounted and belaboured many enormities respecting individual gods, they always described the Godhead in the abstract as holy and faultless." .....

"Immo illud admittendum oportet, quod quum de singulis Diis negligensius quoque crederent, tamen ubi sine certo nomine Deum dicebant, omnium ab omni vitio, acriterque impietate præditum intelligebant. Illuc igitur Jovis veritatem ac excoent defensores Trilogiæ, et jure pœnitentem voluit Prometheus--et in sequente fabula reconciliato Jove, restitutum restituantur divinam justitiam. Quo invento, veniat ne post optima dignitate amittantur expremi Deorum, quum decuerat potius non serviti animo, quam placari ex lege, ut alius Prometheus illic loqueret."

There is one real exception to this statement—the *Panæa*—which is founded upon an event of recent occurrence; and one apparent exception—the *Promethæus Vinctus*. But in that drama no individual mortal is made to appear; we can hardly consider Iō as an ἀφάρμοτος (253).

chargeable with frequent straining, beyond the limits of poetical taste, to realise his picture. If he does not consistently succeed in it, the reason is because consistency in such a matter is unattainable, since, after all, the analogies of common humanity, the only materials which the most creative imagination has to work upon, obtrude themselves involuntarily, and the lineaments of the man are thus seen even under a dress which promises superhuman proportions.

Sophoklēs, the most illustrious ornament of Grecian tragedy, dwells upon the same heroic characters, and maintains their grandeur, on the whole, with little abatement, combining with it a far better dramatic structure, and a wider appeal to human sympathies. Even in Sophoklēs, however, we find indications that an altered ethical feeling and a more predominant sense of artistic perfection are allowed to modify the harsher religious agencies of the old epic; occasional misplaced effusions<sup>1</sup> of

Sophoklēs.

rhetoric, as well as of didactic prolixity, may also be detected. It is Æschylus, not Sophoklēs, who forms the marked antithesis to Euripidēs; it is Æschylus, not Sophoklēs, to whom Aristophanēs awards the prize of tragedy, as the poet who assigns most perfectly to the heroes of the past those weighty words, imposing equipments, simplicity of great deeds with little talk, and masculine energy superior to the corruptions of Aphroditē, which beseem the comrades of Agamemnōn and Adrastus<sup>1</sup>.

How deeply this feeling, of the heroic character of the mythical world, possessed the Athenian mind, may be judged by the bitter criticisms made on Euripidēs, whose compositions were pervaded, partly by ideas of physical philosophy learnt under Anaxagoras, partly by the altered tone of education and the wide diffusion of practical eloquence, forensic as well as political, at Athens<sup>2</sup>. While Ari-

is said to have decided it—*Ἐπιπρὶ γὰρ ὁ Σοφοκλῆς ἔλεγε, εἰς Ἀλεχίδαν διακρινόμενος ἔγχεον, &c.* (Plutarch, *De Profect. in Virt. Sent.* c. 7), unless we are to understand this as a mistake of Plutarch quoting Sophoklēs instead of Euripidēs, as he speaks in the *Progs.* of Aristophanēs, which is the opinion both of Lessing in his *Life of Sophoklēs* and of Welcker (*Æschyl. Trilogie*, p. 525).

<sup>1</sup> See above, Chapters xiv. and xv.

Æschylus seems to have been a greater innovator as to the matter of the myths than either Sophoklēs or Euripidēs (*Diogen. Laert.* *Julie de Vet. Script.* p. 422, Reisk.). For the close adherence of Sophoklēs to the Homeric epic see *Albani*, vii. p. 277; *Diogen. Laert.* iv. 20; *Suidas*, v. *Πολύμων*. Æschylus puts into the mouth of the Kumenidēs a serious argument derived from the behaviour of Zeus in chaining his father Kronos (*Eumen.* 640).

<sup>2</sup> See Valckenner, *Thuride in Euripid.* *Præg.* capp. 3 and 6.

The fourth and fifth lectures among the *Dramatische Vorlesungen* of August Wilhelm Schlegel depart both justly and eloquently the difference between Æschylus, Sophoklēs and Euripidēs, especially on this

stophanês assaults Euripidês as the representative of this "young Athens," with the utmost keenness of sarcasm,—other critics also concur in designating him as having vulgarised the mythical heroes, and transformed them into mere characters of common life,—loquacious, subtle, and savouring of the market-place<sup>1</sup>. In some of his plays, sceptical expressions and sentiments were introduced, derived from his philosophical studies, sometimes confounding two or three distinct gods into one, sometimes translating the personal Zens into a substantial Æther with determinate attributes. He put into the mouths of some of his unprincipled dramatic characters, apologetic speeches which were denounced as ostentatious sophistry, and as setting out a triumphant case for the criminal<sup>2</sup>. The *Banx* and *Acharniæ* of Aristophanês exhibit fully the reproaches urged against Euripidês: the language put into the mouth of Euripidês in the former play (vv. 935-977) illustrates especially the point here laid down. Plutarch (*De Glorâ Atheniens.* c. 5) contrasts ὁ Εὐριπίδου σοφία καὶ ὁ Σοφοκλέους μεγαλουργία. Suidas either adhered to the old mythos or introduced alterations into them in a spirit conformable to their original character, while Euripidês refined upon them. The comment of Dêmétrius Phaleræus connects τὸ λόγιον expressly with the maintenance of the dignity of the tales. Ἀρξομένη δὲ ἀπὸ τοῦ μεγαλουργοῦ, ὡς τὸν λόγον ἀπομαρτύνειν (c. 38).

Euripidês says to Æschylus, in regard to the language employed by both of them,—

Ἦν οὐδὲ γὰρ λόγος ἀκαθάρτος

by his enemies to have only reproduced in substance the pre-existing tales,—the illicit and fatal passion depicted in several of his female characters, such as Phædra and Sthenoboea. His opponents admitted that these stories were true, but contended that they ought to be kept back and not produced upon the stage,—a proof both of the continued mythical faith and of the more sensitive ethical criticism of his age<sup>1</sup>. The marriage of the six daughters to the six sons of Æolus is of Homeric origin, and stands now, though briefly stated, in the *Odyssey*: but the incestuous passion of Macareus and Canacé, embodied by Euripides<sup>2</sup> in the lost tra-

In the *Hercules Furor*, Euripides puts in relief and even exaggerates the worst elements of the ancient myths: the implacable hatred of Hérè towards Héraklès is pushed so far as to deprive him of his reason (by sending down Iris and the unwilling *Alceia*), and thus intentionally to drive him to slay his wife and children with his own hands.

It suited the plan of the drama of *Æolus*, as composed by Euripides, to place in the mouth of Macareus a formal recommendation of incestuous marriages: probably this contributed much to offend the Athenian public. See Dionys. *Hal. Rhetor.* ix. p. 355.

Orill, whose poetical tendencies led him chiefly to copy Euripides, observes (*Trist.* ii. 1, 380)—

gedy called *Æolus*, drew upon him severe censure. Moreover he often disconnected the horrors of the old legends with those religious agencies by which they had been originally forced on, prefacing them by motives of a more refined character, which carried no sense of awful compulsion: thus the considerations by which the Euripidean Alkmæon was reduced to the necessity of killing his mother appeared to Aristotle ridiculous<sup>1</sup>. After the time of this great poet, his successors seem to have followed him in breathing into their characters the spirit of common life, but the names and plot were still borrowed from the stricken mythical families of Tantalus, Kadmus, &c.: and the heroic exaltation of all the individual personages introduced, as contrasted with the purely human character of the Chorus, is still numbered by Aristotle among the essential points of the theory of tragedy<sup>2</sup>.

The logographers—  
Phere-  
kydes, &c.

The tendency then of Athenian tragedy—powerfully manifested in *Æschylus*, and never wholly lost—was to uphold an unquestioning faith and a reverential estimate of the general mythical world and its personages, but to treat the particular narratives rather as matter for the emotions than as recitals of actual fact. The logographers worked

<sup>2</sup> Aristot. *Poetic*. 26-27. And in his *Problemata* also, in giving the reason why the Hypo-Dorian and Hypo-Phrygian musical modes were never assigned to the Chorus, he says—

Ταῦτα δὲ ἄμφω χόροι μὲν ἀναρμόνιοι, οὗτοι δὲ ἀπὸ σκληρῆς νύκτωρος ἑστῆσι μὲν γὰρ ἡρώεω εὐρηγοῦσι· οἱ δὲ ἄγχιότι τοῦ ἀρχαίου μῦθου ἔσσι· οἱ δὲ λαοὶ ἀσθενέστεροι, οὗ ἐνταῦθα ὁ φόρος. Διὸ καὶ ἀρμόζει μᾶλλον τὸ γυνεῖον καὶ ἡσυχίαν ἔχειν καὶ μέλος ἀσθενεστέρῳ γένει.

along with them to the first of these two ends, but not to the second. Their grand object was, to cast the mythos into a continuous readable series, and they were in consequence compelled to make selection between inconsistent or contradictory narratives; to reject some narratives as false, and to receive others as true. But their preference was determined more by their sentiments as to what was appropriate, than by any pretended historical test. Pherekydēs, Akusilaos and Hellanikus<sup>1</sup> did not seek to banish miraculous or fantastic incidents from the mythical world; they regarded it as peopled with loftier beings, and expected to find in it phenomena not paralleled in their own degenerate days. They reproduced the fables as they found them in the poets, rejecting little except the discrepancies, and producing ultimately what they believed to be not only a continuous but an exact and trustworthy history of the past—wherein they carry indeed their precision to such a length, that Hellanikus gives the year, and even the day, of the capture of Troy<sup>2</sup>.

Hekateus of Milētus (500 B.C.), anterior to Pherekydēs and Hellanikus, is the earliest writer in whom we can detect any disposition to disallow the prerogative and specialty of the mythos, and to soften down their characteristic prodigies, some of which however still find favour in his eyes, as in the case of the speaking ram who carried Phryxus over the Hellespont. He pronounced the Grecian

fables to be "many and ridiculous"; whether from their discrepancies or from their intrinsic improbabilities we do not know: and we owe to him the first attempt to force them within the limits of historical credibility; as where he transforms the three-headed Cerberus, the dog of Hades, into a serpent inhabiting a cavern on Cape Tænarus—and Geryon of Erytheia into a king of Epirus rich in herds of oxen<sup>1</sup>. Hekataeus traced the genealogy of himself and the gens to which he belonged through a line of fifteen progenitors up to an initial god<sup>2</sup>,—the clearest proof both of his profound faith in the reality of the mythical world, and of his religious attachment to it as the point of junction between the human and the divine personality.

We have next to consider the historians, espe-

Perhaps Hekataeus was induced to look for Erytheia in Epirus by the brick-red colour of the earth there in many places, noticed by Ponquerille and other travellers (*Voyage dans la Grèce*, vol. ii. 248; see Klausen, *Äwne und die Persaten*, vol. i. p. 227). *Ἐκκαταῖος ὁ Μελισσηνός*—*λόγος ἐπὶ τῇ εὐρώπῃ*. *Pausan.* iii. 25, 4. He seems to have written especially concerning the fabulous Hyperboreans, and to have upheld the common faith against doubts which had begun to rise in his time: the derisory notice of Hyperboreans in Herodotus is probably directed against Hekataeus, iv. 36; *Schol. Apollon. Rhod.* ii. 675; *Diodor.* ii. 47.

It is maintained by Mr. Clinton (*Past. Hell.* ii. p. 480) and others (see not. ad *Fragsm.* Hekataei, p. 30, ed. Didot), that the work on the Hyperboreans was written by Hekataeus of Abdera, a literary Greek of the age of Ptolemy Philadelphus—not by Hekataeus of Miletus. I do not concur in this opinion. I think it much more probable that the earlier Hekataeus was the author spoken of.

The distinguished position held by Hekataeus at Miletus is marked not only by the notice which Herodotus takes of his opinions on public matters, but also by his negotiation with the Persian satrap Artaphernes on behalf of his countrymen (*Diodor.* *Excerpt.* xlvii. p. 41, ed. Dindorf).

cially Herodotus and Thucydides. Like Hekateus, Thucydides belonged to a gens which traced its descent from Ajax, and through Ajax to Æakus and Zeus<sup>1</sup>. Herodotus modestly implies that he himself had no such privilege to boast of<sup>2</sup>. Their curiosity respecting the past had no other materials to work upon except the mythes; but these they found already cast by the logographers into a continuous series, and presented as an aggregate of antecedent history, chronologically deduced from the times of the gods. In common with the body of the Greeks, both Herodotus and Thucydides had imbibed that complete and unsuspecting belief in the general reality of mythical antiquity, which was interwoven with the religion and the patriotism, and all the public demonstrations of the Hellenic world. To acquaint themselves with the genuine details of this foretime, was an inquiry highly interesting to them: but the increased positive tendencies of their age, as well as their own habits of personal investigation, had created in them an *historical sense* in regard to the past as well as to the present. Having acquired a habit of appreciating the intrinsic tests of historical credibility and probability, they found the particular narratives of the poets and logographers, inadmissible as a whole even in the eyes of Hekateus, still more at variance with their stricter canons of criticism. And we thus observe in them the constant struggle, as well as the resulting compromise, between these two opposite tendencies; on one hand a firm belief in the reality of the mythical world, on the other

hand an inability to accept the details which their only witnesses, the poets and logographers, told them respecting it.

Herodotus  
—his mys-

Each of them however performed the process in his own way. Herodotus is a man of deep and anxious religious feeling: he often recognises the special judgements of the gods as determining historical events: his piety is also partly tinged with that mystical vein which the last two centuries had gradually infused into the religion of the Greeks—for he is apprehensive of giving offence to the gods by reciting publicly what he has heard respecting them. He frequently stops short in his narrative and intimates that there is a sacred legend, but that he will not tell it: in other cases, where he feels compelled to speak out, he entreats forgiveness for doing so from the gods and heroes. Sometimes he will not even mention the name of a god, though he generally thinks himself authorised to do so, the names being matter of public notoriety<sup>1</sup>. Such pious reserve, which the open-hearted Herodotus avowedly proclaims as chaining up his tongue, affords a striking contrast with the plain-spoken and unsuspecting tone of the ancient epic, as well as of the popular legends, wherein the gods and their

proceedings were the familiar and interesting subjects of common talk as well as of common sympathy, without ceasing to inspire both fear and reverence.

Herodotus expressly distinguishes, in the comparison of Polykratēs with Minōs, the human race to which the former belonged, from the divine or heroic race which comprised the latter<sup>1</sup>. But he has a firm belief in the authentic personality and parentage of all the nunes in the myths, divine, heroic and human, as well as in the trustworthiness of their chronology computed by generations. He counts back 1600 years from his own day to that of Semelē, mother of Dionysus; 900 years to Hēraklēs, and 800 years to Penelopē, the Trojan war being a little earlier in date<sup>2</sup>. Indeed even the longest of these periods must have seemed to him comparatively short, seeing that he apparently accepts the prodigious series of years which the Egyptians professed to draw from a recorded chronology—17,000 years from their god Hēraklēs, and 15,000 years from their god Osiris or Dionysus, down to their king Amasis<sup>3</sup> (550 B.C.). So much was his imagination familiarised with these long chronological computations barren of events, that he treats Homer and Hesiod as "men of yesterday," though separated from his own age by an interval which he reckons as four hundred years<sup>4</sup>.

His deference for Egypt and Egyptian statements.

Herodotus had been profoundly impressed with what he saw and heard in Egypt. The wonderful monuments, the evident antiquity, and the peculiar civilization of that country, acquired such preponderance in his mind over his own native legends, that he is disposed to trace even the oldest religious names or institutions of Greece to Egyptian or Phœnician original, setting aside in favour of this hypothesis the Grecian legends of Dionysus and Pan<sup>1</sup>. The oldest Grecian mythical genealogies are thus made ultimately to lose themselves in Egyptian or Phœnician antiquity, and in the full extent of these genealogies Herodotus firmly believes. It does not seem that any doubt had ever crossed his mind as to the real personality of those who were named or described in the popular myths: all of them have once had reality, either as men, as heroes, or as gods. The eponyms of cities, dæmōs and tribes, are all comprehended in this affirmative category; the supposition of fictitious personages being apparently never entertained. In the veins of the Lacedæmonian kings flowed the blood both of Kadmus and of Danaus, their splendid pedigree being traceable to both of these great mythical names: Herodotus carries the lineage up through Héraklês first to Perseus and Danaë, then through Danaë to Akrisius and the Egyptian Danaus; but he drops the paternal lineage when he comes to Perseus (inasmuch as Perseus is the son of Zeus by Danaë, without any reputed human father, such as Amphitryôn was to Héraklês), and then follow the higher members of the series through Danaë alone<sup>4</sup>. He also pursues the same regal genealogy, through the mother of Eurysthenês and Proklês, up to Polynikês, Œdipus, Laius, Labdakus, Polydôrus and Kadmus: and he assigns various ancient inscriptions which he saw in the temple of the Ismenian Apollo at Thêbes, to the ages of Laius and Œdipus<sup>5</sup>. Moreover the sieges of Thêbes and Troy,—the Argonautic expedition,—the invasion of Attica by the Amazons,—the protection of the Herakleids, and the defeat and death of Eurystheus, by the Athenians<sup>6</sup>,—the death

of Mèkisteus and Tydeus before Thêbes by the hands of Melanippus, and the touching calamities of Adrastus and Amphiaræus connected with the same enterprise,—the sailing of Kastôr and Pollux in the *Argô*<sup>1</sup>,—the abductions of Id, Eurôpa, Mèdeia and Helena,—the emigration of Kadmus in quest of Eurôpa, and his coming to Bœôtia, as well as the attack of the Greeks upon Troy to recover Helen<sup>2</sup>,—all these events seem to him portions of past history, not less unquestionably certain, though more clouded over by distance and misrepresentation, than the battles of Salamis and Mykalê.

But though Herodotus is thus easy of faith in regard both to the persons and to the general facts of Grecian mythes, yet when he comes to discuss particular facts taken separately, we find him applying to them stricter tests of historical credibility, and often disposed to reject as well the miraculous as the extravagant. Thus even with respect to Hêraklês, he censures the levity of the Greeks in ascribing to him absurd and incredible exploits; he tries their assertion by the philosophical standard of nature, or of determinate powers and conditions governing the course of events. “How is it consonant to nature (he asks), that Hêraklês, being, as he was, according to the statement of the Greeks, a man, should kill many thousand persons? I pray that indulgence may be shown to me both by gods and heroes for saying so much as this.” The

religious feelings of Herodotus here told him that he was trenching upon the utmost limits of admissible scepticism<sup>1</sup>.

Another striking instance of the disposition of Herodotus to rationalise the miraculous narratives of the current myths, is to be found in his account of the oracle of Dôdôna and its alleged Egyptian origin. Here, if in any case, a miracle was not only in full keeping, but apparently indispensable to satisfy the exigences of the religious sentiment; anything less than a miracle would have appeared tame and unimpressive to the visitors of so revered a spot, much more to the residents themselves. Accordingly, Herodotus heard both from the three priestesses and from the Dodonæans generally, that two black doves had started at the same time from Thêbes in Egypt: one of them went to Libya, where it directed the Libyans to establish the oracle of Zeus Ammon; the other came to the grove of Dôdôna, and perched on one of the venerable oaks, proclaiming with a human voice that an oracle of Zeus must be founded on that very spot. The in-

<sup>1</sup> Herod. ii. 45. Λίγαντι δὲ πάλλῃ καὶ ὅλα ἀπεπιστεύεται αἱ Ἑλληνες· εἰρήθη δὲ αὐτίκῃ καὶ ὅτε ὁ μῦθος ἔσται, τὰς περὶ τοῦ Ἡρακλῆος λέγοντες· ..... Ἐπεὶ δὲ ἔστι ἱστορία τὰς Ἡρακλῆος, οὐκ εἶσι ἀσθένεσθαι ὅτι ὁ φασί, καὶ φύσει ἔχει πολλὰς μυθολογίας φρονέοντες; Καὶ περὶ μὲν ταῦτας τοιαύτας ἡμῖν εἰπόμεναι, καὶ παρὰ τὰς θεῶν οὐ κατὰ τὸν ἥρωα εἰρησίου εἶναι.

We may also notice the manner in which the historian criticises the stratagem wherewith Peisistratus established himself as despot at Athens — by dressing up the staid Athenian woman Phyl in the costume of the goddess Athênâ, and passing off her injunctions as the commands of the goddess; the Athenians accepted her with unhesitating faith, and received Peisistratus at her command. Herodotus treats the whole affair as a piece of extravagant silliness, *πρότερον εἰρησίου καὶ μακροῦ* (i. 60).

junction of the speaking dove was respectfully obeyed<sup>1</sup>.

Such was the tale related and believed at Dodona. But Herodotus had also heard, from the priests at Thêbes in Egypt, a different tale, ascribing the origin of all the prophetic establishments, in Greece as well as in Libya, to two sacerdotal women, who had been carried away from Thêbes by some Phœnician merchants and sold, the one in Greece, the other in Libya. The Theban priests boldly assured Herodotus that much pains had been taken to discover what had become of these women so exported, and that the fact of their having been taken to Greece and Libya had been accordingly verified<sup>2</sup>.

The historian of Halicarnassus cannot for a moment think of admitting the miracle which harmonised so well with the feelings of the priestesses and the Dodonæans<sup>3</sup>. "How (he asks) could a dove speak with human voice?" But the narrative of the priests at Thêbes, though its prodigious improbability hardly requires to be stated, yet in-

The miracle sometimes takes another form; the oak at Dodona was itself once endued with speech (Theophr. Hal. Agr. Rhetoric. i. 6; Strabo).

<sup>2</sup> Herod. ii. 54.

<sup>3</sup> Herod. ii. 57. Ἐπεὶ τίς τρέσσει ἢ πολέμῳ γὰρ ἀδρανιστὴς φωνὴ φέρεται;

According to one statement, the word *Heleus* in the Thessalian dialect meant both a dove and a prophetess (Scriptor. Rer. Mythicarum, ed. Boeckh, i. 26). Had there been any truth in this, Herodotus could hardly have failed to notice it, inasmuch as it would exactly have helped him out of the difficulty which he felt.

volved no positive departure from the laws of nature and possibility, and therefore Herodotus makes no difficulty in accepting it. The curious circumstance is, that he turns the native Dodonæan legend into a figurative representation, or rather a misrepresentation, of the supposed true story told by the Theban priests. According to his interpretation, the woman who came from Thêbes to Dôdôna was called a dove, and affirmed to utter sounds like a bird, because she was non-Hellenic and spoke a foreign tongue: when she learned to speak the language of the country, it was then said that the dove spoke with a human voice. And the dove was moreover called black, because of the woman's Egyptian colour.

That Herodotus should thus bluntly reject a miracle, recounted to him by the prophetic women themselves as the prime circumstance in the *origines* of this holy place, is a proof of the hold which habits of dealing with historical evidence had acquired over his mind; and the awkwardness of his explanatory mediation between the dove and the woman, marks not less his anxiety, while discarding the legend, to let it softly down into a story quasi-historical and not-intrinsically incredible.

We may observe another example of the unconscious tendency of Herodotus to eliminate from the mythes the idea of special aid from the gods, in his remarks upon Melampus. He designates Melampus "as a clever man, who had acquired for himself the art of prophecy"; and had procured through Kadmos much information about the religious rites and customs of Egypt, many of which he introduced

into Greece<sup>1</sup>—especially the name, the sacrifices, and the phallic processions of Dionysus: he adds, "that Melampus himself did not accurately comprehend or bring out the whole doctrine, but wise men who came after him made the necessary additions<sup>2</sup>." Though the name of Melampus is here maintained, the character described<sup>3</sup> is something in the vein of Pythagoras—totally different from the great seer and leech of the old epic myths—the founder of the gifted family of the Amythaonids, and the grandfather of Amphiaraus<sup>4</sup>. But that which is most of all at variance with the genuine legendary spirit, is the opinion expressed by Herodotus (and delivered with some emphasis as *his own*), that Melampus "was a clever man who had acquired for himself prophetic powers." Such a supposition would have appeared inadmissible to Homer or Hesiod, or indeed to Solon in the preceding

Hesiodotus notices the celebrated mythical narrative of Melampus healing the distraught Argive women (ix. 34); according to the original legend, the daughters of Procus. In the Hesiodic Catalog (Fr. 16, Dind.) century, in whose view even inferior arts come from the gods, while Zeus or Apollo bestows the power of prophesying<sup>1</sup>. The intimation of such an opinion by Herodotus, himself a thoroughly pious man, marks the sensibly diminished omnipresence of the gods, and the increasing tendency to look for the explanation of phenomena among more visible and determinate agencies.

We may make a similar remark on the dictum of the historian respecting the narrow defile of Tempê, forming the embouchure of the Pêneus and the efflux of all the waters from the Thessalian basin. The Thessalians alleged that this whole basin of Thessaly had once been a lake, but that Poseidôn had split the chain of mountains and opened the efflux<sup>2</sup>; upon which primitive belief, thoroughly conformable to the genius of Homer

For whoever thinks that Poseidōn shakes the earth, and that the rifts of an earthquake are the work of that god, will, on seeing the defile in question, say that Poseidōn has caused it. For the rift of the mountains is, as appeared to me (when I saw it), the work of an earthquake." Herodotus admits the reference to Poseidōn, when pointed out to him, but it stands only in the background: what is present to his mind is, the phenomenon of the earthquake, not as a special act, but as part of a system of habitual operations<sup>1</sup>.

The manner in which conjectures, derived from local configuration or peculiarities, are often made to assume the form of traditions, is well-remarked by the same illustrious traveller:—"Ce qui se présente comme une tradition, n'est souvent que le reflet de l'impression que laisse l'aspect des lieux. Des bancs de coquilles à demi-fossiles, répandus dans les ischons ou sur des plateaux, font naître, même chez les hommes les moins avancés dans la culture intellectuelle, l'idée de grandes inondations, d'anciennes communications entre des bassins limitrophes. Des opinions, que l'on pourrait appeler systématiques, se trouvent dans les forêts de l'Oréoque comme dans les îles de la Mer du Sud. Herodotus adopts the Egyptian version of the legend of Troy, founded on that capital variation which seems to have originated with Stesichorus, and according to which Helen never left Sparta at all—her *eiddon* had been taken to Troy in her place. Upon this basis a new story had been framed, midway between Homer and Stesichorus, representing Paris to have really carried off Helen from Sparta, but to have been driven by storms to Egypt, where she remained during the whole siege of Troy, having been detained by Prôteus, the king of the country, until Menelaus came to re-

In another case (viii. 123), Herodotus believes that Poseidōn produced a preternaturally high tide in order to punish the Persians, who had insulted his temple near Potidæa: here was a special motive for the god to exert his power.

This remark of Herodotus illustrates the hostile ridicule cast by Aristophanes (in the *Nubes*) upon Sokratēs, on the score of alleged impiety, because he belonged to a school of philosophers (though in point of fact he disavowed that line of study) who introduced physical laws and forces in place of the personal agency of the gods. The old man Strepsiades inquires from Sokratēs, *Who ruins?* *Who thunders?* To which Sokratēs replies, "Not Zeus, but the *Nephelæ*, i. e. the clouds: you never saw rain without clouds." Strepsiades then proceeds to inquire—"But who is it that compels the clouds to move onward? is it not Zeus?" Sokratēs—"Not at all; it is eternal rotation." Strepsiades—"Rotation? that had escaped me: Zeus then no longer exists, and Rotation reigns in his place!"

If Aristophanes had had as strong a wish to turn the public antiquities against Herodotus as against Sokratēs and Euripides, the explanation here given would have afforded him a plausible show of truth for doing so; and it is highly probable that the Thesmothes would have

claim her after his triumph. The Egyptian priests, with their usual boldness of assertion, professed to have heard the whole story from Menelaus himself—the Greeks had besieged Troy, in the full persuasion that Helen and the stolen treasures were within the walls, nor would they ever believe the repeated denials of the Trojans as to the fact of her presence. In intimating his preference for the Egyptian narrative, Herodotus betrays at once his perfect and unsuspecting confidence that he is dealing with genuine matter of history, and his entire

been sufficiently displeased with the view of Herodotus to sympathise in the poet's attack upon him. The point would have been made (waiving metrical considerations)—

Σεταμὲν Πασθεῖν, τοὺς Ποσειδῶν' ἐχθρότατον.

The comment of Herodotus upon the Thebanian view seems almost as if it were intended to guard against this very inference.

Other accounts ascribed the cutting of the delfs of Tempé to Héraklēs (Diodor. iv. 18).

Respecting the ancient Grecian faith which recognised the displeasure of Poseidōn as the cause of earthquakes, see Xenoph. Hellen. iii. 3, 2; Thucyd. i. 127; Strabo, xii. p. 579; Diodor. xv. 48–49. It ceased to give universal satisfaction even so early as the time of Thales and Anaximandēs (see Aristot. Meteorolog. ii. 7–8; Plutarch, Placit. Philon. iii. 15; Seneca, Natural. Quæst. vi. 6–23); and that philosopher, as well as Ambragoras, Democritus and others, suggested different physical explanations of the fact. Notwithstanding a dissentient minority, however, the old doctrine still continued to be generally received; and Diodorus, in describing the terrible earthquake in 373 B.C., by which Halikē and Bura were destroyed, while he notices those philosophers (probably Kallisthenēs, Senec. Nat. Quæst. vi. 23) who substituted physical causes and laws in place of the divine agency, rejects their views and ranks himself with the religious public who traced this formidable phenomenon to the wrath of Poseidōn (iv. 48–49).

The Romans recognised many different gods as producers of earthquakes; an unfortunate error, since it exposed them to the danger of addressing their prayers to the wrong god:—"Unde in ritualibus et pontificiis observatur, contemperentibus sacerdotibus cunctis, ne alio Deo pro alio nominato, cum quis curas terrarum committat, piacula committantur." (Ammian. Marcell. xvii. 7).

distrust of the epic poets, even including Homer, upon whose authority that supposed history rested. His reason for rejecting the Homeric version is, that it teems with historical improbabilities. If Helen had been really in Troy (he says), Priam and the Trojans would never have been so insane as to retain her to their own utter ruin: but it was the divine judgement which drove them into the miserable alternative of neither being able to surrender Helen, nor to satisfy the Greeks of the real fact that they never had possession of her—in order that mankind might plainly read, in the utter destruction of Troy, the great punishments with which the gods visit great misdeeds. Homer (Herodotus thinks) had heard this story, but designedly departed from it, because it was not so suitable a subject for epic poetry<sup>1</sup>.

Enough has been said to show how wide is the difference between Herodotus and the logographers with their literal transcript of the ancient legends. Though he agrees with them in admitting the full series of persons and generations, he tries the circumstances narrated by a new standard. Scruples have arisen in his mind respecting violations of the laws of nature: the poets are unworthy of trust,

<sup>1</sup> Herod. ii. 116, *δοκεῖ δὲ μοι καὶ Ὅμηρος τὰς λέγας ταύτας παθεῖναι, ἀλλ' οὐ γὰρ δοκίμω τίνασθε ἢ ἐκ τῆς ἐπιστάτης ἢ ἐφ' ἑτέρας τῆς αἰγ' ἐχρήσαντο, ἐκ δὲ πολλῶν αἰτίων, δηλώσαντες ὅτι καὶ ταῦτα ἐπιστάτης τὰς λέγας.*

Herodotus then produces a passage from the Iliad, with a view to prove that Homer knew of the voyage of Paris and Helen to Egypt; but the passage proves nothing at all to the point.

Again (c. 130), his slender confidence in the epic poets breaks out—*ὅτι καὶ τὰς τοιαύτας χρεώμεθα λέγειν.*

It is remarkable that Herodotus is disposed to identify Helen with the *ἑνὴν Ἀφροδίτην* whose temple he saw at Memphis (c. 112).

and their narratives must be brought into conformity with historical and ethical conditions, before they can be admitted as truth. To accomplish this conformity, Herodotus is willing to mutilate the old legend in one of its most vital points: he sacrifices the personal presence of Helena in Troy, which ran through every one of the ancient epic poems belonging to the Trojan cycle, and is indeed, under the gods, the great and present moving force throughout.

Thucydides places himself generally in the same point of view as Herodotus with regard to mythical antiquity, yet with some considerable differences. Though manifesting no belief in present miracles or prodigies<sup>1</sup>, he seems to accept without reserve the pre-existent reality of all the persons mentioned in the mythes, and of the long series of generations extending back through so many supposed centuries: in this category, too, are included the eponymous personages, Hellen, Kekrops, Eumolpus, Pandion, Amphiloehus the son of Amphiaraus, and Akarnan. But on the other hand, we find no trace of that distinction between a human and an heroic ante-human race, which Herodotus still admitted,—

<sup>1</sup> " Ut conquirere fabulosum (says Tacitus, *Hist. iii. 56*), a worthy parallel of Thucydides) et fletis oblectare legentium animos, procul gravibus cepti operis erodiderim, ita vulgatis traditisque demoto fletu non animi. Dio, quo Belisarij certabatur, armis similitudine specie, apud Regium Lepidum celebris vico conuersasse, incolarum memorant; nec deinde curia hominum aut circumvolitantium altum, territam pulsanique, docet Otho se ipse interfecisset: tunc ablatum ex oculis: et tempora reputationibus, initium fluxumque miraculi cum Othonis exitu comparasse." Suetonius (*Vesp. 5*) recounts a different miracle, in which three eagles appear.

This passage of Tacitus occurs immediately after his magnificent description of the suicide of the emperor Otho, a deed which he contemplates with the most fervent admiration. His feelings were evidently so wrought up, that he was content to relax the canons of historical credibility.

nor any respect for Egyptian legends. Thucydides, regarding the personages of the mythes as men of the same breed and stature with his own contemporaries, not only tests the acts imputed to them by the same limits of credibility, but presumes in them the same political views and feelings as he was accustomed to trace in the proceedings of Peisistratus or Periklês. He treats the Trojan war as a great political enterprise, undertaken by all Greece; brought into combination through the imposing power of Agamemnôn, not (according to the legendary narrative) through the influence of the oath exacted by Tyndareus. Then he explains how the predecessors of Agamemnôn arrived at so vast a dominion—beginning with Pelops, who came over (as he says) from Asia with great wealth among the poor Peloponnêsiens, and by means of this wealth so aggrandised himself, though a foreigner, as to become the eponym of the peninsula. Next followed his son Atreus, who acquired after the death of Eurystheus the dominion of Mykênæ, which had before been possessed by the descendants of Perseus: here the old legendary tale, which described Atreus as having been banished by his father Pelops in consequence of the murder of his elder brother Chrysippus, is invested with a political bearing, as explaining the reason why Atreus retired to Mykênæ. Another legendary tale—the defeat and death of Eurystheus by the fugitive Herakleids in Attica, so celebrated in Attic tragedy as having given occasion to the generous protecting intervention of Athens—is also introduced as furnishing the cause why Atreus succeeded to the

deceased Eurystheus: "for Atreus, the maternal uncle of Eurystheus, had been entrusted by the latter with his government during the expedition into Attica, and had effectually courted the people, who were moreover in great fear of being attacked by the Herakleids." Thus the Pelopids acquired the supremacy in Peloponnêsus, and Agamemnôn was enabled to get together his 1200 ships and 100,000 men for the expedition against Troy. Considering that contingents were furnished from every portion of Greece, Thucydidês regards this as a small number, treating the Homeric catalogue as an authentic muster-roll, perhaps rather exaggerated than otherwise. He then proceeds to tell us why the armament was not larger: many more men could have been furnished, but there was not sufficient money to purchase provisions for their subsistence; hence they were compelled, after landing and gaining a victory, to fortify their camp, to divide their army, and to send away one portion for the purpose of cultivating the Chersonese, and another portion to sack the adjacent towns. This was the grand reason why the siege lasted so long as ten years. For if it had been possible to keep the whole army together, and to act with an undivided force, Troy would have been taken both earlier and at smaller cost<sup>1</sup>.

Such is the general sketch of the war of Troy, as given by Thucydidês. So different is it from the genuine epical narrative, that we seem hardly to be reading a description of the same event; still less should we imagine that the event was known.

<sup>1</sup> Thucyd. i. 9-12.

to him as well as to us, only through the epic poets themselves. The men, the numbers, and the duration of the siege, do indeed remain the same; but the cast and juncture of events, the determining forces, and the characteristic features, are altogether heterogeneous. But, like Herodotus, and still more than Herodotus, Thucydides was under the pressure of two conflicting impulses,—he shared the general faith in the mythical antiquity, yet at the same time he could not believe in any facts which contradicted the laws of historical credibility or probability. He was thus under the necessity of torturing the matter of the old myths into conformity with the subjective exigences of his own mind: he left out, altered, recombined, and supplied new connecting principles and supposed purposes, until the story became such as no one could have any positive reason for calling in question: though it lost the impressive mixture of religion, romance and individual adventure, which constituted its original charm, it acquired a smoothness and plausibility, and a political *ensemble*, which the critics were satisfied to accept as historical truth. And historical truth it would doubtless have been, if any independent evidence could have been found to sustain it. Had Thucydides been able to produce such new testimony, we should have been pleased to satisfy ourselves that the war of Troy, as he recounted it, was the real event; of which the war of Troy, as sung by the epic poets, was a misreported, exaggerated, and ornamented recital. But in this case the poets are the only

real witnesses, and the narrative of Thucydides is a mere extract and distillation from their incredibilities.

A few other instances may be mentioned to illustrate the views of Thucydides respecting various mythical incidents. 1. He treats the residence of the Homeric Phæacians at Korkyra as an undisputed fact, and employs it partly to explain the efficiency of the Korkyrean navy in times preceding the Peloponnesian war<sup>1</sup>. 2. He notices with equal confidence the story of Tereus and Prokne, daughter of Pandion, and the murder of the child Itys by Prokne his mother and Philomela; and he produces this ancient myth with especial reference to the alliance between the Athenians and Tères, king of the Odrysian Thracians, during the time of the Peloponnesian war, intimating that the Odrysian Tères was neither of the same family nor of the same country as Tereus the husband of Prokne<sup>2</sup>. The

Νέος δὲ καὶ τὸ σῶμα Πανδίωνος ἐκείνου ἐκείνου ἐκ τῆς ἐκπαίδευσης καὶ τῆς ἐκπαίδευσης, ἐκ' ὧν καὶ τῆς ἐκπαίδευσης, καὶ τῆς ἐκπαίδευσης. The first of these sentences would lead us to infer, if it came from any other pen than that of Thucydides, that the writer believed the metamorphosis of Philomela into a nightingale: see above, ch. xi. p. 276.

The observation respecting the convenience of neighbourhood for the marriage is remarkable, and shows how completely Thucydides regarded the event as historical. What would he have said respecting the marriage of Orithyia, daughter of Erechtheus, with Demos, and the prodigious distance which she is reported to have been carried by her husband? Ὑπὲρ τε σάκκου σάκος, ἐν' ἐκχαρα χόρμαι, &c. (Sophocles ap. Strabo. vii. p. 295.)

From the way in which Thucydides introduces the mention of the

conduct of Pandion, in giving his daughter Prokne in marriage to Tereus, is in his view dictated by political motives and interests. 3. He mentions the Strait of Messina as the place through which Odysseus is said to have sailed<sup>1</sup>. 4. The Cyclopes and the Læstrygonæ (he says) were the most ancient reported inhabitants of Sicily; but he cannot tell to what race they belonged, nor whence they came<sup>2</sup>. 5. Italy derived its name from Italus king of the Sikels. 6. Eryx and Egæta in Sicily were founded by fugitive Trojans after the capture of Troy; also Skione, in the Thracian peninsula of Pallênê, by Greeks from the Achaean town of Pellênê, stopping thither in their return from the siege of Troy: the Amphilocheian Argos in the Gulf of Ambrakia was in like manner founded by Amphilocheus son of Amphiaræus, in his return from the same enterprise. The remorse and mental derangement of the matricidal Alkmaeon, son of Amphiaraus, is also mentioned by Thucydides<sup>3</sup>, as well as the settlement of his son Akarnan in the country called after him Akarnania<sup>4</sup>.

event, we see that he intended to correct the misapprehensions of his countrymen, who having just made an alliance with the Chrysaean *Troës*, were led by that circumstance to think of the old mythical *Tereus*, and to regard him as the ancestor of *Troës*.

He talks about Italus just as Thucydides talks about Theseus, as a wise and powerful king, who first acquired a great dominion (Dionys. H. A. R. i. 12, 33, 71). Antiochus also mentioned Italus in the same general terms (Polit. vi. 2, 27).

<sup>4</sup> We may here notice some particulars respecting Isokrates. He

Such are the special allusions made by this illustrious author in the course of his history to mythical events. From the tenor of his language we may see that he accounted all that could be known about them to be uncertain and unsatisfactory; but he has it much at heart to show, that even the greatest were inferior in magnitude and importance to the Peloponnesian war<sup>1</sup>. In this respect his opinion

manifests entire confidence in the authenticity of the mythical genealogies and chronology: but while he treats the mythical personages as historically real, he regards them at the same time not as human, but as half-gods, superior to humanity. About Helena, Theseus, Sarpédon, Cyrenus, Memnon, Achilles, &c., see *Eucora*. *Helena*. Or. x. pp. 282, 292, 296, Bek. Helena was worshiped in his time as a goddess at Therapne (ib. p. 296). He recites the settlements of Danaus, Kadmus and Pelops in Greece, as undoubted historical facts (p. 297). In his discourse called *Buciris*, he assumes Polykrates the nephew of a great monarchism in having placed Buciris subsequent in point of date to Orpheus and Aeolus (Or. xi. p. 301, Bek.), and he adds that the tale of Buciris having been slain by Hēraklēs was chronologically impossible (p. 309). Of the long Athenian genealogy from Kekrops to Theseus, he speaks with perfect historical confidence (*Panathenae*. p. 349, Bek.), not less so of the adventures of Hēraklēs and his mythical contemporaries, which he places in the mouth of Archilochus as a justification of the Spartan tale to Menenius (*Or. vi. Archilochus*, p. 156, Bek., compare Or. v. *Philippus*, pp. 114, 138), *phōnē, olē ep'ē tōis traditōis eurōiōnos*, &c. He condemns the poets in strong language for the naked and dissolute tales which they circulated respecting the gods: many of them (he says) had been punished for such blasphemies by blindness, poverty, exile and other misfortunes (Or. xi. p. 302, Bek.).

In general it may be said, that Isokrates applies no principles of historical criticism to the myths: he rejects such as appear to him incredible or unworthy, and believes the rest.

<sup>1</sup> *Timæd* i. 21-22.

The first two volumes of this History have been noticed in an abstract of the *Quarterly Review* for October 1846; as well as in the *Heidelberg-Jahrbücher der Literatur* (1846. No. 41. pp. 641-655) by Professor Kistlin.

While expressing, on several points, approbation of my work, by which I feel much flattered—both my English and my German critics take partial objection to the views respecting Grecian legend. While the *Quarterly Reviewer* contends that the mythopoeic faculty of the he-

seems to have been at variance with that which was popular among his contemporaries.

man mind, though essentially loose and untrustworthy, is never creative, but requires some basis of fact to work upon—Kortüm thinks that I have not done justice to Thucydides, as regards his way of dealing with legend; that I do not allow sufficient weight to the authority of an historian so circumpect and so cold-blooded (*den kalt-blütigsten und besonnensten Historiker des Alterthums*, p. 653) as a satisfactory voucher for the early facts of Grecian history in his preface (*Herr G. sieht also, wenn er das anerkennt kritische Proömium als Gewährsmann verschmäht*, p. 654).

No man feels more powerfully than I do the merits of Thucydides as an historian, or the value of the example which he set in multiplying critical inquiries respecting matters recent and verifiable. But the ablest judge or advocate, in investigating specific facts, can proceed no further than he finds witnesses having the means of knowledge and willing more or less to tell truth. In reference to facts prior to 776 B.C., Thucydides had nothing before him except the legendary poets, whose credibility is not at all enhanced by the circumstance that he accepted them as witnesses, applying himself only to cut down and modify their allegations. His credibility in regard to the specific facts of those early times depends altogether upon theirs. Now we in our day are in a better position for appreciating their credibility than he was in his, since the foundations of historical evidence are so much more fully understood, and good or bad materials for history are open to comparison in such large extent and variety. Instead of wondering that he shared the general faith in such delusive guides—we ought rather to give him credit for the reserve with which he qualified that faith, and for the sound idea of historical possibility to which he held fast as the limit of his confidence. But it is impossible to consider Thucydides as a *satisfactory guarantor* (*Gewährsmann*) for matters of fact which he derives only from such sources.

Professor Kortüm considers that I am inconsistent with myself in refusing to discriminate particular matters of historical fact among the legends—and yet in accepting these legends (in my chap. xx.) as giving a faithful mirror of the general state of early Grecian society (p. 651). It appears to me that this is no inconsistency, but a real and important distinction. Whether Heraklēs, Agamemnon, Odysseus, &c. were real persons, and performed all, or a part, of the possible actions ascribed to them—I profess myself unable to determine. But even assuming both the persons and their exploits to be fictitious, these very fictions will have been conceived and put together in conformity to the general social phenomena among which the describer and his hearers lived—and will thus serve as illustrations of the manners then prevalent. In fact the real value of the *Fæbles* of Thucydides, upon which Professor

To touch a little upon the later historians by whom these mythes were handled, we find that Anaximenēs of Lampsacus composed a consecutive history of events, beginning from the Theogony down to the battle of Mantinea<sup>1</sup>. But Ephorus professed to omit all the mythical narratives which are referred to times anterior to the return of the Herakleids, (such restriction would of course have banished the siege of Troy,) and even reproved those who introduced mythes into historical writing: adding, that everywhere truth was the object to be aimed at<sup>2</sup>. Yet in practice he seems often to have departed from his own rule<sup>3</sup>. Theopompus,

Kortüm bestows such just praise, contents, not in the particular facts which he brings out by altering the legends, but in the rational general views which he sets forth respecting early Greek society, and respecting the steps as well as the causes whereby it attained its actual position as he saw it.

Professor Kortüm also affirms that the mythos contain "real matter of fact along with mere conceptions:" which affirmation is the same as that of the Quarterly Reviewer, when he says that the mythopœic faculty is not creative. Taking the mythos in the mass, I doubt not that this is true; nor have I anywhere denied it. Taking them one by one, I neither affirm nor deny it. My position is, that whether there be matter of fact or not, we have no test whereby it can be singled out, identified and severed from the accompanying fiction. And it lies upon those, who proclaim the practicability of such severance, to exhibit some means of verification better than any which has been yet pointed out. If Thucydides has failed in doing this, it is certain that none of the many authors who have made the same attempt after him have been more successful.

It cannot surely be denied that the mythopœic faculty is creative, when we have before us so many divine legends not merely in Greece, but in other countries also. To suppose that these religious legends are mere exaggerations, &c. of some basis of actual fact—that the gods of polytheism were merely divinised men with qualities distorted or feigned—would be to embrace in substance the theory of Ruémars.

on the other hand, openly proclaimed that he could narrate fables in his history better than Herodotus, or Ktesias, or Hellenicus<sup>1</sup>. \* The fragments which remain to us exhibit some proof that this promise was performed as to quantity<sup>2</sup>; though as to his style of narration, the judgement of Dionysius is unfavourable. Xenophôn ennobled his favourite amusement of the chase by numerous examples chosen from the heroic world, tracing their portraits with all the simplicity of an undiminished faith. Kallisthenēs, like Ephorus, professed to omit all mythes which referred to a time anterior to the return of the Herakleids; yet we know that he devoted a separate book or portion of his history to the Trojan war<sup>3</sup>. Philistus introduced some mythes in the earlier portions of his Sicilian history; but Timæus was distinguished above all

Marx.), the tales of Kadmos and Harmonia (Fragm. 12), the lustration of Atollus from Uis (Fragm. 15; Strabo, viii. p. 257); he drew inferences from the chronology of the Trojan and Theban wars (Fragm. 28); he related the coming of Dardanos to the Saka king Kokalos, and the expedition of the Amazons (Fragm. 99-103).

He was particularly copious in his information about *erisias*, *deontias* and *orygasterias* (Polyb. ix. 1).

Theopompus affirmed, that the bodies of those who went into the forbidden precinct (*to ákuron*) of Zeus in Arcadia gave no shadow (Polyb. vi. 12). He recounted the story of Midas and Sildanus (Fragm. 74, 75, 76, ed. Wicheri); he said a good deal about the heroes of Troy; and he seems to have assigned the misfortunes of the Sidonians to an historical cause—the rottenness of the Grecian ships from the length of the voyage, while the genuine epic ascribes it to the anger of Athalia (Fragm. 112, 113, 114; Schol. Homer. *Iliad*. ii. 135); he related an alleged expedition of Kinyras from Cyprus by Agamemnon (Fragm. 111); he gave the genealogy of the Macedonian queen Olympias up to Acllus and Eakus (Fragm. 232).

others by the copious and indiscriminate way in which he collected and repeated such legends<sup>1</sup>. Some of these writers employed their ingenuity in transforming the mythical circumstances into plausible matter of history: Ephorus in particular converted the serpent Pythô, slain by Apollo, into a tyrannical king<sup>2</sup>.

But the author who pushed this transmutation of legend into history to the greatest length, was the Messenian Euêmerus, contemporary of Kassander of Macedôn. He melted down in this way the divine persons and legends, as well as the heroic—representing both gods and heroes as having been mere earthborn men, though superior to the ordinary level in respect of force and capacity, and deified or heroified after death as a recompense for services or striking exploits. In the course of a voyage into the Indian sea, undertaken by command of Kassander, Euêmerus professed to have discovered a fabulous country called Panchaia, in which was a temple of the Triphylian Zeus: he there described a golden column with an inscription purporting to have been put up by Zeus himself, and detailing his exploits while on earth<sup>3</sup>.

Timæus (*Fragn.* 50, 51, 52, 53, Güllér) related many fables respecting Jason, Médæa, and the Argonauts generally. The miscarriage of the Athenian armament under Nikias before Syracuse is imputed to the anger of Héraklès against the Athenians because they came to assist the Egeans, descendants of Troy (Plutarch, *Nikias*, 1),—a naked reproduction of genuine equal agencies by an historian; also about Thémis and the Damians; Phaethôn and the river Eridanos; the centaurs of the Hyantes in the Phlegrean plains (*Fragn.* 97, 99, 103).

Some eminent men, among whom may be numbered Polybius, followed the views of Eumèrus, and the Roman poet Ennius<sup>1</sup> translated his *Historia Sacra*; but on the whole he never acquired favour, and the unblushing inventions which he put into circulation were of themselves sufficient to disgrace both the author and his opinions. The doctrine that all the gods had once existed as mere men offended the religious pagans, and drew upon Eumèrus the imputation of atheism; but, on the other hand, it came to be warmly espoused by several of the Christian assailants of paganism,—by Minucius Felix, Lactantius, and St. Augustin, who found the ground ready prepared for them in their efforts to strip Zeus and the other pagan gods of the attributes of deity. They believed not only in the main theory, but also in the copious details of Eumèrus; and the same man whom Strabo casts aside as almost a proverb for mendacity, was extolled by them as an excellent specimen of careful historical inquiry<sup>2</sup>.

St. Augustin, on the contrary, tells us (*Civitas Dei*, vi. 7), "Quid de ipso Jove senerunt, qui nutriceum epus in Capitolio posuerunt? Nunc attestanti sunt omnes Eumero, qui non fabulosa garrolitate, sed *historical diligentia*, homines fuisse mortalesque recensipat!" And Minucius Felix (*Octavi.* 20-21), "Eumèrus exequitur Deorum natus: patrias, sepulchra, diuinitates, et per provincias monent, Deos Jovis, et Apollinis Delphici, et Phœnix Iulias, et Cœteris Claudias." Compare Augustin, *Civitas Dei*, viii. 8-14; and Clements Alexand. *Cohort. ad Gent.* pp. 15-18, Syll.

Lactantius (*De Falsâ Relig.* c. 13, 14, 15) gives copious citations from Ennius's translation of the *Historia Sacra* of Eumèrus.

But though the pagan world repudiated that "lowering tone of explanation" which effaced the superhuman personality of Zeus and the great gods of Olympus, the mythical persons and narratives generally came to be surveyed more and more from the point of view of history, and subjected to such alterations as might make them look more like plausible matter of fact. Polybius, Strabo, Diodorus, and Pausanias, cast the mythos into historical statements—with more or less of transformation, as the case may require, assuming always that there is a basis of truth, which may be discovered by removing poetical exaggerations and allowing for mistakes. Strabo, in particular, lays down that principle broadly and unequivocally in his remarks upon Homer. To give pure fiction, without any foundation of fact, was in his judgement utterly unworthy of so great a genius; and he comments with considerable acrimony on the geographer Eratosthenès, who maintains the opposite opinion. Again, Polybius tells us that the Homeric Æolus, the dispenser of the winds by appointment from Zeus, was in reality a man eminently skilled in navigation, and exact in predicting the weather;

† 17-51. Compare Cicero, *De Nat. Deus* i. 42; Plutarch, *De Iside et Osiride*, c. 29. *Ann.* ii. p. 475, ed. Wyt.

Nitzsch assumes (Heiden Sage der Griechen, sect. 7, p. 84) that the voyage of Theseus to Paschaia was intended only as an amusing romance, and that Strabo, Polybius, Eratosthenès and Plutarch were mistaken in construing it as a serious event. Böttiger, in his *Kunst-Mythologie der Griechen* (Alsch. ii. s. 6, p. 110), takes the same view. But not the least reason is given for adopting this opinion, and it seems to me far-fetched and improbable; Lobbeck (*Aglaophoron*, p. 929), though Nitzsch attributes to him as holding it, manifests no such treachery, so far as I can observe.

that the Cyclopæ and Læstrygones were wild and savage real men in Sicily; and that Scylla and Charybdis were a figurative representation of dangers arising from pirates in the Strait of Messina. Strabo speaks of the amazing expeditions of Dionysus and Héraklès, and of the long wanderings of Jasôn, Menelaus, and Odysseus, in the same category with the extended commercial range of the Phœnician merchant-ships: he explains the report of Thésens and Peirithôus having descended to Hades, by their dangerous earthly pilgrimages,—and the invocation of the Dioskuri as the protectors of the imperiled mariner, by the celebrity which they had acquired as real men and navigators.

Diodôrus gave at considerable length versions of the current fables respecting the most illustrious names in the Grecian mythical world, compiled confusedly out of distinct and incongruous authors. Sometimes the mythe is reproduced in its primitive simplicity, but for the most part it is partially, and sometimes wholly, historicised. Amidst this jumble of dissentient authorities we can trace little of a systematic view, except the general conviction that there was at the bottom of the mythes a real chronological sequence of persons, and real matter of fact, historical or ultra-historical. Nevertheless there are some few occasions on which Diodôrus brings us back a step nearer to the point of view of the old logographers. For, in reference to Héraklès, he protests against the scheme of cutting down the mythes to the level of present reality, and contends that a special standard of ultra-historical credibility ought to be constituted, so as to include

the myths in its native dimensions, and do fitting honour to the grand, beneficent, and superhuman personality of Hēraklēs and other heroes or demi-gods. To apply to such persons the common measure of humanity (he says), and to cavil at the glorious picture which grateful man has drawn of them, is at once ungracious and irrational. All nice criticism into the truth of the legendary narratives is out of place: we show our reverence to the god by acquiescing in the incredibilities of his history, and we must be content with the best guesses which we can make, amidst the inextricable confusion and numberless discrepancies which they present<sup>1</sup>. Yet though Diodōrus here exhibits a preponderance of the religious sentiment over the purely historical point of view, and thus reminds us of a period earlier than Thucydides—he is un-

Καθόλου γὰρ ἐν ταῖς ἀρχαῖαις μυθολογίαις οὐκ ἐκ πιστῆς γράμμις πιαρῶς τῇ ἀλήθειᾳ ἐξεταστέον. Καὶ γὰρ ἄρα, Ἡρακλῆς μὲν ἐστὶ κατ' ἀνθρώπους ὅντα τοῖς ἰδίῳ πόνῳ ἐξημερῶσαι τὴν ἀναιμία, τοὺς δ' ἀνθρώπους, ἐκλειθεμένους τῇ αὐτῇ εὐργεσίᾳ, συνεκφαστέον ἐν ἐπὶ τῶν καθ' ἑαυτοῦ ἔργων ἑαυτοῦ, &c.

This is a remarkable passage: first, inasmuch as it sets forth the total inapplicability of criticisms drawn from the historical past as narratives about Hēraklēs; next, inasmuch as it suspends the employment of critical and scientific tests, and invokes an acquiescence-intercession and identified with the feelings, as the proper mode of obtaining praise and reverence for the god Hēraklēs. It aims at reproducing exactly that state of mind to which the myths were addressed, and with which alone they could ever be in thorough harmony:

other place inserts a series of stories which seem to be derived from Euëmerus, and in which Uranus, Kronus and Zeus appear reduced to the character of human kings celebrated for their exploits and benefactions<sup>1</sup>. Many of the authors, whom Diodôrus copies, have so entangled together Grecian, Asiatic, Egyptian and Libyan fables, that it becomes impossible to ascertain how much of this heterogeneous mass can be considered as at all connected with the genuine Hellenic mind.

Pausanias is far more strictly Hellenic in his view of the Grecian mythos than Diodôrus: his sincere piety makes him inclined to faith generally with regard to the mythical narratives, but subject nevertheless to the frequent necessity of historicising or allegorising them. His belief in the general reality of the mythical history and chronology is complete, in spite of the many discrepancies which he finds in it, and which he is unable to reconcile.

Another author who seems to have conceived clearly, and applied consistently, the semi-historical theory of the Grecian mythos, is Palæphatus, of whose work what appears to be a short abstract has been preserved<sup>2</sup>. In the short preface of this treatise "concerning Incredible Tales," he remarks,

<sup>1</sup> Diodôr. lib. 46-60; v. 44-46.

<sup>2</sup> The work of Palæphatus, probably the original, is alluded to in the *Ciris* of Virgil (88):

"Desta Palæphatidis tentatus vides papyrus."

The date of Palæphatus is unknown—inferred this passage of the *Ciris* seems the only ground that there is for inference respecting it. That which we now possess is probably an extract from a larger work—made by another person at some later time: see Vossius de *Historia Græcâ*, p. 478, ed. Westermann.

that some men, from want of instruction, believe all the current narratives; while others, more searching and cautious, disbelieve them altogether. Each of these extremes he is anxious to avoid. On the one hand, he thinks that no narrative could ever have acquired credence unless it had been founded in truth; on the other, it is impossible for him to accept so much of the existing narratives as conflicts with the analogies of present natural phenomena. If such things ever had been, they would still continue to be—but they never have so occurred; and the extra-analogical features of the stories are to be ascribed to the licence of the poets. Palsphatus wishes to adopt a middle course, neither accepting all nor rejecting all: accordingly, he had taken great pains to separate the true from the false in many of the narratives; he had visited the localities wherein they had taken place, and made careful inquiries from old men and others<sup>1</sup>. The re-

The main assumption of the semi-historical theory is here shortly and clearly stated.

One of the early Christian writers, Minucius Felix, is astonished at the easy belief of his pagan forefathers in miracles. If ever such things had been done in former times (he asserts), they would continue to be done now; as they cannot be done now, so may he sure that they never were really done formerly (Minucius Felix, *Octav. c. 20*): "Majordum enim noscitur tanta facili in mendacis fides fuisse, ut tunc et crediderint etiam alia monstruosa non miranda, Scyllam multiformem, Chimeram multiforem, Hydram, et Centaurum. Quid illis similis Salus—

sults of his researches are presented in a new version of fifty legends, among the most celebrated and the most fabulous, comprising the Centaurs, Pasiphaë, Aktæon, Kadmus and the Sparti, the Sphinx, Cygnus, Dædalus, the Trojan horse, Æolus, Scylla, Geryôn, Bellerophôn, &c.

It must be confessed that Palephatus has performed his promise of transforming the "incredibilia" into narratives in themselves plausible and unobjectionable, and that in doing so he always follows some thread of analogy, real or verbal. The Centaurs (he tells us) were a body of young men from the village of Nephelê in Thessaly, who first trained and mounted horses for the purpose of repelling a herd of bulls belonging to Ixiôn king of the Lapithæ, which had run wild and done great damage: they pursued these wild bulls on horseback, and pierced them with their spears, thus acquiring both the name of *Prickers* (*céropees*) and the imputed attribute of joint body with the horse. Aktæon was an Arcadian, who neglected the cultivation of his land for the pleasures of hunting, and was thus eaten up by the expense of his hounds. The dragon whom Kadmus killed at Thêbes, was in reality Drako king of Thêbes: and the dragon's teeth which he was said to have sown, and from whence sprung a crop of armed men, were in point of fact elephants' teeth, which Kadmus as a rich Phœnician had brought over with him: the sons of Drako sold these elephants' teeth and employed

de humilibus aves, et feræ homines, et de humilibus arbores arque  
feras! Quæ, si essent facta, ferrent: quæ feræ non possunt, alio nec  
facta sunt."

the proceeds to levy troops against Kadmus. Dædalus, instead of flying across the sea on wings, had escaped from Krête in a swift sailing-boat under a violent storm: Kottus, Briareus and Gygês were not persons with one hundred hands, but inhabitants of the village of Hekatoncheiria in Upper Macedonia, who warred with the inhabitants of Mount Olympus against the Titans: Scylla, whom Odysseus so narrowly escaped, was a fast-sailing piratical vessel, as was also Pegasus, the alleged winged horse of Bellerophon<sup>1</sup>.

<sup>1</sup> Palaeph. Nacrat. i. 3, 6, 13, 20, 21, 22. Two short treatises on the same subject as this of Palaephatus, are printed along with it both in the collection of Gale and of Westermann; the one *Heracleti de Incredibilibus*, the other *Anagori de Incredibilibus*. They both profess to interpret some of the extraordinary or miraculous myths, and proceed in a track not unlike that of Palaephatus. Scylla was a beautiful courtesan, surrounded with abominable parasites: she enamoured and ruined the companions of Odysseus, though he himself was prudent enough to escape her (Heraclit. c. 2, p. 313, West.). Atlas was a great astronomer; Pasiphaë fell in love with a youth named Taurus; the monster called the Chimæra was in reality a ferocious queen, who had two brothers called Leo and Drako; the ram which carried Phryxus and Hællô across the Ægean was a boatman named Krias (Heraclit. c. 2, 6, 15, 24).

A great number of similar explanations are scattered throughout the Scholia on Homer and the Commentary of Eustathius, without specification of their authors.

Others consider such resolution of fable into plausible history as a proof of surpassing ingenuity (*Progygmasmata*, cap. 6, ap. Wala. Coll. Rhet. Græc. i. p. 219). Others among the Rhetors, too, exercised their talents sometimes in vindicating, sometimes in controverting, the probability of the ancient myths. See the *Progygmasmata* of Neophan—*Κατασκευὴ ἐπὶ εἰρήνῃ τὰ κατὰ Νεώφυτον*—*Ἀνασκευή ἐπὶ αἰετῇ κατὰ Νεώφυτον* (ap. Wala. Coll. Rhetor. i. p. 284–312), where there are many specimens of this fanciful mode of handling.

Plutarch however, in one of his treatises, accepts Minotauri, Sphingæ, Centauri, &c. as realities; he treats them as products of the monstrous, irresistible, and ungovernable lusts of man, which he contrasts with the simple and moderate passions of animals (Plutarch, *Gryllus*, p. 990).

By such ingenious conjectures, Palephatus eliminates all the incredible circumstances, and leaves to us a string of tales perfectly credible and commonplace, which we should readily believe, provided a very moderate amount of testimony could be produced in their favour. If his treatment not only disenchantments the original myths, but even effaces their generic and essential character, we ought to remember that this is not more than what is done by Thucydides in his sketch of the Trojan war. Palephatus handles the myths consistently, according to the semi-historical theory, and his results exhibit the maximum which that theory can ever present. By aid of conjecture we get out of the impossible, and arrive at matters intrinsically plausible, but totally uncertified; beyond this point we cannot penetrate, without the light of extrinsic evidence, since there is no intrinsic mark to distinguish truth from plausible fiction<sup>1</sup>.

It remains that we should notice the manner in which the ancient myths were received and dealt

<sup>1</sup> The learned Mr. Jacob Bryant regards the explanations of Palephatus as if they were founded upon real fact. He admits, for example, the story Nephelê alleged by that author in his explanation of the fable of the Centaur. Moreover, he speaks with much commendation of Palephatus generally: "He (Palephatus) wrote early, and seems to have been a serious and sensible person; one who saw the absurdity of the fables upon which the theology of his country was founded." (*Ancient Mythology*, vol. i. p. 411-435.)

So also Sir Thomas Brown (*Inquiry into Vulgar Errors*, Book i. chap. vi. p. 221, ed. 1835) alludes to Palephatus as having inconspicuously pointed out the real basis of the fables. "And surely the fabulous inclination of those days was greater than any since; which continued on with fables, and from such slender grounds took birth for fictions, poisoning the world ever after: wherein how far they succeeded, may be exemplified from Palephatus, in his Book of *Fabulous Narrations*."

with by the philosophers. The earliest expression which we hear, on the part of philosophy, is the severe censure betowed upon them on ethical grounds by Xenophanès of Kolophôn, and seemingly by some others of his contemporaries<sup>1</sup>. It was apparently in reply to such charges, which did not admit of being directly rebutted, that Theagenès of Rhêgium (about 520 B.C.) first started the idea of a double meaning in the Homeric and Hesiodic narratives, —an interior sense, different from that which the words in their obvious meaning bore, yet to a certain extent analogous, and discoverable by sagacious divination. Upon this principle he allegorised especially the battle of the gods in the *Iliad*<sup>2</sup>. In the succeeding century, Anaxagoras and Metrodôrus carried out the allegorical explanation more comprehensively and systematically; the former representing the mythical personages as mere mental conceptions invested with name and gender, and

Xenophanès pronounced the battles of the Titans, Gigantes and Centaurs to be "fictions of our predecessors," *πλάσματα τῶν προτέρων* (Xenophan. *Fragmenta*. i. p. 42, ed. Schneidewin).

<sup>2</sup> Schol. *Iliad*. xi. 67. *Talium. adv. illustrative of ethical precepts,—the latter connecting them with physical principles and phenomena. Metrodôrus resolved not only the persons of Zeus, Hêrê and Athênâê, but also those of Agamemnôn, Achilles and Hectôr, into various elemental combinations and physical agencies, and treated the adventures ascribed to them as natural facts concealed under the veil of allegory<sup>1</sup>. Empedoklês, Prodikos, Antisthenês, Parmenidês, Hêrakleidês of Pontus, and in a later age, Chrysippus and the Stoic philosophers generally<sup>2</sup>, followed more or less the same

maelicious infant Dionysus having been sown into the thigh of Zeus.  
Pentheus, while reproving him for his impiety, explains the story away

in place of the *alôph* Ἀλφειά *Lycaonôgôn* (Bacch. 233-290).

Lucretius (iii. 326-383) allegorises the torments which sufferers in

principle of treating the popular gods as allegorical personages; while the expositors of Homer (such as Stesimbrotus, Glaukôn and others, even down to the Alexandrine age), though none of them proceeded to the same extreme length as Metrodôrus, employed allegory amongst other media of explanation for the purpose of solving difficulties, or eluding reproaches against the poet.

Allegorical interpretation of the myths—more and more introduced and applied.

In the days of Plato and Xenophôn, this allegorising interpretation was one of the received methods of softening down the obnoxious myths—though Plato himself treated it as an insufficient defence, seeing that the bulk of youthful hearers could not see through the allegory, but embraced the story literally as it was set forth<sup>1</sup>. Pausanias tells us, that when he first began to write his work, he treated many of the Greek legends as silly and undeserving of serious attention; but as he proceeded, he gradually arrived at the full conviction, that the ancient sages had designedly

The idea of an inferior sense and concealed purpose in the ancient poets occurs several times in Plato (*Theætet.* c. 23. p. 180); *κατὰ τὴν τῶν ἀρχαίων κατὰ τὴν αἰετὴν ἐκονομίαν τὴν πολλοῦ, &c.*; also *Protagor.* c. 23. p. 316.

spoken in enigmatical language, and that there was valuable truth wrapped up in their narratives: it was the duty of a pious man, therefore, to study and interpret, but not to reject, stories current and accredited respecting the gods<sup>1</sup>. And others,—arguing from the analogy of the religious mysteries, which could not be divulged without impiety to any except such as had been specially admitted and initiated,—maintained that it would be a profanation to reveal directly to the vulgar, the genuine scheme of nature and the divine administration: the ancient poets and philosophers had taken the only proper course, of talking to the many in types and parables, and reserving the naked truth for privileged and qualified intelligences<sup>2</sup>. The allegorical

<sup>1</sup> Pausan. viii. 8, 2. To the same purpose (Strabo l. p. 474) allegory is admitted to a certain extent in the fables by Dionys. Halic. Aut. Rom. li. 20. The fragment of the lost treatise of Plutarch, on the Platonic festival of the Diodala, is very instructive respecting Greek allegory (Fragm. is. t. 5, p. 754-763, ed. Wyt.; ap. Ransh. Propter Evang. iii. 1).

<sup>2</sup> This doctrine is set forth in Macrobius (l. 2). He distinguishes between *fabula*, and *fabulosæ sententiæ*: the former is fiction pure, intended either to amuse or to instruct—the latter is founded upon truth, either respecting human or respecting divine agency. The gods did not like to be publicly talked of (according to his view) except under the respectful veil of a fable (the same feeling as that of Herodotus, which led him to refrain from inserting the *ἱεροὶ λόγοι* in his history). The Supreme God, the *ῥέγυς*, the *εἰς πάντα αἶψα*, could not be talked of in fables; but the other gods, the ætheral or æthereal powers, and the soul, might be, and ought to be, talked of in that manner alone. Only superior intellects ought to be admitted to a knowledge of the secret reality. "*De his sententiis, et de animæ, non frustra se nec ut oblectent, sed fabulosæ sententiæ, et quæ sententias rationibus esse sententias oportet undeque expositionem sui: quæ sententias vulgariis mensuris hominum intellectum sui, ratio rerum tegmine operumque cultat; ita in prudentibus animis esse veritas per fabulosas tractari.... <sup>1</sup> According to the anonymous writer up. Westermann (*Script. Myth.* p. 328), every personal or deified god may be examined in three different ways: either *εποικωμικός* (historically, as having been a king or a man)—or *ψευδαῖος*, in which theory *Ἥērē* signifies the *god*; *Athēnē*, *providence*; *Aphroditē*, *desire*; *Zeus*, *will*, &c.—or *αναγκαστικός*, in which system *Ἀπόλλων* signifies the *sun*; *Περσεύς*, the *sea*; *Ἥērē*, the upper stratum of the air, or *ether*; *Athēnē*, the lower or *densest* stratum; *Zeus*, the upper hemisphere; *Kronos*, the lower, &c. This writer thinks that all the three principles of construction may be resorted to, each on its proper occasion, and that neither of them excludes the others. It will be seen that the first is pure Enneism; the two latter are modes of allegory.

The allegorical construction of the gods and of the divine myths is copiously applied in the treatises, both of Phrynichus and Sallustius, in Gale's collection of mythological writers. Sallustius treats the myths as of divine origin, and the chief poets as inspired (*θεοῖν ἑνεστί*): the gods were propitious to those who recounted worthy and creditable myths respecting them, and Sallustius prays that they will accept with favour his own remarks (cap. 3 and 4, pp. 245-251, Gale). He distributes myths into five classes: theological, physical, spiritual, material, and mixed. He defends the practice of speaking of the gods under the veil of allegory, much in the same way as Macrobius (in the preceding note): he finds, moreover, a good excuse even for those myths which imputed to the gods theft, adultery, outrages towards a father, and other enormities: such tales (he says) were eminently suitable, since the mind *must* at once see that the facts so told are *not* to be taken as being themselves the real truth, but simply as a veil disguising some interior truth (p. 247).

Besides the *Life of Homer* ascribed to Plutarch (see Gale, p. 325-337), *Hēraklēs* (not *Hēraklides* of Pontus) carries out the process of allegorizing the Homeric myths most earnestly and most systematically.

centuries after the Christian era, especially among the new Platonic philosophers; being both couge-

The application of the allegorizing theory is, in his view, the only way of rescuing Homer from the charge of scandalous impurity—*εὐεργετὶς γὰρ καὶ ἀσχημία, ἐλ' ἠμῶν ἡλληνισμοῖσι* (Héscue, in *loc. cit.* p. 497, Gale). He proves at length, that the destructive arrows of Apollo, in the first book of the *Iliad*, mean nothing at the bottom except a contagious plague, caused by the heat of the summer sun in marshy ground (pp. 416-424). Athénée, who darts down from Olympus at the moment when Achilles is about to draw his sword on Agamemnon, and seizes him by the hair, is a personification of repentant penitence (p. 435). The conspiracy against Zeus, which Hæmer (*Iliad*, i. 400) relates to have been formed by the Olympic gods, and defeated by the timely aid of Thetis and Briareus—the chains and suspension imposed upon Hère—the casting of Hèphæstos by Zeus out of Olympus, and his fall in Lémnos—the destruction of the Grecian wall by Poseidon, after the departure of the Greeks—the amorous scene between Zeus and Hère on Mount Gargæ—the distribution of the mirrors between Zeus, Poseidon and Hades—all these he resolves into peculiar manifestations and conflicts of the elemental substances in nature. To the much-dreaded battle of the gods he gives a turn partly physical, partly ethical (p. 451). In like manner he transforms and vindicates the adventures of the gods in the *Odyssey*: the wanderings of Odysseus, together with the Lotophagi, the Cyclopa, Circe, the Sirens, Scylla, Charybdis, &c., he resolves into a series of temptations, imposed as a trial upon a man of wisdom and virtue, and emblematic of human life (p. 426). The story of Arès, Aphrodité and Hèphæstos, in the eighth book of the *Odyssey*, seems to perplex him more than any other: he offers two explanations, neither of which seems satisfactory even to himself (p. 494).

An anonymous writer in the collection of Westermann (pp. 325-344) has discussed the wanderings of Odysseus upon the same ethical scheme of interpretation as Héracclides: he entitles his treatise "A short essay on the Wanderings of Odysseus in Homer, worked out in conjunction with ethical reflections, and rectifying what is rotten in the story, as well as may be, for the benefit of readers." (*εὐ πρὸς τοὺς ἀναγνῶντας διόρθωσις*.) The author resolves the adventures of Odysseus into narratives emblematic of different situations and trials of human life. Scylla and Charybdis, for example (c. 8. p. 338), represent, the one the seductions and temptations arising out of the body, the other those springing from the mind, between which man is called upon to steer. The adventure of Odysseus with Eolus shows how little good a virtuous man does to himself by seeking, in times of distress, aid from conjurers and evil enchanters; the assistance of such allies, however it may at first promise well, ultimately deceives the person who accepts it, and renders

nial to their orientalised turn of thought, and useful as a shield against the attacks of the Christians.

It was from the same strong necessity, of accommodating the old mythes to a new standard both of belief and of appreciation, that both the historical and the allegorical schemes of transforming them arose; the literal narrative being decomposed for the purpose of arriving at a base either of particular matter of fact, or of general physical or moral truth. Instructed men were commonly disposed to historicise only the heroic legends, and to allegorise more or less of the divine legends: the attempt of Eudæmerus to historicise the latter was for the most part denounced as irreligious, while that of Metrodorus to allegorise the former met with no success. In allegorising moreover even the divine legends, it was usual to apply the scheme of allegory only to the inferior gods, though some of the great Stoic philosophers carried it farther and allegorised all the separate personal gods, leaving only an all-per-

him worse off than he was before (c. 3, p. 332). By such illustrations does the author sustain his general position, that there is a great body of valuable ethical teaching wrapped up in the poetry of Homer.

Proclus is full of similar allegorisation, both of Homer and Hesiod: the third Excursus of Heyne ad *Iliad.* xxiii. (vol. viii. p. 563), *De Allegoriis Homericis*, contains a valuable summary of the general subject.

The treatise *De Astrologiâ* printed among the works of Lucian, contains specimens of astrological explanations applied to many of the *Grecum pœdon*, which the author as a plain man cannot accept in their literal meaning. "How does it consist with holiness (he asks) to believe that Eurus was son of Aphroditê, Minôs of Zeus, or Atalaphus of Mars? No! these were men born under the formable influences of the planets Venus, Jupiter, and Mars." He considers the principle of astrological explanation peculiarly fit to be applied to the mythes of Homer and Hesiod (*Lucian, De Astrologiâ*, r. 21-22).

vading cosmic Mind<sup>1</sup>, essential as a co-efficient along with Matter, yet not separable from Matter. But many pious pagans seem to have perceived that allegory pushed to this extent was fatal to all living religious faith<sup>2</sup>, inasmuch as it divested the gods of their character of Persons, sympathising with mankind and modifiable in their dispositions according to the conduct and prayers of the believer: and hence they permitted themselves to employ allegorical interpretation only to some of the obnoxious legends connected with the superior gods, leaving the personality of the latter unimpeached.

Limits to this interesting process.

One novelty however, introduced seemingly by the philosopher Empedoklēs and afterwards expanded by others, deserves notice, inasmuch as it modified considerably the old religious creed by drawing a pointed contrast between gods and demons,—a distinction hardly at all manifested in Homer, but recognised in the Works and Days of Hesiod<sup>3</sup>. Empedoklēs widened the gap between the two, and founded upon it important consequences. The gods were good, immortal and powerful agents, having volition and intelligence, but without ap-

petite, passion or infirmity: the *dæmons* were of a mixed nature between gods and men, ministers and interpreters from the former to the latter, but invested also with an agency and dispositions of their own. They were very long-lived, but not immortal, and subject to the passions and propensities of men, so that there were among them beneficent and maleficent *dæmons* with every shade of intermediate difference'. It had been the mistake (ac-

<sup>1</sup> The distinction between *θεοὶ* and *δαίμονες* is especially set forth in the treatise of Plutarch, *De Defectu Oraculorum*, cap. 10, 12, 13, 15, &c. He seems to suppose it inseparable to the doctrine of Zoroaster or the Orphic mysteries, and he represents it as relieving the philosopher from great perplexities: for it was difficult to know where to draw the line in admitting or rejecting divine Providence: errors were committed sometimes in affirming God to be the cause of everything, at other times in supposing him to be the cause of nothing. 'Ἐπεὶ τὸ δαίμονιον οὐκ ἀπορίῃ καὶ μὲν τι τῶν ἐν τῇ φύσει, καὶ ἐν τοῖς, οὐ μὲν οὐδὲν ἀπὸ τοῦ τοῦ θεοῦ, οἱ δὲ ἐμὲν τι πᾶσιν αἰτίαν ἀποδίδτε, ἀντορχαίον τοῦ μετρίου καὶ ἐκρίστοτος. Human sacrifices and other objectionable rites are excused, as necessary for the purpose of averting the anger of bad *dæmons* (c. 14-15).

Empedocles is represented as the first author of the doctrine which imputed vicious and abominable propensities to many of the *dæmons* (c. 15, 16, 17, 20), τοῖς εἰσπαρμένοις καὶ ἑκασθεσμένοις δαίμονι: expelled from heaven by the gods, ἐκλάττον ἐπὶ οὐρανῶν (Plutarch, *De Vitand. Aër. Allen.* p. 360): followed by Plato, Xenocrates and Chrysip-

according to these philosophers) of the old myths to ascribe to the gods proceedings really belonging to the demons, who were always the immediate communicants with mortal nature, inspiring prophetic power to the priestesses of the oracles, sending dreams and omens, and perpetually interfering either for good or for evil. The wicked and violent demons, having committed many enormities, had thus sometimes incurred punishment from the gods: besides which, their bad dispositions had imposed upon men the necessity of appeasing them by religious ceremonies of a kind acceptable to such beings; hence the human sacrifices, the violent, cruel, and obscene exhibitions, the wailings and fastings, the tearing and eating of raw flesh, which it had become customary to practise on various consecrated occasions, and especially in the Dionysiac solemnities. Moreover, the discreditable actions imputed to the gods,—the terrific combats, the Typhonic and Titanic convulsions, the rapes, abductions, flight, servitude, and concealment,—all these were really the doings and sufferings of bad demons, placed far below the sovereign agency—equable, undisturbed, and unpoiled—of the immor-

pus, c. 17: compare Plato (Apolog. Socrat. p. 27; Politic. p. 271; Symposium, s. 29, p. 203), though he seems to treat the *daimones* as defective and imitable beings, rather than actively maleficent. Xenocrates represents some of them both as wicked and powerful in a high degree. —*Ξενοκράτης καὶ τῶν ἡμερῶν τὰς ἀποφράσεις, καὶ τὰς ὑποτιθεῖσιν ἐκείναις τιμῶν ἢ κακῶν, ἢ κτηνῶν, ἢ ἀνθρώπων, ἢ ἀνδραγαθῶν ἔργων, καὶ τοῦ τελευτῆσαι αὐτοὺς ἡμετέρας ἐκείναις χρεῶσιν, ἀλλ' αἷμα φέροντα ἐκ τῆς πατρὸς αὐτοῦ μεγάλαι μὲν καὶ ἰσχυραί, ἐκτελέσαντες δὲ καὶ καθαρῶς, οἱ χαίροντες τοῖς γαστέροσι, καὶ τυχεύοντες ἐπὶ οὐδὲν ἄλλῳ χεῖρον ἐπιδέοντες* (Plutarch. De Isid. et Osir. c. 26, p. 361; Quæstion. Rom. p. 243); compare Stobæus, Eclog. Phys. I. p. 42.

tal gods. The action of such demons upon mankind was fitful and intermittent: they sometimes perished or changed their local abode, so that oracles which had once been inspired became after a time forsaken and disfranchised<sup>1</sup>.

This distinction between gods and demons appeared to save in a great degree both the truth of the old legends and the dignity of the gods: it obviated the necessity of pronouncing either that the gods were unworthy, or the legends untrue. Yet although devised for the purpose of satisfying a more scrupulous religious sensibility, it was found inconvenient afterwards when assailants arose against paganism generally. For while it abandoned as indefensible a large portion of what had once been genuine faith, it still retained the same word *dæmons* with an entirely altered signification. The Christian writers in their controversies found ample warrant among the *earlier* pagan authors<sup>2</sup> for treating all the gods as *dæmons*—and not less ample

<sup>2</sup> A destructive inundation took place at Phoenicia in Arcadia, according to the time of Plutarch: the subterranean outlet (*ἐκπόρευσις*) of the river had become blocked up, and the inhabitants ascribed the stoppage to the anger of Apollo, who had been provoked by the stealing of the Pythian tripod by Hēraklēs: the latter had carried the tripod to Phoenia and deposited it there. "Ἀπὸ οὗ αἰὶς ἀνθρώπων νόσος ἔσται Ἀρκαδίας, ἡ φερύσσεια ἐκείληται τῷ ἑσπέρῳ, ἐμφυγὴς δὲ Πυθίῳ, καὶ κατακλύσσει τὴν χώραν ἀνθρώπων νόσος, ὅτι ἀπὸ χιθίνου ἔρκει, ἢ φωνῆ, ἢ Ἑρμῆος ἀναρπάξας τὴν τρίποδα τῆς πυθίης αἰς φωνίαν ἀνέσχετο;" (Plutarch, de Ser. Numin. Vindictā, p. 567: compare Pausan. viii. 14, 1). The expression of Plutarch, that the abduction of the tripod by Hēraklēs had taken place 1000 years before, is that of the critic, who thinks it needful to historicise and chronologise the genuine legend: which, to an inhabitant of Phoenia at the time of the inundation, was doubtless as little questioned as if the theft of Hēraklēs had been laid in the preceding generation.

Agathoelēs of Syracuse committed depredations on the coasts of Ithaca and Kerkira: the excuse which he offered was, that Odysseus had come to Sicily and killed Polyphēmos, and that on his return he had been kindly received by the Phœnicians (Plutarch, *ib.*).

This is doubtless a jest, either made by Agathoelēs, or more probably launched for him, but it is founded upon a popular belief.

they became rather subjects of respectful and curious analysis—all agreeing that the Word as tendered to them was inadmissible, yet all equally convinced that it contained important meaning, though hidden yet not undiscoverable. A very large proportion of the force of Grecian intellect was engaged in searching after this unknown base, by guesses, in which sometimes the principle of semi-historical interpretation was assumed, sometimes that of allegorical, without any collateral evidence in either case, and without possibility of verification. Out of the one assumption grew a string of allegorised phenomenal truths, out of the other a long series of seeming historical events and chronological persons,—both elicited from the transformed myths and from nothing else'.

Semi-historical interpretation.

The utmost which we accomplish by means of the semi-historical theory even in its most successful applications, is, that after leaving out from the

Compare Lucian, *Zeus Tragicus*, c. 20, and *De Luctu*, c. 2; Dausa *Palæstr.* A. R. ii. p. 50, Syll.

Kallimachus (*Hymn. ad Jov.* 9) distinctly denied the statement of the Kretans that they possessed in Krète the tomb of Zeus, and treated it as an instance of Kretan mendacity; 'while Celus did not deny it, but explained it in some figurative manner—*ἀνεπίσημος ἐπὶ τοῖς ἀνθρώποις* (Origen. *cont. Celsum*, iii. p. 137).

<sup>1</sup> There is here a change as compared with my first edition; I had inserted here some remarks on the allegorical theory of interpretation as compared with the semi-historical. An able article on my work (in the *Edinburgh Review*, October 1846), pointed out that those remarks required modification, and that the idea of allegory in reference to the construction of the myths was altogether inadmissible.

mythical narrative all that is miraculous or high-coloured or extravagant, we arrive at a series of credible incidents—incidents which *may, perhaps*, have really occurred, and against which no intrinsic presumption can be raised. This is exactly the character of a well-written modern novel (as, for example, several among the compositions of Defoe), the whole story of which is such as may well have occurred in real life: it is plausible fiction and nothing beyond. To raise plausible fiction up to the superior dignity of truth, some positive testimony or positive ground of inference must be shown; even the highest measure of intrinsic probability is not alone sufficient. A man who tells us that on the day of the battle of Plataea, rain fell on the spot of ground where the city of New York now stands, will neither deserve nor obtain credit, because he can have had no means of positive knowledge; though the statement is not in the slightest degree improbable. On the other hand, statements in themselves very improbable may well deserve belief, provided they be supported by sufficient positive evidence; thus the causal dog by order of Xerxés across the promontory of Mount Athos, and the sailing of the Persian fleet through it, is a fact which I believe, because it is well attested—notwithstanding its remarkable improbability, which so far misled Juvenal as to induce him to single out the narrative as a glaring example of Grecian mendacity<sup>1</sup>. Again, many critics

<sup>1</sup> Juvenal, Sat. x. 174:—

“*Cavalitur oñum*

*Velificatus Athos, et quantum Græci mendaces*

*Auget in historiâ,” &c.*

have observed that the general tale of the Trojan war (apart from the superhuman agencies) is not more improbable than that of the crusades, which every one admits to be an historical fact. But (even if we grant this position, which is only true to a small extent,) it is not sufficient to show an analogy between the two cases in respect to negative presumptions alone; the analogy ought to be shown to hold between them in respect to positive certificate also. The crusades are a curious phenomenon in history, but we accept them nevertheless as an unquestionable fact, because the antecedent improbability is surmounted by adequate contemporary testimony. When the like testimony, both in amount and kind, is produced to establish the historical reality of the Trojan war, we shall not hesitate to deal with the two events on the same footing.

Some positive certificate indispensable as a constituent of historical proof—mere popular faith insufficient.

In applying the semi-historical theory to Grecian mythical narrative, it has been often forgotten that a certain strength of testimony, or positive ground of belief, must first be tendered, before we can be called upon to discuss the antecedent probability or improbability of the incidents alleged. The belief of the Greeks themselves, without the smallest aid of special or contemporary witnesses, has been tacitly assumed as sufficient to support the case, provided only sufficient deduction be made from the mythical narratives to remove all antecedent improbabilities. It has been taken for granted that the faith of the people must have rested originally upon some particular historical event, involving the identical persons, things and places which the original myths

exhibit, or at least the most prominent among them. But when we examine the psychagogic influences predominant in the society among whom this belief originally grew up, we shall see that their belief is of little or no evidentiary value, and that the growth and diffusion of it may be satisfactorily explained without supposing any special basis of matters of fact. The popular faith, so far as it counts for anything, testifies in favour of the entire and literal mythes, which are now universally rejected as incredible<sup>1</sup>. We have thus the very minimum of

<sup>1</sup> Colonel Sleeman observes respecting the Hindoo historical mind—“History to this people is all a fairy tale” (*Annals and Recollections of an Indian Official*, vol. I. ch. 12. p. 70). And again, “The popular poem of the Ramayana describes the abduction of the heroine by the monster king of Ceylon, Ravana; and her recovery by means of the monkey general Hanuman. Every word of this poem the people assured me was written, if not by the hand of the Deity himself, at least by his inspiration, which was the same thing—and it must consequently be true. Ninety-nine out of a hundred, among the Hindoos, implicitly believe, not only every word of the poem, but every word of every poem that has ever been written in Sanscrit. If you ask a man whether he really believes any very egregious absurdity quoted from these books, he replies with the greatest calmness in the world, Is it not written in the book, and how should it be there written, if not true? The Hindoo religion requires upon an entire prostration of mind,—that continual and habitual surrender of the reasoning faculties, which we are accustomed to make occasionally, while engaged at the theatre, or in the perusal of works of fiction. We allow the scenes, characters, and incidents, to pass before our mind’s eye, and move our feelings—without stopping a moment to ask whether they are real or true. There is only this difference—that with people of education among us, even in such short intervals of illusion or charade, any extravagance in the acting, or flagrant improbability in the fiction, destroys the charm, breaks the spell by which we have been so mysteriously bound, and restores us to reason and the realities of ordinary life. With the Hindoos, on the contrary, the greater the improbability, the more monstrous and preposterous the fiction—the greater is the charm it has over their minds; and the greater their learning in the Sanscrit, the more are they under the influence of this charm. Believing all to be written by the Deity, or under his inspirations, and the men and things of former

positive proof, and the maximum of negative presumption: we may diminish the latter by conjectural omissions and interpolations, but we cannot by any artifice increase the former: the narrative ceases to be incredible, but it still remains uncertified,—a mere common-place possibility. Nor is fiction always, or essentially, extravagant and incredible. It is often not only plausible and coherent; but even more like truth (if a paradoxical phrase may be allowed) than truth itself. Nor can we, in the absence of any extrinsic test, reckon upon any intrinsic mark to discriminate the one from the other<sup>1</sup>.

days to have been very different from men and things of the present day, and the heroes of these fables to have been demigods, or people endowed with powers far superior to those of the ordinary men of their own day—the analogies of nature are never for a moment considered; nor do questions of probability, or possibility, according to those analogies, ever intrude to dispel the charm with which they are so pleasantly bound. They go on through life reading and talking of these monstrous fictions, which shock the taste and understanding of other nations, without ever questioning the truth of one single incident, or hearing it questioned. There was a time, and that not far distant, when it was the same in England, and in every other European nation; and there are, I am afraid, some parts of Europe where it is so still. But the Hindoo faith, so far as religious questions are concerned, is not more capacious or absurd than that of the Greeks or Romans in the days of Socrates or Cæsar: the only difference is, that among the Hindoos a greater number of the questions which interest mankind are brought under the head of religion." (Bosworth, *Ramuldes*, &c., vol. i. ch. xvi. p. 227; compare vol. ii. ch. v. p. 61; viii. p. 27.)

<sup>1</sup> Lord Lyttelton, in commenting on the tales of the Irish bards, in his *History of Henry II.*, has the following just remarks (book iv. vol. iii. p. 13, quarto): "One may reasonably suppose that in MSS. written since the Irish received the Roman letters from St. Patrick, some traditional truths recorded before by the bards in their sacred poems may have been preserved to our times. Yet these cannot be so separated from many fabulous stories derived from the same sources, as to obtain a firm credit; it not being sufficient to establish the authority of unsuspicious traditions, that they can be shown not to be so improbable

In the semi-historical theory respecting Grecian mythical narrative, the critic unconsciously transports into the Homeric age those habits of classification and distinction, and that standard of acceptance or rejection, which he finds current in his own. Amongst us the distinction between historical fact and fiction is highly valued as well as familiarly understood: we have a long history of the past, deduced from a study of contemporary evidences; and we have a body of fictitious literature, stamped with its own mark and interesting in its own way. Speaking generally, no man could now hope to succeed permanently in transferring any striking incident from the latter category into the former, nor could any man deliberately attempt it without incurring well-merited obloquy. But this *historical sense*, now so deeply rooted in the modern mind that we find a difficulty in conceiving any people to be without it, is the fruit of records and inquiries, first applied to the present, and then preserved and studied by subsequent generations;

Mistake of ascribing to an unrecording age the historical sense of modern times.

or almost as others with which they are mixed—since there may be specious as well as senseless fictions. Nor can a poet or bard, who lived in the sixth or seventh century after Christ, if his poem is still extant, be any voucher for facts supposed to have happened before the incarnation; though his evidences (allowing for poetical licence) may be received on such matters as came within his own time, or the remembrance of old men with whom he conversed. The most judicious historians pay no regard to the Welsh or British traditions delivered by Geoffrey of Monmouth, though it is not impossible but that some of these may be true."

One definition of a myth given by Plutarch coincides exactly with a specious fiction: "Ἐστὶ μῦθος εἰς αὐτὸν λόγος ποικίλος ἐνὸς ἀποφύτου" (Plutarch, *De Iside et Osiride*, c. 348).

"Der Grund-Trieb des Mythos (Gemeinlichst ausgesprochen) das Gedachte in ein Geschickliches umzusetzen." (Symbolik der Alten Welt, iiii. 43, p. 29.)

while in a society which has not yet formed the habit of recording its present, the real facts of the past can never be known; the difference between attested matter of fact and plausible fiction—between truth and that which is like truth—can neither be discerned nor sought for. Yet it is precisely upon the supposition that this distinction is present to men's habitual thoughts, that the semi-historical theory of the mythos is grounded.

Matter of  
tradition  
uncertified  
from the  
beginning.

It is perfectly true, as has often been stated, that the Grecian epic contains what are called traditions respecting the past—the larger portion of it indeed consists of nothing else. But what are these traditions? They are the matter of those songs and stories which have acquired hold on the public mind; they are the creations of the poets and storytellers themselves, each of whom finds some pre-existing, and adds others of his own, new and previously untold, under the impulse and authority of the inspiring Muse. Homer doubtless found many songs and stories current with respect to the siege of Troy; he received and transmitted some of these traditions, re-cast and transformed others, and enlarged the whole mass by new creations of his own. To the subsequent poets, such as Arktinos and Leschês, these Homeric creations formed portions of pre-existing tradition, with which they dealt in the same manner; so that the whole mass of traditions constituting the tale of Troy became larger and larger with each successive contributor. To assume a generic difference between the older and the newer strata of tradition—to treat the former as morsels of history, and the

latter as appendages of fiction—is an hypothesis gratuitous at the least, not to say inadmissible. For the farther we travel back into the past, the more do we recede from the clear day of positive history, and the deeper do we plunge into the unsteady twilight and gorgeous clouds of fancy and feeling. It was one of the agreeable dreams of the Grecian epic, that the man who travelled far enough northward beyond the Rhipæan mountains, would in time reach the delicious country and genial climate of the virtuous Hyperboreans—the votaries and favourites of Apollo, who dwelt in the extreme north beyond the chilling blasts of Boreas. Now the hope that we may, by carrying our researches up the stream of time, exhaust the limits of fiction, and land ultimately upon some points of solid truth, appears to me no less illusory than this northward journey in quest of the Hyperborean elysium.

The general disposition to adopt the semi-historical theory as to the genesis of Grecian myths, arises in part from reluctance in critics to impute to the mythopœic ages extreme credulity or fraud; together with the usual presumption, that where much is believed some portion of it must be true. There would be some weight in these grounds of reasoning, if the ages under discussion had been supplied with records and accustomed to critical inquiry. But amongst a people unprovided with the former and strangers to the latter, credulity is naturally at its maximum, as well in the narrator himself as in his hearers: the idea of deliberate fraud is moreover inapplicable<sup>1</sup>, for if the hearers are disposed to ac-

Fictional matter of tradition does not imply fraud or imposture.

<sup>1</sup> In reference to the loose statements of the Highlanders, Dr. John-

cept what is related to them as a revelation from the Muse, the *æstus* of composition is quite sufficient to impart a similar persuasion to the poet whose mind is penetrated with it. The belief of that day can hardly be said to stand apart by itself as an act of reason. It becomes confounded with vivacious imagination and earnest emotion; and in every case where these mental excitabilities are powerfully acted upon, faith ensues unconsciously and as a matter of course. How active and prominent such tendencies were among the early Greeks, the extraordinary beauty and originality of their epic poetry may teach us.

It is, besides, a presumption far too largely and indiscriminately applied, even in our own advanced age, that where much is believed, something must necessarily be true—that accredited fiction is always traceable to some basis of historical truth<sup>1</sup>. The influence of imagination and feeling is not con-

son observers—"He that goes into the Highlands with a mind naturally susceptible, and a credulity eager for wonders, may perhaps come back with an opinion very different from mine; for the inhabitants, knowing the ignorance of all strangers in their language and antiquities, are perhaps not very scrupulous adherents to truth; yet I do not say that they deliberately speak studied falsehood, or have a settled purpose to deceive. They have acquired and considered little, and do not always feel their own ignorance. They are not much accustomed to be interrogated by others, and seem never to have thought of interrogating themselves; so that if they do not know what they tell to be true, they likewise do not distinctly perceive it to be false. Mr. Howell was very diligent in his inquiries, and the result of his investigations was, that the answer to the second question was commonly such as nullified the answer to the first." (*Journey to the Western Islands*, p. 272, 1st edit. 1775.)

fined simply to the process of retouching, transforming, or magnifying narratives originally founded on fact; it will often create new narratives of its own, without any such preliminary basis. Where there is any general body of sentiment pervading men living in society, whether it be religious or political—love, admiration or antipathy—all incidents tending to illustrate that sentiment are eagerly welcomed, rapidly circulated and (as a general rule) easily accredited. If real incidents are not at hand, impressive fictions will be provided to satisfy the demand. The perfect harmony of such fictions with the prevalent feeling stands in the place of certifying testimony, and causes men to hear them not merely with credence, but even with delight: to call them in question and require proof, is a task which cannot be undertaken without incurring obloquy. Of such tendencies in the human mind abundant evidence is furnished by the innumerable religious legends which have acquired currency in various parts of the world, and of which no country was more fertile than Greece—legends which derived their origin, not from special facts misreported and exaggerated, but from pious feelings pervading the society, and translated into narrative by forward and imaginative minds—legends, in which not merely the incidents, but often even the personages are unreal, yet in which the generating sentiment is conspicuously discernible, providing its own matter as well as its own form. Other sentiments also, as well as the religious, provided they be fervent and widely diffused, will find expression in current narrative, and become por-

tions of the general public belief—every celebrated and notorious character is the source of a thousand fictions exemplifying his peculiarities. And if it be true, as I think present observation may show us, that such creative agencies are even now visible and effective, when the materials of genuine history are copious and critically studied—much more are we warranted in concluding that in ages destitute of records, strangers to historical testimony, and full of belief in divine inspiration both as to the future and as to the past, narratives purely fictitious will acquire ready and uninquiring credence, provided only they be plausible and in harmony with the preconceptions of the auditors.

*Allegorical theory of the myths—traced by some up to an ancient priestly caste.*

The allegorical interpretation of the myths has been by several learned investigators, especially by Creuzer, connected with the hypothesis of an ancient and highly instructed body of priests, having their origin either in Egypt or in the East, and communicating to the rude and barbarous Greeks religious, physical and historical knowledge under the veil of symbols. At a time (we are told) when language was yet in its infancy, visible symbols were the most vivid means of acting upon the minds of ignorant hearers: the next step was to pass to symbolical language and expressions—for a plain and literal exposition, even if understood at all, would at least have been listened to with indifference, as not corresponding with any mental demand. In such allegorising way, then, the early priests set forth their doctrines respecting God, nature and humanity—a refined monotheism and a theological philosophy—and to this purpose the

earliest mythes were turned. But another class of mythes, more popular and more captivating, grew up under the hands of the poets—mythes purely epical, and descriptive of real or supposed past events. The allegorical mythes, being taken up by the poets, insensibly became confounded in the same category with the purely narrative mythes—the matter symbolised was no longer thought of, while the symbolising words came to be construed in their own literal meaning—and the basis of the early allegory, thus lost among the general public, was only preserved as a secret among various religious fraternities, composed of members allied together by initiation in certain mystical ceremonies, and administered by hereditary families of presiding priests. In the Orphic and Bacchic sects, in the Eleusinian and Samothracian mysteries, was thus treasured up the secret doctrine of the old theological and philosophical mythes, which had once constituted the primitive legendary stock of Greece, in the hands of the original priesthood and in ages anterior to Homer. Persons who had gone through the preliminary ceremonies of initiation, were permitted at length to hear, though under strict obligation of secrecy, this ancient religious and cosmogonic doctrine, revealing the destination of man and the certainty of posthumous rewards and punishments—all disengaged from the corruptions of poets, as well as from the symbols and allegories under which they still remained buried in the eyes of the vulgar. The mysteries of Greece were thus traced up to the earliest ages, and represented as the only faithful depository channels of that purer

theology and physics which had originally been communicated, though under the unavoidable inconvenience of a symbolical expression, by an enlightened priesthood coming from abroad to the then rude barbarians of the country<sup>1</sup>.

<sup>1</sup> For this general character of the Grecian mysteries with their concealed treasure of doctrine, see Warburton, *Divine Legation of Moses*, book ii. sect. 4.

*Saint Croix*, *Recherches sur les Mystères du Paganisme*, sect. 3, p. 106; sect. 4, p. 404, &c.

*Crozer*, *Symbolik und Mythologie der Alten Völker*, sect. 2, 3, 23, 33, 42, &c. *Möners* and *Haeren* adopt generally the same view, though there are many divergences of opinion between these different authors, on a subject essentially obscure. Warburton maintained that the interior doctrine communicated in the mysteries was the existence of our Supreme Deity, combined with the Farmeristic creed, that the pagan gods had been mere men.

See *Clement Alex. Strom.* v. p. 582, Sylb.

The view taken by Hermann of the ancient Grecian mythology is in many points similar to that of Crozer, though with some considerable difference. He thinks that it is an aggregate of doctrine—philosophical, theological, physical, and moral—expressed under a scheme of systematic personifications, each person being called by a name significant of the function personified; this doctrine was imported from the East into Greece, where the poets, retaining or translating the names, but forgetting their meaning and connection, distorted the primitive stories, the sense of which came to be retained only in the ancient mysteries. That sense however (he thinks) may be recovered by a careful analysis of the significant names; and his two dissertations (*De Mythologiæ Græcorum Antiquissimâ*, in the *Opuscula*, vol. ii.) exhibit a specimen of this systematic expansion of etymology into narrative. The dissent from Crozer is set forth in their published correspondence, especially in his concluding “*Brief an Crozer über das Wesen und die Behandlung der Mythologie*,” Leipzig, 1812. The following citation from his Latin dissertation sets forth his general doctrine:—

Hermann, *De Mythologiæ Græcorum Antiquissimâ* p. 4 (*Opuscula*, vol. ii. p. 171):—“*Videntur rerum divinarum humanarumque sanctarum ex Asia per Lyciam migrantem in Europam; videntur foliabant poetas peregrinam doctrinam, monstris homines amicis esse certare, esse nondum indutam, quæ de integro Græcæ specie procedentes; videntur poetas illos, quædam omnia verè nomina nominibus—ab arte, quæ*

But this theory, though advocated by several learned men, has been shown to be unsupported and erroneous. It implies a mistaken view both of the antiquity and the purport of the mysteries, which cannot be safely carried up even to the age of Hesiod, and which, though imposing and venerable

Hermann thinks, however, that by pursuing the suggestions of etymology, vestiges may still be discovered, and something like a history compiled, of Grecian belief as it stood anterior to Homer and Hesiod:—“est autem in hac omni ratione pulchro maxime opus, quò non tantum res agitur, sed ad interpretandū adertium omnia revocanda sunt” (p. 172). To the same general purpose the French work of M. Boudry David, *Recherches sur le Dieu Jupiter*—reviewed by D. Müller: see the *Klein. Schriften* of the latter, vol. ii. p. 82.

Mr. Bryant has also employed a profusion of learning, and numerous etymological conjectures, to resolve the Greek myths into mistakes, perversions, and mutilations, of the legends and doctrines of oriental tribes long-lost and by-gone—Ammonians, Cuthites, Arkites, &c. “It was Noah (he thinks) who was represented under the different names of Thoos, Hermès, Mênès, Osiris, Zensh, Atlas, Phœbæus, Prométhée, to which list a farther number of great extent might be added: the Neph of Anaxagoras was in reality the patriarch Noah” (*Ant. Mythol.* vol. ii. p. 253, 272). “The Cuthites or Ammonians, descendants of Noah, settled in Greece from the east, celebrated for their skill in building and the arts” (*ib.* i. p. 202; ii. p. 187). “The greatest part of the Grecian theology arose from misconception and blunders, the stories concerning their gods and heroes were founded on terms misinterpreted or abused” (*ib.* i. p. 452). “The number of different actions ascribed to the various Grecian gods or heroes all relate to one people or family, and are at bottom one and the same history” (*ib.* ii. p. 57). “The fables of Prométhéeus and Tityus were taken from ancient Ammonian temples, from hieroglyphs misunderstood and badly explained” (i. p. 423): see especially vol. ii. p. 160.

Supposed

mystery is  
really a  
modern in-  
terpretation.

The doctrine, supposed to have been originally symbolised and subsequently overclouded, in the Greek mythos, was in reality first intruded into them by the unconscious fancies of later interpreters. It was one of the various roads which instructed men took to escape from the literal admission of the ancient mythos, and to arrive at some new form of belief, more consonant with their ideas of what the attributes and character of the gods ought to be. It was one of the ways of constituting, by help of the mysteries, a philosophical religion apart from the general public, and of connecting that distinction with the earliest periods of Grecian society. Such a distinction was both avowed and justified among the superior men of the later Pagan world. Varro and Scævola distributed theology into three distinct departments,—the mythical or fabulous, the civil, and the phy-

world.

<sup>1</sup> The *Anti-Symbolik* of Voss, and still more the *Aglaophamus* of Litzsch, are full of instruction on the subject of this supposed interior doctrine, and on the ancient mysteries in general: the latter treatise especially is not less distinguished for its judicious and circumspet criticism than for its copious learning.

Mr. Haller (Preface to the *German Code of Laws*, p. xlii.-xlv.) has good observations on the vanity of all attempts to allegorise the Hindu mythology: he observes, with perfect truth, "The vulgar and illiterate have always understood the mythology of their country in its literal sense; and there was a time to every nation, when the highest rank in it was equally vulgar and illiterate with the lowest.....A Hindu esteems the astonishing miracles attributed to a Hindu, or a Kshatriya, as facts of the most indubitable authenticity, and the relation of them as most strictly historical."

sical. The first had its place in the theatre, and was left without any interference to the poets; the second belonged to the city or political community as such,—it comprised the regulation of all the public worship and religious rites, and was consigned altogether to the direction of the magistrate; the third was the privilege of philosophers, but was reserved altogether for private discussion in the schools apart from the general public<sup>1</sup>. As a member of the city, the philosopher sympathised with the audience in the theatre, and took a devout share in the established ceremonies, nor was he justified in trying what he heard in the one or saw in the other by his own ethical standard. But in the private assemblies of instructed or inquisitive men, he enjoyed the fullest liberty of canvassing every received tenet, and of broaching his own theories unreservedly, respecting the existence and nature of the gods. By these discussions the activity of the philosophical mind was main-

tained and truth elicited ; but it was such truth as the body of the people ought not to hear, lest their faith in their own established religious worship should be overthrown. In thus distinguishing the civil theology from the fabulous, Varro was enabled to cast upon the poets all the blame of the objectionable points in the popular theology, and to avoid the necessity of pronouncing censure on the magistrates, who (he contended) had made as good a compromise with the settled prejudices of the public as the case permitted.

The same conflicting sentiments which led the philosophers to decompose the divine mythes into allegory, impelled the historians to melt down the heroic mythes into something like continuous political history, with a long series of chronology culminated upon the heroic pedigrees. The one process as well as the other was interpretative guesswork, proceeding upon unauthorised assumptions, and without any verifying test or evidence : while it frittered away the characteristic beauty of the mythes into something essentially anti-mythical, it sought to arrive both at history and philosophy by impracticable roads. That the superior men of antiquity should have striven hard to save the dignity of legends which constituted the charm of their literature as well as the substance of the popular religion, we cannot be at all surprised ; but it is gratifying to find Plato discussing the subject in a more philosophical spirit. The Platonic Sokratēs being asked whether he believed the current Attic fable respecting the abduction of Oreithyia (daughter of Erechtheus) by Boreas, replies, in substance,—“ It

would not be strange if I disbelieved it, as the clever men do ; I might then show my cleverness by saying that a gust of Boreas blew her down from the rocks above while she was at play, and that having been killed in this manner she was reported to have been carried off by Boreas. Such speculations are amusing enough, but they belong to men ingenious and busy-minded over-much, and not greatly to be envied, if it be only for this reason, *that after having set right one fable, they are under the necessity of applying the same process to a host of others*—Hippocentaurs, Chimæras, Gorgons, Pegasus, and numberless other monsters and incredibilities. A man, who, disbelieving these stories, shall try to find a probable basis for each of them, will display an ill-placed acuteness and take upon himself an endless burden, for which I at least have no leisure : accordingly I forego such researches, and believe in the current version of the stories<sup>1</sup>.

These remarks of Plato are valuable, not simply because they point out the uselessness of digging

for a supposed basis of truth in the mythes, but because they at the same time suggest the true reason for mistrusting all such tentatives. The mythes form a class apart, abundant as well as peculiar: to remove any individual mythe from its own class into that of history or philosophy, by simple conjecture and without any collateral evidence, is of no advantage, unless you can perform a similar process on the remainder. If the process be trustworthy, it ought to be applied to all; and *e converso*, if it be not applicable to all, it is not trustworthy as applied to any one specially: always assuming no special evidence to be accessible. To detach any individual mythe from the class to which it belongs, is to present it in an erroneous point of view: we have no choice except to admit them as they stand, by putting ourselves approximatively into the frame of mind of those for whom they were destined and to whom they appeared worthy of credit.

Treatment  
and use of  
the mythes  
according  
to Plato.

If Plato thus discountenances all attempts to transform the mythes by interpretation into history or philosophy, indirectly recognising the generic difference between them—we find substantially the same view pervading the elaborate precepts in his treatise on the Republic. He there regards the mythes, not as embodying either matter of fact or philosophical principle, but as portions of religious and patriotic faith, and instruments of ethical tuition. Instead of allowing the poets to frame them according to the impulses of their own genius and with a view to immediate popularity, he directs the legislator to provide types of his own for the characters of the gods and heroes, and to suppress all such di-

vine and heroic legends as are not in harmony with these pre-established canons. In the Platonic system, the mythes are not to be matters of history, nor yet of spontaneous or casual fiction, but of prescribed faith: he supposes that the people will believe, as a thing of course, what the poets circulate, and he therefore directs that the latter shall circulate nothing which does not tend to ennoble and improve the feelings. He conceives the mythes as stories composed to illustrate the general sentiments of the poets and the community, respecting the character and attributes of the gods and heroes, or respecting the social relations, and ethical duties, as well as motives of mankind: hence the obligation upon the legislator to prescribe beforehand the types of character which shall be illustrated, and to restrain the poets from following out any opposing fancies: "Let us neither believe ourselves (he exclaims), nor permit any one to circulate, that Theseus son of Poseidôn and Peirithôus son of Zeus, or any other hero or son of a god, could ever have brought themselves to commit abductions or other enormities such as are now falsely ascribed to them. We must compel the poets to say, either that such persons were not the sons of gods, or that they were not the perpetrators of such misdeeds<sup>1</sup>."

Most of the mythes which the youth hear and repeat (according to Plato) are false, but some of them are true: the great and prominent mythes

which appear in Homer and Hesiod are no less fictions than the rest. But fiction constitutes one of the indispensable instruments of mental training as well as truth; only the legislator must take care that the fiction so employed shall be beneficent and not mischievous<sup>1</sup>. As the mischievous fictions (he says) take their rise from wrong preconceptions respecting the character of the gods and heroes, so the way to correct them is to enforce, by authorised compositions, the adoption of a more correct standard<sup>2</sup>.

The comments which Plato has delivered with so much force in his Republic, and the enactments which he deduces from them, are in the main an

The same train of thought, and the process formulated upon it, are followed up through chap. 17, 18, and 19; compare De Legg. xii. p. 941.

Instead of recognising the popular or dramatic theology as something distinct from the civil (as Varro did), Plato suppresses the former as a separate department and merges it in the latter.

expansion of that sentiment of condemnation, which he shared with so many other philosophers, towards a large portion of the Homeric and Hesiodic stories<sup>1</sup>. But the manner in which he has set forth this opinion unfolds to us more clearly the real character of the mythical narratives. They are creations of the productive minds in the community, deduced from the supposed attributes of the gods and heroes: so Plato views them, and in such character he proposes to amend them. The legislator would cause to be prepared a better and truer picture of the foretime, because he would start from truer (that is to say, more creditable) conceptions of the gods and heroes. For Plato rejects the mythes respecting Zeus and Hérè, or Thèseus and Peirithòus, not from any want of evidence, but because they are unworthy of gods and heroes: he proposes to call forth new mythes, which, though he admits them at the outset to be fiction, he knows will soon be received as true, and supply more valuable lessons of conduct.

He deals with the mythes as expressions of feeling and imagination —

We may consider then that Plato disapproves of the attempt to identify the old mythes either with exaggerated history or with disguised philosophy. He shares in the current faith, without any suspicion or criticism, as to Orpheus, Palamédès, Dædalus, Amphion, Thèseus, Achilles, Cheirôn, and

<sup>1</sup> The censure which Xenophanes pronounced upon the Homeric legends has already been noticed: Herakleitos (*Diogen. Laert. ii. 1*) and Metrodorus, the companion and follower of Epicurus, were not less profuse in their invectives, *de γροσμίαις κοσμήταις τῶν ποιητῶν ἀλλοτρίοις* (Plutarch, *Non posse suaviter vivi secundum Epicurum*, p. 1036). He even advised persons not to be ashamed to confess their utter ignorance of Homer, to the extent of not knowing whether Hecleus was a Greek or a Trojan (Plut. *ib.* p. 109f).

other mythical personages<sup>1</sup>; but what chiefly fills his mind is, the inherited sentiment of deep reverence for these superhuman characters and for the age to which they belonged,—a sentiment sufficiently strong to render him not only an unbeliever in such legends as conflict with it, but also a deliberate creator of new legends for the purpose of expanding and gratifying it. The more we examine this sentiment, both in the mind of Plato as well as in that of the Greeks generally, the more shall we be convinced that it formed essentially and inseparably a portion of Hellenic religious faith. The mythos both presupposes, and springs out of, a settled basis and a strong expansive force of religious, social, and patriotic feeling, operating upon a past which is little better than a blank as to positive knowledge. It resembles history, in so far as its form is narrative; it resembles philosophy, in so far as it is occasionally illustrative; but in its essence and substance, in the mental tendencies by which it is created as well as in those by which it is judged and upheld, it is a popularised expression of the divine and heroic faith of the people.

Grecian antiquity cannot be at all understood except in connection with Grecian religion. It begins with gods and it ends with historical men, the former being recognised not simply as gods, but as primitive ancestors, and connected with the latter by a long mythical genealogy, partly heroic and partly human. Now the whole value of such genealogies arises from their being taken entire: the god or hero at the top is in point of fact the most

important member of the whole<sup>1</sup>; for the length and continuity of the series arises from anxiety on the part of historical men to join themselves by a thread of descent with the being whom they worshiped in their gentile sacrifices. Without the ancestral god, the whole pedigree would have become not only acephalous, but worthless and uninteresting. The pride of the Herakleids, Asklepiads, Æakids, Neleids, Dædalids, &c. was attached to the primitive eponymous hero and to the god from whom they sprung, not to the line of names, generally long and barren, through which the divine or heroic dignity gradually dwindled down into common manhood. Indeed the length of the genealogy (as I have before remarked) was an evidence of the humility of the historical man, which led him to place himself at a respectful distance from the gods or heroes; for Hekataeus of Milætus, who ranked himself as the fifteenth descendant of a god, might perhaps have accounted it an overweening impiety in any living man to claim a god for his immediate father.

Greek antiquity essentially a religious conception.

The whole chronology of Greece, anterior to 776 a.c., consists of calculations founded upon these mythical genealogies, especially upon that of the Spartan kings and their descent from Héraklēs, —thirty years being commonly taken as the equivalent of a generation, or about three generations to a century. This process of compulation was alto-

Application of chronological calculation discloses it of this character.

<sup>1</sup> For a description of similar tendencies in the Asiatic religions, see *Movers, Die Phönizier*, ch. v. p. 153 (Bonn, 1841): he points out the same phenomena as in the Greek,—confluence between the ideas of ancestry and worship,—confusion between gods and men in the past,—increasing tendency to Euhemerism (p. 156–157).

gether illusory, as applying historical and chronological conditions to a case on which they had no bearing. Though the domain of history was seemingly enlarged, the religious element was tacitly set aside: when the heroes and gods were chronologised, they became insensibly approximated to the limits of humanity, and the process indirectly gave encouragement to the theory of Euëmerus. Personages originally legendary and poetical were erected into definite landmarks for measuring the duration of the foretime, thus gaining in respect to historical distinctness, but not without loss on the score of religious association. Both Euëmerus and the subsequent Christian writers, who denied the original and inherent divinity of the pagan gods, had a great advantage in carrying their chronological researches strictly and consistently upwards—for all chronology fails as soon as we suppose a race superior to common humanity.

Mythical genealogies all of one class, and all on a level in respect to evidence.

Moreover it is to be remarked that the pedigree of the Spartan kings, which Apollodôrus and Eratosthenês selected as the basis of their estimate of time, is nowise superior in credibility and trustworthiness to the thousand other gentile and family pedigrees with which Greece abounded; it is rather indeed to be numbered among the most incredible of all, seeing that Hêraklês as a progenitor is placed at the head of perhaps more pedigrees than any other Grecian god or hero<sup>1</sup>. The descent of the

<sup>1</sup> According to that which Aristotle seems to recognise (*Rhetor. Animal.* vi. 6), Hêraklês was father of seventy-two sons, but of only one daughter—he was essentially ἀπείριστος, illustrating one of the physical peculiarities noticed by Aristotle. Euripidês however mentions daughters of Hêraklês in the plural number (*Æripid. Hêrakleia.* 45).

Spartan king Leonidas from Hēraklēs rests upon no better evidence than that of Aristotle or Hippokratēs from Asklēpius<sup>1</sup>,—of Evagoras or Thocydidēs from Æakus,—of Sokratēs from Dædalus,—of the Spartan heraldic family from Talthybius,—of the prophetic Iamid family in Elis from Iamns,—of the root-gatherers in Pélion from Cheirôn,—and of Hekataeus and his gens from some god in the sixteenth ascending line of the series. There is little exaggeration in saying, indeed, that no permanent combination of men in Greece, religious, social, or professional, was without a similar pedigree; all arising out of the same exigences of the feelings and imagination, to personify as well as to sanctify the bond of union among the members. Every one of these *gentes* began with a religious and ended with an historical person. At some point or other in the upward series, entities of history were exchanged for entities of religion; but where that point is to be found we are unable to say, nor had the wisest of the ancient Greeks any means of determining. Thus much however we know, that the series taken as a whole, though dear and precious to the believing Greek, pos-

<sup>1</sup> Hippokratēs was twentieth in descent from Hēraklēs, and nineteenth from Asklēpius (*Vita Hippocr.* by Soranus, ap. Westermann, *Scriptor. Biographici*, viii. 1); about Aristotle, see Diogen. Laert. v. 1. Xenophôn, the physician of the emperor Claudius, was also an Asklepiad (*Tacit. Ann.* iii. 61).

In Rhodus, the neighbouring island to Kôs, was the gens 'Αρρίδης, or sons of Hērakles, specially distinguished from the 'Αλκίωναί of more associated worshippers of Hērakles, τὸ κατὰ τὰς 'Αλκίονας καὶ τὰς 'Αλκίωναί (see the inscription in Boeckh's *Collectanea*, No. 2525, with Boeckh's comment).

sesses no value as chronological evidence to the historian.

When Hekateus visited Thèbes in Egypt, he mentioned to the Egyptian priests, doubtless with a feeling of satisfaction and pride, the imposing pedigree of the gens to which he belonged,—with fifteen uncestors in ascending line, and a god as the initial progenitor. But he found himself immeasurably overdone by the priests "who genealogised against him<sup>1</sup>." They showed to him three hundred and forty-one wooden colossal statues, representing the succession of chief priests in the temple in uninterrupted series from father to son, through a space of 11,300 years. Prior to the commencement of this long period (they said), the gods, dwelling along with men, had exercised sway in Egypt; but they repudiated altogether the idea of men begotten by gods or of heroes<sup>2</sup>.

Herodotus and  
Egyptian  
genea-  
logies.

Both these counter-genealogies are, in respect to trustworthiness and evidence, on the same footing. Each represents partly the religious faith, partly the retrospective imagination, of the persons from whom it emanated; in each the lower members of the series (to what extent we cannot tell) are real, the upper members fabulous; but in each also the series derived all its interest and all its imposing effect from being conceived unbroken and entire. Herodotus is much perplexed by the capital

<sup>1</sup> Herodot. li. 144. 'Ἐκισταίη δὲ γενεολογήσαντο ἑαυτοὺς, καὶ ἀναδίδουσι ἐν ἑταυδέσκατοις θεῶσι, ἀπεργαστηλόγησαν καὶ τῇ ἀριθμῶσαι, πῶς δεκάτηται σὺν' αὐτοῖς, ἀπὸ θεοῦ γενεσθῆαι ἀνθρώπων· ἀπεργαστηλόγησαν δὲ ἑαυτοὺς, &c.

<sup>2</sup> Herodot. li. 143-145. Καὶ ταῦτα Αἰγύπτου ἀνθρώποι φασὶν ἐπιστάμενοι, αὐτὰ τε λογιζόμενοι καὶ αὐτὰ ἀπεργασθῆναι τὰ θεῶτα.

discrepancy between the Grecian and Egyptian chronologies, and vainly employs his ingenuity in reconciling them. There is no standard of objective evidence by which either the one or the other of them can be tried: each has its own subjective value, in conjunction with the faith and feelings of Egyptians and Greeks, and each presupposes in the believer certain mental prepossessions which are not to be found beyond its own local limits. Nor is the greater or less extent of duration at all important, when we once pass the limits of evidence and verifiable reality. One century of recorded time, adequately studded with authentic and orderly events, presents a greater mass and a greater difficulty of transition to the imagination than a hundred centuries of barren genealogy. Herodotus, in discussing the age of Homer and Hesiod, treats an anterior point of 400 years as if it were only yesterday; the reign of Henry VI. is separated from us by an equal interval, and the reader will not require to be reminded how long that interval now appears.

Value of each purely subjective, in reference to the faith of the people.

The mythical age was peopled with a mingled aggregate of gods, heroes, and men, so confounded together that it was often impossible to distinguish to which class any individual name belonged. In regard to the Thracian god Zalmoxis, the Hellenistic Greeks interpreted his character and attributes according to the scheme of Euhemerism. They affirmed that he had been a man, the slave of the philosopher Pythagoras at Samos, and that he had by abilities and artifice established a religious ascendancy over the minds of the Thracians, and

obtained from them divine honours. Herodotus cannot bring himself to believe this story, but he frankly avows his inability to determine whether Zalmoxis was a god or a man<sup>1</sup>, nor can he extricate himself from a similar embarrassment in respect to Dionysus and Pan. Amidst the confusion of the Homeric fight, the goddess Athênê confers upon Diomédês the miraculous favour of dispelling the mist from his eyes, so as to enable him to discriminate gods from men; and nothing less than a similar miracle could enable a critical reader of the mythical narratives to draw an ascertained boundary-line between the two<sup>2</sup>. But the original hearers

<sup>1</sup> Herod. iv. 94-96. After having related the Euxeristic version given by the Hellenistic Greeks, he concludes with his characteristic frankness and simplicity—Ἐγὼ δὲ, περὶ παρ' τοῦτον καὶ τοῖς κατοικοῖσι ἐκείνων, οὐκ ἔστιν εὐρύνειν, οὐδὲ ἂν περὶ αὐτοῦ τι λήξω. ὁμοίᾳ δὲ πολλοῖσι ἴσται πρότερον τὸν Ζῆλμοξιν τοῦτον γενέσθαι Πυθιάδην. Εἴτε δὲ ἔγιντο τοὶ Ζῆλμοξες ἄνθρωποι, εἴτ' ἐστὶ βασιλεὺς τῆς Γέρας οὗτος ἐκείνων, χαίρειν. So Plutarch (Numa, c. 19) will not undertake to determine whether Janus was a god or a king, εἴτε βασιλεὺς, εἴτε θεὸς αὐτοῦ γενόμενος, &c.

Heraclitus the philosopher said that men were θεοὶ θνητοί, and the gods were ἀθνητοὶ ἀθάνατοι (Lamian, Vitar. Auctio, c. 13, vol. i. p. 302, Tauch. : compare the same author, Dialog. Mortuor. iii. vol. i. p. 182, ed. Tauchn.).

<sup>2</sup> Huid. s. 127 :—

Ἀλλὰ δ' αὖ τοι ἄτ' ὀφθαλμοῖς ἴδω, ἢ πρὶν εἶπεν,

Of this undistinguishable confusion between gods and men, striking illustrations are to be found both in the third book of Cicero de Naturâ Deorum (16-21), and in the long disquisition of Strabo (3. pp. 467-474) respecting the Kabiri, the Korymbantes, the Daktyli of Ida; the more so as he cites the statements of Pherekydês, Akusilaos, Dêmêtrios of Sikyon and others. Under the Roman empire the lares in Greece belonging to the immortal gods were exempted from tribute. The Roman tax-collectors refused to recognise as immortal gods any persons who had once been men: but this rule could not be clearly applied (Cicero, Nat. Deor. lib. 29). See the remarks of Pausanias (ii. 26, 7) about Asklepias; Galen, too, is doubtful about Asklepias and Dionysos—Ἀσκληπιὸς γὰρ τοὶ καὶ Διονύσιος, εἴτ' ἀθάνατοι πρότερον ἦσαν.

of the mythes felt neither surprise nor displeasure from this confusion of the divine with the human individual. They looked at the past with a film of faith over their eyes—neither knowing the value, nor desiring the attainment, of an unclouded vision. The intimate companionship, and the occasional mistake of identity between gods and men, were in full harmony with their reverential retrospect. And we accordingly see the poet Ovid in his *Fasti*, when he undertakes the task of unfolding the legendary antiquities of early Rome, re-acquiring, by the inspiration of Juno, the power of seeing gods and men in immediate vicinity and conjunct action, such as it existed before the development of the critical and historical sense<sup>1</sup>.

To resume, in brief, what has been laid down in this and the preceding chapters respecting the Grecian mythes:—

General re-  
capitula-  
tion.

1. They are a special product of the imagination and feelings, radically distinct both from history and philosophy: they cannot be broken down and decomposed into the one, nor allegorised into the other. There are indeed some particular and even

*εἰς αὐτὸ ἀπὸ τοῦ θεοῦ* (Galen in *Protreptic*, 2. tom. i. p. 22. ed. Kuhn). Xenophôn (De Venat. c. 3.) considers Chæron as the brother of Zens.

The ridicule of Lucian (*Deorum Consolatio*, t. iii. p. 527-538, Roma.) brings out still more forcibly the confusion here indicated.

<sup>1</sup> Ovid, *Fasti*, vi. 6-20:—

"*Pas mihi precipue vultus radisse Deorum,  
Vel quia cum vultu, vel quia sacra cum.....  
.....Ecce Deus vult.....  
Hærentem, taciturnæ animæ palloræ facies:  
Cum Deu, quon locut. instulit ipsa mens.  
Namque ut—O vultu. Romani conditor ante,  
Anse per exiguis magna reficere molis;  
Ius tibi fecisti numeru cordate videndi,  
Cum placuit numeris condere frons tua.*"

assignable mythes, which raise intrinsic presumption of an allegorising tendency; and there are doubtless some others, though not specially assignable, which contain portions of matter of fact, or names of real persons, embodied in them. But such matter of fact cannot be verified by any intrinsic mark, nor are we entitled to presume its existence in any given case unless some collateral evidence can be produced.

2. We are not warranted in applying to the mythical world the rules either of historical credibility or chronological sequence. Its personages are gods, heroes, and men, in constant juxtaposition and reciprocal sympathy; men too, of whom we know a large proportion to be fictitious, and of whom we can never ascertain how many may have been real. No series of such personages can serve as materials for chronological calculation.

3. The mythes were originally produced in an age which had no records, no philosophy, no criticism, no canon of belief, and scarcely any tincture either of astronomy or geography—but which, on the other hand, was full of religious faith, distinguished for quick and susceptible imagination, seeing personal agents where we look only for objects and connecting laws;—an age moreover eager for new narrative, accepting with the unconscious impressibility of children (the question of truth or falsehood being never formally raised) all which ran in harmony with its pre-existing feelings, and penetrable by inspired prophets and poets in the same proportion that it was indifferent to positive evidence. To such hearers did the primitive poet or story-teller address himself: it

was the glory of his productive genius to provide suitable narrative expression for the faith and emotions which he shared in common with them, and the rich stock of Grecian mythos attests how admirably he performed his task. As the gods and the heroes formed the conspicuous object of national reverence, so the mythos were partly divine, partly heroic, partly both in one<sup>1</sup>. The adventures of Achilles, Helen, and Diomédès, of CEdipus and Adrastus, of Meleager and Althæa, of Jason and the Argô, were recounted by the same tongues and accepted with the same unsuspecting confidence as those of Apollo and Artemis, of Arès and Aphroditê, of Poseiddôn and Hêraklès.

4. The time however came, when this plausibility ceased to be complete. The Grecian mind made an important advance, specially, ethically, and intellectually. Philosophy and history were constituted, prose writing and chronological records became familiar; a canon of belief more or less critical came to be tacitly recognised. Moreover, superior men profited more largely by the stimulus, and contracted habits of judging different from the vulgar: the god Elenchus<sup>2</sup> (to use a personification

<sup>1</sup> The fourth Eclogue of Virgil, under the form of a prophecy, gives a faithful picture of the heroic and divine past, to which the legends of Troy and the Argonauts belonged:—

"Ille Deûm vitam accipiet, Divinæque rûlebat  
Permixtor batonæ," &c.

"Aliæ erit tum Tiphys et altera quæ tunc Argo  
Didactos baronæ: erunt etiam altera bella,

of Menander), the giver and prover of truth, descended into their minds. Into the new intellectual medium, thus altered in its elements and no longer uniform in its quality, the mythes descended by inheritance; but they were found, to a certain extent, out of harmony even with the feelings of the people, and altogether dissonant with those of instructed men. Yet the most superior Greek was still a Greek, cherishing the common reverential sentiment towards the foretime of his country. Though he could neither believe nor respect the mythes as they stood, he was under an imperious mental necessity to transform them into a state worthy of his belief and respect. Whilst the literal mythé still continued to float among the poets and the people, critical men interpreted, altered, decomposed and added, until they found something which satisfied their minds as a supposed real basis. They manufactured some dogmas of supposed original philosophy, and a long series of fancied history and chronology, retaining the mythical names and generations even when they were obliged to discard or recast the mythical events. The interpreted mythé was thus promoted into a reality, while the literal mythé was degraded into a fiction<sup>1</sup>.

<sup>1</sup> The following passage from Dr. Ferguson's *Essay on Civil Society* (part ii. sect. 1. p. 126) bears well on the subject before us:—

"If conjectures and opinions formed at a distance have not a sufficient authority in the history of mankind, the shrouded antiquities of every nation must for this very reason be received with caution. They are for the most part the mere conjectures or the fictions of subsequent ages; and even where at first they contained some resemblance of truth, they still vary with the imagination of those by whom they were transmitted, and in every generation receive a different form. They are made

The habit of distinguishing the interpreted from the literal mythic has passed from the literary men of antiquity to those of the modern world, who have for the most part construed the divine mythos as allegorised philosophy, and the heroic mythos as exaggerated, adorned, and over-coloured history. The early ages of Greece have thus been peopled with quasi-historical persons and quasi-historical events, all extracted from the mythos after making certain allowances for poetical ornament. But we must not treat this extracted product as if it were the original substance; we cannot properly understand it except by viewing it in connection with the literal mythos out

to bear the stamp of the times through which they have passed in the form of tradition, not of the ages to which their pretended descriptions relate.....When traditional fables are rehearsed by the vulgar, they bear the marks of a national character, and though mixed with absurdities, often raise the imagination and move the heart: when made the materials of poetry, and adorned by the skill and the eloquence of an ardent and superior mind, they instruct the understanding as well as engage the passions. It is only in the management of more antiques, or strip of the ornaments which the laws of history forbid them to wear, that they become unfit *even to amuse the fancy or to serve any purpose whatever.*

"It were absurd to quote the fable of the *Iliad* or the *Odyssey*, the legends of *Hercules*, *Theseus* and *Odipus*, as authorities in matters of fact relating to the history of mankind; but they may, with great justice, be cited to ascertain what were the conceptions and sentiments of the age in which they were composed, or to characterise the genius of that people with whose imaginations they were blest, and by whom they were finally rehearsed and admired. In this manner fiction may be admitted to vouch for the genius of nations, while history has nothing to offer worthy of credit."

To the same purpose M. Paulin Paris (in his *Lettre à M. H. de Monmerqué*, prefixed to the *Roman de Berthe aux Grands Pieds*, Paris, 1836), respecting the '*romans*' of the Middle Ages:—"Pour bien connaître l'histoire du moyen âge, non pas celle des faits, mais celle des mœurs qui rendent les faits vraisemblables, il faut l'avoir étudiée dans les romans, et voilà pourquoi l'Histoire de France n'est pas encore faite." (p. xxi.)

of which it was obtained, in their primitive age and appropriate medium, before the superior minds had yet outgrown the common faith in an all-personified Nature, and learnt to restrict the divine free-agency by the supposition of invariable physical laws. It is in this point of view that the mythes are important for any one who would correctly appreciate the general tone of Grecian thought and feeling; for they were the universal mental stock of the Hellenic world—common to men and women, rich and poor, instructed and ignorant; they were in every one's memory and in every one's mouth<sup>1</sup>, while science and history were confined to comparatively few. We know from Thucydides how erroneously and carelessly the Athenian public of his day retained the history of Peisistratus, only one century past<sup>2</sup>;

<sup>1</sup> A curious evidence of the undiminished popularity of the Grecian mythos, to the exclusion even of recent history, is preserved by Vopiscus at the beginning of his *Life of Aurelian*.

The prefect of the city of Rome, Julius Tiberianus, took Vopiscus into his carriage on the festival-day of the *Libertas*; he was connected by the ties of relationship with Aurelian, who had died about a generation before—and as the carriage passed by the splendid temple of the Sun, which Aurelian had consecrated, he asked Vopiscus, what author had written the life of that emperor? To which Vopiscus replied, that he had read some Greek works which touched upon Aurelian, but nothing in Latin. Whereat the venerable prefect was profoundly grieved: "*Dolorem gemitibus quæ vir sanctus per hæc verba profudit:—Ergo Thersites, Simonides, ceterique illi prodigia vestustatis, et nos hunc ævum, et patres frequentabant? divites Aurelianus, clarissimum principum, severissimum imperatorem, per quem totus Romanus nominis orbis est restitutus, postea nescimus? Deus avertat hanc attentionem! Ea tamen, si bene memini, ephemerides illius viri scriptas habuimus,*" &c. (*Historie August. Script.* p. 229, ed. Salmas.)

This impressive remonstrance produced the *Life of Aurelian* by Vopiscus. The materials seem to have been ample and authentic: it is to be regretted that they did not fall into the hands of an author qualified to turn them to better account.

but the adventures of the gods and heroes, the numberless explanatory legends attached to visible objects and periodical ceremonies, were the theme of general talk, and any man unacquainted with them would have found himself partially excluded from the sympathy of his neighbours. The theatrical representations, exhibited to the entire city population and listened to with enthusiastic interest, both presupposed and perpetuated acquaintance with the great lines of heroic fable: indeed in later times even the pantomimic dancers embraced in their representations the whole field of mythical incident, and their immense success proves at once how popular and how well-known such subjects were. The names and attributes of the heroes were incessantly alluded to in the way of illustration, to point out a consoling, admonitory, or repressive moral: the simple mention of any of them sufficed to call up in every one's mind the principal events of his life, and the poet or rhapsode could thus calculate on touching chords not less familiar than susceptible<sup>1</sup>.

The first pages of the eleventh Oration of Dio Chrysostom contain some striking passages both as to the universal acquaintance with the myths, and as to their extreme popularity (Or. xi. p. 307-312. Rannk.). See also the commencement of Herakleides, De Allegoriâ Homericâ (ap. Scriptt. Myth. ed. Gale, p. 403), about the familiarity with Homer.

The Lyde of the poet Antimachus was composed for his own consolation under sorrow, by enumerating the ἡρώδων συμφοραί (Plutarch. Consolat. ad Apollōn. c. 9. p. 118; compare Æschines cont. Ktesiph. c. 48). A sepulchral inscription in Thera, on the untimely death of Antimachus, a youth of the heroic gens Aglaie, makes a touching allusion to his ancestors Pileus and Pharis (Boeckh, C. I. t. ii. p. 1087).

A curious passage of Aristotle is preserved by Diodotus Phalerens (Περὶ Ἐρμηνείας, c. 344).—Ὅσοι γὰρ αἰτίαι καὶ αἰσώματα εἰσὶ, φθόγοι, θόγοι, γέννησι (compare the passage in the Nikomachean Ethics, l. 9. μάλιστα καὶ ἄλλοις). Stahr refers this to a letter of Aristotle written in his old age, the myths being the consolation of his solitude (Aristotelis, i. p. 201).

For the employment of the mythical names and incidents as topics of pleasing and familiar comparison, see Menander, Περὶ Ἐκδοῦντος. § 11. capp. 9 and 11, ap. Wais. Coll. Rhett. t. ix. p. 283-284. The degree to which they passed into the ordinary songs of women is illustrated by a touching epigram contained among the Chian Inscriptions published in Boeckh's Collection (No. 2236):—

Βίττις καὶ Φαυρί, φιλῆς θυίης (7), αἱ σπινθήριον.  
Αἱ πενέποι, γέννησι, τῶν ἐκδοῦντος ἡρώ.  
Ἀμφότεραι κῆρυ, πρῶτον γέννησι—δ' ἡρώδων ἔργων.  
Πρὸς δὲ γέννησι μάλιστα ἔργων ἡρώδων.

These two poor women were not afraid to boast of their family descent; they probably belonged to some noble gens which traced its origin to a god or a hero. About the songs of women, see also Agathias, l. 7. p. 29, ed. Rannk.

In the family of the wealthy Athenian Democritus was a legend, that his primitive ancestor (son of Zens by the daughter of the Archigetta of the δῆμος Αἰκάδων, to which he belonged) had received Heraklēs at his table: this legend was so ripe that the old women sang it—ὅσοι αἱ

The annual departure of the Theoric ship from Athens to the sacred island of Délos, kept alive, in the minds of Athenians generally, the legend of Théséus and his adventurous enterprise in Krète<sup>1</sup>; and in like manner most of the other public rites and ceremonies were of a commemorative character, deduced from some mythical person or incident familiarly known to natives, and forming to strangers a portion of the curiosities of the place<sup>2</sup>. During the period of Grecian subjection under the Romans, these curiosities, together with their works of art and their legends, were especially clung to as a set-off against present degradation. <sup>2</sup> The Philopseudes of Lucian (i. iii. p. 31, Reusii, exp. 2, 3, 4) shows not only the pride which the general public of Athens and Thèbes took in their old myths (Triptolemos, Demos and Demithys, the Sparti, &c.), but the way in which they treated every man who called the stories in question as a fool or as an atheist. He remarks that if the guides who showed the antiquities had been restrained to tell nothing but what was true, they would have died of hunger; for the visiting strangers would not care to hear plain truth, even if they could have got it for nothing (μὴδ' ἀποδοῖν τοῖς ἑσθίον τοῖς ἀληθεῖς δεικνύει ἰθαυπεστέρως).

and chapel of the hero stood in his own city—could not be satisfied without a knowledge of the story which explained the origin of such prohibition<sup>1</sup>, and which conducted him back to the originally hostile relations between Amphiaraus and Thêbes. Nor can we suppose among the citizens of Sikyôn anything less than a perfect and reverential conception of the legend of Thêbes, when we read the account given by Herodotus of the conduct of the despot Kleisthenês in regard to Adrastus and Melanippus<sup>2</sup>. The Troezenian youths and maidens<sup>3</sup>, who universally, when on the eve of marriage, consecrated an offering of their hair at the Herôn of Hippolytus, maintained a lively recollection of the legend of that unhappy recusant whom Aphroditê had so cruelly punished. Abundant relics preserved in many Grecian cities and temples, served both as mementos and attestations of other legendary events; and the tombs of the heroes counted among the most powerful stimulants of mythical reminiscence. The sceptre of Pelops and Agamemnôn, still preserved in the days of Pausanias at Chæroneia in Bœotia, was the work of the god Hêphæstos. While many other alleged productions of the same divine hand were preserved in different cities of Greece, this is the only one which Pausanias himself believed to be genuine: it had been carried by Elektra daughter of Agamemnôn to Phôkis, and received

divine honours from the citizens of Chaeroneia<sup>1</sup>. The spears of Mérianès and Odysseus were treasured up at Engyium in Sicily, that of Achilles at Phasélis; the sword of Memnôn adorned the temple of Asklépius at Nicomédia; and Pausanias, with unsuspecting confidence, adduces the two latter as proofs that the arms of the heroes were made of brass<sup>2</sup>. The hide of the Kalydonian boar was guarded and shown by the Tegeates as a precious possession; the shield of Euphorbus was in like manner suspended in the temple of Branchidæ near Milétus, as well as in the temple of Hêré in Argos. Visible relics of Epeius and Philaktêtês were not wanting, while Strabo raises his voice with indignation against the numerous Palladia which were shown in different cities, each pretending to be the genuine image from Troy<sup>3</sup>. It would be impossible to specify the number of chapels, sanctuaries, solemnities, foundations of one sort or another, said to have been first commenced by heroic or mythical personages,—by Hêrakilês, Jasôn, Mèdeia, Alkmæôn, Diomédês, Odysseus, Danaus and his daughters<sup>4</sup>, &c. Perhaps in some of these cases particular critics might raise objections, but the great bulk of the people entertained a firm and undoubted belief in the current legend.

munities of Arcadia or Phôkis even up to the enlightened Athens, we shall find that, over and above the rules of art or capacities requisite for his daily wants, it consisted chiefly of the various mythes connected with his gens, his city, his religious festivals, and the mysteries in which he might have chosen to initiate himself, as well as with the works of art and the more striking natural objects which he might see around him—the whole set off and decorated by some knowledge of the epic and dramatic poets. Such was the intellectual and imaginative reach of an ordinary Greek, considered apart from the instructed few: it was an aggregate of religion, of social and patriotic retrospect, and of romantic fancy, blended into one indivisible faith. And thus the subjective value of the mythes, looking at them purely as elements of Grecian thought and feeling, will appear indisputably great, however little there may be of objective reality, either historical or philosophical, discoverable under them.

The mythos  
in their  
bearing on  
Grecian art.

Nor must we omit the incalculable importance of the mythes as stimulants to the imagination of the Grecian artist in sculpture, in painting, in carving, and in architecture. From the divine and heroic legends and personages were borrowed those paintings, statues, and reliefs, which rendered the temples, porticos, and public buildings, at Athens and elsewhere, objects of surpassing admiration: and such visible reproduction contributed again to fix the types of the gods and heroes familiarly and indelibly on the public mind<sup>1</sup>. The figures delineated on cups and vases as well as on the walls of private

houses, were chiefly drawn from the same source—the mythes being the great storehouse of artistic scenes and composition.

To enlarge on the characteristic excellence of Grecian art would here be out of place: I regard it only in so far as, having originally drawn its materials from the mythes, it reacted upon the mythical faith and imagination—the reaction imparting strength to the former as well as distinctness to the latter. To one who saw constantly before him representations of the battles of the Centaurs or the Amazons<sup>1</sup>, of the exploits performed by Perseus and Bellerophon, of the incidents composing the Trojan war or the Kalydonian boar-hunt—the process of belief, even in the more fantastic of these conceptions, became easy in proportion as the conception was familiarised. And if any person had been slow to believe in the efficacy of the prayers of Æakus, whereby that devout hero once obtained special relief from Zeus, at a moment when Greece was perishing with long-continued sterility—his doubts would probably vanish, when, on visiting the Æakeium at Ægina, there were exhibited to him the statues of the very envoys who had come on the behalf of the distressed Greeks to solicit that Æakus would pray for them<sup>2</sup>. A Grecian temple<sup>3</sup> was not simply a place of worship, but the actual dwelling-

place of a god, who was believed to be introduced by the solemn dedicatory ceremony, and whom the imagination of the people identified in the most intimate manner with his statue. The presence or removal of the statue was conceived as identical with that of the being represented—and while the statue was solemnly washed, dressed, and tended with all the respectful solicitude which would have been bestowed upon a real person<sup>1</sup>, miraculous tales were often told respecting the manifestation of real internal feeling in the wood and the marble. At peril-

<sup>1</sup> See the case of the Argonauts lending the Eakids for a time to the Thebans (Herodot. v. 80), who were however returned (them: likewise lending the Eakids to the battle of Salamis (viii. 64-80). The Spartans, when they decreed that only one of their two kings should be out on military service, decreed at the same time that only one of the Tyndarids should go out with them (v. 75); they once lent the Tyndarids as aids to the envoys of Epizephyrian Ikarh, who prepared for them a couch on board their ship (Diodor. Excerpt. xvi. p. 16, Dindorf). The Thebans grant their hero Melanippus to Kleitharus of Sikyon (v. 68). What was sent must probably have been a conventional copy of the genuine statue.

Respecting the solemnities practised towards the statues, see Plutarch, Alibiad. 34; Kallimach. Hymn. ad Laper. Pallada, init. with the note of Spinaheim; K. O. Müller, Archæologie der Kunst, § 69; compare Plutarch, Questions Romaines, § 61, p. 279; and Tacit. Mor. Germ. c. 40; Diodor. xii. 49.

The manner in which the real presence of a hero was identified with his statue (*τὸ εἶμας διὰ τοῦ οἴκου παρὰ τὴν εἰκόνα τοῦ ἡρώου*—Menander, Fragm. Hylæus, p. 71, Meineke), consecrated ground, and temple, is nowhere more powerfully attested than in the Heræa of Philostemius (supp. 2-26, p. 674-692; also De Vit. Apollôn Tyau. iv. 11), respecting Prætelios at Eleus, Ajax at the Aiantêion, and Hector at Ilium: Prætelios appeared exactly in the equipment of his statue,—*χλαπίδα ἰσχυρὰν, ζώνην, τὸν ὀρθοῦσθαι ἐπὶ τοῦ σώματος καὶ τὸ ὄνυχα τοῦτο* (p. 674). The presence and sympathy of the hero Lykurgos is essential to the satisfaction of the Athenians dikæars (Aristophan. Vesp. 889-820); the fragment of Lucilius quoted by Lactantius, De Falsâ Religione (l. 22), is curious—*Tunc quæritur tunc curâ, tunc pectus et tunc hæpar iduritur* (Lykurgos cult. Leukost. c. 1).

ous or critical moments, the statue was affirmed to have sweated, to have wept, to have closed its eyes, or brandished the spear in its hands, in token of sympathy or indignation<sup>1</sup>. Such legends, springing up usually in times of suffering and danger, and finding few men bold enough openly to contradict them, ran in complete harmony with the general mythical faith, and tended to strengthen it in all its various ramifications. The renewed activity of the god or hero both brought to mind and accredited the pre-existing mythes connected with his name. When Boreas, during the invasion of Greece by Xerxès and in compliance with the fervent prayers of the Athenians, had sent forth a providential storm to the irreparable damage of the Persian armada<sup>2</sup>, the sceptical minority (alluded to by Plato) who doubted the myth of Boreas and Oreithyia, and his close connection thus acquired with Erechtheus and the Erechtheids generally, must for the time have been reduced to absolute silence.

<sup>1</sup> Plutarch, *Timoleon*, c. 12; *Strabo*, vi. p. 264. Theophrastus treats the perspiration as a natural phenomenon in the statues made of cedar-wood (*Histor. Plant.* v. 10). Plutarch discusses the credibility of this sort of miracles in his *Life of Coriolanus*, c. 37-38.

<sup>2</sup> Herodotus, vii. 189. Compare the gratitude of the Megalopolitans to Boreas for having preserved them from the attack of the Lacedæmonian king Agis (*Pausan.* viii. 27, 4.—viii. 36, 4). When the Ten Thousand Greeks went on their retreat through the cold mountains of Armenia, Boreas blew in their faces "parching and freezing intolerably." One of the prophets recommended that a sacrifice should be offered to him, which was done, "and the painful effect of the wind appeared to every one forthwith to cease in a marked manner" (καὶ τὸ αἶμα δὲ καταψυχὰς ἵσθητο λήγειν τὸ χαλεπὸν τοῦ πνεύματος.—Xenoph. *Anab.* iv. 6, 3).

## CHAPTER XVII.

THE GRECIAN MYTHICAL VEIN COMPARED WITH THAT  
OF MODERN EUROPE.

~~Mythos~~—  
Sage—an  
universal  
manifesta-  
tion of the  
human  
mind.

I HAVE already remarked that the existence of that popular narrative talk, which the Germans express by the significant word *Sage* or *Folks-Sage*, in a greater or less degree of perfection or development, is a phenomenon common to almost all stages of society and to almost all quarters of the globe. It is the natural effusion of the unlettered, imaginative and believing man, and its maximum of influence belongs to an early state of the human mind; for the multiplication of recorded facts, the diffusion of positive science, and the formation of a critical standard of belief, tend to discredit its dignity and to repress its easy and abundant flow. It supplies to the poet both materials to recombine and adorn, and a basis as well as a stimulus for further inventions of his own; and this at a time when the poet is religious teacher, historian, and philosopher, all in one—not, as he becomes at a more advanced period, the mere purveyor of avowed, though interesting fiction.

Such popular stories, and such historical songs (meaning by historical simply that which is accepted as history) are found in most quarters of the globe, and especially among the Teutonic and Celtic populations of early Europe. The old Go-

these songs were cast into a continuous history by the historian Ablavius<sup>1</sup>; and the poems of the Germans respecting Tuisto the earth-born god, his son Mannus, and his descendants the eponyms of the various German tribes<sup>2</sup>, as they are briefly described by Tacitus, remind us of Hesiod, or Eumælus, or the Homeric Hymns. Jacob Grimm, in his learned and valuable *Deutsche Mythologie*, has exhibited copious evidence of the great fundamental analogy, along with many special differences, between the German, Scandinavian and Grecian mythical world; and the Dissertation of Mr. Price (prefixed to his edition of Warton's *History of English Poetry*) sustains and illustrates Grimm's view. The same personifying imagination—the same ever-present conception of the will, sympathies, and antipathies of the gods as the producing causes of phenomena, and as distinguished from a course of nature with its invariable sequence—the same relations between gods, heroes and men, with the like difficulty of discriminating the one from the other in many individual names—a similar wholesale transfer of human attributes to the gods, with the absence of human limits and liabilities—a like belief in Nymphs, Giants, and other beings neither gods nor men—the same coalescence of the religious with the patriotic feeling and faith—these are positive features

common to the early Greeks with the early Germans: and the negative conditions of the two are not less analogous—the absence of prose writing, positive records, and scientific culture. The preliminary basis and encouragements for the mythopœic faculty were thus extremely similar.

But though the prolific forces were the same in kind, the results were very different in degree, and the developing circumstances were more different still.

*Differences  
between  
them—  
Grecian  
poetry  
matchless  
—Grecian  
progress  
self-oper-  
ated.*

First, the abundance, the beauty, and the long continuance of early Grecian poetry, in the purely poetical age, is a phenomenon which has no parallel elsewhere.

Secondly, the transition of the Greek mind from its poetical to its comparatively positive state was self-operated, accomplished by its own inherent and expansive force—aided indeed, but by no means either impressed or provoked, from without. From the poetry of Homer, to the history of Thucydides and the philosophy of Plato and Aristotle, was a prodigious step, but it was the native growth of the Hellenic youth into an Hellenic man; and what is of still greater moment, it was brought about without breaking the thread either of religious or patriotic tradition—without any coercive innovation or violent change in the mental feelings. The legendary world, though the ethical judgements and rational criticisms of superior men had outgrown it, still retained its hold upon their feelings as an object of affectionate and reverential retrospect.

Far different from this was the development of the early Germans. We know little about their

early poetry, but we shall run no risk of error in affirming that they had nothing to compare with either Iliad or Odyssey. Whether, if left to themselves, they would have possessed sufficient progressive power to make a step similar to that of the Greeks, is a question which we cannot answer. Their condition, mental as well as political, was violently changed by a foreign action from without. The influence of the Roman empire introduced artificially among them new institutions, new opinions, habits and luxuries, and, above all, a new religion; the Romanised Germans becoming themselves successively the instruments of this revolution with regard to such of their brethren as still remained heathens. It was a revolution often brought about by penal and coercive means: the old gods Thor and Woden were formally deposed and renounced, their images were crumbled into dust, and the sacred oaks of worship and prophecy hewn down. But even where conversion was the fruit of preaching and persuasion, it did not the less break up all the associations of a German with respect to that mythical world which he called his past, and of which the ancient gods constituted both the charm and the sanctity: he had now only the alternative of treating them either as men or as demons<sup>1</sup>. That mixed religious and patriotic

German progress brought about by violent influences from without.

<sup>1</sup> On the hostile influence exercised by the change of religion on the old Scandinavian poetry, see an interesting article of Jacob Grimm in the *Göttingen Gelehrte Anzeigen*, Feb. 1832, p. 262-273; a review of Olaf Trygvesson's Saga. The article *Heiden* in his *Deutsche Mythologie* is also full of instruction on the same subject: see also the *Einleitung* to the book, p. 11, 2nd edition.

A similar observation has been made with respect to the old myths of the pagan Russians by Eichhoff:—"L'établissement du Christian-

retrospect, formed by the coalescence of piety with ancestral feeling, which constituted the appropriate sentiment both of Greeks and of Germans towards their unrecorded antiquity, was among the latter banished by Christianity: and while the root of the old mythes was thus cankered, the commemorative ceremonies and customs with which they were connected, either lost their consecrated character or disappeared altogether. Moreover new influences of great importance were at the same time brought to bear. The Latin language, together with some tinge of Latin literature—the habit of writing and of recording present events—the idea of a systematic law and pacific adjudication of disputes,—all these formed a part of the general working of Roman civilization, even after the decline of the Roman empire, upon the Teutonic and Celtic tribes. A class of specially-educated men was formed, upon a Latin basis and upon Christian principles, consisting too almost entirely of priests, who were opposed, as well by motives of rivalry as by religious feeling, to the ancient bards and storytellers of the community: the “lettered men<sup>1</sup>” were constituted

*même, ce gage du bonheur des nations, fut vivement apprécié par les Russes, qui dans leur juste reconnaissance, le personnifièrent dans un héros. Vladimir le Grand, ami des arts, protecteur de la religion qu'il protégea, et dont les faits firent osciller les fautes, devint l'Arthur et le Charlemagne de la Russie, et ses hauts faits furent un mythe national qui domina tous ceux du paganisme. Autour de lui se groupèrent ses guerriers aux formes athlétiques, sa cour guerrière, dont la poésie aime à entourer le héros mystérieux des peuples: et les exploits du vaillant Dobrinia, de Rogdal, d'Ilia, de Curilo, mimèrent les ballades nationales, et vivent encore dans de naïfs récits.” (Nikoloff, Histoire de la Langue et Littérature des Slaves, Paris 1849, part III, ch. II, p. 190.)*

<sup>1</sup> This distinction is curiously brought to view by Saxo Grammaticus, where he says of an Englishman, named Lavea, that he was “*litteratus*

apart from "the men of story," and Latin literature contributed along with religion to sink the mythes of untaught heathenism. Charlemagne indeed, at the same time that he employed aggressive and violent proceedings to introduce Christianity among the Saxons, also took special care to commit to writing and preserve the old heathen songs. But there can be little doubt that this step was the suggestion of a large and enlightened understanding peculiar to himself. The disposition general among lettered Christians of that age is more accurately represented by his son Louis le Débonnaire, who, having learnt these songs as a boy, came to abhor them when he arrived at mature years, and could never be induced either to repeat or tolerate them<sup>1</sup>.

According to the old heathen faith, the pedigree of the Saxon, Anglian, Danish, Norwegian, and Swedish kings,—probably also those of the German and Scandinavian kings generally,—was traced to Odin, or to some of his immediate companions or heroic sons<sup>2</sup>. I have already observed that the

Theganus says of Louis le Débonnaire, "Poetica carmina gentilia, quæ in iuventute didicerat, respuit, nec legere, nec audire, nec docere, voluit." (*The Gesta Ludovici Imperatoris ap. Pithæum*, p. 304, c. xii.)

<sup>2</sup> See Grimm's *Deutsche Mythologie*, art. *Heiden*, p. 356, 2nd edit. Hengist and Horsa were fourth in descent from Odin (*Völsunga Saga*, Hist. i. 16). Thiodolf, the Scold of Harold Haarfager king of Norway, traced the pedigree of his sovereign through thirty generations to Yngve-frey, the son of Njord companion of Odin at Upsal; the kings of Upsal were called Ynglingers, and the song of Thiodolf, *Ynglingatal* (Dahl-

value of these genealogies consisted not so much in their length, as in the reverence attached to the name serving as primitive source. After the worship attached to Odin had been extinguished, the genealogical line was lengthened up to Japhet or Noah—and Odin, no longer accounted worthy to stand at the top, was degraded into one of the simple human members of it<sup>1</sup>. And we find this alteration

mann, *Hist. Forsch.* i. p. 379). Tyrtius, another Scald a century afterwards, deduced the pedigree of Jarl Hacon from Saming son of Yngvifrey (p. 381). Are Frode, the Icelandic historian, carried up his own genealogy through thirty-six generations to Yngve; a genealogy which Torfæus accepts as trustworthy, opposing it to the line of kings given by Saxo Grammaticus (p. 352). Torfæus makes Harald Haarfager a descendant from Odin through twenty-seven generations; Alfred of England through twenty-three generations; Offa of Mercia through fifteen (p. 762). See also the translation by Lange of P. A. Müller's *Saga Bibliothek*, introd. p. xxviii, and the genealogical tables prefixed to Snorro Sturleson's *Edda*.

Mr. Sharon Turner conceives the human existence of Odin to be distinctly proved, seemingly upon the same evidence as Euhemerus believed in the human existence of Zeus (*History of the Anglo-Saxons*, Appendix to b. ii. ch. 3. p. 219, 5th edit.).

<sup>1</sup> Dahlmann, *Hist. Forsch.* i. i. p. 396. There is a valuable article on this subject in the *Zeitschrift für Geschichte's Wissenschaft* (Berlin, vol. i. p. 297-352) by Stühr. "Über einige Hauptfragen des Nördischen Alterthums," wherein the writer illustrates both the strong motive and the effective tendency, on the part of the Christian clergy who had to deal with these newly-converted Teutonic pagans, to Euhemerize the old gods, and to represent a genealogy, which they were unable to efface from men's minds, as if it consisted only of mere men.

Mr. John Kemble (*Über die Stammtafel der Westsachsen*, ap. Stühr. p. 254) remarks, that "nobilitas" among that people consisted in descent from Odin and the other gods.

Colonel Stenman also deals in the same manner with the religious legends of the Hindoos—so natural is the proceeding of Euhemerus, towards any religion in which a critic does not believe—

"They (the Hindoos) of course think that the incarnation of their three great divinities were beings infinitely superior to prophets, being in all their attributes and progenies equal to the divinities themselves. But we are disposed to think that these incarnations were no-

of the original mythical genealogies to have taken place even among the Scandinavians, although the introduction of Christianity was in those parts both longer deferred, so as to leave time for a more ample development of the heathen poetical vein—and seems to have created a less decided feeling of antipathy (especially in Iceland) towards the extinct faith'. The poems and tales composing the Edda, though first committed to writing after the period of Christianity, do not present the ancient gods in a point of view intentionally odious or degrading.

The transposition above alluded to, of the genealogical root from Odin to Noah, is the more worthy of notice, as it illustrates the genuine character of these genealogies, and shows that they sprang, not from any erroneous historical data, but from the turn of the religious feeling; also that their true value is derived from their being taken entire, as connecting the existing race of men with a divine original. If we could imagine that Grecian paganism had been superseded by Christianity in the year 500 B.C., the great and venerated gentile genealogies of Greece would have undergone the like

*thing more than great men whom their flatterers and poets have exalted into gods—this was the way in which men made their gods in ancient Greece and Egypt.—All that the poets have sung of the actions of these men is now received as revelation from heaven: though nothing can be more monstrous than the actions ascribed to the best incarnation, Krishna, of the best of the gods, Vishnu."* (Steinman, *Rambles and Recollections of an Indian Official*, vol. i. ch. viii. p. 61.)

In the *Leitfaden zur Nördlichen Alterthumskunde*, pp. 4-5 (Copenhagen, 1837), is an instructive summary of the different sciences of interpretation applied to the northern myths: 1. the historical; 2. the geographical; 3. the astronomical; 4. the physical; 5. the allegorical.

modification; the Herakleids, Pelopids, Æakids, Asklepiads, &c. would have been merged in some larger aggregate branching out from the archæology of the Old Testament. The old heroic legends connected with these ancestral names would either have been forgotten, or so transformed as to suit the new vein of thought; for the altered worship, ceremonies, and customs would have been altogether at variance with them, and the mythical feeling would have ceased to dwell upon those to whom prayers were no longer offered. If the oak of Dôdôna had been cut down, or the Theôric ship had ceased to be sent from Athens to Dêlos, the mythes of Theseus and of the two black doves would have lost their pertinence, and died away. As it was, the change from Homer to Thucydides and Aristotle took place internally, gradually, and imperceptibly. Philosophy and history were superinduced in the minds of the superior few, but the feelings of the general public continued unshaken—the sacred objects remained the same both to the eye and to the heart—and the worship of the ancient gods was even adorned by new architects and sculptors who greatly strengthened its imposing effect.

While then in Greece the mythopœic stream continued in the same course, only with abated current and influence, in modern Europe its ancient bed was blocked up and it was turned into new and divided channels. The old religion,—though as an ascendant faith, unanimously and publicly manifested, it became extinct,—still continued in detached scraps and fragments, and under various

alterations of name and form. The heathen gods and goddesses, deprived as they were of divinity, did not pass out of the recollection and fears of their former worshipers, but were sometimes represented (on principles like those of Eudæmus) as having been eminent and glorious men—sometimes degraded into dæmons, magicians, elfs, fairies and other supernatural agents, of an inferior grade and generally mischievous cast. Christian writers such as Saxo Grammaticus and Snorro Sturleson committed to writing the ancient oral songs of the Scandinavian Scalds, and digested the events contained in them into continuous narrative—performing in this respect a task similar to that of the Grecian logographers Pherekydēs and Hellanikus, in reference to Hæsioid and the Cyclic poets. But while Pherekydēs and Hellanikus compiled under the influence of feelings substantially the same as those of the poets on whom they bestowed their care, the Christian logographers felt it their duty to point out the Odín and Thor of the old Scalds as evil diemons, or cunning enchanters who had fascinated the minds of men into a false belief in their divinity<sup>1</sup>. In some cases the heathen recitals

(Extract from the Prose Edda, p. 75, in the *Lexicon Mythologicum ad eandem Eddæ Sæmund.* vol. iii. p. 357, Copenhagen: 1815.)

A similar warning is to be found in another passage cited by P. E. Müller, *Über den Ursprung und Verfall der Isländischen Historiographie*, p. 128, Copenhagen, 1813; compare the Prologue to the Prose Edda, p. 6, and Mallet, *Introduction à l'Histoire de Danemarck*, ch. vii. p. 114-132.

and ideas were modified so as to suit Christian feeling. But when preserved without such a change, they exhibited themselves palpably, and were designated by their compilers, as at variance with the religious belief of the people, and as associated either with imposture or with evil spirits.

Mythopæic tendencies in modern Europe still subsisting, but forced into a new channel.  
1. Saintly ideal.  
2. Chivalrous ideal.

A new vein of sentiment had arisen in Europe, unsuitable indeed to the old mythes, yet leaving still in force the demand for mythical narrative generally. And this demand was satisfied, speaking generally, by two classes of narratives,—the legends of the Catholic Saints and the Romances of Chivalry, corresponding to two types of character, both perfectly accommodated to the feelings of the time,—the saintly ideal and the chivalrous ideal.

times as an evil demon, sometimes as a high priest or pontiff of heathenism, who imposed so powerfully upon the people around him as to receive divine honours. Thor also is treated as having been an evil demon. (See *Lexicon Mythologicæ*, ut supra, pp. 507, 516.)

Respecting the function of Surtur as logographer, see Prefat. ad Eddam, ut supra, p. xi. He is much more faithful; and less unfriendly to the old religion, than the other logographers of the ancient Scandinavian Sæga. (Leitfaden der Nörlischen Alterthümer, p. 14, by the Antiquarian Society of Copenhagen, 1837.)

By a singular transformation, dependent upon the same tone of mind, the authors of the French *Chansons de Geste* in the twelfth century turned Apollo into an evil demon, patron of the Muscadans (see the *Roman of Garin le Loherain*, par M. Paulin Paris, 1833, p. 31).—"Car minez vait Diens que ne fait Apollin," M. Paris observes, "Cet ancien Dieu des beaux arts est l'un des démons le plus souvent désigné dans nos poèmes, comme patron des Muscadans."

The prophet Mahomet, too, anathematized the old Persian epic anterior to his religion. "C'est à l'occasion de Nams Ibn al-Hareth, qui avait apporté de Perse l'Histoire de Rustem et d'Isfendiar, et la faisoit réciter par des esclaves dans les assemblées des Khoréshiens, que Mahomet prononça le vers suivant (of the Koran): Il y a des hommes qui achètent des contes grecs, pour détourner par-là les hommes de la voie de Dieu, d'une manière mesurée, et pour la livrer à la risée; mais leur punition les courra de suite." (Mohl, Préface au Livre des Rôles de Perdonat, p. xiii.)

Both these two classes of narrative correspond, in character as well as in general purpose, to the Grecian mythes,—being stories accepted as realities, from their full conformity with the predispositions and deep-seated faith of an uncritical audience, and prepared beforehand by their authors, not with any reference to the conditions of historical proof, but for the purpose of calling forth sympathy, emotion, or reverence. The type of the saintly character belongs to Christianity, being the history of Jesus Christ as described in the Gospels, and that of the prophets in the Old Testament; whilst the lives of holy men, who acquired a religious reputation from the fourth to the fourteenth century of the Christian æra, were invested with attributes, and illustrated with ample details, tending to assimilate them to this revered model. The numerous miracles, the cure of diseases, the expulsion of dæmons, the temptations and sufferings, the teaching and commands, with which the biography of Catholic saints abounds, grew chiefly out of this pious feeling, common to the writer and to his readers. Many of the other incidents, recounted in the same performances, take their rise from misinterpreted allegories, from ceremonies and customs of which it was pleasing to find a consecrated origin, or from the disposition to convert the etymology of a name into matter of history: many have also been suggested by local peculiarities, and by the desire of stimulating or justifying the devotional emotions of pilgrims who visited some consecrated chapel or image. The dove was connected, in the faith of the age, with the Holy Ghost, the

the Saints*

serpent with Satan ; lions, wolves, stags, unicorns, &c. were the subjects of other emblematic associations ; and such modes of belief found expression for themselves in many narratives which brought the saints into conflict or conjoint action with these various animals. Legends of this kind, so indefinitely multiplied and so pre-eminently popular and affecting, in the middle ages, are not exaggerations of particular matters of fact, but emanations in detail of some current faith or feeling, which they served to satisfy, and by which they were in turn amply sustained and accredited<sup>1</sup>.

<sup>1</sup> The legends of the Saints have been touched upon by M. Guizot (*Cours d'Histoire Moderne*, leçon xvi.) and by M. Ampère (*Histoire Littéraire de la France*, t. II. cap. 14, 15, 16) ; but a far more copious and elaborate account of them, coupled with much just criticism, is to be found in the valuable *Essai sur les Légendes Pieuses du Moyen Âge*, par L. P. Alfred Maury, Paris, 1849.

M. Guizot scarcely adverts at all to the more or less of matter of fact contained in these biographies ; he regards them altogether as they grew out of and answered to the predominant emotions and mental exigencies of the age : " Au milieu d'un déluge de fables absurdes, le monde éclate avec un grand empire " (p. 159, ed. 1829). " Les légendes ont été pour les Chrétiens de ce temps (qu'on ne permette cette comparaison purement littéraire) ce que sont pour les Orientaux ces longs récits, ces histoires si brillantes et si variées, dont les Mille et une Nuits nous donnent un échantillon. C'était là que l'imagination populaire errait librement dans un monde inconnu, merveilleux, plein de mouvement et de poésie " (p. 175, *ibid.*).

M. Guizot takes his comparison with the tales of the Arabian Nights, as heard by an Oriental with unassuming and un suspicious credence. Viewed with reference to an instructed European, who reads these narratives as pleasing but recognised fiction, the comparison would not be just ; for no one in that age dreamt of questioning the truth of the biographies. All the remarks of M. Guizot assume this implicit faith in them as literal histories : perhaps in estimating the feelings to which they owed their extraordinary popularity, he allows too little predominance to the religious feeling, and too much influence to other mental exigencies which then went along with it ; more especially as he remarks in the preceding lecture (p. 116), "*Le caractère général de*

Every reader of Pausanias will recognise the great general analogy between the stories recounted to him at the temples which he visited, and these legends of the middle ages. Though the type of character which the latter illustrate is indeed materially different, yet the source as well as the circulation, the generating as well as the sustaining forces, were in both cases the same. Such legends were the natural growth of a religious faith earnest, unexamining, and interwoven with the feelings at a time when the reason does not need to be cheated. The lives of the Saints bring us even back to the simple and ever-operative theology of the Homeric age; so constantly is the hand of God exhibited even in the minutest details, for the succour of a favoured individual,—so completely is the scientific point of view, respecting the phenomena of nature,

Their analogy with the Homeric theology.

*l'époque est la concentration du développement intellectuel dans la sphère religieuse."*

How this shunning religious sentiment operated in generating and accrediting new matter of narrative, is shown with great fulness of detail in the work of M. Maury:—"Tous les écrits du moyen âge nous apportent la preuve de cette préoccupation exclusive des esprits vers l'Histoire Sainte et les prodiges qui avaient signalé l'avènement du Christianisme. Tous nous montrent la pensée de Dieu et du Ciel dominant les moindres œuvres de cette époque de naïveté et de crédulité simplifiée. D'ailleurs, n'était-ce, pas le moine, le clerc, qui constituaient alors les seuls écrivains? Qu'y a-t-il d'étonnant que le sujet habituel de leurs méditations, de leurs études, se reflète sans cesse dans leurs ouvrages? Partout reparaitrait à l'imagination *Jésus et ses Saints*: cette image, l'esprit l'accueillait avec soumission et obéissance: il n'osait pas encore envisager ces célestes pensées avec l'œil de la critique, armé de défiance et de doute; au contraire, l'intelligence les acceptait toutes indistinctement et s'en nourrissait avec avidité. Ainsi l'accréditaient tous les jours de nouvelles fables. Une foi vive veut sans cesse de nouvelles fables qu'elle puisse croire, comme la charité veut de nouveaux bienfaits pour s'exercer" (p. 43). The remarks on the History of St. Christopher, whose personality was allegorical by Luther and Melancthon, are curious (p. 57).

absorbed into the religious<sup>1</sup>. During the intellectual vigour of Greece and Rome, a sense of the invariable course of nature and of the scientific explanation of phenomena had been created among the superior minds, and through them indirectly among the remaining community; thus limiting to a certain extent the ground open to be occupied by a religious legend. With the decline of the pagan literature and philosophy, before the sixth century of the Christian æra, this scientific conception gradually passed out of sight, and left the mind free to a religious interpretation of nature not less simple and naïf than that which had prevailed under the Homeric paganism<sup>2</sup>. The great religious move-

<sup>1</sup> "Dans les prodiges que l'on admettait avoir dû nécessairement s'opérer au moment du saint nouvellement canonisé, l'expression, *Curriculum, claudii gressum, intui loquulam, sorchi auditum, paralyticis delictum membrorum offellum, recuperantur*, était devenue plutôt une formule d'usage que la relation littérale du fait." (Maury, *Essai sur les Légendes Pieuses du Moyen Âge*, p. 3.)

To the same purpose M. Ampère, *ib.* 14, p. 361: "Il y a un certain nombre de faits que l'agiographie reproduit constamment, quelque soit son héros: ordinairement ce personnage a eu dans sa jeunesse une vision qui lui a révélé son avenir: ou bien, une prophétie lui a annoncé ce qu'il serait un jour. Plus tard, il opère un certain nombre de miracles, toujours les mêmes; il exorcise des possédés, ressuscite des morts, il est averti de sa fin par un songe. Puis sur son tombeau s'accomplissent d'autres merveilles à-peu-près semblables."

<sup>2</sup> A few words from M. Ampère do illustrate this: "C'est donc au même siècle que la légende se constitue: c'est alors qu'elle prend complètement le caractère naïf qui lui appartient; qu'elle est elle-même, qu'elle se sépare de toute influence étrangère. En même temps, l'ignorance devient de plus en plus grossière, et par suite la crédulité s'accroît: les calamités du temps sont plus lourdes, et l'on a un plus grand besoin de remède et de consolation..... Les faits miraculeux se substituent aux arguments de la théologie. Les miracles sont devenus la meilleure démonstration du Christianisme: c'est la seule qui puisse convaincre les esprits grossiers des barbares" (*ib.* 15, p. 373).

Again, *ib.* 17, p. 401: "Un des caractères de la légende est de mêler constamment le puéril au grand: il faut l'avouer, elle défigure parfois

ment of the Reformation, and the gradual formation of critical and philosophical habits in the modern mind, have caused these legends of the Saints,—once the charm and cherished creed of a

un peu des hommes d'une troupe si forte, en mettant sur leur compte des anecdotes dont le caractère n'est pas toujours sérieux; elle en a usé ainsi pour St. Columban, dont nous verrons tout à l'heure le rôle vis-à-vis de Branchiens et des chefs Mérovingiens. La légende aurait pu se dispenser de nous apprendre, comment un jour, il se fit rapporter par un ecclésiastique les gants qu'il avait perdus: comment, un autre jour, il empêcha la bière de couler d'un tonneau percé, et diverses merveilles, certainement indignes de sa mémoire."

The miracle by which St. Columban employed the raven to fetch back his lost gloves is exactly in the character of the Homeric and Hesiodic age: the earnest faith, as well as the reverential sympathy, between the Homeric man and Zeus or Athênâ, is indicated by the invocation of their aid for his own sufferings of detail and in his own need and danger. The criticism of M. Ampère, on the other hand, is analogous to that of the later pagans, after the conception of a course of nature had become established in man's mind, so far as that exceptional interference by the gods was understood to be, comparatively speaking, rare, and only supposable upon what were called great emergencies.

In the old Hesiodic legend (see above, ch. ix. p. 245), Apollo is apprised by a raven of the infidelity of the nymph Koronis to him—*τὸ πρῶτον ἄρ' ἄγγελος ἦλθε κόραϊ, &c.* (the raven appears elsewhere as companion of Apollo, Plutarch. de Isid. et Os. p. 379, Herod. iv. 15.) Pindar in his version of the legend eliminated the raven, without specifying how Apollo got his knowledge of the circumstance. The Scholiasts praise Pindar much for having injected the puerile version of the story—*ἐνταῦθα τὰς Πινδαροῦ δ' Ἀπρίμου ἐστὶ παραπομπήματα τῆς περὶ τὰς κόρας ἱστορίας, αὐτὸν δὲ ἱστορῶν ἔγνωσαν φρενὶ τὰς Ἀπὸλλων.....χαλκῶς οὐκ ἔδωκε τῷ ποιῆσαι μὲθρ' ἔχοντι ἔστι ληυλῶδες, &c.*—compare also the criticisms of the Schol. ad Soph. Œdip. Kol. 1378, on the old epic Thebais; and the remarks of Arrian (Exp. Al. iii. 4) on the divine interference by which Alexander and his army were enabled to find their way across the sand of the desert to the temple of Ammon.

In the eyes of M. Ampère, the recital of the biographer of St. Columban appears puerile (*comme dans les fables d'Apollonius Rhodius*, Odys. iii. 221): in the eyes of that biographer, the criticism of M. Ampère would have appeared impious. When it is once conceded that phenomena are distributable under two denominations, the natural and the miraculous, it must be left to the feelings of each individual to determine what is and what is not, a suitable occasion for a miracle. Theodorus and Pausanias differed in opinion (as stated in a previous chapter)

numerous public<sup>1</sup>,—to pass altogether out of credit, without even being regarded, among Protestants at

about the death of Artæon by his own hands—the former maintaining that the case was one fit for the special intervention of the goddess Artemis; the latter, that it was not so. The question is one determinable only by the religious feelings and conscience of the two dissentients: no common standard of judgement can be imposed upon them; for no reasonings derived from science or philosophy are available, inasmuch as in this case the very point in dispute is, whether the scientific point of view be admissible. Those who are disposed to adopt the supernatural belief, will find in every case the language open to them wherewith Dionysius of Halicarnassus (in recounting a miracle wrought by Vesta in the early times of Roman history for the purpose of reviving an unjustly accused virgin) reproves the sceptics of his time: "It is well worth while (he observes) to recount the special manifestation (*ἐξέφασκεν*) which the goddess showed to these unjustly accused virgins. For these circumstances, extraordinary as they are, have been held worthy of belief by the Romans, and historians have talked much about them. Those persons indeed who adopt the atheistical schemes of philosophy (if indeed we must call them *philosophy*), pulling in pieces as they do all the special manifestations (*ἐξέφασκεν* *διειρησεν* τὰς *ἐξέφασκεν* τὰς *θεῶν*) of the gods which have taken place among Greeks or barbarians, will of course turn these stories also into ridicule, ascribing them to the vain talk of men, as if none of the gods cared at all for mankind. But those who, having pushed their researches farther, believe the gods not to be indifferent to human affairs, but favourable to good men and hostile to bad—will not treat these special manifestations as more incredible than others." (Dionys. Halic. ii. 68-69.) Pindar, after noticing the great number of miraculous statements in circulation, expresses his anxiety to draw a line between the true and the false, but cannot find where: "excess both of credulity and of incredulity (he tells us) in such matters is dangerous; caution, and nothing too much, is the best course." (Cæcilius, v. 6.) Polybius is far from granting permission to historians to recount a sufficient number of miracles to keep up a feeling of piety in the multitude, but not more: to measure out the proper quantity (he observes) is difficult, but not impossible (*θεωρησάμενος ὅτι οὐκ ἔστιν ὅσον, ἀλλὰ μέτρον ἀποφασιστέον* γὰρ, xvi. 12).

<sup>1</sup> The great Bollandist collection of the Lives of the Saints, intended to comprise the whole year, did not extend beyond the nine months from January to October, which occupy fifty-three large volumes. The month of April fills three of these volumes, and exhibits the lives of 1472 saints. Had the collection run over the entire year, the total number of such biographies could hardly have been less than 25,000, and might have been even greater (see Guizot, Cours d'Histoire Moderne, leçon xvii. p. 157).

least, as worthy of a formal scrutiny into the evidence—a proof of the transitory value of public belief, however sincere and fervent, as a certificate of historical truth, if it be blended with religious predispositions.

The same mythopœic vein, and the same susceptibility and facility of belief, which had created both supply and demand for the legends of the Saints, also provided the abundant stock of romantic narrative poetry, in amplification and illustration of the chivalrous ideal. What the legends of Troy, of Thèbes, of the Kalydonian boar, of Œdipus, Thèseus, &c. were to an early Greek, the tales of Arthur, of Charlemagne, of the Niebelungen, were to an Englishman, or Frenchman, or German, of the twelfth or thirteenth century. They were neither recognised fiction nor authenticated history: they were history, as it is felt and welcomed by minds unaccustomed to investigate evidence and unconscious of the necessity of doing so. That the Chronicle of Turpin, a mere compilation of poetical legends respecting Charlemagne, was accepted as genuine history, and even pronounced to be such by papal authority, is well known; and the authors of the Romances announce themselves, not less than those of the old Grecian epic, as being about to recount real matter of fact<sup>1</sup>. It is certain that

<sup>1</sup> See Warton's History of English Poetry, vol. i. dissent. i. p. xvi. Again, in sect. iii. p. 140: "Vincent de Beauvais, who lived under Louis IX. of France (about 1260), and who, on account of his extraordinary erudition, was appointed preceptor to that king's sons, very gravely classes Archbishop Turpin's Charlemaigne among the real histories, and places it on a level with Suetonius and Caesar. He was himself an historian, and has left a large history of the world, fraught with a va-

Charlemagne is a great historical name, and it is possible, though not certain, that the name of Arthur may be historical also. But the Charlemagne of history, and the Charlemagne of romance, have little except the name in common; nor could we ever determine except by independent evidence (which in this case we happen to possess), whether Charlemagne was a real or a fictitious person<sup>1</sup>. That illus-

riosity of reading, and of high repute in the middle ages; but edifying and entertaining as this work might have been to his contemporaries, at present it serves only to record their prejudices and to characterise their credulity." About the full belief in Arthur and the Tales of the Round Table during the fourteenth century, and about the strange historical mistakes of the poet Gower in the fifteenth, see the same work, sect. 7, vol. ii. p. 33; met. 19, vol. ii. p. 239.

"L'auteur de la *Chronique de Turpin* (says M. Simondi, *Littérature du Midi*, vol. i. ch. 7. p. 289) n'avait point l'intention de briller aux yeux du public par une invention lumineuse, ni d'annexer les cœurs par des contes merveilleux qu'ils reconnaissent pour tels: il présentait aux Français tous ces faits étranges comme de l'histoire, et la lecture des légendes fabuleuses avait accoutumé à croire à de plus grandes merveilles encore; aussi plusieurs de ces fables furent elles reproduites dans la *Chronique de St. Denis*."

Again, *ib.* p. 290: "Souvent les écrivains romanciers, lorsqu'ils entreprennent un récit de la cour de Charlemagne, prennent un ton plus élevé; ce ne sont point des fables qu'ils vont conter, c'est de l'histoire nationale.—c'est la gloire de leurs ancêtres qu'ils veulent célébrer, et ils ont droit alors à demander qu'on les écoute avec respect."

The *Glenniole of Turpin* was inserted, even as late as the year 1566, in the collection printed by Scardius at Frankfort of early German historians (*Giugrand. Historie Littéraire d'Italie*, vol. ix. part ii. ch. 3. p. 157).

To the same point—that these romances were listened to as real stories—see Sir Walter Scott's *Preface to Sir Tristram*, p. lxxvi. The authors of the *Legends of the Saints* are not less explicit in their assertions that everything which they recount is true and well-attested (*Amplex. x. 14. p. 353*).

<sup>1</sup> The series of articles by M. Pauriel, published in the *Revue des Deux Mondes*, vol. xii., are full of instruction respecting the origin, tenor, and influence of the Romances of Chivalry. Though the name of Charlemagne appears, the romancers are really unable to distinguish him from Charles Martel or from Charles the Bald (pp. 337-339).

trious name, as well as the more problematical Arthur, is taken up by the romancers, not with a view to celebrate realities previously verified, but for the purpose of setting forth or amplifying an ideal of their own, in such manner as both to rouse the feelings and captivate the faith of their hearers.

To inquire which of the personages of the Carlovingian epic were real and which were fictitious,—to examine whether the expedition ascribed to Charlemagne against Jerusalem had ever taken place or not,—to separate truth from exaggeration in the exploits of the Knights of the Round Table,—these were problems which an audience of that day had neither disposition to undertake nor means to resolve. They accepted the narrative as they heard it, without suspicion or reserve: the incidents related, as well as the connecting links between them, were in full harmony with their feelings, and gratifying as well to their sympathies as to their curiosity: nor was anything farther wanting to induce them to believe it, though the histo-

They ascribe to him an expedition to the Holy Land, in which he conquered Jerusalem from the Saracens; obtained possession of the relics of the passion of Christ, the crown of thorns, &c. These precious relics he carried to Rouen, from whence they were taken to Spain by a Saracen emir named Balan at the head of an army. The expedition of Charlemagne against the Saracens in Spain was undertaken for the purpose of recovering the relics:—"Ces divers romans peuvent être regardés comme la suite, comme le développement, de la fiction de la conquête de Jérusalem par Charlemagne."

Respecting the romance of Rinaldo of Montauban (describing the struggles of a feudal lord against the emperor) M. Fauchet observes, "Il n'y a, je crois, aucun fondement historique: c'est selon toute apparence, la pure expression poétique du fait général." &c. (p. 552)

rical basis might be ever so slight or even non-existent<sup>1</sup>.

<sup>1</sup> Among the 'formules consacrées' (observes M. Fauriel) of the romancers of the Carolingian epic, are assertions of their own veracity, and of the accuracy of what they are about to relate—specification of witnesses whom they have consulted—appeals to pretended chronicles:—"Que ces citations, ces indications, soient parfois sérieuses et utiles, cela peut être; mais c'est une exception et une exception rare. De telles allégations de la part des romanciers, sont en général un pur et simple mensonge, mais non toutefois un mensonge gratuit. C'est un mensonge qui a sa raison et sa convenance: il tient au désir et au besoin de satisfaire une opinion accoutumée à supposer et à chercher du vrai dans les fictions du genre de celles où l'on allègue ces prétendues autorités. La manière dont les auteurs de ces fictions les qualifient souvent eux-mêmes, est une conséquence naturelle de leur prétention d'y avoir suivi des documents vénérables. Ils les qualifient de *chansons de vieille histoire*, de *haute histoire*, de *bonne geste*, de *grande renommée*: et ce n'est pas pour se vanter qu'ils parlent ainsi: la vanité d'auteur n'est rien chez eux, en comparaison du besoin qu'ils ont d'être crus, de passer pour de simples traducteurs, de simples répétiteurs de légendes ou d'histoire consacrée. Ces protestations de véracité, qui, plus ou moins expressa, sont de rigueur dans les romans Carolingiens, y sont aussi fréquemment accompagnées de protestations accessoires contre les romanciers, qui, ayant déjà traité un sujet donné, sont accusés d'y avoir faussé la vérité." (Fauriel, *Orig. de l'Epopée Chévaleresque*, in the *Revue des Deux Mondes*, vol. xiii. p. 554.)

About the Cycle of the Round Table, see the same series of articles (*Rev. D. M.* t. xiv. p. 170-184). The Chivaliers of the Saint Grail were a sort of *idéals* of the Knights Templars: "Une race de princes héroïques, originaires de l'Asie, fut prédestinée par le ciel même à la garde du Saint Grail. Perille fut le premier de cette race, qui s'étoit converti au Christianisme, passa en Europe sous l'Empereur Vespasien," &c. & then follows a string of fabulous incidents: the epical agency is similar to that of Homer—*Asie & Jérusalem* *passés*.

M. Paulin Paris, in his Preface to the *Romans des Douze Peers de France*, has controverted many of the positions of M. Fauriel, and with success, so far as regards the Provencal origin of the *Chansons de Geste*, asserted by the latter. In regard to the Romances of the Round Table, he agrees substantially with M. Fauriel; but he tries to assign a greater historical value to the poems of the Carolingian epic—very unsuccessfully in my opinion. But his own analysis of the old poem of *Garin le Loherain* bears out the very opinion which he is confuting: "Nous sommes au règne de Charles-Martel, et nous reconnaissons sans

The romances of chivalry represented, to those who heard them, real deeds of the foretime—"glories of the foregone men," to use the Hesiodic expression<sup>1</sup>—at the same time that they embodied and filled up the details of an heroic ideal, such as that age could conceive and admire—a fervent piety, combined with strength, bravery, and the love of adventurous aggression directed sometimes against infidels, sometimes against enchanters or

Toutes les parties de la narration sont vraies ; seulement toutes s'y trouvent déplacées. En glissant, les peuples n'entendent rien à la chronologie ; les événements restent : les individus, les lieux et les époques, ne laissent aucune trace : c'est pour ainsi dire, une décoration scénique que l'on applique indifféremment à des récits souvent contraires." (*Preface to the Roman de Berthé de Lohereain*, pp. xvi.-xx. : Paris, 1843.) Compare also his *Lettre à M. Monmerqué*, prefixed to the *Roman de Berthé aux Grans Pêls*, Paris, 1836.

To say that all the parts of the narrative are true, is contrary to M. Paris's own showing; some parts may be true, separately taken, but these fragments of truth are melted down with a large mass of fiction, and cannot be discriminated unless we possess some independent test. The poet who picks out one incident from the fourth century, another from the fifth, and a few more from the eighth and then blends them all into a continuous tale along with many additions of his own, shows that he takes the items of fact because they suit the purposes of his narrative, not because they happen to be attested by historical evidence. His hearers are not critical: they desire to have their imaginations and feelings affected, and they are content to accept without question whatever accomplishes this end.

Pausanias talks of the remnant of birds existing in his time (162): "Blind Hesper, or such like Tawern Minstrels, whose matters are for the most part stories of old time, as the Tale of Sir Topaze, the Reportes of Beris of Southampton, Adam Bell, Clymde of the Clough, and such other old Romances or Historical Rhymes." monsters, sometimes in defence of the fair sex. Such characteristics were naturally popular, in a century of feudal struggles and universal insecurity, when the grand subjects of common respect and interest were the church and the crusades, and when the latter especially were embraced with an enthusiasm truly astonishing.

Teutonic  
and Scan-  
dinavian  
epic—its  
analogy  
with the  
Grecian.

The long German poem of the *Nibelungen Lied*, as well as the *Volsunga Saga* and a portion of the songs of the *Edda*, relate to a common fund of mythical, superhuman personages, and of fabulous adventure, identified with the earliest antiquity of the Teutonic and Scandinavian race, and representing their primitive sentiment towards ancestors of divine origin. Sigurd, Brynhilde, Gudrun, and Atle, are mythical characters celebrated as well by the Scandinavian Scalds as by the German epic poets, but with many varieties and separate additions to distinguish the one from the other. The German epic, later and more elaborated, includes various persons not known to the songs in the *Edda*, in particular the prominent name of Dieterich of Bern—presenting moreover the principal characters and circumstances as Christian, while in the *Edda* there is no trace of anything but heathenism. There is indeed, in this the old and heathen version, a remarkable analogy with many points of Grecian mythical narrative. As in the case of the short life of Achilles, and of the miserable Labdakids of Thêbes—so in the family of the Volsungs, though sprung from and protected by the gods—a curse of destiny hangs upon them and brings on their ruin.

in spite of pre-eminent personal qualities<sup>1</sup>. The more thoroughly this old Teutonic story has been

<sup>1</sup> Respecting the *Volunga Saga* and the *Niebelungen Lied*, the work of Lange—*Untersuchungen über die Geschichte und das Verhältniss des Nordischen und Deutschen Heldenage*—is a valuable translation from the Danish Saga-Bibliothek of P. E. Müller.

P. E. Müller maintains indeed the historical basis of the tales respecting the *Volunga* (see p. 102-107)—upon arguments very unsatisfactory; though the genuine Scandinavian origin of the tale is perfectly made out. The chapter added by Lange himself at the close (see p. 432, &c.) contains juster views as to the character of the primitive mythology, though he too advances some positions respecting a something "reun-symbolisches" in the background, which I find it difficult to follow (see p. 477, &c.).—There are very ancient epical ballads still sung by the people in the Faro islands, many of them relating to Sigurd and his adventures (p. 412).

Jacob Grimm, in his *Deutsche Mythologie*, maintains the purely mythical character, as opposed to the historical, of Siegfried and Dietrich (*Art. Helden*, pp. 344-346).

So, too, in the great Persian epic of Ferdousi, the principal characters are religious and mythical. M. Mohl observes,—"Les caractères des personnages principaux de l'ancienne histoire de Perse se retrouvent dans le livre des Rois (de Ferdousi) tels que les indiquent les parties des livres de Zoroastre qui nous sont parvenues. Kalmashra, Djemschid, Feridoun, Gushmasp, Isfendiar, &c. jouent dans le poème épique le même rôle que dans les livres sacrés : à cela près, que dans les derniers ils nous apparaissent à travers une atmosphère mythologique qui grandit tous leurs traits : mais cette différence est précisément celle qu'en devait s'attendre à trouver entre la tradition religieuse et la tradition épique." (Mohl, *Livre des Rois* par Ferdousi, Preface, p. 1.)

The Persian historians subsequent to Ferdousi have all taken his poem as the basis of their histories, and have even copied him faithfully and literally (Mohl, p. 63). Many of his heroes became the subjects of long epical biographies, written and recited without any art or grace, often by writers whose names are unknown (*ib.* p. 54-70). Mr. Muirer tells us that "the Shah Nameh is still believed by the present Persians to contain their ancient history" (*Adventures of Haidji Baba*, c. 22). As the Christian romancers transformed Apollo into the patron of Musashmuna, so Ferdousi makes Alexander the Great a Christian : "La critique historique (observe M. Mohl) était du temps de Ferdousi chose presque inconnue." (*ib.* p. xliii.) About the absence not only of all historiography, but also of all idea of it or taste for it, among the early Indians, Persians, Arabians, &c., see the learned book of Sark, *Die Götter Syriens*, Preface, p. viii. seqq. (Stuttgart, 1842.)

traced and compared, in its various transformations and accompaniments, the less can any well-established connection be made out for it with authentic historical names or events. We must acquiesce in its personages as distinct in original conception from common humanity, and as belonging to the subjective mythical world of the race by whom they were sung.

Such were the compositions which not only interested the emotions, but also satisfied the undistinguishing historical curiosity, of the ordinary public in the middle ages. The exploits of many of these romantic heroes resemble in several points those of the Grecian: the adventures of Perseus, Achilles, Odysseus, Atalanta, Bellerophôn, Jâson, and the Trojan war or Argonautic expedition generally, would have fitted in perfectly to the Carolingian or other epics of the period<sup>1</sup>. That of

<sup>1</sup> Several of the heroes of the ancient world were indeed themselves popular subjects with the romancers of the middle ages, Thésée, Jâson, &c.; Alexander the Great more so than any of them.

Dr. Warton observes respecting the Argonautic expedition, "Few stories of antiquity have more the cast of one of the old romances than this of Jâson. An expedition of a new kind is made into a strange and distant country, attended with infinite dangers and difficulties. The king's daughter of the new country is an enchantress; she falls in love with the young prince, who is the chief adventurer. The prize which he seeks is guarded by hexen-footed bulls, who breathe fire, and by a hideous dragon who never sleeps. The princess lends him the assistance of her charms and incantations to conquer these obstacles; she gives him possession of the prize, leaves her father's court, and follows him into his native country." (Warton, *Observations on Spenser*, vol. i. p. 178.)

To the same purpose M. Ginguené: "Le premier modèle des Fées n'est-il pas dans *Carle*, dans *Calypso*, dans *Médée*? Celui des géants, dans *Polypheème*, dans *Cacus*, et dans les géans, ou les Titans, cette rare annonce de *Jupiter*? Les serpents et les dragons des romans ne

the middle ages, like the Grecian, was eminently expansive in its nature: new stories were successively attached to the names and companions of Charlemagne and Arthur, just as the legend of Troy was enlarged by Arktinus, Leschès, and Stesichorus,—that of Thêbes by fresh miseries entailed on the fated head of Œdipus,—and that of the Kalydonian boar by the addition of Atalanta. Altogether, the state of mind of the hearers seems in both cases to have been much the same—eager for emotion and sympathy, and receiving any narrative attuned to their feelings, not merely with hearty welcome, but also with unsuspecting belief.

Heroic character and self-exalting subject common to both.

Nevertheless there were distinctions deserving of notice, which render the foregoing proposition more absolutely exact with regard to Greece than with regard to the middle ages. The tales of the epic, and the mythes in their most popular and extended signification, were the only intellectual nourishment with which the Grecian public was supplied, until the sixth century before the Christian æra: there was no prose writing, no history, no philosophy. But such was not exactly the case at the time when the epic of the middle ages appeared.

Points of distinction between the two—epic of the middle ages seldom stood so completely alone, nor was so closely interwoven with religion, as the Grecian.

At that time, a portion of society possessed the Latin language, the habit of writing, and some tinge both of history and philosophy: there were a series of chronicles, scanty indeed and imperfect, but referring to contemporary events and prevent-

Les armes enchantées et impénétrables! elles sont de la même trempe, et l'on peut les croire forgées au même fourneau que celles d'Achille et d'Énée." (Ginguené, Histoire Littéraire d'Italie, vol. iv. part. ii. ch. 3. p. 131.)

ing the real history of the past from passing into oblivion: there were even individual scholars, in the twelfth century, whose acquaintance with Latin literature was sufficiently considerable to enlarge their minds and to improve their judgements. Moreover the epic of the middle ages, though deeply imbued with religious ideas, was not directly amalgamated with the religion of the people, and did not always find favour with the clergy; while the heroes of the Grecian epic were not only linked in a thousand ways with existing worship, practices, and sacred localities, but Homer and Hesiod pass with Herodotus for the constructors of Grecian theology. We thus see that the ancient epic was both exempt from certain distracting influences by which that of the middle ages was surrounded, and more closely identified with the veins of thought and feeling prevalent in the Grecian public. Yet these counteracting influences did not prevent Pope Calixtus II. from declaring the Chronicle of Turpin to be a genuine history.

If we take the history of our own country as it was conceived and written from the twelfth to the seventeenth century by Hardyng, Fabyan, Grafton, Hollinshed, and others, we shall find that it was supposed to begin with Brute the Trojan, and was carried down from thence, for many ages and through a long succession of kings, to the times of Julius Cæsar. A similar belief of descent from Troy, arising seemingly from a reverential imitation of the Romans and of their Trojan origin, was cherished in the fancy of other European nations. With regard to the English, the chief circulator of

it was Geoffrey of Monmouth, and it passed with little resistance or dispute into the national faith—the kings from Brute downward being enrolled in regular chronological series with their respective dates annexed. In a dispute which took place during the reign of Edward I. (A.D. 1301) between England and Scotland, the descent of the kings of England from Brute the Trojan was solemnly embodied in a document put forth to sustain the rights of the crown of England, as an argument bearing on the case then in discussion: and it passed without attack from the opposing party<sup>1</sup>,—an incident which reminds us of the appeal made by *Æschinës*, in the contention between the Athenians and Philip of Macedon respecting Amphipolis, to the primitive dotal rights of Akamas son of Theseus—and also of the defence urged by the Athenians to sustain their conquest of Sigeum, against the reclamations of the Mityleneans, wherein the former alleged that they had as much right to the place as any of the other Greeks who had formed part of the victorious armament of Agamemnon<sup>2</sup>.

<sup>1</sup> See Warton's History of English Poetry, sect. iii. p. 131, note. "No man before the sixteenth century presumed to doubt that the Franks derived their origin from Francus son of Hector; that the Spaniards were descended from Japhet, the Britons from Brutus, and the Scotch from Fergus." (*Ibid.* p. 140.)

According to the Prologue of the *puer Edia*, Odia was the supreme king of Troy in Asia, "in ea terra quam nos Turciam appellamus..... Hinc omnes Borussiae plagæ magnates vel principes genealogias suas referunt; aliqui principes illius archæ inter numina locuti: sed in prima ipsam Præmam pro Odene putant." &c. They also identified Troy with Theb. (See *Lexicon Mythologicum ad calæm Edie Scamud.* p. 552. vol. iii.)

The tenacity with which this early series of British kings was defended, is no less remarkable than the facility with which it was admitted. The chroniclers at the beginning of the seventeenth century warmly protested against the intrusive scepticism which would cashier so many venerable sovereigns and efface so many noble deeds. They appealed to the patriotic feelings of their hearers, represented the enormity of thus setting up a presumptuous criticism against the belief of ages, and insisted on the danger of the precedent as regarded history generally<sup>1</sup>. How this controversy stood, at the time and in the view of the illustrious author of *Paradise Lost*, I shall give in his own words, as they appear in the second page of his *History of England*. After having briefly touched upon the stories of Samothēs son of Japhet, Albion son of Neptune, &c. he proceeds,—

“ But now of Brutus and his line, with the whole progeny of kings to the entrance of Julius Cæsar, we cannot so easily be discharged: descents of ancestry long continued, laws and exploits not plainly seeming to be borrowed or devised, which

progenitor Hēraklēs over Eryx, the eponymous hero of the place. (Herodot. i. 43.)

<sup>1</sup> The remarks in Speed's *Chronicle* (book v. c. 3, sect. 11-12), and the preface to *Howes's Continuation of Stow's Chronicle*, published in 1631, are curious as illustrating this earnest feeling. The Chancellor Fortescue, in impressing upon his royal pupil, the son of Henry VI., the limited character of English monarchy, deduces it from Brute the Trojan:—"Concerning the different powers which kings claim over their subjects, I am firmly of opinion that it arises solely from the different nature of their original institution. So the kingdom of England had its original from Brute and the Trojans, who attended him from Italy and Greece, and became a most kind of government, compounded of the regal and the political." (Hallam, *Hist. Mid. Ages*, ed. vol. P. 3, page 239.)

on the common belief have wrought no small impression: *defended by many, denied utterly by few*. For what though Brutus and the whole Trojan pretence were yielded up, seeing they, who first devised to bring us some noble ancestor, were content at first with Brutus the Consul, till better invention, though not willing to forego the name, taught them to remove it higher into a more fabulous age, and by the same remove lighting on the Trojan tales, in affectation to make the Briton of one original with the Roman, pitched there: Yet *those old and inborn kings, never any to have been real persons, or done in their lives at least some part of what so long hath been remembered, cannot be thought without too strict incredulity*. For these, and those causes above-mentioned, that which hath received approbation from so many, I have chosen not to omit. Certain or uncertain, be that upon the credit of those whom I must follow: *so far as keeps aloof from impossible or absurd, attested by ancient writers from books more ancient, I refuse not as the due and proper subject of story*.<sup>1</sup>

Yet in spite of the general belief of so many centuries—in spite of the concurrent persuasion of historians and poets—in spite of the declaration of Milton, extorted from his feelings rather than from his reason, that this long line of quasi-historical kings and exploits could not be *all* unworthy of belief—in spite of so large a body of authority and precedent, the historians of the nineteenth century

begin the history of England with Julius Cæsar. They do not attempt either to settle the date of king Bladud's accession, or to determine what may be the basis of truth in the affecting narrative of Lear<sup>1</sup>. The standard of historical credibility, especially with regard to modern events, has indeed been greatly and sensibly raised within the last hundred years.

But in regard to ancient Grecian history, the rules of evidence still continue relaxed. The dictum of Milton, regarding the ante-Cæsarian history of England, still represents pretty exactly the feeling now prevalent respecting the mythical history of Greece:—"Yet those old and inborn kings (Agamemnon, Achilles, Odysseus, Jason, Adrastus, Amphiaræus, Meleager, &c.), never any to have been real persons, or done in their lives at least some part of what so long hath been remembered, cannot be thought without too strict incredulity." Amidst much fiction (we are still told), there must be some truth: but how is such truth to be singled out? Milton does not even attempt to

<sup>1</sup> Dr. Zachary Grey has the following observations in his Notes on Shakespeare (London, 1784, vol. i. p. 112). In commenting on the passage in *King Lear*, *Nero is an angler in the lake of darkness*, he says, "This is one of Shakespeare's most remarkable anachronisms. *King Lear* succeeded his father Bladud anno mundi 2105; and *Nero*, anno mundi 4017, was sixteen years old, when he married Octavia, Cæsar's daughter. See *Fineeli Chronologia*, p. 94."

Such a supposed chronological discrepancy would hardly be pointed out in any commentary now written.

The introduction prefixed by Mr. Giles to his recent translation of Geoffrey of Monmouth (1842) gives a just view both of the use which our old poets made of his tales, and of the general credence so long and so unsuspectingly accorded to them. The list of old British kings given by Mr. Giles also deserves attention, as a parallel to the Grecian genealogies anterior to the Olympiads.

make the severance: he contents himself with "keeping aloof from the impossible and the absurd," and ends in a narrative which has indeed the merit of being sober-coloured, but which he never for a moment thinks of recommending to his readers as true. So in regard to the legends of Greece,—Troy, Thêbes, the Argonauts, the Boar of Kalydôn, Hêraklês, Thêseus, CEdipus,—the conviction still holds in men's minds, that there must be something true at the bottom; and many readers of this work may be displeased, I fear, not to see conjured up before them the Eiddolon of an authentic history, even though the vital spark of evidence be altogether wanting<sup>1</sup>.

<sup>1</sup> The following passage from the Preface of Mr. Price to Warton's History of English Poetry is alike just and forcibly characterised; the whole Preface is indeed full of philosophical reflection on popular fables generally. Mr. Price observes (p. 79).—

"The great evil with which this long-contested question appears to be threatened at the present day, is an extreme equally dangerous with the incredulity of Mr. Risson,—a disposition to receive as authentic history, under a slightly fabulous colouring, every incident recorded in the British Chronicle. An allegorical interpretation is now inflicted upon all the marvellous circumstances; a forced construction imposed upon the less glaring deviations from probability; and the usual subterfuge of baffled research,—erroneous readings and etymological sophistry,—is made to reduce every stubborn and intractable text to something like the consistency required. It might have been expected that the notorious failure of Dunsinon and Plazarch in Roman history would have prevented the repetition of an error, which neither learning nor ingenuity can render palatable; and that the havoc and deadly ruin effected by these ancient writers (in other respects so valuable) in one of the most beautiful and interesting monuments of traditional story, would have acted as sufficient corrective on all future impostors. The fervours of this system might at least have been instructed by the philosophic example of Livy,—if it be lawful to ascribe to philosophy a hint of conduct which perhaps was prompted by a powerful sense of poetic beauty,—that traditional record ran easily down the hands of the future historian by one attractive aid,—the grandeur and lofty grandeur

jectionable.

I presume to think that our great poet has proceeded upon mistaken views with respect to the old British fables, not less in that which he leaves out than in that which he retains. To omit the miraculous and the fantastic, (it is that which he really means by "the impossible and the absurd,") is to suck the life-blood out of these once popular narratives—to divest them at once both of their genuine

of that incomparable style in which the first decade is written; and that the best duty towards antiquity, and the most agreeable one towards posterity, is to transmit the narrative received as an unadorned tradition, in all the plenitude of its march and the awful dignity of its supernatural agency. For however largely we may concede that real events have supplied the substance of any traditive story, yet the amount of absolute facts, and the manner of those facts, the period of their occurrence, the names of the agents, and the locality given to the scene, are all combined upon principles so wholly beyond our knowledge, that it becomes impossible to fix with certainty upon any single point better authenticated than its fellow. Probability in such decisions will often prove the most fallacious guide we can follow; for, independently of the acknowledged historical axiom, that *"le vrai n'est pas toujours le vraisemblable,"* innumerable instances might be adduced, where tradition has had recourse to this very probability to confer a plausible sanction upon her most fictitious and romantic incidents. It will be a much more useful labour, wherever it can be effected, to trace the progress of this traditional story in the country where it has become located, by a reference to those natural or artificial monuments which are the unvarying sources of fictitious events; and, by a strict comparison of its details with the analogous monuments of other nations, to separate those elements which are obviously of a native growth, from the occurrences bearing the impress of a foreign origin. We shall gain little, perhaps, by such a course for the history of human events; but it will be an important accession to our stock of knowledge on the history of the human mind. It will infallibly display, as in the analysis of every similar record, the operations of that refining principle which is ever obliterating the monotonous deeds of violence, that fill the chronicle of a nation's early career, and exhibit the brightest attribute in the catalogue of man's intellectual endowments,—a glowing and vigorous imagination,—bestowing upon all the impulses of the mind a splendour and virtuous dignity, which, however fallacious historically considered, are never without a powerfully redeeming goad, the ethical tendency of all their lessons."

distinguishing mark, and of the charm by which they acted on the feelings of believers. Still less ought we to consent to break up and disenchant in a similar manner the mythes of ancient Greece—partly because they possess the mythical beauties and characteristics in far higher perfection, partly because they sank deeper into the mind of a Greek, and pervaded both the public and private sentiment of the country to a much greater degree than the British fables in England.

Two courses, and two only, are open; either to pass over the mythes altogether, which is the way in which modern historians treat the old British fables—or else to give an account of them as mythes; to recognise and respect their specific nature, and to abstain from confounding them with ordinary and certifiable history. There are good reasons for pursuing this second method in reference to the Grecian mythes; and when so considered, they constitute an important chapter in the history of the Grecian mind, and indeed in that of the human race generally. The historical faith of the Greeks, as well as that of other people, in reference to early and unrecorded times, is as much subjective and peculiar to themselves as their religious faith: among the Greeks, especially, the two are confounded with an intimacy which nothing less than great violence can disjoin. Gods, heroes and men—religion and patriotism—matters divine, heroic and human—were all woven together by the Greeks into one indivisible web, in which the threads of truth and reality, whatever they might

Two ways open of dealing with the Grecian mythes: 1. to omit them; or, 2. to recount them as mythes. Reasons for preferring the latter.

originally have been, were neither intended to be, nor were actually, distinguishable. Composed of such materials, and animated by the electric spark of genius, the mythic antiquities of Greece formed a whole at once trustworthy and captivating to the faith and feelings of the people; but neither trustworthy nor captivating, when we sever it from these subjective conditions, and expose its naked elements to the scrutiny of an objective criticism. Moreover the separate portions of Grecian mythical foretime ought to be considered with reference to that aggregate of which they form a part: to detach the divine from the heroic legends, or some one of the heroic legends from the remainder, as if there were an essential and generic difference between them, is to present the whole under an erroneous point of view. The mythes of Troy and Thêbes are no more to be handled objectively, with a view to detect an historical base, than those of Zeus in Krête, of Apollo and Artemis in Dêlos, of Hermês, or of Promêtheus. To single out the siege of Troy from the other mythes, as if it were entitled to pre-eminence as an ascertained historical and chronological event, is a proceeding which destroys the true character and coherence of the mythical world: we only transfer the story (as has been remarked in the preceding chapter) from a class with which it is connected by every tie both of common origin and fraternal affinity, to another with which it has no relationship, except such as violent and gratuitous criticism may enforce.

By drawing this marked distinction between the

mythical and the historical world,—between matter appropriate only for subjective history, and matter in which objective evidence is attainable,—we shall only carry out to its proper length the just and well-known position long ago laid down by Varro. That learned man recognised three distinguishable periods in the time preceding his own age: "First, the time from the beginning of mankind down to the first deluge; a time wholly unknown. Secondly, the period from the first deluge down to the first Olympiad, which is called *the mythical period*, because many fabulous things are recounted in it. Thirdly, the time from the first Olympiad down to ourselves, which is called *the historical period*, because the things done in it are comprised in true histories<sup>1</sup>."

*Triple partition of past time by Varro.*

Taking the commencement of true or objective history at the point indicated by Varro, I still consider the mythical and historical periods to be separated by a wider gap than he would have admitted. To select any one year as an absolute point of commencement, is of course not to be understood literally; but in point of fact, this is of very little importance in reference to the present question, seeing that the great mythical events—the sieges of Thèbes

and Troy, the Argonautic expedition, the Kalydonian bear-hunt, the return of the Hērakleids, &c.—are all placed long anterior to the first Olympiad, by those who have applied chronological boundaries to the mythical narratives. The period immediately preceding the first Olympiad is one exceedingly barren of events; the received chronology recognizes 400 years, and Herodotus admitted 500 years, from that date back to the Trojan war.
